DEC 14 1931

Town Council Meeting

A regular meeting of the Town Council was held last Thursday night with Mayor Montgomery, Councillors Simmons, LeRiche, Lalonde and Smith being present.

The minutes of the previous meeting were read and adopted.

A delegation appeared before the Council with respect to the matter of license fees for outside trucks and teams delivering coal etc. in the Town. The question was fully discussed and the delegation was advised that the Council has had the question under consideration for some time, and was expecting certain details from the Government on the subject soon.

The Council authorized the purchase of 25 Sanitary buckets from Fort Hardware Co., at $1.35 each, and the purchase of 25 at the same figure from A. M. Carscadden.

Correspondence and posters re National Emergency Relief Appeal was submitted to the Council. It was pointed out by His Worship the Mayor that a public meeting would be called for the 7th. Instant to discuss the matter.

A motion was passed adopting the Voter's List for the year 1931 as compiled and displayed in the Town office.

The following accounts were passed for payment:— The Record $14.75; Simmons Lumber Co., 6.03; F. W. Smith 40c; J. Larsen, coal $40.01; Jones, Graham & O'Brien $12.50; J. T. Lalonde $7.94; Calgary Power Co., Light for Streets and hall $128.06.

Buy in the Fort

A free sample of the Record is being sent out this week to very one in our large district. Our idea in increasing the circulation of the Record is first to bring the attention of non-subscribers to the wonderful bargains shown in the advertisements of our home town merchants, which readers are urged to read carefully before buying elsewhere. Your motto should be "Buy in the Fort". Our other reason for sending out this free sample is to show that The Record is second to none in the weekly publications for a Town of this size, and to invite those who are not on our list to become subscribers, and thus support your home paper. We would also be glad to have correspondents in every out lying district, and hope any who would undertake to submit their local news, will write or phone us. The cost of the paper is only $1.50 per year. Your subscription for 1932 will be very welcome indeed.

CARD OF THANKS

The Relief committee of the Oddfellows Dance on Dec. 4th., wishes to thank their patrons and donors, and hearty thanks are extended to the president and members of the Legion B.E.S.L. who kindly donated the use of the memorial hall free, and to Nels Palmer for a parcel and to the Record for advertising the dance free.

"Bashful Mr. Bobbs" Draws Good Crowd

A large and enthusiastic audience enjoyed the play "Bashful Mr. Bobbs", presented by St. George's A.Y.P.A. at the Empress theatre last night.

The cast included Muriel Taylor, Hazel Roberts, Olive Groves, Gwyneth Roberts; Alice McLellan, Anna Stefanson; Christine Anderson; Edward Roberts; Two Henry; Glover Taylor and Herbert Roberts.

The play started sharp on time, and proceeded right through in a business like manner. Each of the artists portrayed their part very well indeed, thus showing that much time had been taken up in studying the various characters, and reflecting a great deal of credit upon the director, Miss Amy West.

The singing and dancing of the young people from The Doris Jordan School of Dancing, were of a high order. The selections of Margaret Kesler and Marie Jordan being very good indeed, and they were repeatedly called back. Special mention, however, must be made of pretty little Ida Sorensen in her acrobatic dance, which was a revelation, and one of the most graceful features seen here in a long time. Mr. Jack White was the accompanist to these young ladies.

Fred Berg's popular orchestra provided the music for the evening and it came in for generous share of the applause.

From entertainments given here one cannot help remarking that our fair little town takes second place to none for talent, and for its good looking young people, particularly the girls. A number of those in the cast last night were making their initial appearance on the stage, and they really showed up well. The costumes of all were becoming, and tasteful.

Josephburg

On November 30th, the Josephburg Junior U. F. A., held its second meeting at the Josephburg School.

The President Rudolph Rippel occupied the chair calling the meeting to order, O'Canada was sung and business commenced.

The secretary read the minutes of the last meeting which were approved.

It was decided that our membership last till the end of 1932.

A committee of four were elected to decide whether we should have a skating rink and where. Carried.

Mr. Griffin suggested that we go for a hiking trip some evening. This was agreed upon but the date was not definitely stated.

A program of four was elected to arrange a program for Friday, Dec. 4th. Mrs. Ashton had asked Mr. Joe. Doss to come and tell about his trip north, but he was unable to come and promised to do so on December 4th. We hoped he'd have a good audience to encourage him.

A very interesting program consisting of songs, piano solos, plays and readings and last but not least, was the interesting Junior U. F. A. bulletin on the latest news flashes, read by Estige Frey.

Five more had joined the local.

The meeting was adjourned with the singing of 'God save the King'

Emergency Relief Meeting

A public meeting was held in the Town Hall last Monday night, presided over by Mayor Montgomery, when preliminary arrangements were made to handle the situation in the Town and surrounding District. Rev. D. C. Ramsay is chairman of the committee with Jas. Ritchie, Secretary, and Mr. A. H. Rogers, Manager of the Bank of Commerce, Treasurer. The following were appointed on the committee Mr. E. A. Wilmerath; Mrs. C. Reed; Mrs. H. Staples; Dr. C. H. Turner; Mr. J. D. McLean; and Mr. S. O. Jones; R. Hannig, M.L.A., C. H. Flintoff, Partridge Hills; A. Lamoureux, Lamoureux; H. Peters D. Roberts; William Thomas, Josephburg. The assistance of elevator agents to the campaign is asked, by them soliciting subscriptions of grain, which can be handled through the elevators, and all creamery firms are kindly asked to aid the campaign through soliciting subscriptions from their customers.

The purpose of the appeal is to provide funds for extraordinary and emergency cases which cannot be dealt with under the present system of relief. From evidence it has been proven that this need is both urgent and great. The above committee will meet at once to arrange for the canvass and appeal

Your Storm Sash Are Here

We have a stock of Storm Sash and Doors on hand and can fill your orders promptly.

You can depend on sash, but not on weather.

Christmas Suggestions

From our different Departments

Gifts for Him

MEN'S FINE SHIRTS

He always likes a new shirt for Christmas. All are men's fine dress shirts in many different smart patterns and colorings. Sizes 14½ to 18 regular values from $3.50 to $5.00

Special Xmas Sale Price $2.95

Men's cheaper dress shirts as low as $1.00

MEN'S SWEATER COATS

Men's All-Wool Jumbo Knit Sweater Coats. Good warm sweaters for sportswear or rough out door work. Colors Grey, Carmel, Maroon, Black, White. Prices from ..... **$2.95 to $4.00**

MEN'S DRESS GLOVES

One-dome fastner Calfskin Gloves with warm lining. Sizes 8½ to 10 Price **$1.65**

Also a nice line of Men's Wool Gloves.

MEN'S DRESS SOCKS

Let us show you our line of "Holeproof Autogart" Dress Socks for men. The new self supporting sock. The Knitten Garter is guaranteed to out last the sock.

75c & $1.00

Men's Christmas Ties at 50c

You will not be long in picking out several of these ties in this nice assortment of new patterns and colors, something to suit the older young man.

Each tie individually boxed if desired.

Men's Handkerchiefs

Men's large size "Excella" Handkerchiefs in fancy colored borders. Looks like silk and will wash and wear better than silk. Prices each ..... **25c and 35c**

Men's Intial Handkerchiefs, all linen ..... 25c each.

BATH ROBES and BATH TOWELS

Bath Robes and Bath Towels are always acceptable gifts. Ask to see them.

BOY'S LEATHER MITTS

Nothing better for everyday school wear made from good strong soft leathers, with tight fitting wrist band. Warm wool lining. Sizes 6 to 16 years, Price from

45c to 85c

Toys Galore

As a result of a lucky purchase we have an exceptionally fine display of Toys etc., which we are selling at prices lower than we have ever had them.

Mechanical Trains with tracks	45c
Mechanical Trucks and Vans	45c
Tinker Toy building sets	95c
Erection Sets	$1.25
Dolls	35c
Teddy Bears	45c

Toys and Xmas decorations, hundreds of them from 5 cents up.

Gifts for Her

TOWEL SETS

Nicely colored Towel and Face Cloth Sets. At special Xmas values from **75c to 1.50**

LEATHER HAND BAGS

Beautiful genuine Leather Hand Bags. Regular $6.00 to $7.00 values to clear **$4.95**

MANICURE SETS

Dainty 5 piece Manicure Sets in attractive lined cases with mirrors **75 to $3.00**

BOXED HANDKERCHIEFS

Lovely Boxed Handkerchiefs in sets of three priced to suit every purse.

Soft Pure Wool Baby Jackets, Bonnets, Mitts and Booties at exceptionally low prices.

JUST ARRIVED

A nice selection of heavy warm Dressing Gowns. In medium and larger sizes **$3.95**

Silk Hosiery

New shipment of "Corticelli Holeproof" and Permano Silk Hosiery in all good colors. From now till Christmas.

All full fashioned light service weights **95c**

All full fashioned heavy service weights **$1.45**

Peace On Earth

As the Christian nations of the world again prepare to observe the anniversary of the birth of Christ the thoughts of their peoples are impressed anew with "the glad tidings of great joy" with which the herald angels announced the coming of the greatest event in the history of mankind, the precursor of "peace on earth, goodwill toward men." So it is as Christmas approaches that we dwell upon thoughts of home, and peace, and friendship and goodwill, and seek to banish from our minds old enmities and ill-will.

Nevertheless, to many it will appear as if "peace on earth" is still a vision of the future, an ideal that may some day be realized, if and when the Christian nations of the world realize the inconsistency of their attitude in maintaining huge armaments wherewith to wage war upon each other.

Christmas with its thoughts and ideals of peace can be made to serve the great purpose this year, perhaps to a greater extent than ever before, of cultivating a "will to peace" among people in general. Until there is such a strongly ingrained will to peace, there will be, and can be, no permanent peace, no permanent security against the horrors and destruction of war.

There is in evidence in many quarters a tendency to sharply criticize and condemn the League of Nations as ineffective and timid in its handling of the crisis that developed between China and Japan in Manchuria. The League has always had its enemies, while others have been lukewarm in its support, often proving more of a handicap than a help to the League in its efforts for world betterment. In practically every ongoing crisis that has loomed upon the international horizon since the League was established, some newspapers and public men have denounced the League as a failure.

Yet the League has survived and has been the instrument through which more than one impending open conflict has been averted. Even in the present Manchurian crisis, notwithstanding the clashes which have taken place, can any fair and opened-minded citizen doubt that, had there been no League of Nations, a sanguinary war would now be raging in the Orient with all the dire probabilities that it would spread and engulf Europe and possibly provoke another world disaster!

The League is not perfect. It cannot always attain to its highest ideals. It cannot always achieve everything it desires. The difficulties which confront it, and the problems which it must solve, are prodigious. Even should it utterly fail on some one occasion to prevent war, and such failure has not yet been recorded against it,—it would not necessarily mean the end of the League, nor that its efforts were wholly futile.

The League of Nations is the great clearing house, the arbitration court of the world's international difficulties. As such it is deserving of the support of all peace-loving people of all nations. Instead of being critical of its efforts and its achievements where they do not prove 100% efficient, all peace-loving people should be boosters and enthusiastic supporters. Destroy the League and the world would be thrown into chaos, with the one great restraining influence of an impartial international character removed, add the proponents of the gospel of force given a free hand to promote their evil designs.

As the world progresses towards greater enlightenment, to better understanding between all nations, to an abandonment of narrow nationalism in favour of true internationalism,—and the League is heading its efforts in these directions,—so, too, will the League itself grow and develop into an ever increasingly useful factor in world affairs and as an influence for peace. Something better than the League as at present constituted will be developed will ultimately take its place when the nations are prepared to support that better organization. In the meantime every Canadian should be an ardent League of Nations supporter. They should demand that their Government continue to support the League actively, and do so in a moral way, an intellectual way, in a financial way.

And this year as we sing "Peace on earth, goodwill toward men" may we sincerely mean what we sing, and may our song be a re-affirmation of our belief in and support of the one great peace organization that arose out of the war which we were told, and which we fondly hoped was true, was a war to end war.

Wore Clever Surgeons

Scottish Doctors Performed Delicate Operations 3,000 Years Ago

As far back as 3,000 years ago delicate brain operations were performed by Scottish surgeons, according to Professor Otto Rydbeck, in Lund, the old university town of Southern Sweden. The professor stated that four-inches or fifteen skulls found in Southern and show marks of trepanning by Stone Age surgeons. In the pelvis of Skivard the skeleton of a man of 3,000 years ago, showed that he had been operated on to remove a purulent infection on the brain. The operation, which had not been performed by boring, but by scraping of the bone, had evidently been quite successful, since it was evident that the patient lived for many years afterwards.

California bakers have introduced bread from seaweed.

Eclipse Aided Columbus

Skilled Native Of Jamaica Solo Supplying Needed Provisions

The eclipse of the moon on March 1, 1504, proved of much service to Christopher Columbus. Being off the island of Jamaica, and short of provisions, the explorer found that the natives would be threatened to punish them by depriving them of the moon's light. At the first his threat was treated with indifference, but when the eclipse itself began the natives, terror-struck with the apparently supernatural powers of the great Spaniard, commander, immediately collected provisions for the fleet, and thereafter treated their visitors with profound respect.

Douglas' Egyptian Liniment is especially recommended for spavin or infection of cow's teat. Invaluable also in cases of epsoin, colds, and quinsy.

Cannot Be Licked

A man may lose his business, his home, his clothes, his bonds, his real estate, his automobile and even his membership in a golf club, but if he does not lose his high integrity and his courage and his determination to carry on, he is not and cannot be licked.

Ontario spends half a million dollars keeping its roads clear of snow in winter, and Quebec one-tenth of that amount, says the St. Catharines Standard. The sleigh is still the chief mode of winter transportation in Quebec.

Demand For Graded Beef

Red Marking For Choice Grade and Blue For Good

Just over two years the Canadian Government Department of Agriculture introduced a policy under which choice or good beef sold by retail butchers must be identified by a red or blue ink-line on the ivory rut. The red for choice grade and blue for good. Only beef which has passed Federal inspection from a health standpoint can be branded. The sale of this quality beef has exceeded the most sanguine expectations of the promoters of the policy. Government officials began at the opening of 1931 to check up on the sale of the branded beef, after allowing a period of 18 months as an experimental stage. In January, 1931, the total number of pounds of red and blue branded beef sold was 867,600, by July the sales were nearly 2,000,000 pounds. It is estimated that 12,000,000 pounds of branded beef have been sold in Canada this year and more cattle have been sold in the Dominion for branded meat than have been exported to the British market.

Not all eligible beef is branded, the amount of branding done by various plants being more or less according to market prices, the cut and grade as well is part the expectation of demand during the following week or so. It is interesting to note that in recent months meat purchers have quite often found themselves out of supplies, as a result of a strong steady pick-up to inquiry from the consumer.

In certain areas there are producers' associations which have a definite policy with the production of beef eligible for branding as the main objective. The success of these ventures for branded beef is being reflected back to the producer and is stimulating better feeding. The demand for suitable cattle has, throughout 1931, been a sustaining factor on the market, and in view of the fact that there will be a very liberal supply of cattle grain-fed during the coming winter it is hoped that a steady flow of graded beef will play an important part in the spring and summer markets.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CARROTS AND PEAS

1 package lemon-flavored gelatin.
1 cup boiling water.
¾ cup vegetable stock or cold water.
½ teaspoon salt.
½ teaspoon paprika.
1 cup cooked carrots, diced.
1 cup cooked peas.
1 tablespoon vinegar.

Dissolve gelatin in boiling water. Add vegetable stock, vinegar, salt, and paprika. Chill. When slightly thickened, fold in carrots and peas. Turn into molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

RIBBON SANDWICHES

Sandwich bread.
Softened butter.
Sweet pickle relish.
Mayonnaise.
Pimento cream cheese.

Slice bread in slices ¼-inch thick. Spread first slice generously with softened butter, then with sweet pickle relish moistened with a little mayonnaise. Cover with a second slice of bread, buttered on both sides. Spread the second slice with mashed pimento cream cheese. Top with third slice of bread. Press slices firmly together. Remove crusts. Wrap in a damp cloth and place in refrigerator under a heavy weight for several hours. To serve slice very thin and serve immediately.

Modern Housing Easy. The construction of the air passages and the struggle for breath too familiar evidence of asthmatic trouble cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for the complete effectiveness even under unfavorable conditions. It is no untried experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Eleven plants in Canada produced in 1930 over 90,000,000 pounds of wire nails and wire. The Dominion exported during the year 2,102,000 pounds of nails and imported 1,063,000 pounds.

National Research Council

Plans Made For Further Improvement of Canadian Wool

Attended by representatives of both manufacturers and producers of wool and delegates from various Canadian universities, the annual meeting of the National Research Council's associate committee on wool was concluded recently at Toronto. Marked by a general readiness to co-operate in solution of the problems facing the industry, the meeting authorized the continuation of plans for further improvement of Canadian wool.

Results from experiments designed to develop a type of sheep suited to western range conditions were deemed so satisfactory, the committee decided, to assemble the wool from three of the four provinces, compare it with fleece obtained from similar strains in other countries, and then follow it into a Canadian manufactured product.

GOVERNMENT HOUSE,
OTTAWA

The Christmas Seal Sale of the Canadian Tuberculosis Association, of which we are Patron and Governor-General, has our warmest support.

The struggle against the spread of tuberculosis is one in which every Canadian is concerned, for there is no disease that has more deadly effects on the health of a nation; its prevention and its cure call for unceasing vigilance and expense.

The Canadian Tuberculosis Association has played a noble part in this struggle, and evidence of its work may be seen in all parts of the Dominion. That work has brought health and strength to thousands and has averted from many other thousands, especially children, what is perhaps the most insidious of all the dangers to which the human race is exposed.

We ask those who can, to show their appreciation of what the Association is doing by helping this Christmas to make the result of the Christmas Seal Sale even more successful than it was last year.

Value Of Fish Meal

Use In Steadily Increasing As A Source For Livestock

Dr. Frank T. Shutt, Dominion Chemist, in discussing the nutritive value of fish meal states. "The use of fish meals in the rations of all classes of live stock and especially in those for pigs and poultry is steadily increasing. These meals may, perhaps, be regarded primarily as sources of protein, but the fat, the mineral content and the iodine are also constituents of very considerable value in stock feeding." He points out also that edible fish meals must be made from fresh fish. The flesh of the fish is the most valuable source of protein, while the mineral content is highly valuable.

Romance of Gold

Sketch of Development of Industry in British Columbia

In the lure of gold which took men past the narrow frontiers of a trading post colony, was the genesis of British Columbia's greatness, Dale L. Pitt, president of the Mining Association of British Columbia and general manager of the Premier mine, told the annual meeting of the Canadian Institute of Mining and Metallurgy and Mining Association of British Columbia. Developing his theme Mr. Dale took his audience back into the last century and showed how mining in these camps had led to opening up of new country, development of roads and railways.

Mr. Dale, following the mining industry from its inception in British Columbia, touched on some of the romance and pointed to the resultant influence it had exercised, not only on the province, but on the Dominion. From the nugget found by an Indian woman on Queen Charlotte Islands, and the few colors prospectors panned on the Thompson River, the industry rose through the placer era with all its romance, its wealth and its disappointments; thence to the development of lode mining with its building of mills and smelters and railroads. Next came the more recent days when science and skill manifested itself in the development of modern ore dressing, smelting and refining so that man could take from the earth nature's immense precious metals, and by its ingenuity, coupled with capital's ability to build huge plants, gave us wealth never dreamed of before.

An excellent protection against worms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

A British scientist estimates that an earthquake of just average size generates heat equal to that produced by burning more than 3,000 tons of coal.

Keep Foods Deliciously Fresh
Keep your foods—cakes, bread, pies, cut meats, etc. —under a coverage of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

May Replace American Coal With Canadian Mine Products As Result of Exhaustive Tests

Results of widespread and exhaustive tests of Nova Scotia and British Columbia bituminous coal indicate the feasibility of replacing with the Canadian product a large tonnage of American coals at present utilized, it was stated by John McLeish, director of the mines' branch of the Dominion government. Mr. McLeish has just returned from the conference on bituminous coal held in Pittsburg, Pa.

This subject received considerable attention from the Canadian delegates to the conference and the committee had the benefit of expert tests of representative samples of Nova Scotia and British Columbia soft coal. The tests were carried out in the low temperature carbonization retorts of the Illingsworth company, in Pontypridd, Wales; in the experimental laboratories of the research council in Ottawa; in the ovens of the Winnipeg Electric company, and of the Montreal Coke Manufacturing company.

All tests showed that a highly satisfactory domestic fuel could be produced in this manner. It was stated by Mr. McLeish, in this connection, that already about 60 per cent. of the total coal requirements of the Winnipeg Electric company are being obtained from Michel, B.C., while the Montreal company is trying out a large quantity of Nova Scotia coal.

The sessions in Pittsburg also gave attention to the hydrogenation and liquefaction of coal. Mr. McLeish said that the research council had for some time been engaging the services of an engineer to carry on small tests of the application of commercial high pressure hydrogenation technology to crude shale oil, bituminous sands, and low temperature coal tar oils of Canadian origin. It had already been proven, he said, that it was possible to produce motor fuel and gasoline from these substances.

Lord Reading's First Case

Was Last Because Defence Refused To Rest the Evidence

The Marquise of Reading began his career by losing his first important case in court.

He was briefed to defend a fruit merchant, sued by a street trader, who alleged that he had been sold a consignment of bad fruit. Roused by Mr. Rufus Isaac's cross-examination, the plaintiff swept aside legal subtleties and challenged "Try some of 'em yourself, then, and if they don't upset you sick I'll give in."

The judge backed the suggestion, but Mr. Isaacs announced that the proper person to make the test was the defendant.

"What'll happen if I refuse?" whispered the merchant anxiously.

"Judgment will be given against you," said Mr. Isaacs.

"Then," said he, decisively, "I'd rather lose."

The Difference

"Dad, what is a traitor?"

"Leader of Political Party—A traitor, my son, is one who leaves our party and goes over to the enemy.

"And what do you call a man who leaves the other party to come to us?"

"A convert, my son."

Germany has managed to work herself into an impregnable position. When the collector comes to the door he is promptly bitten by the wolf.

"Well, lovely daughter of the mountain, are you watering the cattle?" "Yes, I am just shaving I."—Meggendorfer Blatter, Munich.

Work Is Preferred

Many People on Relief Would Welcome Job With Small Wage

The young man who had been squeezed out of a job by a merger of competing companies looked across the desk of an acquaintance and declared: "I'm too proud, I guess, to go to a social agency or an emergency committee to ask for money to tide me over until I make another connection. What I want is not financial aid, not even friendly counsel but real work that is worth paying for."

The friend to whom the remark was made was impressed with the reasonableness of the young man's point of view, and when he met with a relief committee somewhat later succeeded in changing the method of extending help to folk temporarily out of employment. A canvas was undertaken to find jobs and positions, some of them only part-time and involving a small wage.

In many instances, opportunities for useful work about town were made out of whole cloth—new jobs to repair lottery streetlighting posts, to paint old buildings, to clean up the parks and the municipal golf course. The money which once went directly to the needy was now turned into the pay envelope of the work performed, so that men no longer considered themselves recipients of charity.

One of the human factors which needs to be considered in the present crisis is the preserving of the worker's self-respect, the strengthening of his morale and his courage to go forward. A job which calls for the exercise of his resourcefulness and abilities, and which yields some financial recompense, is probably a surer step in the difficulty than a mountain of well-meant sympathy, or an order for free groceries and coal issued by the entire staff of some emergency committee.— Christian Science Monitor.

Cheese Is Good Food

And Is From Ninety To Ninety-Nine Per Cent Digestible

With the possible exception of butter, cheese is the oldest prepared food in the world. It is meat to the French, potatoes to the Dutch, breakfast, dinner and supper to the Swiss. In Paris every restaurant worthy of its name has a cheese cellar. The French chef would be as lost without cheese as we would be without eggs—cheese crops into his delicacies at every turn.

In Alkmaar, cheese are auctioned off every Friday. On the day before, wagons and boats laden with cannon ball cheeses come to town from every direction. The auction begins at ten o'clock sharp.

The bidding is done by Leiengrire's wedding march played on a wonderful old carillon. At some of these auctions, 125,000 little Edams are sold in a single day.

Today there are 500 varieties of cheese all made of milk but all treated differently. The variations in cheese are often due to locality, breed of cows, and atmospheric conditions. Many of these cheeses which originated in foreign countries are produced under laboratory conditions in the United States today. Roquefort cheese is an example; it has been made for 800 years in Roquefort. Parmesian cheese, comfort cheese is manufactured in America at the present time.

In all times and all ages foodstuffs have acquired a host of traditions, some true and others violently erroneous. Cheese enjoys no exception to this rule. Some people pronounce it "rich" and say that only small amounts should be eaten at any time. Others traditions have grown about the time and way it should be eaten. The most absurd of these warns against the use of cheese at the evening meal because it supposedly causes bad dreams.

There is no need to trust to tradition in this matter, according to nutritionists of the National Dairy Council of the United States. Exhaustive studies undertaken by the United States Department of Agriculture have proved beyond doubt that anyone who wishes can use cheese to his own best good. Tests revealed that cheese is from 90 per cent. to 99 per cent. digestible.—Ontario Milk Producer.

One Jump Ahead

A lady Liberal speaker told a Toronto meeting that "the Liberal workers were right behind Hon. Mackenzie King." So far, however, that particular backfoot has been able to outrun 'em.

Hawaii's population is now 370,211, an increase for the year of nearly 2,000.

"The clinging type of girl is going out." The boys will keep taking her.

Study Of Recently Formulated Schemes For The Prevention Of Drought In Western Canada

(By S. Barnes, Dominion Experimental Station, Swift Current)

A study of recently formulated schemes for the prevention of drought in western Canada fails to give the assurance that their adoption would appreciably lessen the harmful effects of drought.

Two schemes for drought prevention have received much prominence in the press. Tree planting on a huge scale is advocated, and also the storage of water in reservoirs. Both schemes, it is alleged, will add moisture to the air and thereby induce a normal rainfall.

Meteorologists are suspicious of any scheme to promote rainfall since so many of these schemes have failed. The effect of trees inducing a normal rainfall can be easily determined. It is proposed to plant 1,500 square miles to trees. These trees, it has been stated, will transpire each month 50,000 million gallons of water in vapor form, or a total for a period of six months of 900 million tons of water. These are impressive figures but the trees would need to be benefited is also large. The drought area is given as 50,000 square miles or 81,300,000 acres. Some 900 million tons of water distributed over this area would give a rainfall of slightly more than fifteen hundredths of an inch, scarcely enough to lay the dust, and it would take six months to get it.

The possibilities in the reservoir idea are about as equally encouraging. The total evaporation of water for the growing period on the prairies is approximately 30 inches.

The average water surface of a number of reservoirs is given as 33 acres. If we assume the possibility of increasing the natural rainfall by one inch in a six months period, it would be necessary to construct some 50,000 dams.

Both of the above schemes entirely overlook the influence of the natural factors which produce rain. Rain is produced from vapor present in the air, but the mere presence of moisture in the air is no assurance of rain. What is to happen when the wind blows, as it sometimes does on the prairies? It is quite conceivable that the vapor arising from the trees and the artificial lake in Saskatchewan may be wafted into Manitoba, or even wander off to relieve a drought in Oklahoma or Texas. The bulk of Saskatchewan's rainfall, it should be remembered, originates in the Pacific ocean at least one thousand miles away.

For several years experiments on soil moisture, the fundamental factor in drought prevention, have been conducted at the Dominion experimental station at Swift Current, Sask. At the same time inquiries for information on methods of overcoming drought have been directed to points throughout the world where drought is experienced. Many common theories regarding soil moisture have been dispelled and evidence has been disclosed of important details upon which present knowledge is very meagre. There is no evidence to indicate that drought is western Canada is in any way connected with the system of farming practised or is steadily becoming worse. On the contrary the present agricultural practices, the outcome of many years of practical experience, are fundamentally sound in that they are designed to make the greatest position use of the available moisture supply. The experimentalist is now faced with the task of still further increasing their efficiency, and in this way to evolve a means of drought prevention built upon a thoroughly practical and scientific basis.

World's Grain Show

To Be Held at Regina July 31 to August 5th, 1932

Meeting at Toronto recently the national committee of the World's Grain exhibition and conference to be held in Regina, Sask., adopted July 24 to Aug. 5, 1932, as the dates for the event. The committee heard the optimistic report of J. A. Mooney, managing director of the exhibition, and approved the financial statement for the year.

It was reported all the countries, states and provinces which had arranged to take part in the exhibition when the date was originally set for 1931, had signified their intention of participating in 1932. Rice from the Philippines is already stored in Regina awaiting the exhibition, and the exhibit of wheat from Indore, Central India, is on its way. Fifty or sixty of the world's greatest grain experts have agreed to give addresses at the conference.

"The experience gained by some of the provinces during the past two years, and the excellent progress made, should be an incentive to greater things in the future," said Mr. Mooney. He suggested that every advantage be taken of the year for preparation, as the result of the postponement announced some months ago, so that Canada would occupy the position of this 1932 exhibition that the quality of her agricultural products merited. He said the exhibition committee had played an important part in giving assistance to the agricultural industry of Canada."

Our Agricultural Wealth

A statement issued by the Dominion Bureau of Statistics estimates the gross agricultural wealth of Canada for 1931 at $7,372,509,000. Of this $697,252,000 was represented by live stock and $84,852,000 by poultry on farms, a total of $742,077,000. The estimated gross annual agricultural revenue for 1930 was $1,340,470,000. Farm animals sold contributed $164,-680,000; wool $2,311,000; dairy products $377,154,000; poultry and eggs $95,327,000; a total of $641,323,000 directly from live stock and animal products.

Well To Remember

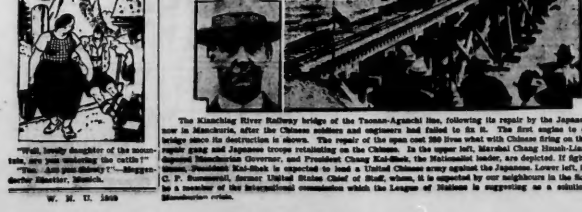
Bread was slow to follow the drop in price of wheat, bakers arguing that flour was after all a small item in the ultimate cost of bread. The argument should not be forgotten in a rising market.

One danger to which the modern girl will not expose herself is that of catching her fingers in a clothes wringer.

"I wonder how men can tell so many lies?"

His: "It is because you women ask so many questions."—Kasper, Stockholm.

Repair of This Bridge Cost $50 Lives



The Kinchling River Railway bridge of the Tsonan-Aganchi line, following its repair by the Japanese forces now in Manchuria, after the Chinese soldiers and engineers had failed to fix it. The first engine to cross the bridge since its destruction is shown. The repair of the span cost 350 lives what with Chinese firing on the Nippon repair gang and Japanese troops retaliating on the Chinese. In the upper left, Marshal Chang Hsueh-Liang (left), deposed Manchurian Governor, and President Chang Kai-Shek, the Nationalist leader, are depicted. If fighting continues, President Kai-Shek is expected to lead a United Chinese army against the Japanese. Lower left, in General C. F. Summerall, former United States Chief of Staff, whom, it is expected by our neighbours in the South, may be a member of the International commission which the League of Nations is suggesting as a solution of the Manchurian crisis.

Tour Of Lady Cholmondeley

British Theatrical Company Will Visit Canada

Lady George Cholmondeley, accompanies by her theatrical party of London artists, sailed on board the Canadian liner "Alaunia" from Southampton recently, for an extended tour of Canada that will take them from Halifax to Victoria.

Their tour of Canada, which is attracting considerable attention, will not only have the distinguished patronage of Their Excellencies, Lord and Lady Bessborough for the opening night, but also in Ottawa, Toronto, and Toronto, but Lord and Lady Bessborough have signified their intention of also attending the opening nights in these three cities.

Interest is also being shown in this tour of Lady Cholmondeley's theatrical company, on account of her association with the Stcensted Players, the well-known amateur group of players set Governor-General of Canada. The Stcensted Players have for several years given performances regularly in the private theatre which Lord Bessborough built alongside his country house, Stensted, in Surrey, England. Lady Cholmondeley is a brilliant amateur actress and society hostess and has been a member of productions at Stensted Theatre. She played the part of Eliza in George Bernard Shaw's "How He Lied To Her Husband" at the first production given at Stensted before Lord Bessborough came to Canada last spring. It has been noted that Lady Cholmondeley's productions in Canada will include ballets as well as plays. She herself is a brilliant dancer, as those who saw the "Blue Bird" in London, Stensted, will remember, and her dancing and arrangement of dances of the first sted have been a special feature of the Stensted productions.

After playing in Montreal the company will move to Ottawa, where the Governor-General and Lady Bessborough will be present when they open on December 8th. They will then in that city for one week before going to Toronto. After a week in Toronto during which time they will give ten performances, the company will spend three days in London, Ont., and Hamilton before entraining for the West. They open in Winnipeg on January 4th for a week.

Regina will be the next city visited where they will open a three day engagement on January 11th. Edmonton, Edmonton and Calgary will also be played in before the company goes to the Coast where they play in Vancouver commencing on February 1st.

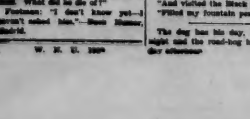
After finishing in Victoria, the Lady Cholmondeley Company will return from Seattle, coming once more to Edmonton, Regina, Saskatoon and Winnipeg, from which City they will be booked in as the return trip. The company will then play in Hamilton before going to make a second visit to Ottawa, and after that they will play in Kingston, Brockville and Peterboro following which they will return to Toronto for a week.

Their last performances will commence in Halifax on April 18th, 19th again at His Majesty's Theatre, and they expect to sail home to London, England, the week following.

Lady Cholmondeley has surrounded herself with a most excellent cast, included in which will be Norman Page, former dramatic head of the Royal Academy of Dramatic Art in London, England.

Lady Cholmondeley's husband, Lord Cholmondeley, will come to Canada early in the New Year and will return to England with them.

It is expected that the tour will be under the distinguished patronage of the various Lieutenant-Governors of each of the provinces which the company will play in.



The wheat yield in Western Canada, over a period of 25 years, averaged 17.5 bushels to an acre, and was higher than that of all other wheat exporting countries.

"Travelled all over the world eh? Went up the Nile, I suppose?"

"Climbed it to the top."

"And visited the Black Sea?"

"Tried my fountain pen there."

The dog has his day, the cat his night and the road-hog has all Sunday otherwise.

Better Farming Societies

Getting Together To Study Better Farming and Agricultural Problems During the Winter Months

The Hon. James F. Bryant, K.C., Chairman of the Commission on Conservation of Water and Afforestation, for Saskatchewan, stated recently that it was generally recognized that owing to conditions in the dried out areas, many of the farm homes are not able to afford the papers, magazines and general reading matter that came into these homes in previous years. Under these circumstances, during the long winter ahead, an effort should be made to create a common interest which would bring the farmers together in the different districts and endeavour to take some more constructive measures to remedy present conditions in the dried districts of southern Saskatchewan.

"As Chairman of the Commission on Conservation and Afforestation," said Mr. Bryant, "I received a letter from F. Fraumes, of Springwater Saskatchewan, secretary of the Rural Municipality of Bayne, which was very encouraging and which suggested a plan that might with great benefit be adopted in the municipalities in the dried out areas of the province.

"At the annual meeting of the ratepayers of the municipality a resolution was passed, on the suggestion of the secretary, a local 'Better Farming Society' was formed, which has been supplied with all available information on farming. The Society will meet once in two weeks at the most central of the municipality to discuss and exchange ideas. The whole programme to be devoted to 'Better Farming' Agricultural Papers have been placed at the disposal of the society for discussions to be strictly prohibited as they might tend to dissension and friction, meetings to be held short when through a careful study of better farming problems it would not be necessary to meet often, but be of great benefit to all. The first meeting of the above Society will include a study of all the available literature used at Monarch, Alberta, and the members of the local society are trying to get all the available information on this subject for discussion.

"I desire to urge the formation of similar Better Farming Societies all over the province, as I feel that it would be a matter of great value to the farmers themselves, and to the Province of Saskatchewan, if such meetings were held all over the southern part of Saskatchewan, especially in the dried out districts, and Agriculture' problems in their relationship to drouth and soil drift. Also the best methods to adopt for permanently removing the causes of drouth conditions by intelligent and united effort.

"The whole question of climatic conditions as affected by the lack of conservation of water and the absence of the trees would furnish a most interesting field for study and discussion.

"To get material for the papers and discussions, the members might obtain a limited quantity from the Department of Agriculture, Regina, of such pamphlets as the Report of the Royal Commission of inquiry into farming conditions in Western Canada, crop rotation, and many others. Valuable pamphlets could be obtained on tree planting from the Forestry Station at Indian Head; on many subjects from the Agricultural College, Saskatoon, and the Experimental Farms at Lacombe, Brandon, and Scott.

"Full material for the Department of Agriculture, Ottawa, and the subjects of fruit growing, vegetable growing, cereals, cultivation of farming, crop rotation, grasses and clover might well be studied.

"It would be possible to obtain outside speakers,—say once a month or once or twice during the winter months, and the Commission on Conservation and Afforestation would be pleased to assist so far as his other duties permitted. Dean Rutherford of the Dominion Department staff of the Agricultural College, Saskatoon, Norman Rose of the Forestry Branch, Indian Head, members of the staff of the Experimental Farms and of the Department of Agriculture, Regina, could be obtained. Perhaps Professor Klut of Ottawa might be persuaded to give a few addresses when in visiting the West—in December or January. Subjects for discussion and short addresses prepared for meetings might be broadcast through the Saskatchewan Farmers' radio school. Farm papers such as the 'Western Producer,' the 'Saskatchewan Farmer' and the 'Country Guide,' the 'North-West Farmer' and the 'Prize Fress Prairie Farmer,' might, if requested, get several splendid articles prepared and publish them in order to assist in studying the problem.

"I strongly urge the formation of such societies at the earliest possible date. The initial meeting of farmers might well be arranged by the secretary-treasurer of the municipalities in the drouth areas."

SUNDAY SCHOOL LESSON

DECEMBER 13

JOHN'S VISION ON PATMOS

Golden Text: "Fear not, I am the first, and the last, and the Living One." Revelation 1.17, 18.

Lesson: Revelation 1.1 to 3.22.

Devotional Reading: 1 Corinthians 15.42-49.

Explanations and Comments

The Address Or Salutation, verses 4-7. With this salutation compare the salutations in Paul's letters, as in 1 Thessalonians 1.1, and St. John, to the seven churches that are in Asia, this was a common form for the beginning of a letter. As we learned in Paul's history in The Acts, Asia stood, not for the continent of Asia, nor for the peninsula of Asia Minor, but for a Roman province in that peninsula. It was to these churches (named in verse 11) that the Book of Revelation was primarily written, the churches with which John was personally acquainted. Revelation 22.16, "Seven" is a number representing completeness, and therefore meaning "all."

"He who seven churches John wrote, grace and peace from Him who is, and who was, and who is to come; probably making use of a solemn and stereotyped phrase to describe the Creator." There is evidently here an allusion to Exodus 3.14, where Jehovah reveals Himself as the "I Am, the Self-existent, and Eternal. . . . And from the seven spirits that are before the throne; again the number seven. It is thought this is a combination of the idea in Psalm 104, 4 with the latest Jewish idea that the number of the chief angels was seven. And from Jesus Christ, who is the faithful witness. Compare Revelation 1.2 and 3.14; and Jesus' own words, "I bear witness to the truth," John 18. 37. Jesus Christ the first born of the dead (the first of the dead to "enter life"; compare Colossians 1. 18); and the ruler of the kings of the earth (a paraphrase of the language of the Eighty-Ninth Psalm).

Unto Him that loveth us: "Perhaps the first words 'loved' and then He thought him, 'Why should I say loved' when He loves us still?" And loosed us from sin by His blood; suffered us from sin by the shedding of His blood on the cross. And He made us to be a kingdom: Christ's followers not only ideally a kingdom, but they are a kingdom, a society under His Kingship. To be priests unto His God and Father; see Exodus 19.6. In former times other men had been priests, or mediators between God and men; now such are no longer needed for each one has direct access to God. Him be the glory and the dominion for ever and ever, unto the ages of the ages. Compare Romans 16.27, 1 Timothy 1.17; Hebrews 13.21; 1 Peter 4.11.

Behold He cometh with the clouds: compare Daniel 7.13; Matthew 24.30; Mark 13.26; 14.62. Every eye shall see Him and they that pierced Him: that is, the tribes of the earth shall mourn over Him. Even so, Amen. "There will be two kinds of mourning, the one due to the terror of a sinner, the other to the terror of his Saviour."—Bengel.

The Hawaiian Islands broke their temperature record this year with a 100 degree temperature, and it happened, not in August, but in April.

Experiment Was Costly

Labor Government in Australia Found Most Business Unprofitable

A Labor government in Queensland, Australia, decided, several years ago, that the public was paying too much for meat, and plunged into the business. It purchased a number of splendid ranches and put governmental officials in charge. The advance picture drawn by the politicians was one of assured profits and cheaper meat. The actual results were enormous deficits and dearer meat. The final blow came with the sale of the ranches. They cost $6,350,000, besides which the government raised $5,750,000 to meet operating losses, or a total outlay of $12,100,000. And all the state got back when it sold out was $2,600,000. The Australian experiment in socialism cost every man, woman and child in Queensland $10 more each in taxes.

Metals For Dirigibles

Many Besides Aluminum Play An Important Part In Construction

Aluminum is the metal most commonly associated with the building of dirigibles such as the new Akron, but there are numerous other metals playing important parts in such airships. The Akron, like the Shenandoah, is built of duralumin, which is an alloy of aluminum and copper. Other metals are used for outrigger fittings because of strength; stainless steel for exhaust manifolds; non-magnetic alloy steel for control boards; plain carbon steel and plain iron for miscellaneous purposes; pasts and fittings of monel metal; nickel and aluminum for fairings; bronze and copper for fuel lines; platinum for some navigation instruments. Stainless steel is used for the framework. Incidentally, the lightness of aluminum is taken advantage of not only for the actual body of the ship but in used for the stoves and other galley equipment. The stove weighs only 110 pounds.

Another Victim to Science

Second Montreal Doctor Dies of Mysterious Infection

Second victim of a mysterious infection picked up while doing research work in Continental universities two years ago, Dr. Joseph B. Gallagher, surgeon attached to the Montreal General Hospital, died Wednesday after long suffering. The first victim was Dr. H. Stewart, who died six years ago.

The surgeons, friends, went to Europe in 1929 to do some post-graduate work in London, Berlin and Vienna. In former cities they became with a mysterious infection picked up apparently in the country of their visit. Both are now dead from blood poisoning.

Height Makes Big Difference

When you go to the top of the Empire State Building, New York City, the world's tallest man-made structure, you can see the sun rise a half hour earlier and set a half hour later than from the street level. That is the difference a height of 1,248 feet makes.

In the historic old German meeting house at Waldeboro, Maine, church services have been held regularly for 189 years.

Wheat Tariff Asked

British Millers Suggest Two Shilling Preference On Grain Coming to Canada

London, England.—Representatives of the British flour milling industry suggested to Sir John Gilmour, Minister of Agriculture, the imposition of a general tariff of four shillings a quarter (eight bushels) on wheat, with a preference of two shillings on wheat, the Daily Express said recently. Coupled with this was the suggestion of a two shilling preference on wheat from Canada or the other Dominions, the paper adds.

The millers, the Daily Express says, argued against the Government's proposed wheat quota scheme, contending it would disorganize the trade.

Another suggestion made to the Minister of Agriculture was a duty of four shillings a bushel on all sold foreign wheat stored in Great Britain, particularly the thousands of tons of Soviet grain lying in port elevators.

Fails To Beat Record

Hawks Overcome By Monoxide Gas Fumes In Hospital

Yreka, Calif.—Overcome by monoxide gas fumes from his motor as he streaked through the sky seeking a new three-flag speed record between Vancouver and Agua Caliente, Mexico, Capt. Frank Hawks was forced to dive dizzily to earth before he lost consciousness. He is suffering from congestion of the lungs and pneumonia was feared.

The poisonous effects of the gas Dr. Victor Hurt, his physician, said probably would keep the flyer in bed for a week and he had ordered the aviator to rest as his condition was more serious than at first diagnosed.

Pay In Canadian Funds

New York.—The Bank of Montreal informed its shareholders in this country, beginning with the dividend payable December 1, that payment will be made in Canadian funds only, instead of United States funds as has been the policy for several years.

W. N. U. 1919

BONZO - - - By Studdy

MIXED FARMING WILL NOT SOLVE PROBLEM OF WEST

Montreal, Que.—It is a mistake to think that diversified farming will solve all of western Canada's problems, Dr. W. W. Swanson, economist and grain expert from Saskatchewan University, who accompanied Premier E. B. Bennett to the last Empire Conference in Britain, said here.

Dr. Swanson was referring to the newly established $5,000,000 revolving credits fund, sponsored by President E. W. Beatty, of the C.P.R., to help the western farmers towards diversification.

He did not belittle its value to the farmers of northern Alberta and Saskatchewan. Indeed he stated that it would be of considerable benefit to them if the fund was really kept rotating and fluid, as it would supply an intermediate form of credit between the short-term loans of the banks and the long-term mortgage companies' loans.

"But there are large parts of the prairie provinces where it will be quite impossible for the farmers to make a general turnover to mixed farming," he said. "These areas have a small rainfall. They have little or no fuel at all available for livestock and thus cannot benefit from the plan. Yet they produce the bulk of our present wheat crops.

"Even to be of real value to those western farmers who are so fortunately situated that they have more to diversification, which they already have, the rotating fund will be useful only as long as great care is used not to attempt too fast a diversification of agriculture.

"The danger which is too often ignored," Dr. Swanson said, "is that too rapid a shift towards the production of livestock would depress the markets and freeze the credits, thus entirely offsetting the benefits of diversification."

Wheat Tariff Asked

British Millers Suggest Two Shilling Preference On Grain Coming to Canada

London, England.—Representatives of the British flour milling industry suggested to Sir John Gilmour, Minister of Agriculture, the imposition of a general tariff of four shillings a quarter (eight bushels) on wheat, with a preference of two shillings on wheat, the Daily Express said recently. Coupled with this was the suggestion of a two shilling preference on wheat from Canada or the other Dominions, the paper adds.

The millers, the Daily Express says, argued against the Government's proposed wheat quota scheme, contending it would disorganize the trade.

Another suggestion made to the Minister of Agriculture was a duty of four shillings a bushel on all sold foreign wheat stored in Great Britain, particularly the thousands of tons of Soviet grain lying in port elevators.

Germany's Move May Affect Canadian Goods

Export Trade Will No Doubt Suffer Through Prohibitory Duties

Ottawa, Ont.—While Canada has no trade treaty with Germany, there is a most favorable conditional export rate from the Dominion to that country which may be adversely affected by the "prohibitory" duties forecast in Berlin despatches.

During the year ended March 31, Canada exported a large variety of merchandise to Germany, wheat being predominant with exports valued at more than $4,000,000, and wheat flour valued at more than $2,500,000. Other grains, fruit, fish, furs, lumber, farm implements, minerals and wood products are featured in the volume of exports last year.

Date May Be Changed

Imperial Conference Likely To Open Earlier Than July

London, England.—Plans for the Imperial Conference to be held in Ottawa will be speeded up, says the Daily Express. The National Government, the paper says, hopes arrangements will be made permitting the conference to open earlier than July, the date mentioned for some time.

Discussions are progressing between the British Government and those of the Dominions in regard to arrangements for the conference. The premiers in London, England, of Prime Minister R. B. Bennett of Canada and Premier Hughes, of Australia, are understood to have completed the preliminaries, the paper adds.

Former Official Dead

Winnipeg, Man.—A. H. Carelli, 75, former clerk of the Manitoba Legislature, died December 2. He served overseas with the rank of lieutenant-colonel, commanding a unit of the Canadian Army Service Corps. From 1887 until 1916, when he resigned to go overseas, he was clerk of the legislature.

Communists Appeal

Protest Against Jail Sentence Imposed By Toronto Judge

Toronto, Ont.—Appeals have been entered by the eight Communists convicted and sentenced on November 13 of being members of an unlawful association and parties to a seditious conspiracy. The appeal was based on the grounds that there was no evidence to show "that a revolution if it came about as a result of the teachings of Communism, would be accompanied by force, violence, terrorism or physical injury to person or property."

The accused claim the judge erred in excluding oral evidence by the defence as to the doctrines, teachings and objects of the Communist Party of Canada, while admitting such evidence on behalf of the crown; that the judge was in error in admitting evidence tendered by the defence to show the Communist revolutions have in fact been peaceful.

Further, the appellants claim the judge erred in refusing to allow the programme of the Communist Party of Canada as evidence for the defence; that the charge of the trial judge to the jury "as a whole unduly emphasized the evidence against the accused and failed to place the defence fully and fairly before the jury."

Finally, it is contended that trial judge erred in admitting evidence of seized documents as against the Communist Party of Canada.

Prince Of Wales Ill

Has Attack Of Malaria In Report Of Physician

London, England. The Prince of Wales has been forced to stay indoors because he was suffering from a chill. His condition was not serious, it was authoritatively reported, and no physicians' bulletins will be issued.

The Prince's illness made it necessary for him to cancel plans to attend a naval inspection at Portsmouth. He was to have also represented the King at the presentation of the colours of the Portsmouth division of the Royal Marines. Prince George celebrated four days.

The Daily Mail says the "chill" is an attack of malaria and that Sir Stanley Hewitt, one of the physicians who attended the king during his long illness, visited the prince. He suffered a mild attack of malaria last March while hunting in Africa and was obliged to return to Nairobi, where he quickly recovered.

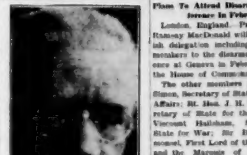
Gift To Aid Club Work

International Harvester Company Donates $50,000 For Agricultural Education

Ottawa, Ont.—Cheque for $50,000 to aid in the spreading of agricultural education among the farm boys and girls of Canada has been received by Hon. Robert Weir, Minister of Agriculture, from George A. Rumely, vice-president and treasurer of the International Harvester Company.

The money is a gift to the Canadian Council on Boys' and Girls' Club work. A permanent trust fund will be established, the income from which will be used in furthering the extension and usefulness of the movement.

ON LAMBETH COMMITTEE



The Right Reverend J. C. Roper, Bishop of Ottawa, who has been appointed to the consultative committee of the Lambeth Conference. He expects to go to London in the spring.

MacDonald Going To Geneva

Plans To Attend Disarmament Conference In February

London, England. Prime Minister Ramsay MacDonald will head a British delegation including six cabinet members to the disarmament conference at Geneva in February, he told the House of Commons.

The other members are Sir John Simon, Secretary of State for Foreign Affairs; Rt. Hon. J. H. Thomas, Secretary of State for the Dominions; Viscount Hailsham, Secretary of State for War; Sir Bolton Eyres-Monsel, First Lord of the Admiralty, and the Marquis of Londonderry, Secretary of State for Air. The Prime Minister said he hoped it would be unnecessary for all of the ministers to be in attendance at the same time.

A Paris despatch says Premier Pierre Laval may attend personally the opening of the conference. In League of Nations circles reports are current that several nations would like to see the conference postponed, believing the present world situation is not the best in which to hold it, but France is prepared actively to back up a postponement of the move should take concrete form.

Canada Buys Carriers For Machine Guns

Number Have Been Purchased By Department Of National Defence

London, England—Canada is taking the lead among the forces of the Empire for the modernization of its machine guns, the military writer of the Daily Telegraph says. He devotes half a column to an account of the purchasing of three Canadian permanent force battalions with armored machine gun carriers. This he says, is an increased greatly the offensive strength of the forces.

The Daily Mail says the "chill" is an attack of malaria and that Sir Stanley Hewitt, one of the physicians who attended the king during his long illness, visited the prince. He suffered a mild attack of malaria last March while hunting in Africa and was obliged to return to Nairobi, where he quickly recovered.

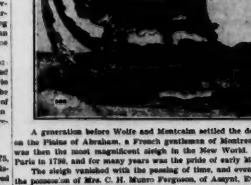
Farmers Still Hold Wheat

Over Thirty-One Million Bushels In West Not Yet Marketed

Winnipeg, Man.—A total of 31,522,000 bushels of wheat and 11,510,000 bushels of other grains still remain in the hands of farmers located along the lines of the Canadian National Railways and is yet to be marketed.

Of the grain remaining in the hands of the farmer, Manitoba holds 4,500,000 bushels of wheat and 3,150,000 bushels of other grains. Saskatchewan holds 10,641,000 bushels of wheat and 2,320,000 bushels of coarse grains, and Alberta holds 16,797,000 bushels of wheat and 5,052,000 bushels of other grains.

A Sleigh From Old Montreal



A generation before Wolfe and Montcalm settled the destiny of Canada on the Plains of Abraham, a French gentleman of Montreal imported what was then the most magnificent sleigh in the New World. It was built in Paris in 1736, and for many years was the pride of early Montreal.

The sleigh vanished with the passing of time, and eventually came into the possession of Mrs. C. H. Munro Ferguson, of Aegyst, Evanton, Scotland, who, in view of its early associations, presented it to Mr. E. W. Beatty, Chairman and President of the Canadian Pacific Railway. It is now on view at the headquarters of the Art Association of Montreal.

The sleigh is typical of the period in which it was built, the iron work being hand wrought and gilded. It is attracting a great deal of interest, especially among students of early Canadian history.

RAIL WORKERS NOT WILLING TO TAKE WAGE CUT

Montreal, Que.—"Anybody who talks in that strain in these days has not followed closely the report issued in labor disputes. The period of the iron fist is buried," stated Hon. James Murdock, member of the cabinet and vice-president of the Brotherhood of Railway Trainmen, Wednesday night, December 3, when asked if there was any possibility of a strike in connection with the majority award of the Board of Conciliation which decided the railway men were entitled to a reduction of 10 per cent. in the wages of their "running trades" employees.

The conference committee of general chairmen, representing the engineers, firemen, conductors, trainmen and telegraphers on the Canadian National and Canadian Pacific Railways found the majority opinion of the Board of Arbitration unacceptable, the two railways have been advised. The matter would be referred back to the 26,000 employees concerned, the railways were informed.

In a letter sent to every division of the employees the general chairmen asked them to decide if a local strike should be authorized. Each district was requested to send its reply to the chairman of the conference committee not later than December 15.

What the next step will be remains for the future. Strong efforts to reconcile the disputants will be put forward. Officials at Ottawa expressed hope that some means might be devised of getting the affected parties together and ironing out the difficulties.

Two Hundred Million Estimated For Loan

Hon. E. N. Rhodes Thanks Committee For Efforts In Huge Venture

Montreal, Que.—Hon. E. N. Rhodes, acting Minister of Finance, who came here to attend a luncheon at which he thanked the members of the National Service Loan Committee for their efforts in successfully completing the huge venture, stated in an interview that when the final figures were published they would run in the neighborhood of $250,000,000.

As the Government asked for only $200,000,000, the final figures will show a tremendous over-subscription.

"The small investor, who has made the success of this loan possible, has proved wise in his day and generation," stated the acting Finance Minister. "He can rely will be eight high interest but he has an excellent chance of appreciation on his capital investment in addition to knowing that his money is being used in the public service."

States Asking For Canada's Co-Operation

In Creating International Agency For Conservation Of Game

New York, N.Y. The American Game Association at a convention unanimously adopted a resolution asking Canada to join the United States in creating an international agency to foster wider fowl restriction and acquisition of large breeding areas and wintering grounds.

Hopes Lloyd, supervisor of wild life protection, parks branch, of the Canadian Department of the Interior, Ottawa, was elected a vice-chairman of the American Game Conference.

David H. Matsen, Salt Lake City, Utah, Federal Supervisor of Wild Life Resources in National Parks for United States, was elected chairman.

Food Dictator For Germany

Berlin, Germany.—Appointment of a "food dictator" for Germany is forecast in government circles. It was stated the official would probably be empowered automatically to reduce wages costs of industrial and food products. He would also have the power, it was stated, to prevent wage cuts in factories unless a similar saving was passed along to the consumer.

COMING EVENTS

A meeting of the Ladies Curling Club, will be held in the Curling rink on Tuesday, December 15th, at 3, o'clock.

All those wishing to curl, and cannot attend the meeting, please phone Mrs. Von Iffland. If any ladies from the country wish to join the club, we shall be pleased to hear from them.

Partridge Hill

Mr. Billy and Miss Sadie Whitson and Mrs. James Whitson were Edmonton visitors last Thursday.

******

Mr. and Mrs. Bob. Warring were Edmonton visitors on Saturday.

******

Mrs. James Larson of Dutchess, Alberta, who is visiting old friends in the district is at present the guest of Mrs. Jos. Smith.

******

At the annual meeting of the W. M. S and Ladies Aid held last week the following officers were elected for 1932. Hon. President, Mrs. W. Ochsldston; President, Mrs. J. S. Attevell, (re-elected); Vic.-President, Mrs. Robert Gordon; Sec.-Treas., Mrs. C. H. Flintoff, (re-elected) Systematic Offering Secretary, Mrs. W. Alton, (re-elected); Mission Monthly, Mrs. F. Lawrence, (re-elected); Flower Committee, Mrs. R. Warring, (re-elected).

The members are thankful that in spite of the depressed condition they have been able to meet their allocation for the year.

******

Mrs. H. Rye and Mrs. C. H. Flintoff were hostess to the U. F. A. and U. F. W. A. at the latter's home at the annual meeting on Tuesday night.

The U. F. A. slate for 1932 is:—President W. Gillison, Vic.-Pres., W. Fenerer; Sec.-Treas. C. H. Flintoff.

U. F. W. A. officers were elected as follows President, Mrs. R. Warring, Vic.-Pres., Mrs. Jos. Brady (re-elected); Sec.-Treas. Mrs. A. Krebs, (re-elected).

Directors Mrs R. Gordon, Mrs. F. Davies, Mrs. A. Ochsldston, Mrs. W. Attevell and Mrs. F. Lawrence.

Flower and Sick committee, Mrs. George Ochsldston; Mrs. James Whitson.

The financial report shows both bonds in a healthy condition. A short program followed at the close of the business, reading from C. H. Flintoff; Solo W. Gillison; Reading Mrs. H. Rye; Piano Solo B. Alton; Christmas Story Mrs. Latimer; Fraternal greetings from the Junior U. F. A. by R. Robinson; Mr. and Mrs. R. Warring; Reading Mr. J. Lambly followed by Christmas Carols which were enjoyed very much.

The members of the U. F. W. A. President Mrs. W. Fenero who has served two years, and Mrs. A. Krebs were each made the recipients of a gift from the band.

Mr. Gillison in the role of Santa Claus in his usual happy style dispensed the gifts from the tree of little Christmas trees. A box of provisions to be forwarded to sunshine was packed during the evening.

******

Partridge Hill School will hold their Christmas Tree and Concert on Friday evening, Dec. 18th. A good program of songs, drills, and dialogues are being prepared by Mr. Lambly.

Presentation Made After Play

After the Play was over on Tuesday evening, while the A. Y. P. A. Trompe was being photographed, Mrs. Rust and some of the ladies hurried over to the Rectory to prepare a little supper for all the performers. But the Parson had bolted the kitchen door and they could not get in! However a storm sash was taken off the study window and the Parson crawled through and opened the front door, and all was well.

By the time the kettles boiled the crowd arrived! Some crowd too! All the actors and actresses, all the dancers and escorts, all the A.Y.P.A. and their best girls or boys, all the orchestra, in fact, the whole bunch.

Mr. White found the piano, the young people found seats, and the mothers found a job in the kitchen. Sandwiches, Cakes, tea and coffee were then consumed in a subdued hum that was almost a silence compared with what followed. When T.W.E. Henry felt better he got up and with a full heart though hesitating tongue, on behalf of the troupe presented to Miss West a manicure set to show their appreciation of her skill and patience in directing. Miss West's reply was eloquent with few words. Votes of thanks were tendered to the Edmonton artistes, to the orchestra, in fact to all who had helped to make the affair a success.

Then the crowd crowded more closely round the piano, where Mrs. Smith presided in olde fashion, and made the old music box talk as it has seldom talked before, and its no chicken! So they wandered in the moonlight where the long, long trail a-winding, while some of the boys shadow danced in the limited space at the back, until the inexorable march of time, and the departure of the Edmonton contingent, began the breaking up process. Dishes washed, the ladies sighed with relief and after many cordial good-nights the Rectory was left to soak a much needed repose. The people of course, not the house.

Bride To Be, Showered

On Monday evening, December 7th, Mr. and Mrs. George Cranston, held a (surprise shower) at their home, in compliment to, Miss Betty Louis a bride of the near future.

A varied program was carried through during the evening. A flower contest, was held, the honors were to Miss Jean Ramsay, and Mrs. R. Flintoff. Miss Elizabeth Jones, sang very effectively and Miss Jean Ramsay gave a reading, which was enjoyed by all Miss Gladys Hodgins played the Wedding March for the shower and Miss Margaret Ketterborn accompanied the community singing.

Miss Evelyn Cranston and Miss Dorothy Lane presented the lovely gifts, the former giving a fine speech and Miss Louis replied suitably.

Dainty refreshments were served by Mrs. Shackleton, Mrs. McNaughton, Mrs. S. Taylor and Mrs. S. Dennis.

Among those present were:—Mrs. T. Lane, Mrs. C. Glover, Mrs. F. Baker, Mrs. R. Flintoff, Mrs. G. Frey, Mrs. R. Armstrong, Mrs. D. C. Ramsay, Mrs. G. Becker, Mrs. McNaughton, Mrs. S. Taylor, Mrs. S. Dennis, Mrs. W. McAdie, Mrs. Ed. LeBlehs, Mrs. E. L. Hurlbut, Mrs. Martin, and the Misses R. Shackleton, A. Dickeson, A. Moyer, G. Hodgins M. Ketterborn, A. Truby, E. Jones, J. Ramsay, M. Stevenson.

7:30 Evening Worship.

MARRIAGE

On Tuesday, December 1st 1931, at the Josephburg Reformed Church a very pretty wedding was solemnized, between Miss Ruth Katherine Mohr, youngest daughter of Henry Mohr, of Josephburg, and Frank Becker, jr. son of Frank Becker of Josephburg, Rev. Wiesbrauch officiating.

The bride who look charming in a gown of georgette and lace with a veil of orange blossoms, and carried a bouquet of deep pink roses, was given away by her brother.

The bridesmaid Irma Becker sister of the groom wore a pale blue satin gown and carried a bouquet of pale pink carnations.

Walter Mohr, brother of the bride supported the groom. During the short wedding service, Mrs. R. Mohr sang a lovely solo. The wedding march "Bridal Rosen" was played by Mrs. Ed. Mohr.

After the wedding a very dainty supper was served at the home of Mr. Henry Mohr, where some 125 relatives and friends sat down. The tables were decorated in white, the bridal table being centered with a three tier wedding cake.

After the usual short speeches and toasts had been given, the tables were cleared away and dancing was indulged in until daylight.

The Groom gift to the bride was a pearl necklace, to the bridesmaid a pendant, the best man, a pair of gold cuff links, and the organist a necklace.

The young couple were the recipients of many beautiful gifts.

They will reside at the groom's farm at Josephburg.

LOST

Lost—Small stove hammer. Silver-plated. Please notify A. Flintoff

Grain traffic handled by the Canadian Pacific for October last shows a considerable increase over that carried for October, 1930. A total of 17,921 cars was loaded last month from the Pacific Province compared with a total of 13,572 cars in October, 1930.

Idle since the first week of October the mill of the British Empire Steel plant at Sydney, N.S., is again in operation, giving full time employment of six days a week to upwards of 2,000 men. They are rolling soft steel for a number of orders recently placed with the company.

With a rail mileage of 7,142 miles to his credit and having to date seen 434 incase, 29 caribou and 434 deer in New Brunswick, E. L. Pope, of Boston, Mass., is back in the New Brunswick forests on his 27th hunting trip in 29 seasons. He will spend several weeks on this trip.

Nat. Cordner, colorful golf pro at the Canadian Pacific Jubilee course, Vancouver, for the past five and a half years, called by the Empress of Russia recently for Tokio where he will act as golf instructor at the Fuji Imperial Club course. This organization operates a huge indoor layout in addition to its outdoors links.

Major John W. Sifton, one of the proprietors of the Manitoba Free Press, Winnipeg, seated at his writing desk in his private residence at Toronto recently, pulled a lever which, through the medium of Canadian Pacific Telegraphs transmission wires, set in motion the new two unit speed press just erected in the Free Press offices at a cost of $300,000. The new press has a rated maximum capacity of more than 160,000 forty-page papers per hour.

Twelve hundred colonies of screened bees and their accompanying queens from the Province of Alberta to China was the unique feature of the Canadian export trade to the Orient and of the shipments aboard the Empress of Russia recently. The European and American bee produces nearly twice as much honey as its Asiatic brother that has been exploited by the Chinese since the time of Confucius. (TG)

WOULD REDUCE EXPENDITURES ON NATIONAL LINES

Ottawa, Ont.—Reduction as far as possible in capital expenditures on the present works and consideration of the suggestion of Sir Henry Thornton that an outside commission of leading Canadians be appointed to consider the entire question of Canadian transportation are likely to be recommended by the special committee of the House of Commons on the Canadian National Railways report.

In parliamentary lobbies, it is also reported that the committee may suggest to the House of Commons the abandonment and sale of the Canadian Government Merchant Marine, the original cost of which was $30,000,000 when purchased in the days of the Great War.

Another probability, it is understood, is a recommendation for considering the abandonment of the Canadian National steamship service between Vancouver, Seattle and Victoria.

Continuation of the West Indies service, combined with approval of a sum of $755,000 for requirements respecting obligations under the treaty between the Dominion and the islands, will likely be proposed. The bill guaranteeing securities under the system's financing act of 1931, it is reported, will be approved by the committee. A sum of $500,000 is required under the Maritime Freight Rates Act and approval of this sum is likely to be given.

It is understood the committee will consider recommending that the amounts Sir Henry Thornton receives in excess of $75,000 per year salary should be published and that there should be no annuity of $30,000 to Sir Henry after he leaves the system. Whether salaries of other officials may be made public is a matter upon which no information is available. Supporting statements of Dr. Peter McGibbon (Ottawa, Muskoka-Ontario) that another recommendation may possibly be that club fees and club payments of high C.N.R. officials paid by the system amounting to a large sum should be made public.

The report has yet to receive final approval of the committee.

Looking For Advance In Disarmament Plans

Move Is Seen As Consequence Of War Debts Moratorium

Washington.—Definite advance in world disarmament is expected by the administration as one important consequence of the war debts moratorium.

With the holiday in intergovernmental payments definitely assured and steps already taken to adjust remaining details President Hoover and his advisers made the forthcoming general disarmament conference their next diplomatic objective. Three times in as many months the chief executive has linked the increasing costs of armies, navies and fortifications directly with the world's economic burdens.

The disarmament conference will be held at Geneva in February, 1933, under the auspices of the League of Nations. The United States will participate fully and officially.

Conservatives Hold Seat

Win By-Election in Ontario Riding By 136 Majority

Simcoe.—An unofficial summary of results in the Norfolk provincial by-election showed the Conservative candidate, A. C. Burt, elected by a majority of 136 votes over J. Liberal opponent, with the third candidate, an Independent, losing his deposit.

Unofficial final figures were:

Dr. A. C. Burt, Conservative, 3,710.
Eric W. Cross, Liberal, 3,574.
A. C. Stewart, Independent, 272.

With eldest declared victory hence the complete and official figures could be checked.

In the last general election Hon. John S. Martin, former member of the Ontario cabinet and a Conservative, had been elected with a majority of 1,466.

W. N. U. 1926

Approve Tariff Board

Term Of Office Is Fixed For a Period Of Ten Years

Ottawa, Ont.—After a rough passage and much baffeting, the government bill providing for the appointment of a tariff board finally passed the committee stage in the House of Commons. It now stands for third reading which, in the majority of cases, is merely a formality. It is possible that members of the Liberal opposition will seize the opportunity offered by the motion for third reading to voice briefly once again the many objections which they have developed. Discussion, however, must now be limited.

The bill, in brief, provides for the appointment of a board of three members, of which one is to be chairman, with the powers of a court of record. Its function, as indicated by the prime minister, will be to "find facts" upon which tariff duties may be based. It will endeavor to determine the cost of production of goods in foreign countries, the cost of production of like commodities in Canada, and the rates of duties necessary to equalize costs. Its findings shall be reported to the Minister of Finance.

Salaries are placed at $12,000 for the chairman and $10,000 for each member of the board, and the term of office is fixed at ten years. In addition to the many tariff activities the board is empowered to perform certain functions under the Combines Investigation Act. It also assumes the duties now attaching to the board of customs.

Medals For Bravery

Four Young Brantfords Receive Recognition From Royal Canadian Humane Association

Hamilton, Ont.—Bronze medals "for bravery" have been awarded to four young men of Port Dover, Brantford, by the Royal Canadian Humane Society.

The four, cited for their heroism March 27, 1931, in rescuing three North American visitors from drowning at Capacahuma Beach, are Archie Braun, Jorge Pinho Amando, Edilson Lima Coelho and Roberto Dolabella.

The rescue occurred at the beach when three members of the Canadian trade mission to Brazil, and a friend from the United States, went swimming there. They were carried out from shore by the heavy surf and the undertow, when the young Brantfords went to their assistance.

One of the men rescued, C. E. Morley, Galt, Ont., failed to respond to attempts at resuscitation, but the three others, Arthur W. White, London, Ontario; Ralph Ramsay, Edmonton; and W. F. South, United States friend of the party, survived.

Must Keep Expenses Down

Germany Has Been Warned To Practice Rigid Economy

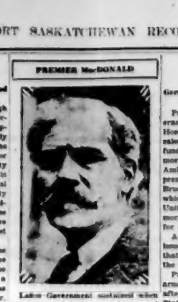
Berlin, Germany.—The German Government pledged its word that the money made available by the Hoover debt plan will be used solely for the purpose of bringing about consolidation of the nation's finances. "Whatever alleviation the credit and money market receives, must rebound to the benefit of Germany's business and economy," the government said in an official proclamation.

The nation was warned in the government statement that it must be unrestricted in efforts to win economies. No increase in the expenditures of any government department will be made. President Hindenburg sent a message to President Hoover, telling of the gratitude of the German people.

Rushden Butter Takes Grand Championship

Ranked First From Twenty Dairy Cows From Which Flow 84 Calgary

Winnipeg, Man.—An exhibit of Manitoba butter, which scored 393 out of a possible 396 points, triumphed at the Calgary Exhibition, taking the grand championship and gold medal in creamery classes, according to official views received here, Tuesday, July 7. The championship exhibit was entered by the Manitoba Co-Operative Dairies, of Dauphin. Buchanan Co-Operative Creameries, Moose Jaw, took second place, and Manitoba Co-Operative Dairies, Rossers, third.



PREMIER MacDONALD

Labor Government sustained when recalcitrant left-wingers who moved rejection of unemployment insurance anomalies bill, were defeated by vote of 231 to 19.

National Relief Board

Social Service Council Of Canada Will Urge Formation

Toronto, Ont.—Appointment at once of a small national board or commission, composed of the best informed and most capable persons available, to plan, co-ordinate, and direct unemployment relief measures is urged by the Social Service Council of Canada in a memorandum of resolutions passed by that body to be submitted to Premier R. B. Bennett and Hon. Gideon Robertson, Minister of Labor.

Rev. Canon C. W. Vernon, of Toronto, president of the council, and Dr. J. Phillips Jones, general secretary, expect to go to Ottawa shortly to present the resolutions to the government.

Trade Conditions In Britain Are Improving

Situation Better Than in Sixties Says Sir Charles Gordon

Quebec, Que.—Noting an improvement generally in trade and in Great Britain, with a trade revival taking place, Sir Charles Gordon, president of the Bank of Montreal, has returned to Canada from a brief visit to Europe.

"I think that conditions in Great Britain are improving, trade generally experiencing a revival, and that conditions there aren't as bad as the United States," said Sir Charles.

Anglo-American Relations

Toronto, Ont.—Delegations of university professors and students from Great Britain and Canada have accepted the invitation of the Carnegie Foundation to discuss Anglo-American relations with a similar group from United States colleges at the University of Michigan from July 12 to 19. Stanley Rands will represent Queen's University and Professor A. Gibson, University of British Columbia.

No Armaments

Germany Will Not Use Reparation Funds For War Purposes

Paris, France.—The German Government, through Ambassador Von Hoesch, gave Premier Laval its reasons word that it would not use the funds realized by the reparations moratorium for building armaments. Ambassador Von Hoesch gave to the premier the text of Chancellor Bruening's statement of July 2, in which the chancellor assured the United States government that the moratorium benefits would be used for economic purposes.

After the interview, Premier Laval issued a statement in which he said that the German government made the move on its own initiative.

Paris began to prepare for the disarmament talks which it expects before the arrival here of United States' Secretary of State Henry L. Stimson.

Had Easy Victory

Labor Government Triumphs Over Recalcitrant Leftwingers

London, England.—The government had an easy triumph in the House of Commons over recalcitrant left-wingers who moved the rejection of the unemployment insurance anomalies bill, which aims to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Maxton, objected that the bill was wholly inadequate, but after some hours debate they failed to muster the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Liberites and Liberals also abstained.

Reduce Insurance Rates

Reduction On Shipping Via Hudson Bay Route Is Reported

Regina, Sask.—The British bull committee has agreed to reduce insurance rates on shipping via the Hudson Bay route from 4 per cent. to 3½ per cent. on vessels valued at £10 per ton, according to official word from London, received by the Saskatchewan government.

This reduction was made contingent upon the operation by the government of ice breakers and direction finding equipment.

The committee also agrees to extend the sailing date to October 7 of each year for a 10 per cent. increase on the above rates, and to October 15 for a 25 per cent. increase on the same rates.

Gore Over To Opposition

London, England.—Gerald Mosley, one time known as the millionaire Socialist, has formally joined the opposition to the government, surrendering his seat on the Labor benches for one of the Conservative back benches.

DADDY BORE THE TRICK

In all the millions that followed the progress of Wiley Post and Harold Gatty, who flew around the world in nine days, none were more intently interested than the young personages shown here. Mrs. Harold Gatty, wife of the flier, with her children, Alan, five years old; Lindsay, three, and Ronald, who is nearly two. They were confident "Daddy" would get back home in "Winnie Mae" after the climate flight.

TAKE STEPS TO ENSURE SEED FOR DRIED-OUT AREAS

Ottawa, Ont.—The government has for some time had under consideration steps to ensure that the areas in the west facing short crops would not be denuded of the grain already in store there. The Saskatchewan actual pool delegates in Regina decided to urge the government to purchase and retain all grain in the final out areas until the feed and seed requirements can be assured.

There need be no fear in this regard, Hon. Robert Weir, Minister of Agriculture, said in an interview recently. The areas referred to would be protected as to the removal of grain. The government had been giving the situation close consideration for some time.

Plan To Organize Labor Battalions

In Considered Best Way To Help the Unemployed

Ottawa, Ont.—The proposal to deal with unemployment by organizing labor battalions is being much discussed among members of the House of Commons since the suggestion was made some time ago by Gen. A. E. Ross, Conservative member for Kingston. Several similar suggestions have since been made.

It was proposed to have the battalions work on the road construction, tree planting, and other similar undertakings. The suggestion of Gen. Ross was that the battalions be organized by Conservatives if there were not members of the permanent militia force.

Labor members will likely be ready to support the scheme, but are understood to be strongly opposed to such legislation being under the Department of National Defence. They should be under the Public Works Department or the Labor Department, they contend.

Sympathy From Britain

Expression Of Regret On Partial Crop Failure Heard In British House Of Commons

London, England.—"I am sure the whole House will regret to hear that the present drouth is expected to have a very serious effect on crop prospects in the prairie provinces of Canada," said Rt. Hon. J. H. Thomas, secretary for the Dominions, referring in the House of Commons to the present and probable economic effects of the failure of a large portion of the Canadian wheat crop. "As to the position generally I can only refer to the statement made by the Prime Minister of Canada on July 1," Mr. Thomas continued. This was Mr. Bennett's review in the House of Commons of the serious situation confronting the crops of a large section of Saskatchewan and of smaller sections of Alberta and Manitoba, wherein he announced that the Dominion government would take measures for relief.

Convicts Are Stirred

Say Deportations From Canada Will Not Cure Unrest

Winnipeg, Man.—Stirred by reports from Ottawa that Communists would be deported from Canada, leaders of the party in Winnipeg, declared such deportations would not cure the present unrest. Several believed it would stir up further trouble and aid in the growth of Communistic doctrines.

W. N. Kolinsyh, former alderman, and a leader of the Communists in Winnipeg, who has been a resident here for 17 years, declared he would "welcome deportation." Many workers, he added, would also welcome deportation, especially to the Soviet Union, where there is no unemployment.

Trade Treaty Delayed

Ottawa, Ont.—The new Canada-Australia trade agreement, bearing the signatures of Australian representatives, has not yet reached Ottawa, At the request of the Australian government, arrangement has been made for simultaneous release in Canada and Australia.

As Every Mother Knows
A growing girl has a valued ally
SCOTT'S EMULSION
of Norwegian Cod Liver Oil
Rich in Vitamin A and D

Conscious that perhaps she had been abominably her interest a little too openly, she turned her attention to a magazine she had bought en route from Dover and was soon absorbed in the inevitable happy-ever-after conclusion of the story she had been reading.

"Lady Anne? Oh, she lives at Shiplow now. Didn't you know?"

The speaker's voice was clear and resonant, with the peculiar carrying quality which has replaced in the modern Englishwoman of the upper classes that excellent thing in woman which was the proud boast of an earlier generation.

The conjunction of the familiar title "Lady Anne" and "Staple" struck sharply on Jean's ears, and almost instinctively she looked up.

As she stirred, one of the women glanced indifferently in her direction, then placidly resumed her conversation with her companion.

"It was just after the smash-up," she purred glibly. "Blaise Tormarin rushed off abroad for a time, and the news of Nesta's death in a motor-car he was away. Poor Lady Anne had to write and tell him of it."

Jean's book fell in a heap unheeded on the very slight and shadowy picture she had been able to form of her future environment as she mentally sketched in her mind from the few hints dropped by her father.

She wondered a little why Glyn should have omitted all mention of Blaise Tormarin's love affair and its unhappy sequel, but a moment's reflection brought the explanation according to Purser Cullins. Here all the romantic charms of the East had been exploited efficiently by the Press Bureau, and Glyn was one of its owners. It is an unfortunate characteristic of the Baht temple dancers perform their strange dances in subtle rhythms and curious music. The Francesca was the first boat to call at this out-of-the-way port of civilization.

Being purser on the great cruise liner, it is no sinecure. His elaborate programme of entertainment for passengers, which included concerts, tournaments at various games, musical shows, contests, movies and lectures, called for a cruise director with several assistants, there is a competent subordinate on board in the person of Dr. C. C. Batchelder, of Boston, who gives morning lectures at sea, on the history, geography, and characteristics of each place to be visited. He also gives medical advice on how to get the most out of the trip, projected views of what to wear, eat, drink, etc. In general, he is the "information bureau" expert. After each place visited he projects "before and after" slides of scenes and "memory pictures," before proceeding to lecture on the next place to be visited. The "Before and After Forums," as they are called, are always well attended by those who want to get the most out of each place visited.

Many people imagine that the best accommodations on a cruise ship must be terrific. But Purser Cullins claims that he has never felt so much discomfort" anywhere in all his travels as he has experienced in Nice and its environs during July. A dreadful summer weather. Leaving Nice by car on a frozen January day, the cruise liner soon runs into the Gulf of Biscay, where it is said Madeira, Throughout January, the item of striking terror. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness, or chafing caused by weather conditions.

Ends Pain in Minutes
Don't suffer! Get Dr. Scholl's Zino-pads and stop pain instantly. Then remove the cause with Dr. Scholl's Foot Balm. Zino-pads are thin, antiseptic, waterproof, cushioned discs that relieve pain by removing the pressure. Apply in a jiffy. Cost but a few cents. Sold everywhere. Dr. Scholl's Zino-pads

New Use For Ice

Invention May Be Valuable In Making Sunken Submarines

A new device sponsored by a Swiss company is expected to prevent many fatal accidents when submarines are lost, and to facilitate the recovery of the vessels in many cases.

The device consists of a series of cells filled with ice, which are placed on a frozen January day, the cruise liner soon runs into the Gulf Stream and proceeds to the Madeira. Throughout January, the item of striking terror. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness, or chafing caused by weather conditions.

Difficult For Communists

Reds Find It Almost Impossible To Meet in Cities

It's getting tougher and tougher for Communists in Canada, Jacob Penner, Communist candidate for Dominion parliament, said somewhere he was addressing in a public school.

"There is not a single town in the east where a meeting of this nature is possible," he said, "not in a public or private hall.

"And in the west, particularly in many Jaw, Calgary, Edmonton and Vancouver, even the unemployed are not allowed to assemble.

"Winnipeg is still one exception where the Communists can pour out their ideas to their heart's content," he conceded, "but how long will this last?"

School Board Hold Busy Meeting

A regular monthly meeting of the School Board was held in the office of the Secretary on Monday, Dec. 7.

The minutes of the last meeting were read and on the motion of Mrs. Rogers adopted as read.

Dr. Henry reported to the Board that Mr. Atkinson and he had inspected the school and filled out the insurance report required by Henry Brass.

The following coal tenders were read.

National Elevator—Black Diamond at $4.50 per ton. Alberta Pacific Elevator—Black Diamond 5.10, Marcus $5.00, New Penn $4.50 (all D.S.L.). W. A. Graham—Surgeon $4.00, Marcus $5.00 (all D.S.L.).

Moved by Mr. Todd that we call for new tenders for nine run lump coal. Motion lost.

It was moved by Mr. Atkinson that we order one car of coal from the National Elevator, Black Diamond at $4.50, also one from the Alberta Pacific at $4.50, new Penn Coal. Carried.

Moved by Mrs. Rogers that Mr. Anderson be authorized to look into the matter of lighting in Mr. Hamby's room and carry out necessary repairs. Carried.

Mr. Anderson also submitted a request from Miss West for 15 easy Primers, and one large bottle of Paste, also for 3 new desks. The Board decided not to purchase any new desks as the old desks could be repaired. The rest of the order was O.K'ed.

Mrs. Rogers volunteered to look after the repairs of the desks and will also try and get the Primers.

Moved by Mr. Atkinson that the School open at 9:30 a.m. in place of 9 a.m. as formerly for the Public School during the short days until further notice.

It was agreed that the school close on the 23rd of December until the 4th of January for the Christmas holidays.

Letters re National Appeal were read and Mr. Anderson expressed his willingness to look after it and take donations and keep a list of the donors names in place of pledge cards.

Attendance reports were read and filed.

Moved by Mrs. Rogers that Dr. Henry, Messrs Atkinson and Todd be appointed as a committee to look into the insurance with Mr. Atkinson.

The following accounts were read. W. A. Graham, Coal $69.50; Fort Saskatchewan Record, Coal tenders advertisement $2.25; A. M. Carscadden $9.30; J. T. Lalonde $6.72. On the motion of Mr. Atkinson these were ordered to be paid.

The Secretary was instructed to see the Janitor and give him instructions to put a glass in the back door and in the basement.

On the motion of Mrs. Rogers the meeting was adjourned.

Father: "Dear me, the baby has swallowed a piece of worsted."

Mother: "That's nothing to the yarns she'll have to swallow if she lives to grow up."

HOCKEY

The local hockey season was ushered in last Thursday night when the local team defeated Morinville 5-2 in a fast game.

The brand of hockey played was very good for so early in the season. The crowd at this game was disappointing to the home team as there was a greater number of visitors than local fans.

On Tuesday night, December 15th, Chipman paid the local team a visit and went home with a 4-3 verdict.

A fair crowd turned out to see this game and at times got many thrills for their money.

The first period was only under way a few minutes when Earl Lane scored for the Fort. Chipman were not long in retaliating, getting two goals to go into the lead at the end of the first period.

In the second period there was only one goal scored, this falling to the credit of Harry Kazun". This goal was quite a surprise to even the visiting goalie.

The second period was fast but the goalies seemed to tighten up.

The third and final period was a fight to a finish and at times some rough checking headed by both sides thrilled the crowd that lined the fence.

In this period Chipman outscored the Fort Boys 2-1, these were mostly brought by a general mix up in front of the Fort goal. With a few breaks the Fort might easily have had the game.

Stan Wilson opened the scoring in this period for Chipman. From that time on the local boys were fighting hard to tie the score and "Mah" Tercier knotted it on a solo rush.

Warshawski the busy defence man of the visitors netted the winner goal about four minutes from the end and the local boys were unable to tie it up again in the short time remaining. Tercier, Pocock and Lane were the best of the locals, but we must not mention "Shorty" a new spud on the ice for the visiting players.

Wilson, Warshawski, and the two Weatherick boys were Chipmans brightest stars.

Chipman Lineup—Achkasuhuk, Warshawski, Kulky, J. Weatherick, L. Weatherick, S. Wilson, robb, Hackedy Pruck and Marsock.

Fort Lineup—Pocock, Tercier, Henry, Lane, Karren, Hutton Stuckey, Flinloff, Gauf and Lamoureux.

Referees, Diamond and Walton.

St. George's W.A. Hold Annual Meeting

The annual meeting of St. George's Church W.A. was held at the home Of Mrs. Wallis on Thursday afternoon the 3rd inst. Mrs. Taylor was in the chair.

The Secretary, Mrs. W. Graham read a report of the year's work showing that a splendid result had been reached especially when the general state of business was taken into account. Mrs. A. M. Carscadden, treasurer, also reported, showing a good balance on hand.

The election of officers for the coming year resulted as follows:—President, Mrs. Taylor; Honourary Presidents, Mrs. Christopher Reed, and Mrs. J. Wallis; Vice Presidents, Mrs. Magee and Mrs. Carscadden; Secretary, Mrs. W. A. Graham; Treasurer, Mrs. Wisher; Junior Superintendent, Mrs. E. Graham; Living Message Secretary, Mrs. Onley.

Votes of thanks were passed to the retiring officers, and the Rector added his hearty appreciation of their efforts.

The usual most excellent refreshments were then served, by Mrs. Wallis and Mrs. Budd, the meeting adjourning at 5.30 p.m.

NOTICE

Town of Fort Saskatchewan

Don't Let Constipation Lead You Into Serious Illness

Serious rectal troubles, piles, paralysis, hemorrhoids, are frequently the result of using cheap cathartics.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO in a glass of water every morning, tones up and sweetens the entire system.

ENO'S FRUIT SALT

One For All: All For One

Speaking to the brilliant gathering of celebrities assembled at the recent Lord Mayor's banquet at the Guildhall, Premier Ramsay MacDonald declared: "We have been witnessing the complete breakdown of the doctrine of national economic self-sufficiency."

True, more significant words have seldom been uttered, but it is doubtful if people generally have yet come to a full realization of how futile the doctrine of self-sufficiency is, regardless of the fact whether it is applied in the realm of national economics or in the narrower sphere of an individual's life.

Belief that one is sufficient unto oneself is an outgrowth of egotism which in itself is a sign of weakness and a fatal defect in character. Belief in oneself is essential to success, but to take the position that incorporated within ourselves are all the elements essential to success, that nothing more is needed, that we, and we alone apart from everybody and everything, can achieve, is a mistaken, a fatal attitude.

And what is true of the individual is equally true of nations and peoples. During the progress of the Great War the nations of the world learned that not one of them, no matter how obscure or isolated it might be, nor how great and powerful it might be, could live unto and within itself alone. Not one proved self-sufficient. Rather, the Great War revealed the dependence of one on another, and the interdependence of all.

The Great War was a struggle for the supremacy of one of two conflicting ideas or principles in government,—democracy versus autocracy. Either autocracy as represented by the Germanic powers and Russian absolutism, or democracy as represented by those countries having constitutional governments based on the will of the people governed, had to prevail. Autocracy was defeated and democracy triumphed.

Out of that triumph arose the demand for the "self determination of peoples," and several new nations came into being. Unfortunately, these little nations fell impelled first of all to develop a so-called national spirit, and to attempt to make their new found independence as nations secure, by making themselves supposedly self-contained, self-sufficient. To that end they strove to shut other nations, and the peoples and products of other nations, out. In doing so, they actually shut themselves in. The interdependence taught by the Great War was lost in the nationalistic, economic struggle which succeeded the war.

But, as Ramsay MacDonald points out, this doctrine of national and economic self-sufficiency has completely broken down. One nation suffers loss of trade, and all nations find they, too, are suffering as a result. Unemployment prestige in one country and automatically the resultant loss of purchasing power by the citizens of that country brings about unemployment in other countries which formerly did business with it.

The United States is, perhaps, the most compact, self-contained nation in the world today. Its national policies for many decades have been developed in that belief. Yet today the United States is suffering enormous declines in trade, with millions of its people unemployed, with its government facing a deficit this year of the stupendous sum of two billions of dollars. Why? Because the prosperity of the United States is dependent upon the prosperity of other nations; because, despite all its proud boastings in the past, it is not a self-contained nation, and because, while it is not sufficient; because world depression prevails and the United States cannot escape its calamitous results.

The cities and towns of Western Canada, as well, and the doctors, lawyers, bankers, merchants, insurance and financial men, artisans and laborers who make up those urban communities are suffering today because, first of all, the farmers are suffering through loss of crops, low prices for what they have succeeded in producing, inability to market their products at a profit. Nothing else is wrong with the cities and towns, but the fact that the great primary industry of this country, agriculture, upon which they depend just the truly as the farmers themselves, has been stricken. The cities and towns are not sufficient unto themselves; they are dependent on the farms. And the farmers, in turn, are dependent upon the great consuming masses in the cities of the world to purchase their produce. Each class is dependent on the other; all are interdependent.

May this great lesson of the war and of these difficult post-war years sink in the consciousness of all people, may it become indelibly engraved in the memories of all, never to be forgotten, may it continue the education of the world that their policies must in future be based in interdependence rather than in self-sufficiency, and founded on a large and broad internationalism rather than in a selfish, narrow nationalism.

When Recovery Will Come

On talk will begin to recover when the world begins to recover, and the world will begin to recover when the impediments to world trade are reduced, war debts cancelled and free intercourse of the United States of and France so settled that they will flow into the coffers of other countries in need of the yellow-metal.

PATENTS

A list of "Patent Inventions" and how to obtain them sent free on request.

The RITCHIE Co. LTD. GILBERT

W. N. U. 1930

Federal Bird Conference

Canada now has 49 federal bird sanctuaries across the Dominion. Surveys indicate that these sanctuaries are effective in preserving bird life. A census of birds in a group of ten sanctuaries on the north shore of the St. Lawrence River in 1929 showed an average increase of all varieties of 10 per cent. since the year 1925.

Thousands Visit Observatory

Over 22,000 persons visited the Dominion Astrophysical Observatory of the Department of the Interior at Victoria, British Columbia, during the year ended March 31, 1930.

Discussing Support For Canadian Dollar

Heavy Discount Proves Restraining To United States Bankers.

United States banking and business interests are feeling the heavy discount on the Canadian dollar sometwhat of a boomerang and are considering action to alleviate their distress.

The New York Herald-Tribune, in a financial page item, remarking that "banking interests in this country are talking nuts of the situation, says there is talk in Wall Street of "support" for the Dominion currency.

"It was pointed out," says the paper, "that the further the Canadian dollar declines the more difficult it becomes to do business with Canada. If prices are scaled up to meet the deficiency realized on exchange, it naturally becomes quite impossible to compete with Canadian or British goods in the Dominion. It is reasoned that New York's interests in supporting the Canadian dollar should receive additional support from banks and corporations which have bank balances in Canada. Corporations whose subsidiaries operate in Canada but pay dividends to parent companies on this side of the border should also be interested in supporting the Canadian dollar."

Just what form the "support" would take is not pointed out, but the Herald-Tribune says it is "recognized generally it would be of mutual benefit."

Publication Restricted

Bible Printed In England By Only Three Firms

Only three publishers are allowed to print the Bible in England. They are the Oxford and Cambridge presses and the King's Printer. These publishers have been told that "there is money in the Bible," for millions of copies are sold or given away each year, and copyright does not exist in the United States. Any one who wishes, may publish the Bible, and, it was recently announced, an "Americanized" version of it will soon be issued. The American Bible Society estimates that in 1930 alone, 24,000,000 copies of the Bible, or of sections of it including one book or more, were sold or presented to those who could not afford to purchase them.

Colonization Progress

Many People Settled On Land Under Government Policy

The policy of encouraging colonization within Canada, instituted in September last year by Hon. W. A. Gordon, Minister of Immigration, and conducted in the form of a co-ordinate effort by the department and railway companies, has resulted in return to the land of approximately 42,843 people, according to a statement made public at Ottawa.

Detailed returns to November 30, 1931, show a total of 8,040 families and 17,652 single men have been placed on farms since October 1, 1930, the former as settlers and the single men as farm laborers.

Cultured Value Here

Replying to a questionnaire sent him by a New York college organ, H. L. Mencken, author, stated the situation of college students in the United States universities is concentrated upon cocas and trivial things. Very few of the professors who teach in them "are really civilized men, and relatively few of the students come from civilized homes. Thus, the cultural value of the college tends to approximate zero."

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will not be troubled by their ravages. The powders are sweet to the taste and so mild that they may be given to infants. There are non-injurious in their composition, and will not harm the child. They bring coms vomiting, but must not be taken for a dose of physic, as they are not one, but as an indication of their effective work.

Ancient Coins Found

Coins believed to be over 900 years old have been found in a cemetery in Sangsi, near Budapest, Hungary. They bear the effigy of King St. Stephen of Hungary, who was crowned in A.D. 1001, when Hungary first became an independent kingdom. The coins were found within the spot where a burial place of the heathen age was recently discovered.

Urge Use Of Home Products

Building Industry Said To Be Imperiling Huge Quantities Of Materials

An indictment of the building industry for importing millions of dollars' worth of undesirable annually, at the expense of similar produced-in-Canada goods is made in a survey released by the Montreal industrial commission on unemployment. The survey, based on a year's work by Norman Holland, chairman of the commission, will be mailed to all members of the Royal Architectural Institute of Canada, it is announced.

Canada imported from the United States in the fiscal year ended March 31, 1931, building material valued at $26,945,457. The statement deals with approximately 80 separate foreign products which, it is claimed investigation shows, were used in Canadian buildings.

Summing up, the document gives the following belief of the unemployment commission: "We believe if the independent companies were given authority to check over all specifications for such buildings as receive financial support from the public of Canada, this would bring back to Canadian factories in one year at least half of the $27,000,000 worth of business which now goes to foreign countries."

Diseases Of Ancients

X-Ray Reveals Troubles Of People Who Lived 3,000 Years Ago

In ancient Egypt at least four out of five persons had pyorrhea, children had rickets, the aged had cases of arthritis and arteriosclerosis presumably were favourite topics when the elders swapped clinical stories.

These are discoveries announced after two years' study at the Field Museum of Natural History in Chicago, where scientists diverted X-rays from modern medical problems to historical secrets, focused them back over the centuries, and conducted autopsies on persons dead 3,000 years.

A Foe To Asthma.

Give Asthma half a chance and it gains ground rapidly. But give it repeated treatments of Dr. J. D. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right into the blood and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Had To Be Satisfied

"H'm! I don't like the look of your wife at all, Mr. Blunt," said the doctor, after he had examined the patient.

"Neither do I," answered Blunt, "but still she's a good wife, and looks after the children and the house well —so I can't grumble, I suppose."

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them *fresh* until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

HUNTER-MARTIN & CO., REGINA, SASK.

Interesting Statistics

Show Indians In Canada Are Thrifty and Prosperous

The census of Indians in Canada in 1929 gave the total number of men, women and children as 108,012. These are, of course, not all farmers, some being engaged in hunting and trapping, in lumbering, commercial fishing, and in transportation. However, according to the records of the Department of Indian Affairs, they had in the above year all told 1,101,175 acres of land fenced and 236,028 acres under actual cultivation. Other figures relating to the whole Indian community are: Brick, stone or frame dwellings, 9,442; other dwellings (mostly log), 11,880; churches, 256; council houses, 124; schoolhouses, 280; sawmills, 32. In addition to the number of day schoolhouses, there are 78 residential schools devoted to the education of the Indian population.

One of the commonest complaints of infants is worms, and the most effective application for them is Miller Graves' Worm Exterminator.

Canadian People Are Buying More Luxuries

Indication Confidence In General Improvement Of Economic Conditions

The Canadian public has been purchasing more luxuries recently than for months past, indicating a possible loosening up of ready money and a more general confidence throughout the Dominion in the general improvement of economic conditions, states the department of trade and commerce in a statistical review.

The Dominion Bureau of Statistics, says the review, reports larger retail sales of radio and other musical instruments in October than in any month since last December. Sales by candy stores also were greater. Retail sales by furniture stores and by general department stores also were reported larger.

No More Examinations

Entrance examinations in Manitoba schools will be abolished in favour of recommendations by teachers on pupil's work throughout the term. Examinations which in former years have been the test for graduating from public to high schools, have been discontinued. In future graduation from public schools will be made on recommendation of the teacher.

Movement To Have All Eastern Shipments Of Grain Routed Through Canadian Ports

"No obstacle that cannot be overcome stands in the way of Canadian grain traffic through all-Canadian ports. Such was the conviction voiced at Halifax recently by Col. Earle C. Phinney, chairman of the Halifax Harbor Commission.

Speaking at a dinner designed to secure co-operation in furtherance of a campaign to acquaint all sections of Canada with "the fact that inland sections of this country will benefit to the same extent as Halifax and St. John from such a movement," the chief commissioner called for a getting together of every business force in Halifax and the maritimes to make it an eventuality.

"The major problems involved are national, not local," he said, "but we, at present, are the plaintiffs and we must carry the case. The rest of Canada is sympathetic, but unless there is complete unity among ourselves, we cannot go to other sections of the Dominion and bring back to Canadian factories in one year at least half of the $27,000,000 worth of business which now goes to foreign countries."

New Breed Of Rabbit

Has Fur Colour and Texture Of Beaver Is Claim

A new breed of rabbit, with fur the color and texture of beaver has been developed after twelve years of scientific experiment. Dr. C. F. Friend, rabbit fancier, and organizer of the Fur Rabbit Breeders Federation, Chicago, announced perfection of the breed prior to opening of the first display of the new offspring of the Lapin Canicular family.

The rabbit, scientifically attributed to a mutation or a biological change in cells, reached its present development in this country after discovery 12 years ago in France.

Through application of the Mendelian law, Dr. Friend reported successful experiments have also been practised out in the development of rabbits bearing fur closely akin to ermine, seal and chinchilla.

Government Rejects Manitoba Farm Plan

Unemployment Relief Measure Turned Down By Federal Authorities

Plans to place selected families on Manitoba farms as an unemployment relief measure, proposed by the provincial government, were turned down by the Federal Government, it was announced in a letter to the deputy minister of public works from Harry Hereford, director of Dominion relief at Ottawa.

The scheme was intended to establish families on farms on a co-operative basis to keep roads open. Flight Lieutenant Carefoot, and Flight Sergeant Winsle, stationed at the R.C.A.F. base at Lac du Lac Lake, are piloting the two "planes being used.

One hundred barrels of apples to an acre is considered a profitable crop from a full-grown orchard.

"Be sure you're right—then go ahead" may be good advice, but not always for pedestrians.

The common name of the cicada is "locust."

Shetland Sheep Wool Made into Blankets

Imported Flock Owned By London Men Yields Heavy Clip

The only Shetland sheep wool blankets ever made in Canada were made for Drs. Hugh and W. J. Stevenson, the wool being this year's clip from the herd owned by the Londoners at their Pond Mills stock farm.

These blankets are uncoloured, but retain the natural chocolate brown fleece of the wool just as it grows on the backs of the hardy little island sheep. The texture of the blankets is luxuriously soft and heavy.

These little known sheep were brought to Western Ontario from Shetland by Drs. Stevenson two years ago, and have proved both adaptable to the climate and profitable. The wool is remarkably fine and long and yields a fairly heavy clip. The sheep themselves, though a wild breed, have a hunting sense that helps to bring them back to the fold, and as can too, they are excellent.

Saves Keeping Roads Open

Airplanes Carrying Supplies Weekly To Northern Relief Camps

Making their first trip December 4, R.C.A.F. aeroplanes being used this year to take supplies to relief work camps in the Prince Albert National Park, landed at Prince Albert, took on a load of 1lbs pounds, and then took off for Clearsand Lake camp set in the midst of the wilderness of pine and spruce near where boundary is being cut out by single jobless transients. Six camps are to be opened up, and from now on the trips will be made regularly once a week.

This is considered a simpler solution of the problem of supplying the camps with food than by attempting to keep roads open. Flight Lieutenant Carefoot, and Flight Sergeant Winsle, stationed at the R.C.A.F. base at Lac du Lac Lake, are piloting the two "planes being used.

One hundred barrels of apples to an acre is considered a profitable crop from a full-grown orchard.

"Be sure you're right—then go ahead" may be good advice, but not always for pedestrians.

The common name of the cicada is "locust."

Hardwoods That Are Native To Canada Have Never Been Properly Appreciated

Lumbering and pulpwood operations provide work and wages for thousands of labourers, offer a medium of investment in one of Canada's richest natural resources, and provide salaries for a large group of executive and technical employees. An economic crisis should focus attention on the natural resources of a country and induce a desire to utilize these natural resources to best advantage. The hardwood lumber industry of Canada has not been accorded the additional sustaining support which so many other industries have received.

Canada's native hardwoods, even in normal times, have never been sufficiently appreciated. Their properties, characteristics, and adaptability for service have never become widely known. It has always been thought necessary to import certain woods for certain specific purposes. These imported hardwoods have been chiefly gumwood, hickory, mahogany, sycamore, yellow poplar, rosewood, oak, walnut and ash. This importation is principally from the United States. Thus 132,671,000 ft. b.m. in 1925; 130,180,000 ft. b.m. in 1929; and 75,018,000 ft. b.m. in 1930 of hardwoods were imported from that country. In addition considerable quantities of hardwood flooring were also imported. Depression or no depression, some of this importation is certainly justified, as most of these species do not occur in Canada and accordingly will always be required for specific purposes. At the same time there are certain Canadian hardwoods whose characteristics adapt them admirably for identically the same uses, interior trim, flooring, furniture, implements, machinery parts, shipbuilding, vehicles, etc., as these imported woods. In fact it has been demonstrated that Canadian hardwoods are in many cases not only equal but superior to imported hardwoods.

It is not realized that many of our hardwood forests are going to waste. Good forestry practice requires a tree to be cut when it is mature, not after or before. A tree cut at maturity yields the maximum in utility value. After maturity it starts to decline, becomes more subject to the ravages of decay, and finally as a disease spreader becomes a menace to the rest of the forest. In spite of the fact that our hardwood resources are of great potential value, hardwood logging operations are not being carried on at a rate fast enough to keep the forest in a healthy condition. Thus only 255,425,000 ft. b.m. of Canadian hardwoods were produced in 1928, and only 266,169,000 ft. b.m. and 183,823,000 ft. b.m. in 1929 and 1930 respectively. This represents a rate of cutting of about two per cent. of the total stand available; and yet yearly there are imported into Canada, a land of immense forest resources, thousands of feet of competing lumber.

These foreign woods are competing species. Our native woods are not inferior in quality and adaptability for service. It is not a question of principally from the United States. Thus 132,671,000 ft. b.m. in 1925; 130,180,000 ft. b.m. in 1929; and 75,018,000 ft. b.m. in 1930 of hardwoods were imported from that country. In addition considerable quantities of hardwood flooring were also imported. Depression or no depression, some of this importation is certainly justified, as most of these species do not occur in Canada and accordingly will always be required for specific purposes. At the same time there are certain Canadian hardwoods whose characteristics adapt them admirably for identically the same uses, interior trim, flooring, furniture, implements, machinery parts, shipbuilding, vehicles, etc., as these imported woods. In fact it has been demonstrated that Canadian hardwoods are in many cases not only equal but superior to imported hardwoods.

It is not realized that many of our hardwood forests are going to waste. Good forestry practice requires a tree to be cut when it is mature, not after or before. BERYL AND BANANAS

To which should be added another "B"—Bermuda. Perhaps it seems strange to link "a silicate of beryllium and aluminum usually in rare distinctly pale tints, when transparent flushes blue and green," with the familiar banana, but the fact is surprisingly when you find it growing, in upside down and green.

But it is strange. But then it is just as strange to leave the snow and ice of Canada and less than 60 hours later to find oneself in the gentle, soft-tropic warmth of Bermuda.

"Beryl," as a metaphor, expresses the transparent beauty of the seas around Bermuda. Bananas are the least strange of the many luscious fruits with which the island abounds. It is a fascinating combination of ancient and modern that one reaches by 20,021 ton Canadian Pacific Duchess steamer sailing from New York every Wednesday and Saturday. Her sisters are also in the island—yet there is an ultra-modern Diesel-electric railway. A "cow's breakfast" bat, a victim of a skirt, and pandoscript paste tied up by a one-strap "sailing" suffice laughing darkies for omfrey, yet five minutes from where the "Duchess of York" and "Duchess of Atholl" dock is the up-to-date Hamilton Hotel, Bermuda's largest hostelry. Only a 20 minutes' walk separates ship and Princess Hotel, while short drives or launch trips reach many other delightful inns and guest houses.

Canadians in increasing numbers are making Bermuda their winter playground, more so since the inauguration last year of steamship service by trans-Atlantic liners.

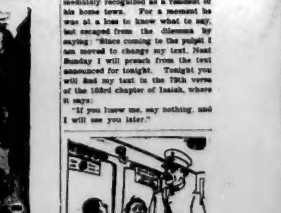
(A.) Stepping from ship to street.
(B) "Have a banana?" A bright-hued chameleon attained a bright eye and delayed when the young lady appeared on the scene—otherwise it was just like picking an apple in the orchard back home.
(C) Ancient and modern! The palatial Hamilton Hotel is in effective contrast with the horse-drawn carriage.

Took Safest Course

Colored Preacher Colored Text To Suit Occasion

Having urgent reasons for leaving his home town in two days, a colored man located in a village not far distant. After a few months he entered the ministry. One night when he arose to preach he noticed, not far from the front, a man whom he immediately recognized as a resident of his home town. For a moment he was at a loss to know what to say, but escaped from the dilemma by saying: "Since coming to the pulpit I can reveal to change my text. Next Sunday I will preach from the text announced for tonight. Tonight you will find my text in the 79th verse of the 183rd chapter of Isaiah, where it says:

"If you know me, say nothing, and I will see you later."



Conductor: "How old are you?"
Youth: "Not quite nine—this is my brother—Just three months younger than I am!"—Lustige Kolner Zeitung, Cologne.

WORLD HAPPENINGS BRIEFLY TOLD

The Soviet Government is preparing to discard the famous Communist system of rationing food and clothes.

Britain will make no binding trade agreements until the outcome of the Imperial Conference is known.

Control hoating is proposed for Churchill, Manitoba's new seaport on Hudson Bay.

Captain Tikhon N. Agapeyeff, former commander of the Russian Imperial Navy, died suddenly at Halifax.

Rt. Hon. Winston Churchill, noted British statesman, is on a lecture tour in the United States.

Improved train facilities are greatly needed in Peace River country, E. H. Kloth, delegate to the Alberta pool meeting, declared.

Population of Russia in 1926, the Academy of Sciences, Moscow, estimates, will be 240,000,000.

The pool of the bells of St. Peter's has been heard for the first time in many nations in a broadcast from the Vatican radio station.

Miss Ethel Catherwood, Saskatoon's Olympic champion, has taken up residence in San Francisco where she will remain until after the 1932 Olympic games.

Unless a solution is found for the present problem in the dairy industry of the province, Quebec faces the possibility of the abandonment of 60,000 farms.

The Department of Public Works, Ottawa, has approved of a numbered highway and railway bridge which the Fraser River Bridge Company propose building at Port Mann, British Columbia.

Means Valuable Saving

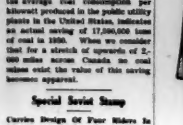
Canada's Energy Requirements Met By Water-Power Industry

The water-power industry in Canada supplies nearly the entire energy requirements of the country, exclusive of that utilized for steam railways, automobiles, etc., and as a further measure of its importance it may be mentioned that the capital investment involved in rapidly approaching a billion and a half dollars. The records of the Dominion Water Power and Hydrometric Bureau, Department of the Interior, show that during 1930 upwards of twenty billion kilowatt hours of energy were produced which, using the figure for the average coal consumption per kilowatt produced in the public utility plants in the United States, indicates an actual saving of 17,500,000 tons of coal in 1930. When we consider that for a network of upwards of 2,000 miles across Canada no coal unless entail the value of this saving becomes apparent.

Special Soviet Stamp

Carries Design Of Four Riders In Red Race

On the occasion of the tenth anniversary of the organization of the Red army, a regular stamp-duty attachment a special stamp which bears a design strikingly similar to the traditional proletarianisms of the four horsemen of the Apocalypse, was issued by the Soviet Government. Four riders are shown in a mad race across the face of the stamp, on which is roughly outlined a map of the European section of the Soviet Union. The first of the horsemen pictured carries a large red hammer; his three companions, each leaning far forward on his horse, carry their weapons above their heads.



"Your daughter is learning to sing? Is she a success?"

"Yes. Already two tenants below have moved."—Lustige Kolner Zeitung, Cologne.

W. N. U. 1930

North Country Brought Close To Civilization

Remote Settlements Served By Chain Of Wireless Stations

Ten years ago communication between points within the North West Territories and the world at large involved a delay of weeks during the summer season and of months during the winter. Seven years ago the Department of the Interior, through its North West Territories and Yukon Branch, took the first step towards bringing the north country closer to civilization. With Edmonton as a base a chain of wireless stations was built which served Simpson on the Mackenzie River as well as Dawson and Mayo in the Yukon Territory. Since that year the northern wireless system has been extended until today first South Resolution, Simpson, Norman, Aklavik, and Herschel Island on the west with Coppermine and Chesterfield Inlet to the east are equipped with wireless offices, which handle ordinary commercial messages to and from all parts of the world. In addition some of the more northerly offices are equipped with broadcasting plants by means of which they are enabled to relay commercial messages and daily news bulletins to the more remote settlements.

Gold Member's Bet

Vincent Carter, member of the United States House of Representatives from Wyoming, entered a shop where many odds and ends were displayed in a big feminine crowd. He respectfully put down his hat and walked around. In less than no time the shopwoman had sold the hat for the benefit of a hospital in Ketchikan, Alaska.

FASHION

No. 418—Sterling Costume Slip. This style is designed in sizes 4, 6, 8, 10, 12 and 14 years. Size 8 requires 1¾ yards of 32-inch material.

No. 427—Youthful Pajamas. This style is designed in sizes 14, 16, 18, 20 years, 36 and 38 inches bust measure. Size 16 requires 4¼ yards of 36-inch material with ¾ yard of 36-inch contrasting and 4¼ yards of 32-inch binding to complete jacket trimming. ¾ yard of 32-inch material.

No. 424—Complain Coatie. This style is designed in sizes 2, 4, and 6 years. Size 4 requires 3 yards of 36-inch material.

No. 386—Walking Suit a Shirt. This style is designed in sizes 14½, 15, 15½, 16, 16½, 17, 17½, 18, 18½ and 19 inches neck. Size 16½ requires 3½ yards of 36-inch material.

No. 146—For Boy or Mother. This style is designed in sizes 12, 14, 16 years, 34, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3¼ yards of 36-inch material with ¾ yard of 36-inch contrasting.

No. 397—Smocked Bedjacket. This style is designed in sizes 11, 13, 15, 17 years. Size 15 requires 2¾ yards of 36-inch material with 1 yard of 36-inch contrasting and ¾ yard of 32-inch ribbon.

Grain Show Held At Prince Albert

Fine Samples Of Wheat and Oats Were Exhibited

With a view to producing grain of sufficiently high quality to exhibit at the World's Grain Show at Regina, Sask., in 1932, the Prince Albert Board of Trade staged a grain show recently.

The samples exhibited were produced from seed sent out by the board to the most successful growers of the district. There were 15 lots of Reward wheat sent out in five-bushel lots, and ten lots of Marvelous oats of five bushels each.

The exhibit showed the results in both classes, the winners being chosen for plumpness, soundness, colour, freedom from disease and from other varieties of grain.

Professor Manley Champion, of the Field Husbandry Department, Saskatchewan University, was the judge. The yield of the grain on exhibit was: Wheat, 40 to 50 bushels per acre; oats, 80 to 90 bushels per acre. There were 26 exhibitors in all. First, second and third prizes were awarded in both classes and considered them, in view of the scale of the best grade of flour produced by the Weyburn Milling Company.

Knew His Horse

An old gentleman who had just made a big haul that he must buy a horse, his old mare having become a little uncertain on fuel, met a dealer. "Have you," he said, "I'm thinking of buying a horse. Do you know of anyone who's got a nice animal to sell?" The dealer replied, "I think Bill Davis has, sir, or he will have in a day or two. I sold him one yesterday!"

SUNDAY SCHOOL LESSON

DECEMBER 28

THE SUPREME GIFT OF LOVE—CHRISTMAS LESSON

Golden Text: "Beloved, if God so loved us, we also ought to love one another."—1 John 4:11.

Lesson: 1 John 4:7-19.

Devotional Reading: John 13:12-17.

Explanations and Comments

Love the Proof Of Sonship, verses 7, 8.—"Beloved" wrote John, the beloved disciple, "let us love one another: for love is of God; and every one that loveth is begotten of God, and knoweth God." Love is not an attribute of God, but His very Being, and since love proceeds from God, we who are His sons must prove our sonship by our love. "He that loveth not, knoweth not God; for God is love." This negative counterpart of verse 7 emphasizes the thought that "Love is the lens through which I discern the secret things of God."

Their Supreme Gift Of God, verses 9, 10.—The incarnation is the manifestation of God's love. For God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish, but have eternal life, John 3:16.

God's Love the Ground For Our Love Of Others, verse 11.—God's love for us lays upon us the obligation of loving one another, for in this we show our love for God.

Love the Proof Of God's Spirit In Us, verses 12-16.—God's presence cannot be seen, but it can be appreciated by its results: where love is seen in action, it proves the presence of God's Spirit within him. And God's love is completed in us by His abiding in us to the most complete expression of His love. Through the Spirit which God has given us we have the consciousness of actual fellowship with Him. Furthermore, we have received great proof of His love, which we can believe, and hear witness to those who lived with Him on earth have seen Him with our eyes and to His life we can testify; in that the Father hath sent the Son to be the Saviour of the world. He who confesses that Jesus is the Son of God, lives in free fellowship with God. And we who saw Jesus know the love which God hath for us. God is love, and he that abideth in love abideth in God, and God abideth in him. "There is only one love, and our love, whatever it may be, is merely an infinitesimal expression of that love."

Love In Relation To the Day Of Judgment, verses 17, 18.—We may know that love is made perfect with us, when we can look forward with confidence to the great day of judgment, because as He is even so are we in this world. "This is to be our aim: that the life of Christ in us and that do what the life of Christ was and did in Himself. We are to so live that our life shall repeat the life of Jesus of Nazareth."—Alexander Maclaren.

"Fear springs from the consciousness that punishment is deserved, and from the expectation that it will be inflicted. Love emancipates from fear."

"There is no fear in love, but perfect love casteth out fear." Perfect love or love made perfect is absence of fear, confidence that hath here and hereafter no real evil can overtake us. To be in God, to be as Christ is, must mean safety."—Hugh Price Hughes.

"A world of charity I dreamed was sight,
Where chaos lived without reason;
The chasm of terror of that sight
No brush of mine can ever paint.

"From dream of night to truth of day,
I know as fact, naught can gainsay
That God is love, and love is law.
—James I. Vance.

Toronto May Float Loan

Would Follow Plan Of Recent Dominion Service Loan

Following the recent successful refutation of the Dominion Service Loan, it was stated that the next municipal bond issue in Toronto may be made on the same internal basis, rather than payable in United States money as well as Canadian money. Civic Finance Commissioner George Wilson said he favoured the idea of Toronto doing its financing internally or in Canada, "when the times arrive and it is propitious to do so." The city, however, is not contemplating going on the market in the immediate future, it was said.

Ship Sea Water To London

A shipment of one and one-half tons of sea water constituted a large number of glass bottles, has travelled 7,618 miles from Calais, Peru, to Liverpool. The water was taken from the Humboldt current, which runs along the western seaboard of South America. It has been sent to London for chemical analysis to determine the properties of the Humboldt current.

Many Demands On Service

Forest Products Laboratories Of Canada Assist Wood-Using Industries

The Forest Products Laboratories of the Forest Service, Department of the Interior, extend to the wood-using industries of Canada, including the pulp and paper industry, advice and assistance in the various problems which arise in converting the standing tree into the finished commercial product.

These laboratories were first organized and established in Montreal in 1913. On account of the rapid development of the pulp and paper industry and the increase in the uses to which wood is being put, demands on the services of the Laboratories have correspondingly increased. The work is carried out in three different centres, viz., Ottawa, Montreal, and Vancouver.

The importance of Pacific Coast problems, as well as the great distance from the Montreal laboratories, made it necessary to open in 1918 a branch laboratory in Vancouver, and since its establishment the work of this branch has increased steadily. It is excellently accommodated in buildings provided by the province on the shore of inner harbour, Vancouver.

The research program of the Laboratories in Montreal was for several years seriously hampered through lack of accommodation. Besides, the pulp and paper industry had so many technical problems requiring attention that it offered to provide the pulp and paper research laboratories with better accommodation for its work. The old buildings were therefore demolished in 1927 to make way for the pulp and paper research laboratories, and the main laboratories were moved to Ottawa, where excellent facilities were available.

The main laboratories at Ottawa are operated under eight divisions as follows: Wood Preservation, Timber Mechanics, Lumber Seasoning, Timber Pathology, Timber Physics, Wood Utilization, Markets and Exhibits, and Office Administration.

Puts Fortune In Stamps

London Dealer Paid Twenty-Five Thousand Pounds For Collection

A London dealer has just put his entire fortune into one block of foreign stamps, comprising the whole issues of Abyssinian stamps that preceded the new designs of which the Emperor Haile Tafari has approved.

The catalogue value of the purchase exceeds twenty-five thousand pounds, and the collection includes the entire remarkable series, which reflect the history of Abyssinia since its accession into the postal union.

There are early stamps incorporating the symbolical Lion of Judah, others marking the memorable coronation of Ras Tafari, and three sets which bear the official surcharge of the air mail.

Chariady Fashion

Paris has gone to the charitably for its latest fashion. Since 1896 she has worn a black knitted "pelerine," a small cape which covers the shoulders. They are now vogue with all costumes and on occasions. Some will have furs to match, others velvet and satin.

British People Like Candy

The sweet-toothed people of the British Isles consume over $350,000,000 worth of candies in a year. Half this amount is spent on chocolates. In addition to this Great Britain exports over $10,000,000 worth of candies annually.

"I have said 'Good Health' to your six times, and you have taken no notice. Most I get drunk in the middle of the day just to tank you nauseous?"—Muggensturfer Blaetter, Munich.

PREMIER ASKS SUPPORT OF RED CROSS CAMPAIGN

S.S. Duchess Of Richmond, At Sea.—Prime Minister R. B. Bennett issued the following appeal to the Canadian people in support of the campaign of the Canadian Red Cross Society, which was inaugurated December 19.

"Before leaving Canada I decided to make an appeal to the people of the Dominion for a national emergency fund to be raised by voluntary subscription and used for the relief of suffering and distress during the coming winter.

"With this in view I asked the Canadian Red Cross Society to undertake, in co-operation with other organizations and societies, the necessary collection and distribution of this fund. His excellency, the governor-general, has kindly consented as president of the Red Cross, assured me of the willingness of the society to carry on this effort, and has intimated understanding, sympathy and efficiency.

"We are still faced today with difficulties that are in some respects similar to those which confronted us during the Great War. Our troubles are less serious than those of some other countries, but nevertheless, there is a great deal of distress and suffering resulting from the economic depression, unemployment, unsettlement and continued crop failure in large areas of the prairie provinces.

"Parliament authorized expenditures to be made and the government might deem best in the form of official undertakings to minimize unemployment. Through a co-operative program with provincial governments and municipalities much has been accomplished in providing relief in this way. But ever and above what has been and will be done through such regular official expenditures and channels, there are thousands of people in all parts of Canada that cannot be cared for through governmental activities. They can only be effectively dealt with through voluntary assistance and assistance.

"It is for that reason that I appeal to the generosity and public spirit of our citizens. I am proud of what they have done and are doing, but there is still an urgent problem to face us all. Never indeed has the splendid charity of the Canadian people been so much needed as it is at the present time. I feel confident that the liberality and human friendliness they have shown in the past will be expressed again on this occasion.

"I ask all the men, women and children in our Dominion who are not themselves in need, and who all organizations, civic societies and lodges of every kind, to make a sacrifice for this cause. Let us, as people make sure that no child shall go hungry or unclothed, and no sick or afflicted person shall lack care. We may be grateful that the outlook for the future is becoming brighter and we may do much to ensure a strength and fortitude in our national life by helping those of our countrymen who are in distress and want.

Closed Season Not Needed

Edmonton, Alberta.—There is no need for a closed season on ducks in 1931 in the central and northern parts of Alberta, according to a resolution passed at a meeting here of the Edmonton branch, Alberta Fish and Game Protective Association. The members went on record as opposed to a closed season next year.

More Idle In Britain

London, England.—For the first time since the end of September, British unemployment has shown an increase in the week ended November 23. The total then was 2,632,027, which was 6,913 more than the previous week and 316,383 more than at the same time a year ago.

Urges Early Conference

London, England.—Prime Minister Ramsay MacDonald told the House of Commons that his government feels that an international conference to deal with the world economic situation should be held immediately after the financial experts now meeting at Basel have made their report.

W. N. U. 1930

Ontario Aids Farm Holders

Forbids Foreclosure Of Any Mortgage Held By Province

Toronto, Ont.—The Ontario Government has notified the Provincial Agricultural Development Board which holds $35,000,000 of farm mortgages not to foreclose under any circumstances when mortgagors are unable to meet their obligation, Hon. W. H. Price, Attorney-General and Acting Premier announced. The step is being taken in order to give farmers every opportunity to weather present financial difficulties.

The Attorney-General revealed the action of the government in regard to farm mortgages during the course of an announcement that the government would bring down legislation at the next session of the legislature to provide for a modified moratorium on mortgages.

"We realize that in these times of depression, people are finding it hard to make ends meet and would be able to meet their payments are in considerable difficulty and the government is anxious to help them," said Hon. Minister of Municipal affairs, agency," said Col. Price.

"I have asked loan companies in which the province has an interest also approached sheriffs and bailiffs and made the same request. But there is no legislation at present providing for relief and the government intends to have the entire matter discussed on the floor of the legislature with a view to some form of legislation.

Supreme Court Judge Dead

Hon. Edmund L. Newcombe Taken Ill During Legislative Session

Ottawa, Ont.—A justice of the supreme court of Canada since 1924, Hon. Edmund L. Newcombe, C.M.G., died here.

He was present at the beginning of the November session of the supreme court, but took ill during the sitting.

He was born in Cornwallis, Nova Scotia, and received his education in that province. He graduated from Dalhousie with the degree of bachelor of arts when 19 years old, and completed his law course in 1881. He was called to the bar in 1884, and in 1895 he was admitted to the bar of Ontario, and the same year was appointed queen's counsel. On March 13, 1905, Mr. Newcombe was appointed deputy minister of justice.

From 1912 to 1923 Mr. Newcombe was chairman of the select committee appointed to revise the statutes of Canada. In 1909, he was Canadian delegate to the conference for international copyright legislation. He was associate British agent and counsel-agent Canada in the pecuniary claims agitation between Great Britain and the United States, prosecuting agent for his late Majesty's Government in the case in Canada; chairman of the Military Service Council of 1917-18, member ex-officio of the Canada Registration Board.

Wants To Keep Good Beats

Germany Doing Everything Possible To Remain On Standard

Basel, Switzerland.—Germany will do everything possible to remain on the gold standard, Carl Melchoir, German representative of the world bank advisory committee, assured his fellow-countrymen.

Melchoir informed the banking experts investigating Germany's capacity to pay reparations, that the German people were "horrified" at the thought of abandoning the gold standard.

Refuse To Pay Rent

Allahabad, India.—A hundred thousand peasants in 900 villages throughout this district, took part in "no rent" demonstrations and swore a common oath to refuse payment of rent. The proceedings were superintended by members of the Nationalist Congress.

Population Of France

Paris, France.—The total population of France is 41,834,923, complete returns from the census conducted last spring revealed. The department of the Seine, which includes Paris, has 4,933,850 inhabitants. The increase in all France since 1926 was 1,691,976.

Building activities in Denmark are breaking all records.

AGAIN WHEAT KING

Herman Trelle of Wembley, Alberta, has again annexed the title of the Wheat King as a result of his showing at the Chicago Grain Show. As Wheat King for the third time Mr. Trelle wins outright for the first time in history the International Wheat Cup.

France Taxes Canadian Goods

Are Exempt If Coming Through From Other Lands

Paris.—A decree imposing 15 per cent. ad valorem surtax on products of Argentine and Uruguay and an 11 per cent. surtax on Canadian goods is responsible for the indirect export premium enjoyed by these countries owing to depreciation of their currencies, was published in the official journal.

Goods proved to be passing through these countries from other lands are exempt from the surtax and goods already on the way before the decree was promulgated remain subject to previous regulations.

Completed During Job

White Man and Eskimos Brave Perils To Salvage Furs

Point Barrow, Alaska.—Using dog sleds for bridges over cracks in the ice and ropes to pull themselves over huge bergs, C. D. Morris, one of the seasoned passengers of the steamship "Baychimo," and three Eskimo trappers completed one of the most daring salvage jobs in Arctic history.

Morris and the natives, after a dispiriting struggle for 15 miles over the ice to the "Baychimo," frozen in when the Arctic winter caught her before she could escape to open water in the south, brought back ten bales of valuable furs.

Critical Of League

Manchester, England.—The Manchester Guardian, which has been critical of the League of Nations during the current Manchurian debate, carried an editorial describing the league council's efforts to solve that dispute as "futile and weak efforts which have only served to make the league contemptible in the eyes of the world."

Industry Must Prepare For Imperial Conference

If It Is To Result In Intimate Economic Partnership

London, Eng.—Industry throughout the Empire must organize itself and take a leading part in the preparations for the Ottawa Imperial Conference, says the London Times, in an editorial headed Industries and Ottawa." It expressed the opinion great satisfaction will be manifested throughout the Empire after Rt. Hon. J. H. Thomas, Dominions Secretary, makes his statement to the House of Commons.

"But," adds the Times, "much more than government departmental preparation is required to make the Ottawa conference a success. Industries themselves, both here and in the Dominions, must prepare if the conference is to result in intimate economic partnership. It should, therefore, be clear the enunciation of the British government's policy should be definite enough to encourage industries to start preparation."

British People Help In Financial Distress

Give Valuables For Auction Bringing $3,700 To Treasury

London, England.—The national treasury gained about $3,700 when jewelry, gold coins and trinkets, gifts to the nation in its day of financial distress, were auctioned. It was the most unique sale in the long history of Christie's.

The valuables were sent to Rt. Hon. Philip Snowden in the last days of his chancellorship by people in all stations of life. They represented tangible sacrifice on the nation's behalf. Some obscure women and were the sole remaining relics of their younger days when their families were prosperous. Each gift was accompanied separately so the donor might know the amount subscribed to the treasury.

Among the coins were two pennies minted for President Kruger of South Africa, a gold five-pound piece and a gold spade guinea.

English Holly From B.C.

Victoria, B.C.—Comprising 10,000 pounds of choice red berried English holly, the first carlot order of the Vancouver Island product ever to be shipped out of the province, has been despatched to Toronto, where it will arrive on December 14 and will provide Christmas decorations for about 2,000 households. The holly was grown on the holly ranch of F. S. Pemberton.

Planning Dirigible Service

London, England.—Establishment of a regular New York and London dirigible service is being discussed by Dr. Hugo Eckener, master of the Graf Zeppelin, and British air experts. The German commander said: "If we get the permission of the British Government we propose to start a trans-Atlantic service."

PREPARING TO MEET THE PROBLEM

Lord Bessborough, Governor-General of Canada (left), and Premier R. B. Bennett (right), are here seen discussing plans for the National Emergency Fund appeal, which the Prime Minister had just announced, and which is to meet distress and suffering in Canada this Winter. Mr. Bennett lays the matter before His Excellency who, as President of the Red Cross, promises the Society's fullest co-operation in helping to collect and administer this Fund.

PENSIONS COST DOMINION OVER $41,000,000

Ottawa, Ont.—Canada's annual pension liability at the end of November, apart from provision for retroactive awards, was $41,684,963. The annual liability on March 31, 1926, was $37,892,516. This announcement is made in a statement issued by Hon. Murray Maclaren, Minister of Pensions and National Health, on amendments to the Pension Act, in which Col. Maclaren sets out that the policy of the three bodies adjudicating pensions is to deal first with the most urgent cases.

The statement of the Minister reads:

"Amendments to the Pension Act in 1930, providing for a pension tribunal, pension appeal board and veteran's bureau, constituted a radical change in the administration of the Pension Act. Further amendments covered the restoration to pension of final payment cases and an extension of the legislation respecting widows.

"The result of the restoration of final payment cases has been that 9,318 pensions have been restored after medical examination and that disability has persisted without increase. In addition, since March 31, 1930, 2,239 final payment cases have been restored, owing to increasing disability.

"The provision that widows married before January 1, 1920, should receive pension on the death, from a war disability, of their husbands, has resulted in the award of 677 pensions.

"The provisions for the creation of the pension tribunal, the pension appeal court and the veterans' bureau have been far-reaching in effect, and the pensions advocates are displaying marked efficiency in the preparation and presentation of cases.

"Necessarily with the advent of new legislation, there was a deluge of applications which had in the first instance to be made to the Board of Pension Commissioners for Canada. Many of those who brought their case even a remote chance of securing pensions made application. There was a provision in the act that any application not granted by the pension board should be referred to the veterans' bureau, and to the chief commissioner, an officer appointed to represent the pension board before the tribunal and the court. This automatic reference necessarily placed a heavy new machinery, as upwards of 13,000 cases were referred, and it was impossible either for the veterans' bureau to prepare and present, or for the tribunal to hear these applications with out great delay.

"In order to make possible the administration of the act, amendments were passed during this year, 1931, whereby the personnel of the pension tribunal was increased, so that instead of there being four sections of the tribunal sitting at one time there are now six. This has meant more rapid hearing of cases. The tribunal has rendered 3,786 decisions to November 30. 1,311 of these have been in favor of the applicant and 1,963 against the applicant. The decisions during the month of November were 437, of which 195 were in favor of the applicant and 242 against.

Gale Paralyzed Shipping

Newfoundland Homes Were Flooded and Wharves Swept Away

St. John's, Nfld.—Newfoundland was culminating the worst succession of gales that swept the island dominion for two days.

Reports reaching St. John's indicated that shipping was paralyzed all along the coast, while some waterfront homes were flooded and wharves swept away. Fishing boats came word of dislocated telegraph and telephone systems.

Reminding the shore dwellers of the death-dealing cyclone-wave of 1929, a high tide rolled into Placentia Bay carrying away many wharves, small boats and much fishing gear. At Prouwetown and Davis Cove several homes were flooded.

Northern Ireland's linen trade is resuming activity.

Air Is Principal Element Of Earth

In Becoming More Real As Aviation Progresses

The U.S. Aeronautical Chamber of Commerce estimates that more than 400,000 persons will have travelled by air at the close of the year. In August alone more than 20,000 American passengers were carried on this immense ocean of the atmosphere that the Wrights first ventured on successfully in heavier-than-air machines in 1903.

This subtle and transparent sea, whose floor we had been content to creep upon since our first trials of locomotion by land and water; which naively from childhood we have thought of as a kind of vast emptiness or nothingness compared with the solid earth under our feet, becomes more and real as 400,000 of us put it under the hull of our transport planes. Decidedly it is not nothing by the exceedingly thin film of air and earth that is the environment of human life, already our perpendicular explorations have been more upward than down. Already we have made ourselves more at home in its height of air than in its depth of earth crust.

If the Aeronautical Chamber of Commerce is challenging us with its statistics to become altruistic, it is not asking so much of us then. We are asked to trust ourselves in a new but by no means untried relation to one of the principal realities of our existence; to sail an ocean whose waters, pressing heavily upon us at their base, incessantly, night and day, flow in and out of our bodies as the breath of life.

"All the creatures who walk, crawl or fix their roots on the earth," says the great geographer Elisee Reclus, "are none the less children of the air. . . . We repose on the soil, but it is of the air and in the air that we live—men, animals and plants. . . . This gaseous, transparent mass . . . which seems hardly part of the earth is, however, its principal element."—New York Herald-Tribune.

Television Not Yet Practical

Although Great Strides Have Been Made In Past Year

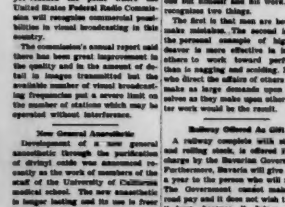
Although television has made great strides in the past year, it has not yet reached the point where the United States Federal Radio Commission will recognize commercial possibilities in visual broadcasting in this country.

The conclusion's annual report said there has been great improvement in quality and in the amount of detail in images transmitted but the available number of visual broadcasting frequencies put a severe limit on the number of stations which may be operated without interference.

New General Anesthetic

Development of a new general anesthetic through the purification of diethyl ether was announced recently as the work of members of the staff of the University of California medical school. The new anesthetic is longer lasting and its use is free from the objectionable pathological effect.

A new printing press for the Winnipeg Free Press was started by the pulling of a lever at Toronto. Westward Ho!



He: "I am surprised that our wedding is not mentioned in this column."

She: "Why should it?"

He: "It gives the dates of all the great disasters."—Pele Mele, Paris.

W. N. U. 1929

Rum Of Officer Worked

Coal Ship's Cat To Foil Custom's Guard

The second officer of a certain ship was very anxious to take some Scotch whiskey ashore with him. He managed it this way. He put the ship's cat, a wild, flighty creature, in a suitcase, walked down the gangplank, and started lugging it quickly for the street. When a customs guard stopped him, he brushed rudely by. The guard pursued, took him by the arm, and said he would have to see what was in that bag.

"You can't," said the second officer, "I won't open it. I got the ship's cat in here, and she would get away on me."

"That's too bad," said the guard. "Open her up."

The second mate did, and the cat scuttled for the ship. The officer pursued hotly. Aboard once more, it was very simple for the mate to fill the customs with whiskey and wash out again. As he went ashore, he said, wisely: "The son-of-a-gun won't get away from me this time."

Mistake Was Slight

So Minister Thought It Not Worth Mentioning

A preacher and a lawyer who were travelling together fell to discussing mistakes.

"What do you do," asked the preacher, "if you have a slip of the tongue and say something you didn't intend to say?"

"That depends," replied the lawyer. "If it is a serious mistake I go back and correct it; if only a slight one, take I pass on and do not notice it. What do you do?"

"I follow the same rule," replied the preacher. "For instance, last Sunday in the course of my sermon I intended to say that the devil was the father of liars, but by the slip of the tongue I said that the devil was the father of lawyers."

"What did you do?" asked the lawyer.

"It was such a slight mistake that I went on without noticing it."

Tries To Set Example

Head Of Great Concern Follows Good Rule

A man who has been at the head of a great concern says that he does not try to demand perfection in anyone but himself and his work. He recognizes two things.

The first is that men are bound to make mistakes. The second is that the personal example of high endeavor is more effective in leading others to work toward perfection, than is nagging and scolding. If men who direct the affairs of concerns that make as large demands upon themselves as they make upon others, better work would be the result.

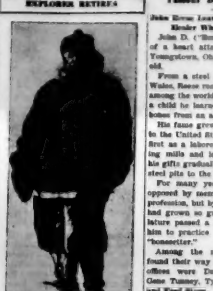
Railway Offered An Gift

A railway complete with stations and rolling stock is offered free of charge by the Bavarian Government. Furthermore, Bavaria will give $2,000 a year to the person who will run it. The Government's conduct makes the cost pay and it does not wish to shut it down because it brings many foreigners to Bavaria's tourists and holiday makers in the country.

Event For Canadians

On August 31, 1923, there will take place the unique if relatively rare event of a total eclipse of the sun visible in Canada. The last such eclipse occurred in 1925, and no further total eclipses except the one next year will cross Canada until 1954, states the Canadian Observatory of the Department of the Interior.

EXPLORER RETIRES



Major L. Burwash, well known Canadian Arctic explorer, who is being retired from the Government service at the end of the year.

Showed Real Courtesy

Kingfish Lady Used Maid To Wedding In Both Boys

There are often charming decisions about the relations between old fashioned masters, mistresses and their household servants, when it is revealed that the family nurse, the maid or the butler is the gardener as almost like one of the family, and are treated with the utmost consideration and respect, especially after long years of service. It is the rare exception to find the blood stock of England "high hatting" their domestics.

Quite recently the lady's maid of a peer's daughter was married. The maid had not been with her very long but the lady went to the wedding. And how!

The wedding was in St. George's Church, Hanover Square, London, England, one of the fashionable churches of Mayfair. The lady gave her Rolls-Royce car to the maid to go to church in, and followed herself in a taxi!

The action of a real lady.

Canada's Turbine Installation

The total turbine installation in Canada on January 1, 1930, according to the Dominion Water Power and Hydrometric Bureau, Department of the Interior, amounted to 4,132,000 horse-power or only a little more than 14 per cent. of the permissible installation of the known water-power resources of the Dominion.

Famous Bonesetter Dead

John Byrne Learned Art From Welsh Healer Whom Quite Young

John D. ("Bonesetter") Byrne died of a heart attack at a hospital in Youngstown, Ohio. He was 76 years old.

From a steel worker in his native Wales, Reese rose to a unique position among the world's healers. While still a child he learned the art of setting bones from an aged Welsh healer.

His fame grew, and when he came to the United States in 1847 he went first as a laborer in Pittsburgh rolling mills and later in Youngstown, his gift gradually took him from the steel pits to the healer's chair.

For many years he was bitterly opposed by members of the medical profession, but by 1890 his reputation had grown so great the Ohio Legislature passed a special act enabling him to practice the profession of "bonesetter."

Among the noted patients who found their way to his unpretentious offices were David Lloyd George, Gene Tunney, Ty Cobb, Will Rogers and Fred Stone.

His fees were often adjusted to his patient, it was said, though none ever was turned away.

Canada Taking Part In Postal Convention

Joins With United States, Spain, and Latin American Countries

Canada joins with the United States, Spain and the Latin American countries in a new postal convention becoming effective on March next, according to announcement made by Postmaster-General Brown at Washington.

The postmaster made the announcement after the return of delegates to the session of the Pan American Postal Congress held in Madrid.

The new convention provided for complete freedom of transit through the signatory countries and by the services maintained by them. Domestic rates and conditions of each country will apply to transit mail to any of the others except that the United States reserves the right to make a 50 per cent. increase in its postage rates to Latin America. The name of the Union was changed from "Pan American Postal Union" to "Postal Union of the Americas and Spain."

The Latest Worry

Bowling Boat Place To Keep Your Driver's License

Don't leave your driver's license in your other pair of pants when you change your clothes, if you have another pair of pants in 1931. Don't leave it in your car, for somebody may steal the car, and you may get pinched while driving a loaner. Don't carry it in your pocketbook, for somebody may pick your pocketbook. Don't carry it in your vest pocket or it will wear itself out riding around there, and probably blow away. Put it in a little rubber bag and hang it around your neck on a steel rope and under your shirt like a little tin tag in war time.

It is found that salmon meat is rich in vitamin "D," an important food substance commonly obtained from eggs and dairy products.

Tribute Paid To England

Man Contributed Leadership and Organization To World's Economic Life

The following tribute is paid England in the Baltimore Sun, by R. M. Anderson, Jr., the economist of the Chase National Bank:

"England has contributed leadership and organization to the world's economic life. A very large part of the world's capital is intangible capital—organization, good will, established trade relationships, knowledge and technique, prestige, courage and enterprise. In all previous periods of economic trouble the world has had the benefit of the wisdom, and the courage, and the prestige, and the money of London. The British, with their world-wide knowledge of economic life, in all previous crises have been quick to sense unusual situations, quick to take advantage of weak markets, buying bargains and thus preventing market disorganization. They have been quick in giving credit to threatened weak spots which could be saved if given a little time for mobilizing slow assets to meet quick liabilities. Small countries, suddenly meeting financial pressure, appealed to London for assistance and got it. . . . It is no disparagement of our own economic organization to say that it is inadequately prepared to take on short notice the problems with which London has been dealing for a hundred years. We need London, and we are still accustomed to lean on London, even though our need for her be not as great as it was in the pre-war period.

Russia's Wheat Crop Fails

Because Farm Machinery Was Not Ready For Planting Time

Russia's 1931 wheat crop, which has been scaring wheat producers the world over for a year, is a failure because Russia's farm machinery was not ready at the proper time for planting, its harvesting was sloppily wrecked by bad handling when it did arrive, the Russian farmer refuses to accept information on the proper use and use of any machine, doesn't care whether it runs or not, and "sleep is one thing he sure loves." So reports an Illinois machinery instructor after some time on a Russian farm mind.

A Detroit industrialist, lately returned from the land of the Soviets, assures us that the same statements are true of the installation and use of machinery in Russian industry in general, and opines that the Russians will never get any further with productive machinery than the Chinese. Up to this writing the famous five-year plan looks about as real as a Hallowe'en false face.

All Dressed Up

This story comes to us from the hills of Arkansas. A young couple was preparing to go to a party. The young man finished dressing and stood aside to let his wife give her appreval. Surveying him from head to foot, she said: "I don't see why you hate us to go to parties, Elmer. You look good in shoes."

Needed Block and Tackle

Six pinso movers, with block and tackle, were employed by an undertaker to lift Charles Ingalls, who weighed 633 pounds, in a casket weighing 408 pounds. He was a butcher who died of fatty degeneration of the heart. He won second place in a fat man's competition several months ago at Los Angeles.

Every day writes a new chapter in the rise of grain prices—the best possible kind of cereal story.

The Just Man: "I never vote. I pay for my own beer—Simplicissimus.

In These Trying Times

SCOTT'S EMULSION

of Norwegian Cod Liver Oil

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of

"The Splendid Path," "The Herald Of The Red."

Hodder & Stoughton, Ltd., London.

CHAPTER VIII.—Continued.

The idea that she might be an unwelcome guest at Staple filled Jean with lively consternation, and by the time she had accomplished the necessary change of train at Exeter, she had found herself being trundled along on the leisurely branch line which conducted her to her ultimate destination, she had succeeded in working herself up into a condition that almost verged upon panic.

"Coming to-day! Coombe Exwic!"

The sing-song intonation of a depressed-looking porter, first rising from a low note to a higher, then descending in contrary motion abruptly from high to low, was punctuated by the sharper, clipped pronouncement of the stationmaster's name, at the top the length of the platform declaiming "Mawvie! Mawvie! Mawvie!" with a tenacious and persistent repetition that reminded one of a cuckoo in June.

Apparently both stationmaster and porter were too much absorbed in the frenzied strophe and antistrophe effect they were producing to observe that any passenger, handicapped by luggage, contemplated descending from the train—unexpected arrivals were of rare occurrence at Coombe Exwic—and Jean therefore hastened to transfer herself and her handluggage to the platform unassisted. A minute later the train snaked on its way again, leaving the stationmaster and the depressed porter grouped in astonished admiration before the numerous trunks and suitcases, labelled "Peterson," which the luggage van of the departing train had vomited forth.

To the humble mind, such an unwonted accumulation argued a passenger of quite superlative importance, and with one accord the combined glances of the station staff raked the intervening platform, to discover Jean standing somewhat forlornly in the middle of it, surrounded by the results of her luggage. The stationmaster hurried forward immediately to do the honours, and Jean addressed him eagerly.

"I want a fare—cab"—correcting herself hastily—"to take me to Staple Manor."

The man shook his head.

"There are no cabs here, miss," he informed her regretfully. "Anyone that wants to be met orders Wonsnott's waggonette in advance." Then, seeing Jean's face lengthen, he continued hastily: "But if they're expecting you up at Staple, miss, they'll be sure to send one of the cars to meet you. There!"—triumphantly, as the clang-clang of an approaching motor came to them clearly on the crisp, cold air—"that'll be it, for certain.

Followed the sound of a car braking to a standstill in the road outside the station, and almost immediately a masculine figure appeared advancing rapidly from the lower end of the platform.

Even through the dusk of the winter's afternoon Jean was struck by something curiously familiar in the man's easy, swinging stride. A surge of memories came flooding over her, and she felt her breath catch in her throat at the sudden possibility which flashed into her mind. Every instinct she was in doubt—the thing seemed so amazingly improbable. Then, turning his head, the stationmaster moved respectfully aside, and she found herself face to face with the unknown Englishman from Montavan.

She gazed at him speechlessly, and for a moment he, too, seemed taken aback. His eyes met hers in a startled, leaping glance of recognition and something more, something that set her pulses racing unsteadily.

"Little comrade!" She could have sworn the words escaped him. Then, poised in the same instant, she saw the old, rather weary gravity replace the sudden fire that had blazed up in the man's eyes, quenching its light.

"So—you are Miss Peterson!"

There was no pleasure, no welcome in his tone, rather, an accent of ironical vexation as though Fate had played some scurvy trick upon him.

"Yes." The brief monosyllable came baldly in reply; she hardly knew how to answer him, or what his mood meant. Then, hastily calling up her reserves she went on lightly: "You don't seem very pleased to see me. Shall I go away again?"

His mouth relaxed into a grim smile.

"This isn't Clapham Junction," he answered tersely. "There won't be a train till ten o'clock tonight."

A glint of humour danced in Jean's eyes.

"In that case," she returned gravely, "what shall we do?"

"I don't advise" he replied promptly. "I apologise. Please forgive such an ungracious reception Miss Peterson—but you must understand it was something in the nature of a surprise to find that you were—you!"

"Disappointing?"

"It's given you an unfair advantage, too," she replied. "I still haven't penetrated your incognito—and I suppose you are Mr. Brennan?"

"No. Nick Brennan's my half-brother. I'm Blake Torrington, and as no doubt you are unable to make out yourself, I came instead. Shall we go? I'll give the stationmaster instructions about your luggage."

So the unknown Englishman of Montavan was the man of whom the two women at the neighboring lunch table at the Ritz had been gossiping—the central figure of that most tragic love-affair! Jean thought she understood now, now the origin of those embittered comments he had let fall when they were together in the mountains.

In silence she followed him out of the Ritz's wayside station to where the big head-lamps of a stationary car threw a blaze of light on the road-way, and presently they were slipping smoothly along between the high hedges which flanked the road on either hand.

CHAPTER IX.

The Master Of Staple

It was too dark to distinguish details on the big car flew along, but Jean found herself yielding instinctively to the still, mysterious charm of the country-side at dusk.

A slender young moon drifted like a curled petal in the dusky blue of the calm sky, its pale light faintly outlining the tops of the trees and hills, gracious curves of distant hills, and touching the mist that filled the valleys to a nebulous, pearly glimmer, so that to Jean's eager eyes the foot of the hills seemed laved by some phantom sea of fancy.

She felt no inclination to talk. The smooth rhythm of the pulsing car, the chill sweetness of the evening air against her face, the shadowy, half-revealed landscape all combined to lull her into a mood of tranquil appreciation, aloof and restful after the fatigue of her journey and the shock of her unexpected meeting with the Englishman from Montavan. She knew that being she would have to take up the thread of things again, adjust her mind to the day's surprising developments, but just for the moment she was content to let everything else slide and simply enjoy this first exquisite revelation of twilit Devon.

For a long time they drove in silence, Torrington seeming no more disposed to talk than she herself.

Presently, however, he slowed the car down and, half-turning in his seat, addressed her abruptly.

"This is somewhat in the nature of an anti-climax," he remarked, the comment quite evidently springing from the thoughts which had been absorbing him.

He spoke curtly, as though he resented the march of events. Jean felt herself jolted suddenly out of the placid reverie into which she had fallen.

"Yes. It is odd we should meet again so soon," she assented hurriedly.

"The silence has been broken—after all! You may be sure, Miss Peterson, it was by no will of mine."

Jean smiled under cover of the darkness.

"You're not very complimentary," she murmured. "I'm sorry my presence seems to afford you so little satisfaction.' There was a ripple of laughter in her tone.

"Is it not that." As he spoke, he slackened speed until the car was barely moving. "You know it's not that." In the dusk his voice trembled. "But, all the same, I'm going to ask you to—forget Montavan."

(To Be Continued.)

Used His Prerogative

Judge Ruled Man Can Stretch His Imagination When Courting

Superior Judge Thomas Gould sat in court at Los Angeles, where Lotus Phillips entered a plea for the annulment of her marriage to Stanley Phillips. The ground was that when Stanley had come to do his courting he had made promises of a bright future. He was a man of some importance according to his own statements. After the marriage Lotus found that her husband was a very ordinary person, possessed of little cash, and he failed rather dismally to live up to the picture of opulence he had painted in former days.

Then the judge told that the lady in the case had no grounds to secure an undoing of the marriage tie. He even went so far as to state plainly that men had for years been stretching their pictures of what they would do if the little lady would only say yes. His worship said there was a written law which held in check the language used in courting, and a man's imagination would be as much as he pleased to make it wiggle in his efforts to win the object of his affections.

Of course, by the same token, there is no law which makes it necessary for the lady to believe all that the ardent suitor says, now, the origin of many communiques keep it for sale. Being easily procurable and extremely moderate in price, no one should be without a bottle of it.

An Aid To Efficiency

London Physician Says Headache Makes Women Work Better

Headaches increase the efficiency of the average woman worker.

This startling theory is advanced by a Harley Street physician who has conducted a lengthy survey of the health of 500 women piece-workers.

For six months the "women were asked to record daily on a chart the state of their health.

These were compared from day to day with the output of the work, and it was found that most work was done on the days when a woman complained of a headache.

Concentration on their work to forget the pain is the explanation offered.

Figured To a Minute

Mrs. Hesspeck is going away for the first time in her married life.

Mrs. Hesspeck: "Do you know what time my train goes tomorrow?"

Hesspeck: "Yes, dear, from now it is 12 hours 27 minutes."

Primitive Motor Cars

England Had the First Self-Propelled Road Vehicle

Austria recently celebrated the anniversary of Siegfried Marcus, whom Central European claim as the original inventor of the motor-car. His first car, which appeared in 1864, says an item in Answers, was driven by oil, and an improved edition of it came before the public in 1875. This Marcus's car was not the first self-propelling road vehicle. A British inventor, Richard Trevithick, ran a steam coach on the London streets 126 years ago, and for a long time the steam road vehicle was a very real competitor of the railways. The use of oil in Marcus's car, however, makes it a real landmark in the story of mechanical road transport.

Plans To Construct Perfect Aeroplane

Will Be Fool-Proof Says Former "Boy Aeronaut"

Nationally acclaimed as "Prince Leo, the Boy Aeronaut" in the gay days of the Barnum circus, Leo Stevens has come to climax his career as an airman, with the construction of a parachute lighter than any now in use and "fool proof" in the sense that it never will fail to open.

Besides opening unfailingly, through its pressure, even if the aviator's hands should "freeze" so that he is unable to push the controlling cord, Stevens' new parachute, he says, will be under control at all times. It will float, too, or bring the flier to the surface should he fall into a lake or stream, or the sea.

THE RHYMING OPTIMIST

By Aline Mackenzie

NO WORDS

When I was deep in sorrow
And could not find a word
From you I sought to borrow
Strength not to be afraid;
And all my pain you spoken
And all my woe revealed,
While silence was unbroken,
In silence I was healed.

When I was thrilled with rapture
Too long undreamed I gained,
With goals life let me capture
And dearest hopes attained,
To you I journeyed, sharing
My glad heart's welling tide,
To you it hastened, bearing
My bliss in open hands.

Yet by no words are spended
The secrets I impart,
No words from me are needed
To reach your loving heart!

Death Of Inventor

Passing Of Man Who Gave Ice Cream Cones To the World

Charles E. Menches, who invented the ice cream cone, died at his home in Akron, Ohio, recently. He was 72 years old.

During his career as an actor, circus performer and hotel owner, Mr. Menches was credited with many inventions, but none of them struck the public fancy as did his edible ice cream container. He also claimed the invention of the "Hamburg" sandwich, and of the game of throwing baseballs at a human face.

Barber's Itch and Ringworm are relieved by the use of Dougias' Egyptian Liniment; quick, certain results. Relieves the most obstinate cases.

Bad Deal All Around

Judge: "You, a respectable young man, stole a coat. In consequence you have lost your post, and brought trouble and sorrow to your parents."

Accused: "Yes, and it was too tight into the bargain."

Stop Coughs Easily This Way

Just rub Vicks on throat; also swallow a little every few hours

VICKS VAPORUB

Over 17 Million Jars Used Yearly

Little Helps For This Week

"Let me depart, that I may go to mine own country."—1 Kings xi. 21.

For strangers into life we come,
And dying is but going home.

How can a great and happy
here? Those who have been amid mountains, and are condemned to live on plains, die of an inconsolable nostalgia. It is because we have loosed from above that we sigh for it, and that all music is to us a reminiscence of our home.—A man cannot breathe in the rarified Swiss. An infinite love supposes an infinite object. If all the stars were gone in one night "God pent" in the sense that it never will fail to open.

Besides opening unfailingly, through its pressure, even if the aviator's hands should "freeze" so that he is unable to push the controlling cord, Stevens' new parachute, he says, will be under control at all times. It will float, too, or bring the flier to the surface should he fall into a lake or stream, or the sea.

Rum "Walking-Stick" Farm

Kentish Villager Plants Seedling and Trains It As Ordered

Bob Sedgy, the "Walking-Stick Man," who lives in Sandhurst, a village in Kent, is the greatest authority on his craft in the world. He does not rely on machinery for his sticks, but on skilled training. When he receives an order, he plants an ash seedling, and the finished stick is exactly as it has grown, with the exception that a ferrule has been fitted. Each stick has Mr. Sedgy's personal attention. He watches its growth, eliminates its weaknesses, and carefully strengthens it. A stick for a millionaire grows next to a stick for a Kentish shepherd. Mr. Sedgy has grown walking-sticks for sixty years. He lives in a caravan on his farm. His has been a strenuous life. One very heavy stick with a special knob on the top is being prepared for an old lady who lives alone and is afraid of burglars.

Persian Balm—The unrivalled toilet requisite. Essential to every dainty woman. Imparts rare charm and beauty to the complexion. Refines and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Used for true feminine distinction. Delicately fragrant. Swiftly absorbed by the pores, leaving no stickiness. Persian Balm instantly creates a subtle elegance and charm.

Source Of Grain Rust

Northern Canada Plague Traced To Raspberry Bushes In Mississippi Valley

Responsibility for grain rust in western Canada was traced to raspberry bushes in the upper Mississippi Valley and in southern Texas by R. Peterson, of the Dominion rust laboratory, addressing the Canadian Society of Agriculturists at Winnipeg. The Mississippi Valley, he said, was the chief source of rust spore epidemics, but spores of wheat stem rust winter in Texas.

Of 28 known varieties of oat rust he added, nine were to be found in western Canada, and no oat variety was resistant to them all.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Sourne, R.R. 3, Picton, Ont., writes—"I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around.

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and finds no other medicine can help her so much for headache.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful medicine."

DISARMAMENT SUPPORTERS CAUGHT IN FREE-FOR-ALL

One of the most disgraceful free-for-all fights ever witnessed at a meeting of the International Disarmament Conference in Paris when the wrath of the French delegates was aroused by insulting remarks of the Italian delegate, Signor Scialoja. The trouble commenced when Edouard Herriot (left), former French Premier and chairman of the meeting, attempted to introduce a French panelist to the gathering. His efforts to control the meeting failed, and in the melee the speaker's stand was overturned. Lord Cecil (right, centre), British delegate, collapsed in his chair; Alsmeer B. Hoogilien (right, centre), U.S. delegate, was thrown and bruised at, and a table broadcast from Washington at Senator Borah's speech (right) in the meeting was dashed out.

PEMMICAN IS AGAIN MADE ON PRAIRIES

Real pemmican, from true buffalo meat, is again being made on the Prairies, and in considerable quantity. The Pemmican, which is being prepared at Wainwright and Edmonton, will be available to the public on request; but most of the dried buffalo meat will be shipped to the far north for Eskimo relief. For the benefit of some old-timers and many young people who appreciate a new article of diet, normal methods of fresh buffalo meat have been shipped over Canadian National Railways to Canadian cities and many more carloads will be shipped from Wainwright in the near future. A total of 1,500 buffalo were killed at Wainwright National Park recently and, as a result, there will be a December wide sale of buffalo steaks, roasts and cutlets.

Fine Concert Given By Josephburg Red Cross

A very large crowd attended the annual Red Cross Christmas Concert held in the Josephburg School on Friday, Dec. 16th.

The chairman for the evening was Mr. Adolph Backer and the program consisted of the following items.

Chorus —O'Canada
Carols — "Hark the Bells, Joy to the World"
Piano solo — Nora Ashton.
Recitation — Keith Cranston
Play — Santa Claus on Trial.
Recitation — Vernon Willy.
Solo — Hazel Magee
Play — "The Christmas Secret".
Recitation — Verna Backer.
Duet — Marion Mann and Keith Cranston.
Recitation — Warren Dose.
Play — "My Son Josiah".
Recitation — Billy Krause.
Carols — "Oh Little Town of Bethlehem, Come all ye faithful, It came upon a midnight."
Recitation — Stella Doss.
Piano Solo — Ellen Krebs.
Chorus — Ten little Niggers.
Play — Bringing up the Christmas Baby.

Harp Selections — These were new and interesting items played by August Darnbeln.

The final and probably most interesting event of the evening was the arrival of Santa Clause and the distribution of a large number of presents. During this distribution a sum of $12.10 was collected in aid of the Red Cross Society.

From all reports of attendents, the concert was a great success—thanks to Mrs. Griffin, who indeed had a great deal of work, in training the new rooms together with the regular school work.

The absence of the Senior room teacher, Mr. Griffin was sincerely regretted by his pupils. We all wish him a speedy recovery and hope he will be with us again at the New Year.

Making Wreaths at Home

Inexpensive Christmas Wreaths may be made of cuttings from pine trees, barberry and bayberry with pine cones wired on. At any florist's a wire circle can be bought with bunches of thin wires, making it the easiest of tasks to build up a wreath that is unusual in its beauty.

Christmas and the Birds

It is said that no peasant in Sweden will sit down with his children to Christmas dinner until he has provided food for the birds. The farmers erect poles in their dooryards to which sheaves of grain are bound, to provide for birds through the season when vegetation is covered with snow and ice.

Town Council News

A regular meeting of the Town Council was held on the 17th. instant in the Council chamber. Present Mayor T. Montgomery, Councillors—Simmons, Gauf, Lalonde, Smith and J. Earl Graham.

The minutes of the regular meeting held on the 3rd. of December were adopted as read.

The following accounts were passed for payment.—St. Joseph's Hospital, for Jan. Foster $25.00; Calgary Power Co., lighting for streets and fire hall $138.39; Fort Hardware, Sanitary Buckets etc., $53.35; Fort Fire Brigade $24.00; F. W. Smith $3.00; Alberta Gov't Telephone $7.95; $1000.00 paid to School District on 21st. instant., for salaries and current expenses.

Three applications for direct relief were considered and approved. The result of the tax sale on the 10th., was considered by the Council and certain matters involved in connection therewith, were dealt with.

The Secretary was instructed to write the C. N. R. Railway General Superintendent with respect to trains unduly blocking the highway at Government St. crossing, especially on occasions of a fire alarm, and to submit certain suggestions of the Council for his consideration. Also to call the Superintendent's attention to the matter of trains blocking the crossings particulary around 9 o'clock in the morning when the children are hurrying to school, and the danger incurred when they try to get through between, or under the cars.

SANTA IS UP-TO-DATE

Santa Claus is a decidedly progressive old chap. He keeps strictly abreast of the times, and in his work employs only modern-day methods. Time was when plodding over the fields in a sleigh no faster than reindeers could gallop. It took him a long time, but he managed to make the rounds.

Then came the automobile. Santa put a big red one and hitched trailers to behind. He could get around faster. He carried bigger loads, got to more houses and made more children happy. When airplanes flew over the North Pole Santa got another idea. He believed that planes would be better for his long trips and for skipping from housetop to housetop. He is hardly built for an air pilot, but surely flies faster nor farther than plump, old Santa.

He does not fancy zeppeline, but he is sure that in another year or two he may be able to broadcast Christmas to the children by radio. As soon as carriers are invented to fly through the air, directed and guided by radio energy, old Santa will sit on his mountain of northern ice and broadcast an up-to-date Christmas to all the world.

Greetings

The Redevelopment extends to every Citizen of Fort Saskatchewan a sincere wish for a Happy Christmas and a Prosperous New Year

C. C. Montgomery, Mayor

MR. and MRS. R. Walton
CELEBRATE GOLDEN WEDDING at BUSBY

Popular Couple Came West Forty-Two Years ... Ago

BUSBY, Dec. 21. — Married on December 19th, 1881, at Harwood, Ontario, Mr. and Mrs. Roland Walton celebrated their golden wedding at their home here on Friday, Casting west to Winnipeg in 1889, Mr. and Mrs. Walton moved to Calgary a year later, and in 1906 went to Fort Saskatchewan where Mr. Walton was in business until 1921, when he settled at Busby.

Mrs. John Irwin of Calgary, a sister of Mrs. Walton, was the only guest present who attended the wedding of 50 years ago. The three children, Mrs. L. A. Rathven of Longview, Washington, Dr. Roy Walton of Stony Plain and Mr. F. H. Walton of Fort Saskatchewan, were with their parents for the celebration, and one grand daughter, Miss Gloria Rathven. A son was killed overseas in the great war.

Mr. and Mrs. Walton were presented with a purse of gold by the ladies' aid and board of managers of Busby United Church and Busby friends and relatives, and messages of good wishes and congratulations came from near and far.

AWAKES NOBLEST TRAITS

Come winds of the North, from the land of snow and ice, blow the horns and ring the bells. Speed the wings of Christmas. Christmas is needed everywhere. It takes the magic of Christmas time to change the drab and gloom to brighter colors and joy.

Christmas is a fine old tonic. It rejuvenates the earth and brings the pleasures of youth to all mankind. It brings relays of health and peace of hope and cheer to a weary hard-working world. It brings new inspiration and add zest to life. It brings the grace of happiness, alike to the hovels of the poor and the mansions of the rich. It weaves evergreens into garlands of eternal hope and hangs them in the homes of men. It comes with simple pleasures for dreary lives and hangs a blazing star above the caverns of despair.

There is no charm like Christmas to drive out greed and selfishness, to soften hate and temper malice. It enlarges the kindness spirit. It brings to life and action the noblest traits of man. Christmas is the last and richest grace given to the dying year.

RED A CHEERY COLOR

Red is regarded as the most cheerful of all colors. It is said to react the most quickly on the optic nerve. Decorations available at the winter salettes include holly, the berries of which are red. It grew to be the custom to use holly and berries of a similar nature in preparing for the festival of Christmas. By virtue of the association of ideas red came to be connected with the Christmas season.

Donations Received for Relief fund sponsored by the Oddfellows.

Marconi's Great Achievement

Millions of the earth's inhabitants sat in homes, offices, hotels, clubs, in railway trains and on ships, on December 12 last, and enjoyed one of the most marvellous demonstrations yet known in an age of marvels. People of many races, black, white and yellow speaking a veritable babel of languages, and of many creeds were, for the time being, brought together as one great family to enjoy an entertainment to which fifteen nations contributed and in which all participated

The event was a world-wide radio hook-up to commemorate an achievement of thirty years ago which has revolutionized methods of communication, transformed social conditions, altered our forms of entertainment and instruction, and been the means of saving countless numbers of lives.

Thirty years ago, (December 12, 1901), at noon, a young man of vision, imbued with the enthusiasm and confidence of youth, and in an old shack on Signal Hill, Newfoundland, and waited patiently for something to happen; something which, to the knowledge of man, had never before occurred. He was Marconi awaiting to construct an incredible world that it was possible to send a signal across the Atlantic Ocean by wireless telegraph Marconi and two assistants waited until in the earphones they heard at the appointed minute the "click, click, click," the three dots of the letter "S" in the Morse Code, which had been the signal agreed upon to be sent from Poldhu, Cornwall, England.

From that historic moment to December 12, 1921, the world had been consciously or unconsciously marking time and space were eliminated. The promising of a key eighteen hundred miles away had been heard in the merest fraction of a second. In the thirty years which have passed, vast strides have been made in world communication, but no wireless message had crossed the Atlantic any faster that that first one of Marconi.

Today we sit in our homes before ornate radio sets and by the simple turning of a dial shift ourselves from Europe to the remotest spot in New York to that of San Francisco; from Ottawa to Vancouver; from Edmonton to Mexico, or, as on December 12 last, we listened to speech and music from London, England, then Brussels, then Paris, Berlin, Rome, Vienna, New York, Washington, Ottawa, Havana, Montreal, Vancouver, Brazil, the Argentine. We heard a message being transmitted from New York to San Francisco, from whence it was sent to Java, thence to Amsterdam, and we heard it being received back in New York after circling the globe in one minute and 47 seconds. We heard English, French, German, Italian, Spanish, Japanese and other languages spoken.

All because Marconi's great experiment of December 12, 1901, succeeded. The world were astounded then: it marvels still. Following that first signal came the development of wireless telegraphy, then wireless telephony was made possible by the invention of the vacuum tube and broadcasting soon spread like wildfire. The vacuum tube led to the discovery of the photo-electric cell, that marvellous sensitive little tube which made talking pictures possible, which opens and closes doors, counts vehicles on the highways, and does many other most astonishing things.

Airplanes are guided by wireless as they wing their way through space; the wireless "SOS" call brings help to stricken ships; the radio carries medical or other assistance into the far frozen north; His Majesty the King addresses his people in every portion of his far-flung Dominions; church services and the finest of the world's music and other forms of entertainment are carried into the most isolated and humble homes.

But as one listened on December 12 last, to the nations talking to and entertaining each other, switching from one continent to another almost quicker than the mind can think, the conviction grew that, great as all these achievements are, something even greater and greater inevitably must result from Marconi's amazing experiment. Will not this annihilation of time and space, this breaking down of barriers to communication between peoples and nations, this development of a sympathetic understanding between peoples, also lead to the breaking down of old suspicions, prejudices and jealousies? Shall we not learn to discard the old, mis-used word "foreigner" and, instead, come to regard those who live under other flags, who speak languages other than our own, and who worship at altars somewhat different from those at which we may worship, as neighbours, friends, and brothers?

In fostering Marconi for his great achievement, may we not also hope that over and above all the material benefits he thus conferred upon us, he has been an effective instrument in the hands of an all-wise Providence in promoting the brotherhood of man and the federation of the world?

An Expensive Pavilion

Necessary For London's Lord Mayor To Have Private Means

The city of London allows its Lord Mayor (£8,000) for expenses, which normally amount to almost £25,000. Banquets, luncheons, civic entertainments and the charities account for a considerable part of this sum. The Lord Mayor can count upon at least three public functions in every two days and he has to make a speech, with four exceptions, at each. His worts hard and his public luncheons and dinners mainly consist of tourists or other people met at the end of the year there is usually a heavy deficit, meeting the Lord Mayor. Sometimes a passage.

Australia Making Macaroni

Formerly An Importer Country Is Now Exporting It

Carrying 1,008,000 cartons of spaghetti and macaroni, the steamer Commonwealth cleared from Sydney, Australia for the United Kingdom.

This shipment is the first of its kind of major proportions to be sent to Britain and marks a bid by South Australia to capture the British market, whose annual requirements are said 8,000 tons. The growth of the new industry followed the successful growing of a suitable red wheat in South Australia, Australia formerly had been an importer of macaroni.

Columbia will regulate food prices

Her Heart Was So Bad Couldn't Do Housework

Mrs. E. Degeaux, R.R. 2, Midland, Ont., writes:—"I had been troubled with heart trouble for many years.

My heart would beat so fast I could hardly get my breath and I had headaches and dizzy and faintish spells.

I couldn't get my housework done I was so weak.

I took three boxes of Milburn's Heart and Nerve Pills and found I could do my housework and since I could not be without them in the house."

Price 50c a box

Sold by all dealers or sent postpaid direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Communal Towns in Russia

Where Children Are Educated and Family Life Destroyed

On the East side of the Ural, in the neighborhood of the enormous ore deposits of the so-called Magnet Mountain, a communistic town will arise in the middle of the Steppes. The town will be given the name of Magnitogorsk, and will have a population of 300,000. The town must be finished in 1927. The engineer Avramov, Mr. Ford May, has drawn up the plans. It will be built on a spacious scale, with straight streets. The housing Peoples Commissioner writes as follows:

"The dwellings for all inhabitants will be the same. Till their 16th year all children will be educated in a town institution where the parents will be allowed to visit them but not too frequently. The father and the mother's name may not be used. Communism aims at the destruction of the family and the creation of the collectivist man and woman. Clothing will take place in a central kitchen and the meals eaten in common." Towns of similar type but on a smaller scale are to Stalingrad and Sulfvine, near Moscow.

Worms, however generated,

are found in the digestive tracts, where they not only disturb the comfort but imperil the health of the child. There is no comfort for the little sufferer until the hateful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

Recipe For This Week

(By Betty Barclay)

SCALLOPED OYSTERS

35 oysters with liquor.
2 cups bread crumbs.
½ cup milk and cream.
2 tablespoons butter.
1 teaspoon salt.
¼ teaspoon pepper.

Grease baking dish and cover bottom with bread crumbs; lay oysters in carefully; season and cover with bread crumbs; pour over milk, oyster liquor and cover top with butter. Bake in hot oven at 425 degrees Fahrenheit. Serve at once.

LEMON MINCEMEAT

4 lemons.
2 apples.
1 pound currants.
½ cup raisins.
½ cup chopped nuts.
½ cup melted butter.
2 cups sugar
1 teaspoon salt.
1 teaspoon ground cinnamon.
1 teaspoon ground nutmeg.
1 teaspoon ground cloves.
1 teaspoon ground ginger.
1 teaspoon ground allspice.

Squeeze juice from lemons and cook until soft. Run through meat-chopper and then rub through a sieve. Add chopped apples and remaining ingredients, well and store in jars. Use as a filling for turnovers and pies.

Doing Welfare Work

Czechoslovakia Has Established Shelters For Jobless Boys and Girls

News comes from Czechoslovakia that its Ministry of Social Welfare has ordered the establishment in twelve cities of shelters for unemployed boys and girls 14 to 18 years of age. A government appropriation has been made to aid the work, but each city is responsible for providing quarters, fuel, and lights. These shelters offer warmth, food, and recreation during the day, and instruction in personal hygiene and other subjects.

Pennsylvania imports four-fifths of the lumber it needs.

Winners Of Peace Prize

Nobel Award Goes To Jane Addams and Dr. Nicholas Butler

The Nobel Peace Prize for 1931 was awarded to Jane Addams, Chicago social worker, and Dr Nicholas Murray Butler, president of Columbia University, the award-general of Norway announced.

At a meeting of the Nobel Institute at Oslo, Norway Professor Fred ecth Bajer, member of the Nobel committee of the Norwegian parliament, announced each would receive one half of the amount of the prize.

The amount of each prize varies with the income from the fund established under the will of A. B Nobel. In recent years the amount has been in the neighborhood of $40,000.

United States citizens who have previously won the peace award are Theodore Roosevelt, in 1906, Elihu Root, in 1912, Woodrow Wilson, in 1919, Ambassador Charles G. Dawes in 1925; and former Secretary of State Frank B. Kellogg, in 1929.

Dr. Nathan Soederbloem, Archbishop of Upsala, received the peace prize in 1930, when the Nobel awards approximated $46,000 each

Troubles Of Business Men

Frogs Take Place Of Money In Trade Here

Sir George Bothamell, prominent industrialist, of London, England, described how a business deal was put through with frogs used for money

"One of the companies I am connected with had money laid in currency in a certain foreign country and a complete embargo as to forwarding money to that country was made," he said.

"By mere chance this company came in contact with a prominent anatomy who was importing for vivisection purposes live frogs from this particular country and the change was made from currency to frogs.

"Could anything illustrate more clearly the lengths to which business men have to go today in order to carry on?"

Simple and Sure.—Dr Thomas'

Eclectric Oil is so simple in application and a child can use it without any instructions. Used as a liniment the only direction is to rub and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Protecting the Children

Playgrounds are provided for the children of Salford in the much crowded areas in 102 streets which are closed to motor traffic. The result is that the number of fatal street accidents to children have been cut down to almost half.

Would Require No Motor

If Airship Built On Principle By Which Birds Soar

After twenty years of study of the flight of birds J. H Montgomery of St Gabriel has apparently solved the secret of the flight of birds. He has discovered that in the wings of every soaring birds is a power plant, with which the bird has nothing whatever to do further than his ability to control it Montgomery said. "Contrary to the prevalent view of scientists, birds do not fly by taking advantage of air currents, but their power to soar is due to the structure of their pinions, which are filled with thousands of vortices which catch the air."

According to Montgomery, the same principles by which birds soar could be applied to a new type of airship, which would require no motor, but could be regulated to fly at any pace up to 350 miles an hour

Persian Balm is inevitably chosen by discerning women Delightful to use. Subtly fragrant. Cooling and refreshing Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a last Sticky and cooling shaving lotion.

An Unusual Accident

Needle Two Inches Long Driven Into Man's Heart

That Edward Sell, 43, of Hayes, England, carried a needle in his heart for two years, and that the needle has revealed by X-rays. Sell was working on an aeroplane when a needle in the spoke of an upholsterer was driven into his breast. It was considered too dangerous at the time to operate and months later an operation was tried, but had to be stopped because the needle was removed Sell died soon afterward, and a needle two inches long was found in the left ventricle of his heart.

Agricultural Council For Working Out Farm Problems May Soon Be Established

Initial steps towards the formation of an organization in the nature of a Dominion Agricultural Council, the first purpose of which would be to co-ordinate all farm organizations in Canada to enable them to work out their joint problems, were taken at a meeting held in Toronto recently of representatives of the various farm bodies, departments of agriculture and other interested organizations. W. Sanford Evans, Winnipeg, presided at the meeting.

The meeting was called on the order of the Canadian Chamber of Commerce, upon the authority of a resolution which was passed at the convention of the organization held in Regina in September of this year. Following is the text of the resolution

"Resolved that the Canadian Chamber of Commerce take the initiative in an endeavour to secure the co-operation of agricultural producers, the trade, a number of outstanding business men, the Federal Department of Agriculture, and of Trade and Commerce, and the Provincial Departments of Agriculture in bringing about the establishment of a Canadian institute of agriculture, whose functions would include a thorough and continuous study of agricultural problems and of marketing possibilities in Canada and other countries, the extension of existing markets and the promotion of new markets; and the dissemination of information as to the present and prospective requirements of individual markets, as to quantity, quality, period of supply and the sales and other channels through which such may be fully developed."

At the conclusion of the meeting a committee was set up to draft a constitution and while the general meeting did not go at any great length into details, indication of the type of organization to be set up may be gathered from the following clauses which were unanimously approved by the meeting with the dedication of the scope and purpose of the organization. They are as follows:

The objects of the organization shall be:

1. To promote the welfare of all those engaged in the industry of agriculture in all branches.

2. To promote co-operation between the agricultural organizations of Canada where such co-operation may be useful to agriculture, and to attend to such common tasks as are not exercised by the individual organizations, but so that the individual organizations shall continue to exercise the particular tasks that fall within their special scope.

3. To be at the disposal of the government as regards agricultural questions and to submit proposals for legislative measures which are deemed to be of benefit to agriculture.

4. To represent agriculture in its relation to the other industries of the country.

It was apparent during the discussion that there was some difference of viewpoint as to whether the organization should be formally made part of the Chamber of Commerce or whether it should be constituted of other organizations besides.

After further discussion, the viewpoint seemed to prevail at the outset the organization should consist of agricultural organizations themselves, having it to the organization when formulated in later its own rules to procure co-operation with other business interests in Canada where such co-operation would appear to be to the advantage.

It is the intention that the committee should proceed with the drafting of the constitution promptly and report back to all the organizations represented at the conference at Toronto as a preliminary step to having such conference and assemble later for the purpose of adopting the constitution and putting it into effect.

The meeting was acknowledged to be the most representative meeting of the kind ever held in Canada

THE NEW MODE IS JUST AS KIND TO THE CHILDREN AS THEY ARE LOVELY

Any little miss would adore this jumper dress that big sister is wearing at college.

It delights in the fact that it is in fact cozy too of the grown-up mode. Even to the fabric which is a thin woollen in a small check pattern in light navy blue and white. The belt is brue shiny patent leather.

The tailored blouse chooses a cotton broadcloth in yellow-beige.

The circular swaying skirt necessarily attracts much attention with the growing miss, who so loves to feel important in clothes of smart sophistication.

Style No. 187 may be had in sizes 6, 8, 10 and 12 years.

Corduroy in linen with white dotted swiss blouse is so pretty.

Plaid taffeta trimmed over with white knitted dotted in matching blue is another lovely choice.

Tweeds, tweed-like cottons, wool crepe, cotton shantung prints, pique, cotton broadcloth prints, gingham, tub silks, etc., are suitable and smart fabrics.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

"Have you noticed how Rodrigues has altered since he was married? He doesn't drink, smoke nor swear."

"No. His wife does it for him!"—Buen Humor, Madrid.

Cambridge Gardens Has Interesting Specimen

Blossom Which Has Grown Straight Instead Of Curved

There is a straight banana in the botanical gardens at Cambridge.

It is one of a bunch of two dozen, the others being curved as usual. It is 6½ inches long. There has been no effort to cultivate it. It has just happened.

Gardeners at first began, loudly to say, "It looks as though that banana is going to be straight." Now they claim proudly that it is straight!

In the academic atmosphere of those gardens officials do not suffer too much over such a matter, but they admit to having an interesting specimen of Miss Cavendish.

It is expected to ripen in due course It shows no signs of going crooked, and promises to be the first banana to lend a really straight life

Seek Advertising Campaign On Fish

Ottawa Asked To Assist in Count-To-Count Publicity

Assistance of the Dominion Government in conducting a coast-to-coast newspaper advertising campaign to increase the consumption of fish in Canada is being sought, A. H. Brittain, president of the Canadian Fisheries Association, here announced. Efforts are being made to obtain a fund of $150,000 for the purpose.

Official comment was not available on the above proposal, but it is known that the Minister of Fisheries, Hon. E. N. Rhodes, is keenly interested in such a project.

Careful Experiments Prove Grain Taken From Egyptian Tombs Will Not Germinate

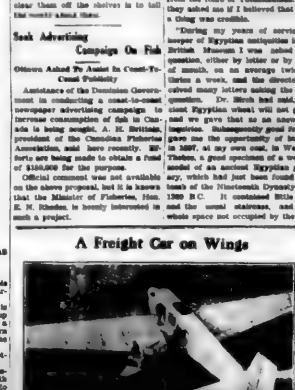
During the past few months there seems to have been an unusual revival of interest in the vitality of seeds contained to have been found in the tombs of ancient Egypt. Samples of this so-called "mummy" wheat have been received by the Cereal Division, Experimental Farm, Ottawa, within recent months. From farmers who claim to have produced the said seed from samples coming directly from those Egyptian tombs, says L. H. Newman, Dominion Cerealist. Statements have also appeared in the press which might lead one to believe that the tombs of Egypt appear to possess some mysterious power to preserve the germinating ability of cereal grain for a long period of time. Apparently these statements have attracted the attention of a number of Old Country people who have appealed to certain officials of the British Museum for information as to whether or not wheat stored in tombs for a long period of years is capable of growing. As a result of these enquiries Sir Ernest Wallis Budge, keeper of Egyptian antiquities in the above museum, published the following article in the London Times recently.

"Three gentlemen connected with this place have sprung me up and told me that they had received a request from America that a distinguished Egyptologist would be unable to grow wheat which he had obtained from the tomb of Tutankhamen. And they asked me if I believed that such a thing was credible.

"During my years of service as keeper of Egyptian antiquities in the British Museum I was asked this question, either by letter or by word of mouth, on an average twice or thrice a week, and the director received many letters asking the same question. Dr. Birch had said, 'Ancient Egyptian wheat will not grow,' and we gave that as our answer to inquiries. Subsequently good fortune gave me the opportunity of buying, for the British Museum, some forty sorts are being made to obtain a fund of $150,000 for the purpose.

Official comment was not available on the above proposal, but it is known that the Minister of Fisheries, Hon. E. N. Rhodes, is keenly interested in such a project.

A Freight Car on Wings



Built to carry a load of 3,850 lbs for a distance of 500 miles with a crew of two and having a normal flying speed of 932 miles in 9½ hours flying time, the Ju-52, recently brought from Germany aboard the Canadian Pacific freighter "Beaverbrae" to the order of Canadian Airways Limited, will revolutionize air traffic in Dominion Canada.

This flying box car will transport large pieces of mining equipment, machinery, and supplies to the Far North, right up to the Arctic Ocean and will help open up new territories, new resources of inestimable mineral wealth to effective exploitation. James A Richardson, president of Canadian Airways Limited, believes that north of steel, deep in the heart of the North West Territories and beyond, there lie untold resources which not only will make Canada one of the richest countries in the world but will open a new era of prosperity.

The Ju-52 is his contribution towards the man-sized job of unrolling the map of Canada and of giving to the Canadian people the most efficient air travel system with the least delay possible.

It has a single cargo space of 690 cubic feet occupying the top part of the fuselage which can be loaded from an aisle-truck backed up to a large side hatch, having internal measurements, 70.90 by 49.54 inches located in the rearmost bay and provided with a substantially built platform for a maximum load of 1,653 lbs. Another large hatch on the roof can be loaded from a crane in the same way as freight is lowered into a ocean-going vessel.

For further convenience there is a door opposite the side hatch; a side door in the forgnost bay and four loading flaps in the second and third bays.

An important innovation is the Double Wing Junker patent which permits larger and heavier machines to be landed on smaller aerodromes.

Writes Longest Poem

Father Blatter Has Out-Glamored Dante By 13,000 Verses

Father John Blatter former parish priest, has announced completion of what he claims is the longest poem ever written, containing 75,000 verses.

Father Blatter who is 71, said he started the work when he was 70 Besides outstanding Dante by 13,000 verses, he said his poem included the story of three visits to inferno, within Dante's work embraces only one

Should Use Union Jack

Hoods Have Display In Canada Says Ontario's Attorney-General

Hon. W. M. Price, Ontario Attorney-General, has instituted an inquiry as to the feasibility of having a Union Jack installed in every courtroom of the province. Speaking at Orangeville, the unveiling of a war memorial, Col. Price made this announcement, at the same time emphasizing the necessity of keeping fresh in the minds of Canadian people the deeds of those who died in war. "We have been remiss in not putting forward our flag in such a manner that every Canadian-born citizen and every naturalized subject will have the history of our institutions and our traditions," said Col. Price, unveiling a monument to Uxbridge's Great War dead in the town square.

"The flag is now flown on every courthouse while courts are in session, but the flag could very well be installed on a staff in every courtroom. The people of Canada were woefully deficient in historical knowledge, the attorney-general declared. They failed to read books on early adventure, pioneering and history of the country.

Lure the Arctic

The lure of Arctic wastes is in the blood of Stephen Decoy, of Halifax. Home after four years in the Northland region, he is eagerly looking forward to another period of service at a wireless direction station needing among native Eskimo interpreting posts in one of Canada's outposts.

There are ten million Chinese, children and adults, in school in that country.

British Economist Not Good Forecaster

Growing Prediction Some Years Ago Failed To Materialize

Sir George Paish, British economist who predicts the world's economic system would break down in a few months, once made a gloomy prediction about Saskatoon which failed to come true, F. M. Scimshaw, chairman of the Saskatoon Board of Trade, has recalled.

Sir George is said to have declared Saskatoon would never recover from the real estate collapse of 1912 "Saskatoon was the first western city to achieve an even keel financially," said Mr. Scimshaw, who added he regretted a man of Sir George's eminence should make such a gloomy prediction at a time when confidence was needed.

Primitive Hunting

Boys In North Woods Hunt Rabbits With Sling-Shots.

The boys attached to the Rankin trans-Canada highway construction camp near Maitawa, Ont., have game primitive. In order to shirk their-collect rabbit bounty recorded by northern Ontario's "great outdoors," they had to overcome the difficulty of lack of firearms, which are prohibited in the construction camps. They did this and, armed with sling-shots, they went out to the chase. They returned with 13 rabbits.

Awaiting Turkish Reply

The British Government has sent a note to France asking for a reply to representations previously made regarding the 15 per cent. French surtax on imported goods

DECEMBER 27

THE SPREAD OF CHRISTIANITY IN EUROPE

Golden Text: "The kingdoms of the world is become the kingdom of our Lord, and of His Christ, and he shall reign for ever and ever." Revelation 11:15.

Devotional Reading: Isaiah 11:1-10

A Service By Means Of Allusions

O breath of God! O my delight!
In many a vigil of the night!
Like the great voice in Patmos heard
By John,
Like the Evangelist of the Word,
I hear Thee behind me saying
Writte.

—Longfellow

Is there any Hezekiahs in our lives, any vital sense of a life to come, any far horizon visible beyond the narrowness and limitations of the daily road we tread? W. J Dawson tell the event to which each of the following refers.

There have been men like those Jews in every age and every land who have delighted in starting up others; no community is free from them.

"In the boundless supply of divine grace lies power to turn the world upside down, if only the people of God would receive and transmit what He is so willing to bestow!"

"There stood a man of Belgium saying, 'Come over and help us,' and immediately men of Britain arose to answer the call."

We have no right to suppose that whatever has done a wrong thing and then state our supposition as a fact. A large proportion of the miserable gossip which is retailed by idle people in drawing-rooms and other places has started just as the story about Paul started. J. R. Miller.

"When came the Sabbath of worship and rest,
Out of the city, in reverent quest,
Down by the riverside faithful came,
Where prayer was wont to be made in His name."

So tiles the saint at Corinth, well content
The craftsman's task we ply).
If, with the weaving, rise another tent
Eternal in the sky.

—John Elliott Bowman.

Every day gives us courage and hope and some song of rejoicing. Though the prison be closed around us and the guards be set over us, may we sing songs in the night. Beecher

How he, who lone in Patmos banished
Saw in the sun a mighty angel stand
Mistaken Burns

"Of Tarsus it is written with authority that once it was no mean city, but that is a tale of long ago."

English Doctor Claims Cure For Rheumatism

Uses Serum Prepared From Microbe Responsible For Disease

Cure of rheumatism, also called arthritis, by injection of a serum prepared from the microbe responsible for the disease, is possible, according to Dr. H. Warren Crowe, London, England.

Speaking before a group of physicians at a meeting of the American Society for the Study of Arthritis, Dr. Crowe said he discovered the value of a vaccine in the treatment of rheumatism by applying it to his wife. He stated the cure was as rapid as to fall little short of being dramatic.

The vaccine treatment, which he declared could be used by the general practitioner everywhere, was endorsed by other speakers, including Dr. Martin E. Rehfuss, Philadelphia, who asserted no drug had been found to cure the disease.

Dr. William W. Lormann, Pittsburgh, said the arthritis was an industrial and social, as well as a medical problem.

"In England it is responsible for one-sixth of all industrial disability," Dr. Lormann said. "Until recently it was considered incurable, and as a matter of fact was incurable, because the cause was not known; now it has been found to be a bacterial infection. The microbes which produce the disease are of the streptococcus group. Unfortunately, more than one kind of streptococcus will cause rheumatism, hence it is necessary to find out what kind is responsible before treatment can be given."

Fishing Grounds Improve

Although the fishing is heavier than ever in the North Sea, it is stated that the more fish are taken out the bigger grow those which are left, and that the fishing grounds are getting better every year.

Keystone Of Empire Trade

Canada Recognized As Greatest Factor In Imperial Situation

Some time next year, probably in the early months, the various governments of the British Commonwealth of Nations will send delegates to Ottawa to work out a basis for the development of inter Empire trade

Because all the Dominion Governments as well as the Government of Britain will wish to make this conference a decisive one, emphasizing the actual machinery rather than the platitudes of commerce, the meeting will have an importance far beyond anything of the kind yet attempted

For this reason the prime representation will probably far exceed the representation of the governments themselves.

Would it not enable those prime representatives of Britain, of New Zealand, of Australia and of South Africa to write with infinitely more understanding and intelligence of their subject if they were sent out three weeks or a month ahead of the formal conference date to tour Canada and to familiarize themselves with products and commercial conditions in this Dominion?

For Canada, with all deference to her sister Dominions, has become the keystone of Empire trade. Her natural resources are so great, her productivity so tremendous that she is recognized as the greatest factor in the imperial trade situation

Would not the world get a fairer report of the conference if the visiting prime representatives saw all this at first hand before the conference started and before their views were colored with the varying tints of statesmanship? Vancouver Sun

Finland Is Building Pocket Battleships

Will Withstand Broadside Fire Of the Largest Cruisers

Work has been started on two new fighting ships for the Finnish navy which are as remarkable in their way as the German pocket battleship, according to the Daily Telegraph's naval correspondent. They are, he says, miniature battleships of 4,000 tons, designed for coast defense operations in the Baltic, with Diesel electric drive and a speed of 16 knots.

Each of these little ships mounts a formidable armament of four 10-inch guns in turrets and eight 4.7-inch quick firers and there is a substantial armour protection of vital parts.

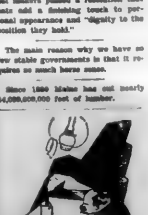
They are under construction at the Crichton Vulcan yard at Abo, Finland, and are due to be completed in 1923. The smallest capital ships in the world, they are said to be able to withstand the broadside fire of the largest cruisers and are more strongly protected. They have been built by native labor and largely from domestic materials, as were four submarines now in the Finnish navy.

Drumming Up Business

British hat makers are circularizing banks and insurance companies asking that they compel their employees to wear hats to business. The hat makers passed a resolution that hats add a finishing touch to personal appearance and "dignity to the position they hold."

The main reason why we have so few stable governments is that it requires so much horse sense.

Since 1860 Maine has cut nearly 44,000,000,000 feet of lumber.



"What is the matter? I can't even get my glass full."—Journal Amusant, Paris.

TWO VESSELS ARE CHARTERED FOR H. B. TEST

Montreal, Que.—Two tramp steamers are will load approximately half a million bushels of heavy grain, probably wheat, at Churchill, Man., between September 15 and 20, 1931. Arrangements have been completed by the Dominion Government for a trial shipment over the Hudson Bay port by Thomas Harling and Son, Montreal, who carried out negotiations.

The S.S. Wentworth, Wentworth and Farnsworth, owned by the Fullgrain Steam Shipping Co., Ltd., have been selected, though no decision has been made as to which two of these three will actually make the trip. The Wentworth has a net register of 4,864 tons, the Farnsworth 4,941 and the Wentworth 5,125. They have been chartered to load 6,500 tons of grain, with an allowance of five per cent either way, and will probably take on approximately 7,000 tons each, or a little more than 500,000 bushels. The first steamer will load between September 15 and 20 and the second between September 20 and 25.

In making the arrangements it was recognized that an experiment was being carried out and no experimental rate quoted accordingly. As there was no precedent on which to base any quotation, it was decided that the through rate from Fort William to London via Montreal should be applied to the northern route. The charter between shipper and shipowner was fixed at three shillings, a ne pence a quarter of 480 pounds which compares with a rate of one shilling, six pence prevailing at present from Montreal to London. The rate from Fort William to Montreal is approximately six cents a bushel, or seven cents, with insurance and storage.

The rate of 3s. 9d. per quarter takes into consideration the load insurance to be paid by the shipowner to his underwriters, which is expected to work out at approximately 3½ per cent or 4d. per one hundred pounds sterling on the value of the ship and two shillings a ton on the gross registered tonnage. This compares with 4, ¼ and per cent or one shilling, six pence per (480 and in 6d. on the gross registered tonnage for vessels using the St. Lawrence route.

Should these two shipments prove successful it is probable that a definite competitive rate will be arranged for next season, when the elevator at Churchill is expected to be in full operation.

The charter certificate stipulates that the vessels to be used this year shall be completely fitted on their arrival at Churchill and ready to load, as no facilities for such a purpose are yet available there.

Rich Gold Discovery

Sensational Gold Strike Made At Red Lake, Ont.

Moss Lookout, Ont.—Discovery of a rich vein of gold said to be one of the most spectacular gold strikes ever made in Ontario, is reported here. The strike was made at Red Lake on the island four miles from the Henry gold mines.

News of the discovery was confirmed by J. E. Osborne, who made the find himself, and who flew out from Red Lake by hydroplane. Although no official has yet been informed of the progress to date gives indications of a valuable strike.

One wall of the vein has been exposed for a distance of 750 feet, and on this have been seen veins, varying from six feet to 15 feet in depth. Visible gold exists in each pit. Prospectors are heading a rush to the surrounding district to stake available land.

Canada Will Observe Fish Week

Montreal, Que.—Canada's fish week will be observed from September 13 to 19. It was announced by A. R. McMaster, president of the Canadian Fisheries Association. This year, as in the past, the co-operation of both Federal and Provincial Governments could be secured, said Mr. McMaster.

Long Motor Trip

Motors Plan Trip From New York To Rome By Car

Ottawa, Ont. Bound from New York to Rome by automobile, via Nome Alaska and across the icy stretches of Bering Strait, three New York Italians have left Ottawa for Toronto From there they plan to drive to Sault Ste. Marie, Duluth, Winnipeg and across the prairies to Nome If accomplished, the trip will be the longest ever made by automobile.

The intrepid motorists are Giuseppe Vado, the leader of the expedition, Emanuel Sacco and Gaetano Cesari. Nome they will pick up specially constructed wheels to use later on the rails of the Trans-Siberian Railway

One of the most difficult parts of their journey will be the drive across the ice of the Bering Strait. When they reach East Cape, Siberia, they will go to Irkutsk, covering some 5,-000 miles of unexplored trackless tundra lands. From Irkutsk they will proceed to Khabarovsk, where they will change the wheels of their car, travelling on rails so far as Moscow. From Moscow they will go to Rome by way of Germany and Switzerland. They expect to take 15 months to complete the journey.

Cattle Shipped North

Shortage Of Hay On Indian Reserves In Qu'Appelle Valley

Regina, Sask.—Owing to the shortage of hay in the Qu'Appelle Valley Indian reserves, northeast of Regina, Indian cattle will be shipped to points north for quotation. It was decided that the through rate from Fort William to London via Montreal should be applied to the northern route The charter between shipper and shipowner was fixed at three shillings, a ne pence a quarter of 480 pounds which compares with a rate of one shilling, six pence prevailing at present from Montreal to London. The rate from Fort William to Montreal is approximately six cents a bushel, or seven cents, with insurance and storage

The rate of 3s. 9d. per quarter takes into consideration the load insurance to be paid by the shipowner to his underwriters, which is expected to work out at approximately 3½, per cent or 4d. per one hundred pounds sterling on the value of the ship and two shillings a ton on the gross registered tonnage. This compares with ¼, ¼ and per cent or one shilling, six pence per (480 and in 6d. on the gross registered tonnage for vessels using the St. Lawrence route.

Should these two shipments prove successful it is probable that a definite competitive rate will be arranged for next season, when the elevator at Churchill is expected to be in full operation.

The charter certificate stipulates that the vessels to be used this year shall be completely fitted on their arrival at Churchill and ready to load, as no facilities for such a purpose are yet available there.

Average Yield Low

Government Report Estimates Average Spring Wheat Yield

Ottawa, Ont.—The crop report issued by the Dominion Bureau of Statistics estimates the average yield per acre for spring wheat of 84 as compared with 168, the long term average. Once records were first collected. The report is based on returns as of August 1. Of the total area of 23,000,000 acres under wheat in Canada, based on conditions on June 30, the average yield was placed at 16 as that condition figure was reported during the month. Last year on July 31 the condition was estimated at 91. In the three provinces the percentage is identical for spring wheat in placed at 85, in Saskatchewan at 83, and in Alberta at 77, all based on conditions as of July 1.

Germans Invited To Conference

Basel, Switzerland.—A conference at which the entire problem of credits to Germany can be checked over decided upon by the committee of experts presided over by Albert H. Wiggin, of New York. And invitations were sent to the Reichsbank president, Hans Luther, and to interested Germans and foreign banks to come to Basel.

RETURNS TO PREMIERSHIP

Hon. J. D. Stewart, Conservative leader in Prince Edward Island, who returns to the Premiership after four years in opposition. His party won 18 seats and the Liberals 13.

High Protein Content

Manitoba Wheat Has Higher Than Usual Percentage This Year

Winnipeg, Man.—A higher than usual percentage of protein content in the wheat crop of Manitoba is indicated by Dr. F. J. Sinclard at the research laboratory of the Board of Grain Commissioners.

The tests record 13.3 per cent. maximum as compared with 14.5 last year, and the average 12.25 as compared with 11.18 in 1930

Drouth conditions, states Dr Sinclard, have doubtless been the main factor in producing this very strong wheat.

Samples of Manitoba wheat have not been made yet.

Good Wishes For Exhibition

Prince Of Wales Expresses Hope That Thomson Exhibition Will Be Successful

London, England.—The Prince of Wales has expressed the hope that despite the depression the forthcoming Canadian National Exhibition at Toronto would prove a great success The Prince, who is honorary patron of the exhibition, sent a wire to Earl Bessborough, Admiral of the Seas and head of the British Service League, who is to [illegible] upon the 1931 exhibition.

Earl Jellicoe read the message from the Prince at a luncheon at which the earl was guest of honor.

Married For Canadian Mail

Ottawa, Ont.—Successful experiments conducted by breweries in the capitals of Canada and Columbia with Canadian barley malt makes possible the development of an extensive market in those countries for Canadian barley, J. A. Shrung, Canadian Trade Commissioner at Panama City, reports that similar experiments are to be undertaken by breweries in Venezuela.

Drive Against Communism

Five Alleged Leaders Of Communist Organization Are In Custody Toronto Ont With the arrest by the Royal Canadian Mounted Police in Vancouver B.C. of Malcolm L. Bruce and Samuel Cohen, alias Samuel Carr, five alleged leaders, or "key men," of the Communist organization in Canada are in custody of the authorities.

Bruce is a former editor of "The Worker," a Communist paper. He is 34 years of age and was born in Prince Edward Island. He is a carpenter and has lived in Los Angeles Cal., and various cities of Canada. In May 1928, he was charged with seditious in connection with the Nova Scotia disturbance in Cape Breton

Cohen is 24 years of age, an accomplished linguist and platform speaker. He has recently been engaged in an extensive tour of western Canada.

Other leaders under arrest in the present campaign against Communism in the industrial districts are situated by Dr. F. J. Sinclard at the research laboratory of the Board of Grain Commissioners.

Pawnshop Authorized By Montreal Officials

Percentage Of Profits Will Be Donated To Charity

Montreal, Que. Establishment of a pawnshop under city patronage has been authorized by the municipal authorities here. The city entered upon a contract with an incorporated firm, authorizing this company to open one or more pawnshops for one year The company agreed to give the city 10 per cent. of the proceeds of its business.

The money given to the city, fixed at a minimum of $1,200 a year, will be donated to charity

The reason behind the move. It was explained, was that many people were in need of money but were hesitant about approaching an ordinary pawnshop. With civic protection and guidance, these people would be assured of fair treatment and security.

Aviators Are Held

Foxglove and Hawaiian Is Difficulties Are Adjusted

London, England.—A Reuter's dispatch from Tokyo said the public prosecutor there had decided to order the confinement of Clyde Pangborn and Hugh Herndon, Jr., United States aviators, pending the outcome of an investigation of charges that they flew over fortified areas in Japan without permission.

The two flyers, who failed in an attempt to set a new speed record around the world, have been under questioning by Japanese officials for several days.

BRITISH ATHLETES GIVE GOOD DISPLAY

Although the Oxford and Cambridge athletes went down to defeat in the international meet with Harvard and Yale Universities of the United States, above are two Englishmen who gave a good account of themselves. Above is W. Dunlop, Cambridge, breaking the tape at the end of the three-mile race which he won, while next is Costello, of Oxford, who turned back strong opposition to win both the 300 and 880 yard events, a remarkable feat.

WHEAT EXPORTS PROVE GREATER THAN LAST YEAR

Fort William, Ont The unrevised estimate of export clearances of Canadian wheat for the crop year ending July 31, 1931, places the amount at [illegible] bushels, according to the report for July issued by E. A Tyrell statistician to the Board of Grain Commissioners. When final figures are available it will be seen that the past year's exports of wheat and wheat flour will be around 78,000,000 bushels more than during the previous year the report states

The report estimates the amount of wheat in store [illegible] transit not including any [illegible] at [illegible] at 106,000,000 bushels, compared with 113,524 000 at the end of the 1930 crop year "The last month," the report continues "appears to have been extremely unfavorable to the Canadian grain trade and producers."

The final figures for the crop year on wheat in store will not differ greatly to those in the previous year "unless quantities in farmers' hands are largely in excess of last year's total."

Refuse To Register Orientals

Will Not Qualify Under Relief Plan In British Columbia

Vancouver, B.C. Destitute Orientals will not qualify for themselves this winter, it was stated here

Reports that the Federal and Provincial Governments have refused to contribute toward their keep were verified by J. H McVety, superintendent of the employment service of Canada, and City Relief Officer H W. Cooper They stated they had been ordered to refuse to register all Orientals presenting themselves for listing under government unemployment relief [illegible]

Mr McVety said that the employment service had already registered a few Col. Cooper reported that his office had been obliged to refuse registration of five Japanese.

Canada To London By Plane

$6,000 WWI Purchase Ticket On Proposed Flight

Montreal, Que. The sum of $5,000 will buy Canada's adventurous individual passage on an aeroplane flight from Canada to London via Greenland and Ireland, according to an advertisement appearing in a local newspaper. A third interest in the proposed flight, which will take place "within two weeks," is included.

The flight is to be made in a cabin plane flown by an experienced pilot, the advertisement states, giving no details of the identity of the sponsors of the flight.

Cardinal To Resign

Cardinal Pacelli May Resign As Papal Secretary Of State

Vatican City. — Semi-official confirmation of reports that Cardinal Pacelli is to resign as papal secretary of state came from the Vatican.

He has sought the Pope's permission it was said, but the Pontiff asked him to wait until the difficulties with Italy over the Catholic Action organization are settled.

It is believed that some sort of report on that issue will have been reached by autumn and that the cardinal will retire from his office in November or December.

Next Dodge Western Trip

Ottawa, Ont. Owing to the imminence of the parliamentary session, Hon. E. N. Rhodes, Minister of Fisheries, has found it necessary to defer until next summer his journey to the Pacific Coast Fisheries. The Minister had intended to spend several weeks in British Columbia at the height of the fishing season this year.

May Attempt World Flight

Seattle.—Officers of the Boeing Oil Company have admitted that four planes would leave Seattle in June in the Aleutian Island, Alaska, for Captain Wolfgang von Gronau, German aviator, now at Reykjavik, Iceland, giving rise to the belief in Seattle that he contemplated an around-the-world flight.

BRITAIN PLANS SUSPENSION OF ALL SHIPBUILDING

London, England The London Daily Herald, Labor organ, said the Government were considering a suspension of the whole British naval building programme, with the exception of submarines.

The suspension, if decided upon, would be temporary, the newspaper said, and contingent upon the progress and results of the international disarmament conference next February.

The Herald likened the idea to a similar gesture on the part of United States and Great Britain on the eve of the London naval conference in 1930.

The ships which would be affected are those authorized in the navy estimates but March.

The Herald added that a suspension of the shipbuilding programme would it was hoped, give a lead to the conference and furnish the British delegation with a strong weapon in pressing for a reduction of armaments.

Report Not Confirmed

That Soviets Will Exhibit Agricultural Products In Canada

Moscow, Russia. The commissariat of agriculture announced an exhibition of agricultural products of the Union of Soviet Socialist Republics will be held in Canada during 1932.

The exhibition which is being organized by the Lenin Agricultural Academy will be one of six sent to foreign countries. Two will be sent to Germany, and one each to France, Italy and Turkey. Similar ventures will be conducted throughout the U.S.S.R. next year.

Ottawa, Ont. "That is the first I have heard of it," said Hon. Robert Weir, Minister of Agriculture, when asked with regard to the Canadian Press cable from Moscow which indicated that the Soviet Government contemplated sending an agricultural exhibition to Canada next year. Mr. Weir had no comment to make on the despatch.

Drop In Immigration

Figures April To October Show 15 Per Cent. Decrease

Ottawa, Ont. According to a statement issued by Hon. W. A. Gordon, Minister of Immigration and Colonization, immigration for the months of April to October, inclusive, was as follows: April, 3,301; May, 5,818; June, 3,169; July 2,543; August, 1,939; September, 1,835; October, 2,056, a total of 19,660 persons, compared with 17,544 arrivals during the corresponding period of 1930. This represents a decrease of 75 per cent. Of the arrivals for the seven months 14,496 were women and children, mostly the dependents of settlers already established in Canada.

During the same period 13,641 Canadians who had gone to the United States returned to make their homes in Canada. These were not, however, counted as immigrants.

Ship Transfer Not Planned

Montreal, Que. Officials of Canadian Pacific Steamships denied that they contemplated transferring the Empress of Scotland to Vancouver to the effect that the liners "Duchess of Bedford" and "Duchess of Atholl" shortly would be transferred to the British Columbia-Australia service. No such move was being contemplated, it was stated.

Aim Of Imperial Conference

Ottawa, Ont. Reciprocal trade agreements between the different parts of the British Empire with the prospect of stability of trade is the aim of the coming Imperial Economic Conference. This is the intimation of Premier R. B. Bennett.

Smaller Battleships Wanted

Paris, France. A drive probably may be made at the world disarmament conference at Geneva in February to secure a reduction in the size of battleships

Europe In Swept By Severe Storm

Shipping In Baltic Sea Imperilled By Blizzard

London Reg 30 winds and floods have been reported from widely scattered parts of Europe, and a cold wave gave many areas their first taste of winter

A blizzard raging down the Baltic has imperilled shipping and caused minor damage to coastal districts A sailing ship was torn from its anchorage and was wrecked in the roads at Libau, Latvia, the crew of seven being drowned

A fishing vessel was sunk in the Stockholm archipelago with the loss of one life. The Soviet ship "Bilbuk," from Odessa, foundered near Smyrna following a violent storm which has raged over the Aegean Sea for several days. Six other vessels were driven ashore and salvage operations were started.

Northern Algeria was suffering from floods and damaged communications as the result of a gale Telegraph lines were down for many miles around Tunis and rail services in Algeria was out of operation. The inhabitants of some districts were cut off from foods and awaited rescue in houseboats

Londoners shivered from a sudden drop in temperature and Paris was reported to be cold A number of villages in south Bulgaria were severely damaged by inundations, but deaths were few. No more communications were received.

Trade Figures Almost Equal

Canadian Exports and Imports For Eight Months Nearly Balance

Ottawa, Ont. Canada exported domestic produce to the value of $257,686,986 in November Imports for consumption for the same month was $46,914,046. This whittles down the unfavorable trade balance for the first eleven months of 1931 and imports are almost equal. Total exports of Canadian products for the eight months are valued $241,765, and total imports for consumption, $11,066,845. These figures were released by the Department of National Revenue

The quantity of domestic produce were $30,573,921 lower than those for November, 1930, while imports were lower by $20,411,017

Queen Mary Officiates

Opens Army Hostel In East End Area Of Whitechapel

London, Eng. Queen Mary went into the densely-populated east end area of Whitechapel and opened the Salvation Army's hostel for homeless women, constructed in a disused school school building

Her Majesty was received by General Edward J. Higgins, of the Army.

In the new hostel of the Salvation Army special provision has been made for women with children.

Cause Of Failure

St. Stephen, N.B. The Calais, Me., branch of the International Trust and Banking Corporation is closed. It is understood that this was due to the withdrawal of heavy sums by depositors who are taking advantage of the premium on United States funds by placing their money in Canadian banks here.

Decrease In Crops Value

Quebec, Que. Statistics prepared by the statistical branch of the Department of Agriculture show that for the current year there has been a reduction in value of $48,732,000 in the total amount of crops for Quebec, as against the figures for last year. The reduction amounts to 40 per cent.

MAY RETIRE

Senator Gideon Robertson may have to relinquish the post of Minister of Labor in the Dominion Cabinet on account of illness.

Welcomes Goodwill Ship

Australians Accord Vessel Enthusiastic Reception On Its Arrival

Ottawa, Ont. The arrival of the [illegible] election campaign let no one present Sir Hon. James Scullin, Prime Minister of Australia, from motoring 100 miles after three meeting; in order to extend his welcome to the Canadian goodwill ship, "Canadian Constructor," which reached Melbourne December 16.

A cable to the Department of Trade and Commerce from D. M. Ross, Canadian Trade Commissioner in Melbourne, described the enthusiastic reception accorded the vessel which sailed from Montreal last month laden with Canadian goods Public notables joined in marking the arrival of the "Constructor," and the Commonwealth Government held a luncheon at which leading commercial, industrial and banking interests were represented

Delegates For Geneva

U.S. Government To Announce Personnel In Near Future

Washington D.C. The United States Government is expected to announce in the immediate future the personnel of its delegation to the general disarmament conference at Geneva in February. So important does Washington consider the conference that Secretary of State Henry L. Stimson will probably head the delegation. The U.S. delegation will be prepared to push energetically the policy of President Hoover for disarmament as an economic measure as well as a preventive of war.

Asking Embargo Of Canadian Cedar

Measure Introduced In Congress By Republican From Washington

Washington, D.C. A measure which would bar Canadian cedar lumber and shingles from the United States has been introduced in congress by Representative Albert Johnson, a Washington Republican Washington is one of the chief lumber producing states

Mr Johnson's bill, which provides for limiting imports under the direction of the Treasury Department, is designed to establish an embargo on cedar lumber and shingles Exports of shingles from Canada to the United States in 1929 amounted to $4,158,000 and came chiefly from British Columbia. Canadian cedar in the American market have provided serious competition for the shingle industry in Pacific Coast states.

Canada is the only country exporting shingles to the United States and Mr. Johnson's measure would affect Canada almost exclusively Cedar logs and shingles now enter the United States free of duty

Winston Churchill Better

Injuries Sustained In Automobile Accident Not Considered Serious

New York, N.Y.—Rt. Hon. Winston Churchill, former Chancellor of the British Exchequer, whose automobile overturned in this country was cut short by an automobile accident, continues to show improvement, and looks and feels much better.

The distinguished statesman was struck by a cab while crossing Fifth ave. yesterday and suffered a sprained shoulder and lacerations about the face. A slight touch of pleurisy had developed.

Charles D. Atkins, director of the Brooklyn Institute of Arts and Sciences, announced that Mr. Churchill would make his first public appearance at the Brooklyn Institute January 14.

Christmas Mail Carried By Kingsford-Smith

Famous Flier Completes Trip When Other Plane Crashes

London, Eng. Wing-Commander Charles Kingsford-Smith landed at Croydon airport in his aeroplane Southern Star, with the Australian Christmas mail

There were 50 000 letters in the half ton of mail he carried. The mail left Australia in another plane which crashed at Akyrdar, Malaya, and the famous flyer volunteered to complete the flight.

HIGH QUOTA FOR EMPIRE GROWN WHEAT LIKELY

London, England. The Montreal Post sums the agenda of the forthcoming Imperial Economic Conference will include the question of how far Canada will be ready to take British coal in return for the wheat she will export to Great Britain, under the proposed wheat quota plan.

Ottawa, Ont The wheat quota under consideration by the British Government is 15 per cent. wheat grown in Great Britain. To per cent wheat grown in other parts of the Empire, and 15 per cent. foreign-grown wheat. These were the figures given by Premier R. B. Bennett in an interview following his return from London

This is a considerably larger quota of Empire-grown wheat than the figures given in a London cable, which quoted "The Miller," official organ of the British milling trade. The Miller" forecast the quota which the British Government would propose as 12 per cent. domestic, 38 per cent. Dominion-grown wheat, and 50 per cent. foreign.

The suggestion here is that a formula has arisen as to the percentage all the Dominions, chiefly Canada and Australia, would furnish and Canada's proportion above indicated is here is that it is estimated Canada would furnish approximately 80 per cent. of the Dominions' quota or 8 per cent. of the total of the wheat used in Great Britain. This is thought to be the reason the figure 38 per cent. was used.

There is known to be a considerable feeling on the part of the millers in Great Britain that the minimum could better be met by a tariff than a quota, and substantial support in this view is said to be found among members of the Government. A small tariff against foreign wheat, giving empire grown wheat a preference, is suggested in many quarters in England.

Liner Will Be Completed

Cunard Company Announces Work Must Be Resumed

Liverpool, Eng. The Board of Directors of the Cunard line, announced the company would continue its new liner now lying partly built in a Clydebank, Scotland, shipyard with or without assistance from the British Government.

Suspension of construction on the 1,000 ship three 2,000 workers out of employment and is the immediate cause of representations in the Parliament and elsewhere that building be resumed as soon as possible. In its previous announcement the company said it was forced to suspend work owing to a drop in the depreciation fund from which money for new vessels is drawn

The directors reached no decision as to how and when the ship will be completed, but one official said construction will be resumed even if the company is unable to secure assistance from the Government.

Celebrates Birthday

MacKenzie King Was Fifty-Seven On December Seventeenth

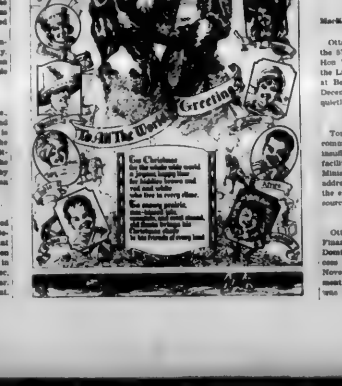
Ottawa, Ont December 17 was the 57th birthday anniversary of Rt. Hon W L. Mackenzie King leader of the Liberal Party Mr. King was born at Berlin (now Kitchener), Ont., on December 17, 1874 He spent the day quietly at Laurier House, here.

Urges Search For Gold

Toronto, Ont Stating that world commerce was lagging because of an insufficiency in the supply of gold to facilitate trade, Hon Charles McCrea, Minister of Mines for Ontario, in an address urged an intensification in the efforts to locate and develop new sources of gold supply.

Canada's Gold Reserve

Ottawa, Ont. The Department of Finance had a gold reserve behind Dominion notes of $1,361,815 in excess of statutory requirements, on November 30, according to a statement recently. The total gold held was $71,651,688.



Great Possibilities In Quota System

Views Of British Mining Head Outlined By Dr. Swanson

Charge of John Westcott, president of the National Association of British and Irish Millers, that the National Government's wheat quota system was uneconomic, unsound and ill-advised was revealed from Dr. W W Swanson, professor of political economy at the University of Saskatchewan in an interview at Toronto.

Dr. Swanson said he was not prepared to controvert the charges of Canadian grains to an extent which would allow them to come an increase in British market prices, he said. Although he had not read the speech delivered recently in effort to over-shadow the attempts of British millers to undercut wheat prices.

"There are great possibilities in the wheat quota system, and I regard the strictures of Mr. Westcott as unreasonable and unfair," said Dr Swanson.

"It is not surprising that Mr. Westcott should take the attitude he has upon the quota system, because for some considerable time the powerful British milling interests have been working behind the scenes to find methods to limit the importations of Canadian and other Dominions' flour.

"Mr Westcott's remarks about the alleged attempt of Canadian producers to victimize the British consumer are entirely beside the point in question," he continued, referring to cabled reports that the British milling head had charged that Canada's two years had "withheld her supplies of wheat to a large extent in the hope of securing a better price."

"Fellowing Mr. Westcott's views, he evidently thinks that Argentine and Soviet Russia have afforded better examples of wise and fairer trading. Yet Argentina has passed through a recession as a direct consequence of her policy, jeopardizing almost $3,000,000 of British capital in that country, while Canadian farmers lost the full weight of their support to the institutions, British industry and British trade. And with respect to Russia, Mr. Westcott's substitute for open trading will not be received with acclaim by the British agricultural class which has been reduced to the brink of ruin by the ruthless dumping wheat, flax, barley, butter and other farm products."

How To Keep Going

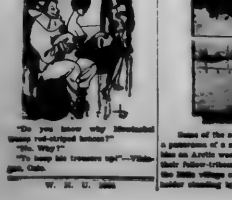
Served In Not Yo Lose Interest In Life

The one fatal thing in life is to lose one's interest in it, and this is where the specialist, the man of one set of interests only, seriously imperils his mind, says Dr. Crichton-Miller, in the Nineteenth Century. He makes himself in life's adventure. The humanist alone, taking the term in its widest sense, seems to me to have the key. The vital force that inspires man going is not solely physical and material. It is spiritual as well, a certain ethical and intellectual attitude to life. —Sir Reginald Blomfield.

Sweden Using Air Mail

More than 3,000,000 letters were sent by the night air mail of the Swedish Aerotransport Company this year. According to Captain Carl Florman, president of the Aerotransport, this means an increase of nearly 100 per cent over 1934. The night air mail service has not ended its fourth season.

Irregular honesty is harder to manage than regular dishonesty.



"Do you know why Mussolini wears red-striped breeches?"

"No. Why?"

"To keep his trousers up!"—Vindicator, Cuba.

Future Of Agriculture Challenge To Youth

Premier Sir Patrick In Thirty Minute Address Broadcast Over CBC

Speaking at the Royal Winter Fair at Toronto, the Hon. Robert Weir, Federal Minister of Agriculture, declared the future of agriculture challenged the patriotism of the rising generation. "They that we have reached an age in the country where many of the older breeders will soon be passing off the scene and giving place to new ones. Soon some new breeders in the rush of this twentieth century will be known that are necessary and the construction that is necessary to continue them won't. The future of agriculture is in their hands, and in their hands I, for one, have every faith to entrust it. I believe that our great difficulties with the new breeders will be that they will concentrate more on the advancement of the breed as a whole and less on the interests of individual breeders. That is, there will not be the prejudice that has often been manifested in the past against co-operation in order that each may receive the benefit of other breeders for the advancement of such breed.

To Sterilize Baby Utensils

Chlorine Gas Substitute When Boiling Water Not Available

The keeping quality of milk depends directly upon the number of bacteria present and this in turn depends upon the thoroughness with which dairy utensils have been cleaned and sterilized. The use of chlorine or scalding with boiling water is always effective provided it is applied in sufficient quantity. As a general rule the quantity available on the average farm is insufficient for scalding purposes. For this reason that the use of chlorine in suitable form is recommended by bacteriological experts. It acts rapidly in cold water and is cheaper and more convenient than the heat treatment generally recommended. When properly employed chlorine sterilization gives excellent results, and the practice, already general among milk and other food plants, is spreading in the dairy farms. —Department of Agriculture.

Red Used For Danger

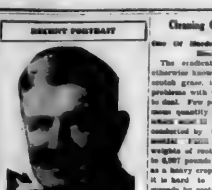
Because Color Does Not Merge Into Surrounding Landscape

If a lamp covered with red glass showed up for a distance of 700 yards, it would only show for 300 yards with green lamp and 200 with white, and still less with blue or purple.

Because red is so conspicuous it has been widely selected as the color to indicate danger. All other colors have a tendency to merge into their surroundings and become lost, but red never does.

A single ragweed plant may produce more than 32,000 seeds.

Even when you're right, it doesn't ever pay to get mad about it.



RECENT PORTRAIT

Above is a reproduction from a recent portrait of Stephen Leacock, famous humorist, whose connection with Red Book is connected with McGill University, Montreal.

Greenland Air Route Not Yet Practical

Icelandic Engine Needed To Surmount Mountains

Regular air routes from Europe to Canada over Greenland and the far-northern trail are impractical until engineers construct an absolutely reliable engine. This is the opinion of H. H Watkins, leader of the British Arctic Air Route Expedition which spent 16 adventurous months in Greenland studying meteorological and geographical conditions.

"We met not one week without a blizzard making flying impossible," said Mr. Watkins. The blizzards, however, were confined to the lower straits and planes equipped for high flying performance could escape them. The machines would have to be equipped with three or four engines of a speed of 200 miles an hour. Floats and emergency gear for landing in snow would have to be carried, said his youthful Arctic explorer.

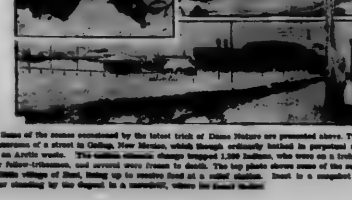
Origin Of Word "Sincere"

Comes From Roman "Sine Cera" Meaning Without Cement

When a Roman ordered a marble statue, he put into the contract the words "sine cera," "without wax or cement"; for dishonest Greek sculptors had a trick of filling in the flaws in a statue with cement that looked like marble. From this we get our English word "sincere." When we sign a letter "Yours sincerely," we mean "Yours without cement," "without wax."

Has Claim To Fame

Charles Ramberg, of Cuero, Wisconsin, who recently celebrated his seventy-sixth birthday, arrived in the United States when he was 14 years old with only 15 cents in his pocket. His claim to fame is that in three-quarters of a century he never has been in debt, never has been ill, and never taken medicine.



WHERE NATURED PLAYED A TRAGIC PRANK

Some of the scenes occasioned by the latest trick of Dame Nature are presented above. The lower panel shows a panoramic view of a street in Gallup, New Mexico, which though ordinarily bathed in perpetual sunshine now resembles an Arctic wonderland. The upper picture shows trapped 1,000 Indians, who were on a trek to the south to join their fellow-tribesmen, and several were frozen to death. The top photo shows some of the survivors, who reached the Zuñi village of Nutt, being up to receive food at a relief station. Inset is a snapshot of a Navajo homeless under shelter by the fireplace in a cavelike opening in a cliff.

Closing Out Comb Grass

One Of Hundred Problems Farmer Has To Tackle

The eradication of couch grass, otherwise known as quack twitch or couch grass, is one of the hardest problems with which the farmer has to deal. Few people realize the enormous quantity of couch grass roots which exist in fertile soil. Some conducted by the Central Experimental Farm at Ottawa, show weights of roots ranging from 1,331 to 6,997 pounds to the acre as much as a heavy crop of hay. The reason it is hard to clean out when it spreads by roots as well as seed. Thoroughly cleaning out of the roots is the one effective way of getting rid of couch. In small areas this may be done by hand. In larger areas by shallow ploughing and working thoroughly with the cultivator to keep the roots turned up to the sun long enough for them to "kill." Only as large an area as can be thoroughly cleaned up at one time should be undertaken, as half-way measures are only lost time and effort.

Depends On Climate

Canadian Grapes Find Clover Seed Stand Few Conditions

That climate has a great deal to do with the success or failure of red clover seed production in Canada is really best has again been conclusively demonstrated at the Federal Experimental Farm at Nappan, N.S. In these tests, first made eight years ago, four Southern European strains averaged 1.91 tons of hay per acre while five Canadian strains produced an average of 2.6 tons per acre. Again in 1937 five Southern grown seed lots produced only 0.86 tons per acre average as compared with an average of 2.3 tons per acre from four Canadian strains. In a third series of tests more recently completed, in which seeds grown under the same contracts, the Canadian strains producing well over three tons to the acre, Canadian -grown seed is decidedly the best for producing red clover under Canadian conditions.

Hole In Earth Has Floor

Between Scotland and Sweden Is 750 Feet Deep

It has been discovered that the floor of the North Sea has a deep hole in it.

This hole lies between Scotland and Sweden, and is no less than 750 feet deep. Before its discovery the floor was supposed to be a plain, with undulations varying in depth from 36 to 50 fathoms. Trawlers are warned of the hole because trawls get lost by fishermen who are unaware of its existence. The sides are very steep.

The depression has received the name of the Devil's Hole. It lies close to where the mouth of the Rhine opened in the pre-glacial epoch, when the North Sea was land.

During 1930, 479,554,302 gallons of gasoline were consumed by motor vehicles in Canada.

Left Good Example

Lawrier Was Loved Man Because He Served His Country

His Wilfrid Laurier died leaving a name as one of the great men of his country. It wasn't because he made millions but because he served Canada.

Visiting the place where he lived in his early days as a lawyer, Arthabaska, Que., a writer found "all whom I met where Sir Wilfrid was best known and loved, united in saying that he cared little or nothing for money or material things, but lived in the mind and in the spirit in this surely we are greatly in need of emulating his example in these days, when so many of our material ideals are toppling to the ground in ruin and confusion.

[illegible] ragged, and we suppose will continue to rage as long as there is a Canada and an Answer, and a record of men have thought almost wholly of self. Canada with them was only a place to make money out of and not so with Laurier a country to serve We are not deprecating personal wealth which is created as a trust to be used for the building up and betterment of the country, but that wealth which is hoarded and is the idol of too many to-day. Wealth that men are far from staical in the means of obtaining and using, isn't making Canada great, better or making the possessor to enjoy the good estimation of his fellows A lot of Canada's record financial messes are due to the "get rich quick" methods of a class whose concern for Canada is nothing but whose selfishness is largely to blame for many of our present problems. Laurier thought of life differently, and the people raised him to the pinnacle of political nation for his service to his country. The other class will be forgotten before the earth is spread over their caskets except by those they have ruined by their grasping, greedy methods.—Lethbridge Herald.

China's Largest City

Shanghai Now Has Population Of Nearly Three Million

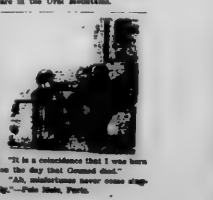
Many years ago, Captain Robert Dollar, the shipping magnate, predicted that Shanghai would become the largest city in China, and he initiated that it was destined eventually to become the largest city in the Orient. As far as China is concerned, his forecast has already become true, for it has a population of almost 2,700,000, the largest in China. In its international and French concessions alone there are more than 2,100,000 people. One of the interesting features of Shanghai is the successful functioning of a large bank founded by Chinese citizens, known as the Wo-men's Commercial & Savings Bank. Many men are patrons of the bank. It specializes in savings accounts. With a force of 40 Chinese women, the bank does a large commercial business.

Derby Home For Sale

Lord Derby has decided to sell "Derby House" in Stratford Place and a few hundred yards off Oxford Circus, London, England. Scene of many brilliant functions, Derby House was built in 1775 and was purchased by the present owner in 1908. It probably will be used for some commercial purpose. In recent years, Lord Derby has realized nearly $15,000,000 by selling parts of his large estate.

Among the foods eaten in Hawaii are 70 different kinds of seaweeds.

The world's richest emerald mines are in the Ural Mountains.



"It is a coincidence that I was born on the day that Counsel died."

"Oh, misfortunes never come single."—Pele Mele, Paris.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of
"The Splendid Folly," "The Stonell Of Far Ward"
Hodder & Stoughton, Ltd. London.

CHAPTER IX Continued

Joan's heart gave a violent throb, and then a sudden pain at the sight of her voice as she repeated blankly

"To forget Montavan?"

"Please, I said and did a few mad things that day we spent together. It was to be an uncounted day, you know, and oh, well, the air of the Alps is heady' I want you to forgive me and to blot out all remembrance of it."

He seemed to speak with some effort, yet each word was uttered deliberately, severing its way into her consciousness like a red-hot iron.

The curt, difficultly spoken sentences could only signify one thing that he had changed his mind, for even good, honest comradeship, that day at Montavan. He had merely been amusing himself with a girl whom he never expected to meet again, and now that circumstances had so unexpectedly brought them together he was clearly anxious that she should be under no misapprehension in the matter

Joan's pride withered beneath the insult of it. It was as though he feared she might make some claim upon his regard and had hastened to warn her, almost in so many words, not to set a fictitious value upon anything that had occurred between them. She turned from him with her hands on the mountain rail. The whole scene was like a nightmare. Her whole memory of it, above all, the memory of that pulsing moment of farewell, would henceforth be soiled and vulgarized converted into a rather sordid little episode which she would have gladly buried out from amongst the concrete happenings of life.

The feminine instinct against self-betrayal whipped her into quick speech.

"I've no wish to forget that you practically saved my life," she said. "I shall always" lightly "feel very much obliged for that."

"You exaggerate my share in the matter," he replied carelessly. "You would have extricated yourself from your difficulties without my assistance. I have no doubt. Or, more truly" with a short laugh "you would never have got into them."

He said no more, but let out the car and they shot forward into the gathering dusk. Presently they approached a pair of massive iron gates admitting to the Chateau de Vaux, as these were opened in response to a shrill hoot from Tormarin's horn the car swung round into an avenue of elms, the bare boughs, interlacing overhead, making a black network against the smooth sky.

Still in silence they approached the house, its dim grey bulk, looming indeterminately through the evening mist, studded here and there with a glowing shield of orange from some unshaded window, and almost before Tormarin had pulled up the car, the front door flew open and a white riband of light streamed out from the hall behind.

Jean was conscious of two or three figures grouped in the open doorway, dark against the welcoming blaze of light, then one of them detached itself from the group and hastened forward with outstretched hands.

"Here you are at last!"

For an instant Joan hesitated, doubtful as to whether the speaker could be Lady Anne. The voice which addressed her was so amazingly young—clear and full of vitality like the voice of a girl. Then the light flickered on to hair as white as if it had been powdered, and she realized that this surprisingly young voice must belong to her hostess.

"I was so sorry I could not meet you at the station myself," continued Lady Anne, leading the way into the house. "But a tiresome visitor turned up—one of those people who never know when it's time to go — and I simply couldn't get away without forcibly ejecting her."

In the fuller light of the hall, Jean discerned in Lady Anne's appearance something of that same quality of inherent youth apparent in her voice. The keen, humorous grey eyes beneath their black, arched brows were utterly vivacious, and the quite white hair served to enhance rather than otherwise, the rose-leaf texture of her skin. Many a much younger woman had envied Lady Anne her complexion. It was so obviously genuine, owing nothing at all to art

"And now" Joan felt herself pull up gently into the light "let me have a good look at you, Oh, yes' — Lady Anne laughed amusedly "you have the chin with that dimple—your little cleft in it. But your eyes and hair are Jacqueline's." She loaned forward a little and kissed Jean warmly "My dear, you're very welcome at Staple There is nothing I could have wished more than to have you here under my own roof, and I'm very glad indeed that you have come."

Joan was conscious of a sense of relief at the light, matter-of-fact tone of her welcome. As Jean's eyes roved round the old-fashioned, raftered place, she was conscious of a little intimate thrill of pleasure With its long low windows, its deep sills, and its open hearth where a roaring fire of logs sent blue and green flames leaping into the chimney's cavernous mouth, it reminded her of the great dining-hall at Beirndale. But here there was a pleasanter air of homeliness, a more feminine touch. It was obvious that at Staple the hall had been adopted as a living-room and furnished with an eye to comfort. There were wide, cushioned window-seats, and round the hearth clustered deep, inviting chairs whose every aspect was cozy, pleasant, home-like evidences — as open book flung down here, a piece of unfinished needlework there — of daily use and occupation.

(To Be Continued).

THE RHYMING OPTIMIST

—By Alice Michaelis—

A CELEBRITY'S DIARY

She names them all, the books she read,
The tale of her work and play,
The cities she saw as the swift years sped,
Her journeyings far away.

She wrote them there for the world to read,
In the years to come, maybe:
Her story of struggle, of want, of need,
Of courage and constancy.

She left a record of fame's bright blaze,
Of stirring and strange events,
Agitators of her crowded, colorful days
Of life, full-brimmed, intense.

But, search as we will, we do not find
A hint of her dreams revealed;
She hated the ways of her splendid mind,
But her soul was a room concealed.

In the end she left for the world to see
Of her life but the lesser part;
She told of her triumphs and victory,
But not of her woman's heart.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Results Are Satisfactory

Barley Ration Produces High Grade Hog Carcass and Meat

There is practically no limit to the production of barley in Canada and recent tests show that it produces better bacon and beef than other grains. It is proving fully the equal of corn when fed with suitable supplements in the form of home-grown leguminous roughages. Barley can be used in almost any proportion of the grain ration up to one hundred per cent. As a hog feed it develops an entirely satisfactory class of bacon, which is more than can be said for corn fed in equal proportions, and as a feed for beef cattle barley is undoubtedly one of the best of our Canadian-grown coarse grains. The increased use of barley and other coarse grains at their present low price levels will make for much better quality in the beef being marketed, and this in turn will help create a demand for more beef.—Department of Agriculture.

Says Canada Strong In Day Of Trial

Bank Of Montreal Heads Review Situation At Bank's Annual Meeting

In the speeches of Sir Charles Gordon, president, and Jackson Dodds, joint general manager, at the annual meeting of the Bank of Montreal comment was made on the inherent strength being exhibited by Canada in the face of world depression, especially in regard to the banking structure of the country. Sir Charles while declaining to prophesy as to the immediate outlook said that taking the long view "There is every reason to look forward with confidence to emerging stronger and more prosperous than ever from the conditions that now prevail." and Mr. Dodds remarked, "It would be rash indeed to speak with assurance of the prospects of the coming year, but it is surely permissible to say that when international confidence and co-operation are restored, and consequently the economic impetus, Canada will be among the first to benefit.

Sir Charles Gordon made particular reference to the manner in which the gold price levels have affected farming, lumbering, mining and newsprint manufacture, remarking in regard to the latter that there was reason to believe that a better condition was being ushered in and the great saving from the premium on New York funds and from consolidation of companies for the purpose of reducing overhead expense and effecting more economical distribution of the product

While expressing the opinion that Canada's large foreign obligations would tend to prevent an early return of the Canadian dollar to par, he said he had no doubt that it would return to par As factors already working to that end he remarked that the adverse balance of trade had been reduced and that in the five months to October 31st last there was each month an excess of domestic exports over imports.

Jackson Dodds, joint General Manager with W. A. Bog, in presenting the balance sheet reviewed the progress made by the Bank during the fiscal year. Remarking that "we should be thankful that we in Canada are as well off as we are," he said business, nevertheless, was at a low ebb, and a halt must be called to mounting expenditures by federal, provincial and municipal authorities, as these only aggravated the situation. Referring to the fact that the downward movement of prices had reached, record levels during the year, he pointed out the importance of a Central Bank in maintaining a stable price level and commented by United States experience. Concluding he urged the adoption of a policy by which as many commodities as possible will be made self-supporting by placing them on the land.

British Women Fliers

Five Hold Licenses As Commercial Pilots For Hire

Seven years ago Winifred Spoong have established the Englishwoman as a noteworthy air pilot. Miss Amy Johnson, of Australia, and Miss Jean Winnifred Spooner, winner of numerous open races; Lady Bailey, Miss Gertrude of Africa, and Mrs. Victor Bruce, who flew solo to Japan, are Britain s best known women fliers.

A number of titled women such as the Duchess of Bedford, own private aeroplanes and do most of their travelling throughout Great Britain and the Continent by air.

A check showed that women pilots on October 1 held 112 Air Ministry "A" licenses, entitling the holder to pilot an aeroplane outside the immediate precincts of the aerodrome. Five women possess the "B" license, which permits the holder to fly as a commercial pilot for hire.

Douglas' Egyptian Liniment is a quick, certain remedy for Hoof Rot or Thrush. Four or five applications are usually enough.

Russia Planning Ranches

Reviews Consider Purchase Of Pure Bred Stock In U.S.

Most contact with the world several hundred beef bulls in Great Britain every year for the past two or three years the Soviet Government is now considering the purchase of pure bred stock in the United States. Representatives of the Amtorg, or Russia's buying organization in New York, are now making a survey of the pure bred beef cattle raising areas of the middle western states with a view to purchasing considerable numbers. It is claimed that a tremendous program of state cattle ranches is planned, where beef cattle would be raised under a management similar to the community wheat farms.

Little Helps For This Week

"Let the Lord do that which is good in His sight."—1 Chronicles xix. 13.

Our own sure safety we reject and resent.

When once we make our good the object of life.

His final ends surpass our feeble notes.

His plan is greater than our predecessors.

Who told us we had any right to bliss?

Our tears are but our arrogant concern.

Two things that grow and yield the greatest sweet:

The lofty cocoa-palm and sugar-cane

As well in waters as on fresh terra firma

Will thrive, and in their sap and fruit complete

No hurting taste of bitter will remain. —J. M. M.

Rest satisfied that whatever is by the appointment of Heaven is right, is best. —James Hervey.

I found it better for my soul to be humble before the mysteries of God's dealings, and not to mutter a cloter about what I could never understand. —George Elliott.

Orders Special Machines

Cleveland Firm Supplying Milling Equipment To British Government

The largest order ever awarded on addressing and mailing equipment was received by the Addressograph-Multigraph Corporation, which announced receipt of a contract for 638 special machines from the British Government. President Joseph R. Rogers said it was the initial order to equip 1,500 postal offices in Great Britain in 1937. Specific cost of the order has been estimated to approach $1,000,000.

Egypt, Arabia and India are in the same latitude as Florida.

OBITUARY

The death occurred suddenly last Tuesday, Dec. 15th, of an old-timer of this district, Mr. T. Trombley age 74.

Coming to this district about 40 years ago and taking up a farm at Lamont-on-the-Beaver. He lived with his family until two years ago, when he moved into the Fort.

He leaves to mourn his loss, his wife, five daughters, and in Manitoba, and four in Alberta, one son living at St. Paul, and many friends.

The funeral service was held in the Fort Saskatchewan Catholic Church on Tuesday, Dec. 17th, interment taking place at the Lamont Cemetary.

The pallbearers were:—Alphonse Lamontagne; Alex. Lamontagne; S. Langlois; Arthur Bourque, C. Villeneuve; Jos. Hostyn.

CARD OF THANKS

Mrs. T. Trombley and family wishes to thank their many friends for their kindness shown during their recent bereavement.

A reign of righteousness begin.

Partridge Hill

SUNDAY SCHOOL

A real jolly time was had by the members of the Partridge Hill United Church Sunday School on Monday evening, when they held a get-together in the basement of the church.

Games and stunts were put on all taking part with a will and the fun reared fast, not to say furious, in which youngster and older joined. A pleasing feature of the evening was a presentation to Miss Bessie Allen in recognition of her services as organist of the Sunday School.

Clover Bar Council Held Busy Meeting

The Council of the Municipal District of Clover Bar, No. 517, held a regular meeting on Friday, the 18th December, with all members in attendance.

The National Emergency Relief Appeal was the subject of much discussion. The Council felt that it was a very difficult matter to organize a committee to canvass the district, particularly at this time of the year. It was also pointed out that the larger part of the District was already covered by the various religious organizations. Nothing of a definite nature could be decided, so the matter was left in abeyance for the time being.

The request of the Canadian National Railways for a road along their right-of-way through Section 17-55-21-4 was submitted. The Company intimated that it was willing to arrange for the necessary land, presumably without cost to the district, if the Council would agree to do the necessary grading. The Secretary was instructed to advise the Company's Engineer that the Council is prepared to do the work provided the required area for the roadway is obtained without any cost to the District.

A verbal complaint was made to the Council regarding the erection of three fences across the road allowance near Section 3-54-23-4. Instructions were given the Secretary to notify the parties responsible for same that these fences must be removed at once.

Approval was given for the rent of the recreation grounds at Bremner and Clover Bar.

Messrs. Storie and Southgate were in attendance to register a complaint about the condition of the road allowance from their farm to the Carbon Road. They were assured that their request would receive every consideration when road work opened up next spring.

The Secretary reported that in company with the Deputy Reeve, Mr. W. Peters, that they had attended the hearing of the application of the District for the cancellation in part of the sub-divisions of College Terrace, Hollywood and Terrace Heights before the Board of Public Utility Commissioners on the 16th of December. The anticipated opposition to the Application did not materialize and the Board granted the application and advised that the necessary order would be issued in due course.

Mr. F. E. Murray, Manager of the Royal Bank, attended and discussed with the Council the matter of the District's finances for the coming year.

With the disposal of much routine business, reading of correspondence and the passing of payment and account the meeting adjourned.

A Christmas tree decorated with strings of colored lights stands in front of the Provincial Gaol this year and is very noticeable indeed.

The tree is in the centre of the main driveway and was a very lovely picture this evening when the trees that line both sides of the road were covered with a heavy frost.

Bread without supplies. Use a tablespoon of borax in each two quarts of water used for rinsing the supplies.

Beaver Hills

A very fine concert was given in the Beaver Hills United Church on Tuesday evening, Dec. 29th, under the direction of Mrs. J. W. Dore, Mrs. Clink, and Mrs. Wesley Fisher. Along with songs and readings several tableaux and drills were given and were well carried off by the pupils of the Sunday School.

The selections were mostly in the keeping with the Christmas season.

The items on the programme were as follows:—

Two part chorus 'Christmas carols'

Reading 'The Friendless Gem'. Norman Fisher.

Play 'Christmas comes but once a year'.

Tableau 'Book of Ages'.

Flag Drill— Vocal Trio — Tableau

Poinsettia drill

Reading Elmer Morris

Song Warren Dore

Pageant "The Star Came"

Chorus "The Whole wide World".

At the close Mrs. E. J. Hodgins, superintendant and on behalf of the Sunday School presented Mrs. Dore, Mrs. Clink and Mrs. Fisher with pieces of china in recognition of their efforts in presenting such a splendid program.

WEDDING

Mahelmah — Bergum

A quite wedding took place at the home of the bridegroom's on Saturday, December 19th., when Ruth Mary daughter of Mr. and Mrs. Kasmus Bergum of Sedgwick, A. bride became the bride of Jacob Phillips, son of Mr. Phillip Eichenlaub of Edmonton.

Rev. A. Kraemer performed the ceremony.

The bride was attended by her sister Miss Eva Bergum and Fred Eichenlaub brother of the groom acted as best man.

Mr and Mrs. Eichenlaub were the recipients of many useful gifts.

The guests were Mr. Phillips Eichenlaub; Mrs. R. Bergum; Mr. and Mrs. Edward Eichenlaub; Mr. and Mrs. Raymond Schultz; Mr. and Mrs. S. LeLeacheur; Mr. and Mrs. Fred Rundel; Mr. and Mrs. Norman Gardner; Mr. and Mrs. Elvin Swanson; Mr. and Mrs. Charlie Jonsalmon; Mrs. A. Schultz; Mrs. George Johnston; Rev. and Mrs. A. Kraemer; Mrs. F. A. Mueller; Mrs. Furse.

The Misses Eva and Clara Bergum, Anne Schultz, Dorothy Walton, Marie Kraemer and Emma Mohr.

Messrs Fred and Reinhold Eichenlaub, Emil Bergum, Harold Goldworthy, Jack Sailes, Cliff Swanson, and Jimmy Campbell.

WHITNEY ROBBES MAY CONTEST ON PRAIRIES

There is a strong possibility that thoroughbreds from the famous Whitney stables of racehorses will perform on Western Canadian tracks.

Cornelius Vanderbilt Whitney, head of the Whitney interests of New York and son of the Harry Payne Whitney, recently travelled through the West over the Canadian National Railways and he expressed great interest in the Prairie race circuit. The famous "owner" declared he will consider sending some of his horses to Western tracks. During his visit in the West, Mr. Whitney and his wife inspected the Pike Pine mine, where early archaeological investigations were financed by the Whitney millions.

YPRES VALLEY

The school concert held on Dec. 23rd was a decided success. The program was extra excellent with songs, drills, and dialogues.

The biggest item on the evenings program was the arrival of Santa Claus, with a lovely present for every child in the district, and a bag of candy, apples and oranges as well.

The older folkes all enjoyed a treat of apples and candy.

Mr. Wm. Gilliken was the chairman for the evening.

******

On Monday, Dec. 28th, friends of David Gunn's Jr. gathered at the school where his parents had given a party to celebrate his twenty-first birthday.

The first part of the evening was taken up with whist sixteen hands being played with the honorgoing to Ladies first.—Mrs Stanley Dennis, Second ladies—Miss Alma Pearce, Ladies consolation:— Mrs. D. Gunn, Gents first:— Clarence Cranston, Gents second— Ed Dennis, Gents consolation:— Stanley Dennis.

After cards, dancing was the order of the evening, and at midnight an excellent lunch was enjoyed by all

Congratulations were extended to David, and all joined in singing for 'He's a jolly good fellow" to which he replied suitably. Many varied gifts were received, amongst them a gold watch from his father and mother.

Dancing was carried on again until the small hours of the morning.

"The Four Hundred" has long been synonymous for the people who do the right things. It is fitting, therefore that it should also be the total of the passengers on the first cruise around the world by the new wonder-ship "Empress of Britain", which left New York on December 5.

With the Canadian dollar where it is in the market, there is a marked tendency to keep it at home and many Canadians are spending or planning to spend the winter amid the beauties of British Columbia, instead of "going south". Fifteen per cent can mean a whole lot of dollars and the British Columbia coastline is one of nature's most beautiful spots, anyway.

There are 28,000 schools or colleges in Canada, taught by 33,144 teachers and attended by 2,490,623 pupils, or one quarter of the Dominion's population. The average expenditure is about $66 on each pupil enrolled. Attendance is on the up grade, being 77 per cent for the whole Dominion, as against 64.7 in 1915. And the future of technical education in Canada, for the Technical Education Act provides for Federal grants of $750,000 a year for 10 years, which means that the night schools will be able to run, to say nothing of the day courses in technical institutions. 600.

PLANNING THE NEW YEAR

We hope we may assist you in planning the work for the New Year, in anything that may include the use of building supplies.

It may be only the installing of a shelf, putting down a new floor, some little change in the interior of your home, or the erecting of a new building.

We are here to help you with service and material.

ENO'S FRUIT SALT

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to laxer cleanliness. And to be healthy clean is to be healthy

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

Why The World Is Sick

Reviewing all that the world has passed through in the years 1914 to 1921, considering the deplorable state of affairs existing in the world today, and, at the beginning of a new year, looking into the immediate future, one would expect all people, of all names, nationalities, languages and creeds, who possess an atom of intelligence and a modicum of common sense to solemnly vow "Never again."

During the frightful years of human anguish and suffering of the world our people were sustained, even uplifted, by the hope, the oft-expressed declaration, that it was a war to end all war; that, when the strife and agony was ended, a new and brighter day would dawn for the old world; the reconstruction of an era of happiness, progress and prosperity unparalleled in the history of mankind. Buoyed up with these hopes, inspired by this bright vision, people labored and sacrificed and suffered cheerfully that their children and children's children through generations to come would reap the benefit.

But disillusionment has come. The nations of the world were not purified in the fires of war; the bitterness and greed of men were not consumed. The huge debts which the war imposed on each nation are crushing the people, but instead of a willingness to mutually and ruinously subject these burdens, or, as there should be, a keen anxiety to do so, with the strong feeling that the weak, the unfortunate and the unborn must bear an equal share with the less favorably cursed, most of the nations of the world are bent on making the "otherfellow" pay to the last farthing. Like Shylock of old, they demand their pound of flesh, caring not that thereby all are headed toward the abyss of destruction.

And individuals, like nations, display the same selfishness, and even greater greed. For the money that accumulated during the war, they seem determined to recoup themselves. Full and exorbitant payment they are demanding for the allegedly patriotic sacrifices they made during the war and reported. They apparently care not that such payment to them means ruin to others, and they short-sightedly forget that with the ruin of these others how must inevitably fall upon themselves.

And so, nearly a decade and a half after the joyful announcement of the armistice and the coming of the long hoped for peace, there is as much suffering throughout the world as during the war years, possibly less in some countries but much more in others. The same great wealth of natural resources, provided by a benign Providence, exists; the needs and desires of men are as great as ever; the means are at hand to utilize the one to meet the requirements of the other. But still, cold and cruel, man says "No." He refuses to consent to anything to help his fellow man, but selfishly thinks only of self, and demands that all others shall help him while he insists back the aid he might extend.

When each nation builds impassable barriers against all other nations; each is at war with all others in an attempt to out-manoeuvre them, to make progress while all others decline. And as all suffer, not one is making progress, all are on the decline. Again, what is true of nations, is true of individuals. One industry makes demands for Relief alone regardless of the effect on other industries, forgetting that if these others suffer, it, too, must suffer; if they perish, it, also, must die.

His moral war to end all war failed in its object. War rages today between the nations as never before. It is a world war, more embracing in its limit than the colossal struggle of 1914-1918. It is being fought by different methods, that is all. It is piling up national debts bigger than ever; it is stendily, even rapidly, increasing the burden of taxation; it is destroying trade and commerce; it is making men, women and children poorer, more cold and hungry. The Great War did provide employment for all; the present economic world war has thrown millions out of employment, and the number steadily increases. It is undermining the health and the morals of thousands of people.

The picture is a dark, a gloomy one. It is, however, futile to delude ourselves. It is idle to cry peace, peace, when there is no peace. The only salvation for the world is a return to sanity. The world is just what the people of the world make it. If they insist on fighting each other, whether in a physical or economic sense, why fight they will. But in realizing and striving to destroy they must necessarily commit build up and prosper. The world must turn from its present ways before it can recover from its sickness. It is not a shortage of gold, nor over-production, nor even present maladjustments that is the trouble. It is the people and their governments that look on life, their individual and narrow nationalistic selfishness that is the root cause of the world's sickness and depression.

Estonia and refugees in Canada: Those with connected-on rates have made approximately one-quarter of loan made in Europe for more than the country's population annually. 15 years.

Sorry To See Night Coming She Could Not Sleep

Mrs. H. McElroy, Kirkfield, Ont., writes:—"I was very nervous and run down, had short of breath, and had constant headache, and could not go to bed night evening as I could not lie down or go to sleep.

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now completely restored; can sleep fine all night, and have gained in weight.

Idea Is Not New

Psychologist Believes Murder Prevention By Detecting Criminal Type Early

Murders may be prevented in the near future by the recognition and treatment of the types likely to commit major crimes.

This is the belief of Miss Alice Raven, a leading London psychologist, who has made an exhaustive study of the most famous murder cases of present years.

"In all cases of murder I have investigated," she told a newspaper representative, "I have found a definite psychological abnormality in the murderers.

"Murderers are almost invariably impressed with a sense of hostility towards the world, probably due to an inferiority complex, and they have frequently no power of self-expression.

"Their emotive faculties are better developed than their brains, and the suppression leads to a desire for violence.

"More research is needed on this point, but I am inclined to think that the murderer is a man who has a memory of cruelty in childhood to avenge.

"My studies of murder cases and criminal mentality show that murder is only committed under certain conditions, and I am convinced that trained psychologists will ultimately be able to recognize the type, even in childhood likely to commit major crimes, and the social services will take them in hand."

Strengthed With Asthma is the only expression that seems to convey what Nacoma means to those who attend its trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is instantaneous. Don't suffer. It was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This remedy is obtainable in all world's Canadian Posts Cheaper

Cattle Exporter Sends Shipment Of American Stock From Quebec

The possibility that Canadian ports will be used in future in preference to American ports for the shipping of cattle to Europe was forecast at Quebec by William H. Stowe, leading United States cattle exporter, who was supervising the loading of twenty-eight carloads of American steers which he had shipped to the United States by the army purchasing, chiefly in connection with artillery.

The animals were sent across on the freighter "Rosenore," which was also carried a capacity cargo of 1,000,000 bushels of grain for the country. When asked why he had chosen Quebec as the shipping port, Mr. Stowe said he found that owing to the longer rail haul to a Canadian port transportation costs were reduced considerably, resulting from a lower rate of rail to Canadian food. The exporter, who crossed to Europe in charge of the shipment, expressed his opinion that the transportation of these animals through Canadian ports would result in the future, meaning that a trade which previously had been entirely through United States harbors now will be dedicated to the ports of Quebec and Montreal during summer months and St. John, N.B., in the winter season.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious results. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Orders Under Heavy Cop

A large shipment of honey has been made by J. Mordhorst of Edmonton, Manitoba, to eastern Canada. After ascertaining the quality of his honey by using a centrifuge which he set in the Canadian Royal Fair, Mr. Mordhorst obtained an order from one of the Toronto departmental stores, and the consignment was placed on order for Mr. Mordhorst's orders now.

Since 1880 A.D. Zealand has established all other regions in the output of love from its volcanoes.

Discoveries Confirm Report

Geological Mapping Of Manitoba Area Indicated Gold Deposits

The discovery of gold made recently in the Island Lake area of northern Manitoba would appear to confirm the views expressed by Dr J. F. Wright in the summary report issued by the geological survey, Department of Mines, Ottawa, following the geological mapping of that area in 1927, according to a brief statement issued from the Department of Mines, Ottawa. The statement continues:

"Commenting on the mineral possibilities of the district, Dr Wright who paid a further visit to the area during the past summer, states that the geology indicates areas of rock similar to those wherein commercial mineral deposits have been discovered elsewhere within the Canadian shield Consequently, it is pointed out, the area is one that should be prospected carefully. Favorable rock conditions extend over a large belt and a great deal of intensive, systematic prospecting will be necessary before the mineral possibilities can be evaluated."

Manitoba Not Charging Auto License Tax

But Owners In Saskatchewan Pay Five Dollars More

Licenses for motor cars in Manitoba will cost no more for 1932 than this year, and the registration fee will continue to be the same, inquiries at the legislative buildings disclosed.

No change is contemplated in Manitoba.

In Saskatchewan cities motor cars will be called upon to pay $5 more for licenses than do owners of motor cars in Manitoba.

Licenses in Manitoba range from $9 to $35 in cost, depending on the length of the wheelbase of the car. Registration of motor vehicles other than trucks and tractors cost $9 for cars not exceeding 160 inches in the length of the wheelbase, and $2.50 for every additional five inches in the wheelbase.

Keep Dangine' Egyptian Liniment handy. A sure, speedy remedy for burns, sprains, bruises, sore throat, chilblains, corns, warts, scald feet. Invaluable for inflammation and muscular rheumatism.

Receive Repeat Orders

Trial shipments of British Columbia tomatoes from Kamloops to Hong Kong, made with the co-operation of the provincial authorities here, resulted in repeat orders for the product, it is announced by Hon. William Atchison, Minister of Agriculture. The initial shipment met quality and all satisfactory prices.

VICKS VAPORUB

Won War Against Speeders

But Duke Of Marlborough Had To Use Drastic Method

The Duke of Marlborough has won his war against the speed-hogs on his estate.

Some weeks ago, personally in command of the speeding of motorcars through the private roads of his estates at Blenheim Park, he adopted a novel, if somewhat drastic method of preventing fast driving.

He had two "humps" built into the roadway near Blenheim Palace, with the result that motorists taking the corner at speed received a timely reminder of their sins.

Speaking recently, the Duke of Marlborough, who had previously expressed his determination to stamp out speeding through his estate, which is noted for its beauty spots, stated that his method had resulted in the return of normal motoring.

Persian Balm quickly relieves chapping, windburn and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing. Never leaves undesirable stickiness. Stimulates the skin. Makes it soft, velvety and flawless. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and perfectly white. Reports that subtle charm so essential to true elegance.

Lumber Trade Improving

Shipments From British Columbia Showing Big Increase

The lumber trade of British Columbia is picking up noticeably. For the first nine months of the current year business with Australia has been greater than at any time since 1927, with exports running to 23,620,980 feet, compared with 29,944,775 feet for the whole of the year 1930. Shipments to China have also been quite large, at 46,280,791 feet for the nine months against 68,950,742 feet for the whole of 1930. Japan's purchases to date amount to 23,000,000 feet.

Development Of Canada's Resources Since War Shows Expansion Not Dreamed Of

Available figures of the decennial census of Canada (1931) leave no room for doubt that the population now exceeds 10,000,000. The census of 1921 showed a total of 8,788,483. From 1906 to 1913 inclusive more than 2,500,000 immigrants entered the country Great Britain and the United States were the chief source.

Since the World War the tide has fallen off. Modern Canada may be said to date from 1867, when the Dominion was formed by the union of Nova Scotia, New Brunswick, Quebec (Lower Canada) and Ontario (Upper Canada). Two years later the Northwest Territories were purchased from the Hudson's Bay Company, and in 1870 Manitoba was organized out of the new lands. It was not until 1871 that British Columbia, and 1873 Prince Edward Island, joined the Dominion. The population in 1871 was 3,635,761. In 1880 the islands and districts within the Arctic Circle came under the jurisdiction of the Dominion Newfoundland and the Labrador Coast still remain outside. Canadian must be thought of as more than 80 per cent. British and French in origin. The area of the Dominion is 3,684,723 square miles, 3 per cent. greater than that of the United States and Alaska, and only 2 per cent. smaller than the area of Europe.

Since the World War the development of Canada's resources has given promise of expansion not dreamed of at the beginning of the century. Her wheat lands produce ever larger crops. She has become the second largest gold producer in the world. Including buildings and machinery, agricultural resources were valued at $7,978,833,000 in 1929. In 1928-30, gold production was $89,540,722. The total will be exceeded in 1931. Copper production in 1930 was worth $41,411,661 and nickel $27,118,643.

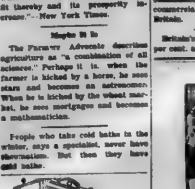
In Diamond Jubilee year, 1927, Canada produced 69 per cent. of the world's nickel, 85 per cent. of its asbestos, 55 per cent. of its cobalt. Pitchblende, a base of radium, has lately been discovered in the Great Bear Lake district in rich veins. The future of the mineral industry in Canada is so full of promise that optimistic forecasts no longer appear extravagant.

Her lumber industry and her pulp and paper industry employ many thousands. The value of the fisheries in 1930 was $85,518,831. Canada's export trade is of great importance to a people engaged in the production of commodities and materials in excess of consumption. Henry Lawrey, a leading French authority, finds the Canadians backward in the mechanisms of foreign trade, but predicts for them a growing share of it. "The whole Dominion," he says, "will benefit thereby and its prosperity increase."—New York Times.

Maybe It Is

The Farmer Advocate describes agriculture as "a combination of all sciences." Perhaps it is. when the farmer is kicked by a horse, he sees stars and becomes an astronomer. When he is kicked by the wheat market, he sees mortgages and becomes a mathematician.

People who take cold baths in the winter, says a specialist, never have pneumonia. But then they have cold baths.



"Because me, but would you mind handing me your hay? Mine will eat it."—Jugend, Munich.

Kaiser Was Outwitted

Lost Price Pig As Well As Purchase Price

How former Kaiser Wilhelm of Germany lost a prize British pig as a complicated series of events has been revealed. During the spring of 1914 the Kaiser wanted a prize British pig for his Potsdam piggeries. The pig was purchased at Somerset and started for Germany, but the Great War broke out and the pig was interned as a prisoner. Then for three years, with a blue ribbon around its neck and a collection box on its back, the Kaiser's prize pig collected money for the British Red Cross. One dark night a cupgoble dropped beside in Norfolk and the poor pig was killed. Came the peace and the ex-Kaiser wanted his pig or his money back. His agent filed a claim with the enemy debts tribunal in London. The tribunal said "O.K." but the Somerset farmers who sold the pig sent in a bill for maintaining the prize pig for three years.

In Abnormal Times

Price Of Hogs Twenty Dollars More Than Year Ago

Hogs have been selling at $4.30 which was a common price during the last ten years of the 19th century, between the years 1890 and 1900. It is twenty dollars less than it was during third year of the Great War. The good hogs in the corn-belt ready to a wasteland. "Accelerodrome" Suggested For Experiments For Greater Speed In Airplane Flights

Taxes On the Farms

Have Increased Steadily While Land Values Are Lower

A gathering of fifteen hundred farmers at Peterboro, Ontario, voiced a protest against the taxes which agriculture is compelled to pay, and passed resolutions asking the Ontario Government to extend relief by paying the entire cost of provincial and county roads and by reducing all Governments salaries by 25 per cent.

Taxation has grown alarmingly in the last quarter of a century. Its pressure is being felt today by all classes. Farmers, especially, find that their outlay for taxes has been increasing steadily for years, while the value of farms has remained stationary or has decreased. There are many farm properties that are worth less today in the open market than they were twenty-five years ago. In fact, it would be regarded as a lucky opportunity today to be assured of prices for farm properties that were available twenty years ago. Nevertheless taxation has marched forward to new heights and shows no symptoms of a turn in the downward direction.

The governments could help revival by relief measures in farm levies. There are farms that produce little more than is adequate to pay the taxes. While conditions remain thus unsatisfactory there is no basis for optimism on the part of those who are much bewildered by the mounting costs of things they have to buy and the unexplainable low prices of farm products. It is a situation that demands official sympathy and action.

The British Empire

People Should Know History Of Each Separate Part

Now that there is every prospect of the union of the practical and sentimental ties that bind British people—the complete union of confidence and endurance—the Federal Government should see that the history of each part of the Empire is taught in the school system. Canada's history is taught in the schools, but the history of the Empire, a paragraph or a page, with an indication of its products, should be a book would be needed in the mess room, ship owners, bankers, politicians and voters. We know the history of the United States of Germany, but how many men in Canada could name all its parts?

Would Favor Veterans' Sons

The Ottawa Citizen recently published the following: "A clause in the Civil Service Act to extend to the sons of ex-service men in the Great War the preference in government appointments now enjoyed by the fathers will, it is said here, be suggested in the coming session of parliament."

In the belief that man has not yet reached anything like the speed at which he is capable of travelling, Louis Hariot, veteran pilot and aircraft builder, suggests that high-speed experiments be conducted in what he calls an accelerodrome.

This would involve an elevated circular track around which a propeller-driven body, or fuselage, may whirl while attached by cables to the track. Centrifugal force would keep such a body aloft and there would be no danger to human life because the fuselage need not have an occupant.

Hariot recently turned over to the Aero Club of France a magnificent cup as a trophy for the man who first reaches a speed of 1,000 kilometers, or 620 miles, an hour. This need not necessarily be done in an aeroplane, but is believed such speed can only be approached with reasonable safety by the air.

A change in the conditions stipulates that the cup may be alleuated to the first man to fly at the rate of 700 kilometers, or 186 miles, an hour for an hour, but the ultimate goal is 1,000 kilometers an hour.

Blaisdorfs's fabulous cup raised to 400 kilometers an hour, but he could not maintain this speed for half an hour, with his 2,000 horse-power motor. Hariot believes many more impractical for much greater speeds. But he holds that the possibilities of the aeroplane are unlimited.

Just as automobiles are suspended from a cable, Hariot's accelerodrome system would apply to a fuselage driven by a motor with a propeller. His idea is to have a circular track, about three kilometers in diameter, supported by a series of steel towers. One or two cables attached to the fuselage would slip along this track as the body moved. It would rise from the displacement of air, under its own speed.

With such a device, Hariot thinks engineers could make the most exhaustive tests to gain the maximum of speed and the highest practical efficiency. He points out that in the case the difficulty of trying out machines has been the human element. Many lives have been lost, and more will be lost unless we aid system of designing a machine and a motor and taking them off in actual flight to see what they can do.

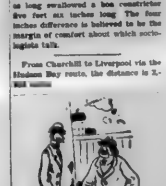
Hariot says that an accelerodrome will enable engineers better to study types of machines, motors and propellers, without risk to human life, by spinning them around the circular track. Stresses and strains can be observed, and adjustments made accordingly.

Hariot, who astonished the world in 1909 by flying across the English Channel, does not think there is anything chimerical in such a speed as 1,000 kilometers an hour. He says it can be realized today with the technical facilities at hand.

Size Margin Of Comfort

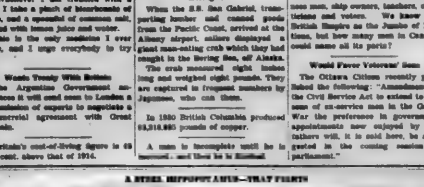
Students of mathematics will be interested in the report from Boston that a king snake five feet ten inches long swallowed a boa constrictor five feet six inches long. The four inches difference is believed to be the margin of comfort about which sociologists talk.

From Churchill to Liverpool via the Hudson Bay route, the distance is 2,400 miles



"I have been shouting at you for half an hour and you only stand and smile. What are you?"

"A football referee!"—Kruger, Amsterdam.



A RUSSIAN METROPOLITAN—THAT FLOATS

What is believed to be the most sensational development yet made in the field of armored cars is represented by this amphibian fortress, equally at home on land or in the water. This strange-looking but deadly land-water tank is shown plowing through the waters of the River Thames, near London, England, in one of its recent tests. The craft was photographed while it was making six miles an hour against both wind and current. Note how heavily it is armored. The gun sticking from the turret is far more deadly than any weapon a hippopotamus, which the tank resembles could employ.

WORLD HAPPENINGS BRIEFLY TOLD

Flood waters spreading over northern Mississippi and portions of Arkansas and Louisiana, December 15, next source of families racing to high ground.

Continued improvement was reported Sunday, December 20, in the condition of Fats Negri, film actress, following her operation and blood transfusion.

The staff of the United States Consulate in Winnipeg, is being increased by the appointment of Stanley H. Lawson, now at Genoa, Italy, as vice-consul, consular officials were advised recently.

Seventeen of six months and one year in prison were inflicted on Purificatione Tonsea, a leader in the Italian Nationalist Congress, at Alessandri, Italie, on charges of violating the ordinance against the "no rent" campaign.

The captain of the liner "Tuscania," which arrived in Glasgow, Scotland, from New York, reported an elderly woman was fatally injured and 25 other passengers suffered minor injuries as the result of heavy seas which struck the ship in mid-Atlantic.

Thirty firemen were injured by falling masonry or overcome by smoke when fire swept the ancient "Alte Schuhaus" palace in Stuttgart, Germany, recently. Most of the art, except a collection of textiles, were saved.

Rose Pilon, Roman Riendeau, each 20 years; Emile Graham, Adrien Desbarats, each 14 years; these were the unanimous verdict cast by Judge Tyrone, in the court of session at Montreal, recently, to four young men who were convicted of armed robbery.

Premier George S. Henry returned to Toronto on Sunday, December 20, from a three weeks' tour of Western Canada and defined reports that he contemplated resigning the premiership to accept the vacant post of Lieutenant-Governor of Ontario.

Canadian car loadings week ended December 12, totalled 46,877, a decrease of 6,697 from preceding week and 4,648 less than the period 1930.

All departments of Colonial Motor Car Company plant at Pontiac, Mich., are on full time basis with some departments working at night as well.

U.S. Treasury called for repayment on $64,230,000 on December 31 and similar amounts on December 22 and 30, making total of 132,662,000, representing 37 per cent. of amounts required for receipt for account of treasury notes dated December 15, 1931.

Studebaker Tractor, report issued September 30, 1931, net loss $634,527 after depreciation, inventor adjustments, etc., against net income $970,-918, equal to $2.64. Studebaker employing employment with 9,000 men, now employed nine hours a day at South Bend.

Twins, a son and a daughter, were born to Mr. and Mrs. F. M. Simpson, of South Sioux City, Neb., early Sunday December 20, 1931. The son was born at the family home shortly after midnight and the mother and the baby were hurried in an ambulance to a Sioux City hospital. An hour later the daughter was born. No one baby is a native of Nebraska, and the other of Sioux City, Iowa.

Thirty-six hundred important bank positions in the United States are held by women.

"I would like to buy you a drum like that, Agatha—and d figure like it so well."—Die Muskete, Vienna.

How To Pass Inspection

Bees Clothesmen—Trees Are Not Immune From Law

Even our Christmas trees are not immune from government inspection and identification. U.S. Department of Agriculture reports that Christmas trees and greens may not always be harmless as they seem. If shipped from an area heavily infested with some dangerous insect pest into a non-infested area, they constitute a distinct menace to vegetation. Therefore, a federal quarantine bars shipment of evergreens from these parts of New Hampshire and Vermont infested with gipsy moth, a serious pest of shade trees. Plant quarantine inspectors of the Department of Agriculture officers carefully examine all shipments from the tightly infested regions.

Backyards Are Busy

Canadian Shooting Keep Poultry Eggs Of Shipments For Market

Dominion Government returns received at Saskatoon covering the marketing of livestock in the province of Saskatchewan reveal that 75 per cent. of the livestock marketed in this province during the week ending December 10 passed through the Saskatoon stockyard. This is taken by live-stock officials to indicate the rapid development of the cattle and hog industry in the northern areas of the province, and follows closely in line with the trend of marketing percentages for the past months.

Radium is being used to detect flaws in steel plants used in shipbuilding.

Chrysler were first presented under canvas in 1850.

SUNDAY SCHOOL LESSON

JANUARY 3

THE SON OF GOD BECOMES MAN

Golden Text: "He that hath seen Me hath seen the Father." John 14:9.

Lesson: John 1:1-18.

Devotional Reading: Philippians 2:5-11.

Explanations and Comments

The Great Theme Of the Gospel: The Relation Of the Word To God and To the World, verses 1-5.

"Logos," Word, is seen in our terms theology, biology, chronology, etc. "Logos" was a familiar and significant term in both Jewish and Gentile thought. It meant the Eternal God in relation to men, the self-communicating God John uses the term to designate Jesus Christ as expressing and revealing God in the world.

"Christ is not a word, you observe, but the Word. Every prophet was a word of God. Every great or good man since the world began, has added anything to the general fund of virtue or of truth, has been a word of God. Galileo was God's word to science. Luther was God's word to religion. But Christ was the Word in the full and complete thought of God — utterance of all, expressing the very soul of God with such entire correspondence that he who has seen Him may be said, The Word was with God and the Word was God." J. W. Thomson.

Christ's Spirit (about) breath again: Within the lives of holy men. Such changing age beholds afresh His word of God in human flesh.

In the beginning: In time. The Word and the Word was with God, and the Word was God: In the mind of God Great. The purpose of the Gospel of John is to prove that Jesus is the incarnate Logos. John 20:30, 31.

"I say the acknowledgement of God is Christ."

"Without Any reason, solves for Him.

All questions in the earth and out of it." J. Browning.

In Him was life; and the life was the light of men. He is the source of life, whence the life of men is derived, whence His life is the source of light, whence comes man's power to discern the truth. Compare Psalm 36:9.

For with Thee is the fountain of life. In Thy light shall we see light.

The Word Becomes Flesh: We Saw His Glory, verses 9-9. Suddenly now, as if on these heights the air was becoming too keen and rare, John drops down to speak of things from the standpoint of men. "There came a man, sent from God (and therefore a word of God), whose name was John. John the Baptist we call him, to distinguish him From John the Apostle. He was sent to bear witness to the Light, to Jesus the Word, who was the true Light.

Auto Bungalow Camp For National Park

May Be Established Under License At Prince Albert

The National Parks Department will shortly advertise for offers for an exclusive license to establish an auto bungalow camp at Prince Albert National Park, it was announced by the superintendent, J. A. Wood. The license offered is for 21 years, renewable for a further 21 years. Exclusive rights to operate a bungalow camp are given for only five years.

Plans in the parks office have never $6,000 worth of buildings by the first year. These are only in the nature of a suggestion, Mr. Wood said. In any event, plans and specifications will have to be fully approved by the parks department. These proposed cities are under consideration.

Has Had 286 Relatives

Governor Job is Not a Steady One in Chihuahua

Governors come and governors go in the Mexican state of Chihuahua. Colonel Roberto Fierro, recently appointed governor of the state, is the 286th man to hold the post since Chihuahua was organized in 1824.

Chihuahua has had an average of two and a half governors a year.

No governor in the last twenty years has served out his elective term of two years.

Enrique Creel, who left office in 1910, was the last governor to serve out a term.

Chihuahua has had seven governors in the last three years.

The shorter term ever held by a governor was one hour.

An automobile is not improved by crossing it with a locomotive.

In Texas, a plant is being built to manufacture carrot syrup.

British Firms Interested

May Invest Capital In Clay Resources Of Saskatchewan

Possible development of Saskatchewan's clay resources by British capitalists is seen in information given out by the Bureau of Publications at Regina.

According to the Bureau's report, two British manufacturing firms have been interested by the Department of Railways, Labor and Industries, from the standpoint of the manufacture of sewer pipe and electrical products.

Should companies here choose to invest in the possible erection of brunch plants, and the department anticipates that with the return of normal conditions the investigations will be continued with the object of ultimately erecting plants.

The only test on Hebrew required to construct an igloo is a knife.

Canadian apples are to be sold in slot machines in France.

"Do you drink out of the bottle?" "Yes. My doctor forbids me to drink a single glass."—Mosaique, Charleroi.

Are Building Giant Liner

New Queen Of Seas Under Construction For Cunard Company

Almost a quarter of a million people in Great Britain will have had employment either directly or indirectly in the construction of the new giant Cunard liner which is being built by John Brown & Co., at their Clydebank yards.

There is hardly an industry in the whole of Great Britain that has not been affected in some way or other by the construction of this mighty vessel. Everywhere factories have been working night and day since the order for this liner was given by Sir John Brown & Co. on December 1st 1930, by Sir Percy Bates, Bart., G.B.E., chairman of the Cunard Line.

In addition to the great forgings, tanks, generators, miles and miles of tubing and such like accessories which will be wanted there will be thousands of pieces of cutlery and plate, crockery and other equipment required for feeding the large armies of passengers on this new super Transatlantic on her trans-Atlantic crossings.

When the huge rudder, which in weight equals almost twenty-five street cars, was being transported from Darlington to Clydebank, the railway company, over whose lines it was being carried, were forced to suspend all other trains until the one carrying the rudder had completed its journey, for the bends and kinks of metal required two specially-constructed flat cars running side by side to carry it. A veritable forest of lamp-posts is required to furnish the woodcan props for varying sizes which support the vessel as she lies in her stocks. This new Queen of the Seas will be turned over to the Cunard Line sometime in 1933. Her launching is expected to take place early next year.

St. Godard To Enter Olympic Dog Races

Famous Northern Musher Will Drive For Philadelphia Retreater

Leo St. Godard of The Pas, Manitoba, brother of Emile St. Godard, famed northern musher, left for Philadelphia, Pa., where he will start training in preparation for the Olympic and other southern races.

Leo will this year drive a team of racing dogs for J. T. McIlhenny, dog lover and race fancier of Philadelphia.

With this pack Leo plans to take part in the Olympic dog races at Lake Placid, New York, which will be held during the week of Feb. 4 to 13 next.

During January Leo will train McIlhenny's dogs either at Pocahontas or Lake Placid.

He will return to The Pas, Manitoba, next spring.

Asked Five For Prison

Three youths, Harvey King, Anthony Orth and Lawrence Cambridge, Norfolk, Neb., said they had one report before they were taken to prison to serve terms of five each for stealing cigarettes—they wanted a pair of dice to take to the "big house."

Drop In Liquor Revenue

Revenue of the Quebec liquor commission dropped to the extent of $4,-239,236 last fiscal year, according to the tenth annual report of the commission, tabled in the provincial legislature. The net revenue to the government amounted to $9,159,982.

"Hello, is that you, my little sugar plum."

"Yes, darling—but who are you?"—Journal Amusant, Paris.

SEEK CONTROL OF FOREIGN BOND BUYING

Toronto, Ont. Following the meeting of bankers with Premier R. B. Bennett at Ottawa, recently, in which the exchange situation was discussed, J. A. McLeod, president of the Canadian Bankers' Association and general manager of the Bank of Nova Scotia, issued the following statement:

"The bankers met the Prime Minister at his request on Wednesday, December 16, in Ottawa, to discuss the adverse exchange situation and to devise means of lessening, so far as possible, the prevailing high rates.

"After discussion, the conclusion was that immediate steps should be taken through the banks, brokers, trust companies and investment houses, to control the sales they might be able the purchase abroad of securities by residents of Canada. The bankers gave the Prime Minister the assurance that they would co-

"This means that bankers, brokers, trust companies and investment houses organization should discourage by every possible argument coupled with a declination to facilitate directly or indirectly such transactions, pointing out to the person desiring to purchase that the Prime Minister had made the request on behalf of the serious adverse exchange situation. The statement could also be made in the prospective purchaser that the Prime Minister expected, without compulsory action on the part of the Government, there would be general co-operation along the desired lines by

Action In This Affair Had Been Communicated to all interests engaged in the handling of bonds, stocks, debentures and other securities, so that everybody who is engaged in making commitments on this account may have full knowledge of the Prime Minister's request, and may be accordingly committed to the Prime Ministership, and there has been a gratifying response to the call, both mortgage and stock interests as well as from representatives of foreign brokerage and private houses doing business in this country."

Public Ownership Programme

Calgary Trades and Labor Council Preparing Resolutions For Convention

Calgary, Alberta. Start of public ownership programme by the Federal and Provincial Governments was urged by the Calgary Trades and Labor Council in preparing resolutions to be submitted to the annual convention of the Alberta Federation of Labor in Drumheller, January 13.

Council asked that the public ownership programme include banks, all forms of insurance and gasoline, and bills and final bond be issued by the governments instead of being sold outright to private persons.

Another resolution urged "A strong protest be made with regard to recent interpretations of the law which deals with short time loan banks and commercial transactions, and that the Federation make representations to the Labor members at Ottawa to have the necessary amendments passed to existing legislation to safeguard the right of Canadians to free speech."

Receives Invitation To Tea

Driver Was Hit Cheerful But Showed Anxiety Over Accident

New York Mario Contaminine, an unemployed "cobbler" who lives in a house behind a nest of billboards in Yonkers, happened to be driving the automobile that struck Rt. Hon. Winston Churchill, Br ish statesman, on Fifth Avenue a week ago.

Sunday afternoon, December 20, Containo, a little shy and shaken, sat down to tea in a luxurious Waldorf-Astoria suite with the wife of his dashing shoe victim and their young daughter, Miss Diana Churchill.

The invitation to the small tete-a-tete came because of the great anxiety Containo evidenced in Mr. Churchill's recovery. Every day last week he called at the hospital.

Revenue Collections In Britain Are Down

Returns Fail To Confirm Optimistic Statement Of Chancellor Neville Chamberlain

London, Eng. In spite of Chancellor Neville Chamberlain's reassuring statement that the budget will be balanced, revenue returns at the present time do not confirm his optimism. [illegible] revenue has been obtained, although nearly three-quarters of the financial year has passed, while total ordinary revenue [illegible] than the corresponding period last year.

Total ordinary revenues from April 1 to Dec 12, was approximately $1 620,000,000, as compared with $2,065,-000,000 last year The total estimated revenue for the full year is $3,923 -

Although leading stores advertisers [illegible] newspapers should abandon given stories [illegible] to prevent unduly the public from doing their Christmas shopping during the [illegible] been sent out by the authorities

In this connection, municipal authorities are fighting with national [illegible] to obtain [illegible] from the unfortunate taxpayers and the phrase "Happy New Year" has a [illegible] meaning.

Meanwhile, the problem facing the [illegible] is how to meet the serious revenue exchange situation. The [illegible] and appeals are being made to the public to look upon it as a patriotic duty to make sacrifices so that Britain can [illegible] herself

Former Civil Servants Are Given Terms

Charges Are the Result Of Lengthy Trials

Montreal, Que.- Two former members of the Civil Service were, on Monday, December 21, given sentences of three months in jail and fines of $1200 each on charges of accepting bribes to assist applicants in securing post offices positions. Lionel Chartrand, of Aylmer, Que., pleaded guilty, while Georges R. Bergeron, of Montreal, was found guilty.

The leading indictment against Chartrand charged him with receiving commissions aggregating $1,000 from applicants on the promise he could get them positions in the post office department. The charges were the result of a lengthy investigation by post office officials and members of the Royal Canadian Mounted Police Force.

Winter Fair Plans Made

Show To Be Held In March, Probably On March 17th

Brandon, Man. The Manitoba Cattle Breeders' Association has arranged matters pertaining to the winter fair and Brandon show to be held in March. The date of the sale of purebred cattle will probably be Thursday, March 17, although that has not been definitely fixed. The association expects keen interest as usual in all of the cattle classes and anticipates record entries in some of the

Must Wear White Canes For Blind

London, Eng.—More than 40 Rotary clubs in various parts of Great Britain have adopted the plan of supplying white canes for blind pedestrians, and the Royal Automobile Club is appealing to motorists to look out for, and help if necessary, all persons carrying the canes.

Two Killed In Train Wreck

Dagenham, England.—Two men were killed in a railway collision here Friday, December 18, when a passenger train struck the rear of a freight train, it was learned recently. At least 30 were injured; some of them children.

New Yonnel Horse

Newport News, Va.—The United States Mail Steamship Co. liner "Virginia," nearing completion at the Newport News Ship Building and Drydock Company, burned at its berth in the yard Sunday, December 20.

ON RAILWAY BOARD

F. Albert Labelle, notary, of Hull Que., who has been appointed to the vacancy caused on the Board of Railway Commissioners by Thomas Vien who resigned this year

Chicago Anti-Crime Campaign

"Secret Six" Confident That Organized Crime Is Crushed

Chicago. — Chicago's anti-crime campaigners basked back, Sunday, December 20 on a year of work and pronounced themselves confident that organized crime has been crushed.

The Chicago crime commission and the Secret Six, backed by wealthy and influential citizens, was given most of the credit. A vigilant federal government and a militant press were given as the other factors that [illegible]

Reorganization of the Chicago police force, the conviction of Al Capone on income tax charges, and enactment of legislation directed against gangsters, said Frank J. Loesch, president of the crime commission, has left the criminal begging for quarter.

Mind Clears Man Returns

Missing Man Arrives Home After Fishing Trip

WHITE PLAINS, N.Y.—Henry Harvey, 39, was home again Sunday, Dec. 20, after being mourned for dead for 6½ years.

On May 2 he went on a fishing trip off Rye. He did not return and searchers found his empty boat. He was not washed up, but his wife, Hazel, and four children believed him dead.

He walked in Saturday night with a strange story. He had been "struck over the head" while fishing, he said. His did not recall how it happened, but afterwards he remembered walking until early the week when his memory came back like a flash.

Great Britain's Liquor Trade

Commission's Report Will Go Before Parliament Eventually

London, England.—A revolutionary plan for supervision of Great Britain's entire liquor trade by five "dictators" is indicated, the Sunday Dispatch said, in the forthcoming report of the British Liquor Commission. The minority report of the commission, the paper said, will demand wide powers for making Britain dry by local option.

The commission's report will go before Parliament [illegible] the government is occupied by economic problems. Much of the battle ground of the five years' work of the commission will be reviewed in the Houses before action is taken.

Method To Separate Weeds

Claims New Method To Separate Weed Seeds From Clover

Toronto, Ont. A new system of cleaning seeds which may prove of great value to farmers, has been discovered by Pr.f. F. C Dyer and H L. McClelland in the new mining laboratories at University of Toronto.

By recognizing and making use of a physical characteristic of seeds, apparently overlooked previously, the two men have been able to reduce weed seeds in alfalfa, sweet clover, red clover and alsike to an infinitesimally small number.

The apparatus utilized was simple, they said It was little more than a rotating band and a tub of water.

Mexico's Tourist Travel

Cites Canada As Model For Tourist Trade

Mexico City Mexico could well pattern after Canada in its treatment of guests, the Mexican consul-general at San Francisco reported in a recommendation to his government on how to increase Mexico's tourist travel.

Courtesy, not the size of the hotels, is the great factor that the average tourist appreciates, the consul declared. Mexico could well afford to treat its guests as royalty, he said, because the tourist trade is the most valuable export trade a country can have.

Montreal Invaded By Rooster Rain

Montreal, Que. Montreal is invaded with a new species of cat of town gamin, the black Russian rat.

Noticed first two years ago in buildings near the harbor, his arrival was traced to ships from across the ocean. Their presence is resented by the native brown and grey rats. Ravages for supremacy are going on and the battle for possession of the warmest and most comfortable cellars will be a fight to a finish."

While Chinese statesmen and diplomats are trying to work up patriotic sentiment and arouse the sympathy of their countrymen outside the war zone for those on the inside, it would appear from the above photograph that sympathy thus aroused would be wasted. The picture, made in Mukden, Manchuria, now in the hands of the Japanese invaders, shows a parade of citizens of the captured city as they marched to a demonstration to protest against League of Nations interference. The Chinese marchers carried Japanese banners and flags, and were surprisingly enthusiastic in praise of their conquerors.

WHEAT FOR THE NEEDY IN U. S. URGED

Washington, D.C.—A United States senate committee was ordered at times to take down the bars which separate the needy from the farm board's mountainous store of wheat. With the approval of Chairman Stone of the board, the agricultural committee, Saturday, December 19, endorsed a measure to give 40,000,000 bushel of wheat to charity

The board despite sales of millions of bushels to foreign governments, still has about 180,000,000 bushels which it acquired during costly stabilization operations.

Senators Capper, Republican, Kansas, and Wheeler, Democrat, Montana, drafted the 40,000,000-bushel bill, to supplement the wheat distribution together with Senator Thomas, Democrat, Oklahoma Despite its endorsement by Chairman C Stone, there is some speculation on the attitude of the administration toward the measure.

President Herbert Hoover has opposed direct appropriation from the federal treasury for feeding or clothing the principle that it would amount to a dole. The measure would have the wheat charged to the credit of the farm board's $500,000,000 revolving fund and so involve any government appropriation.

Senator Norris, Republican, Nebraska, insisted that the wheat be made available for striking miners in Kentucky who are outside the realm of Red Cross relief

The sub-committee stipulated that the wheat be given to the Red Cross or any other charitable organization designed by President Hoover

Big Crop For Argentine

Two Weeks Of Opportune Rain Have Insured Crop

Buenos Aires. Another huge Argentine wheat crop became a certainty this week when rains in the principal sections of the country where frost damage was feared told of high yields.

Grain men estimated the country will have approximately 300,000,000 amount of wheat for export from the harvest now nearing completion as from the yields of previous years, in spite of the fact that the acreage was reduced 20 per cent. this year.

The amount available for export from this year's crop was forecast at from 175,000,000 to 180,000,000 bushels.

Although 145,000,000 bushels of old wheat still are available for export, the new crop is moving to foreign markets with unusual rapidity. Five hundred and sixty-five thousand bushels of new wheat have been shipped already and 1,000,000 have been chartered to move 12,30,000 bushels more before January 31, 1932

In the meantime, two weeks of opportune rain have insured an immense corn crop, grain men said from which the experts may surpose the 320,000,000 next shipped from the last crop.

Trans-Canada Telephone Line

Phone Line To Be In Operation About January 17

Calgary, Alberta. The trans-Canada telephone line will be officially declared open about January 17, one of a program to mark the forward step is being arranged at Montreal, said Hon. Vernon Smith, Alberta Minister of Telephones and Railways. Prominent Canadian officials would take part in the programme, he said

Mr. Smith said there was still some work to be done on the new carrier system, especially between Winnipeg and Calgary, but he thought this work would be completed early in January.

Kaye Don Building New Miss England

London, England. A new, "Miss England" will be ready soon to defend Britain's speedboat championship of the world.

Lord Wakefield, owner of the "Miss England II.", which Kaye Don drove to a world's record of over 110 miles an hour at Lake Garda, Italy, last year, said he had not contracted for the construction of her successor.

Creating Real Vacation Trip

Army Of Young Workers Transforming Rifle Mountain Park

Young men employed at Rising Mountain National Park, in Manitoba, on the Dominion relief scheme are working a great transformation in turning the park into a real vacation land that will draw visitors from far and wide, George W. Mordsworth, superintendent of Dominion relief, said, following his return from a visit of inspection to the workers' camp in the park.

The difference in outlook when one compares the forest even that has been cleared of entangling brush and fallen timbers with the untamed wilderness. This work is supplemented by landscaping the shores of the rippling lake below that are found in strategic parts of the park.

Mr. Mordsworth found the youths to be well fed and comfortably installed in their bunk houses. A large part of the food supplied is obtained from farmers of the surrounding area, and as the work underway is providing a substantial relief as well as a remunerative market for men from urban centres.

In addition to the bunk houses are recreation halls, a hospital and rest houses. The large number of engagements donated by the country of Winnipeg citizens through the Free Press, are found in the recreation halls and are much appreciated by the workers.

A resident physician at the park looks after the needs of the men, and Mr. Mordsworth is arranging for a number of first aid men to go to the camps, so that each camp will have a first aid man prepared for any emergency.

The last contingent of men, 135 in number, have gone to the park. This will bring the number there close to over 1,200. Of the 1,350 men 915 are from Winnipeg, and the remainder from other parts of Manitoba.

Camps for the workers have been constructed from timber cut in the park and cut up in saw mills there, as in camps of the same kind done in building the camps. Mr. Mordsworth told of an instance where a tree was cut down one morning, sawed up and the boards from the tree two were part of a new house before the day was over.

Cutting Down Rational Debt

Lady Rothwilde Has Novel Scheme To Reduce Deficit

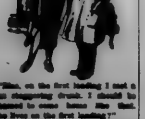
The Dowager Lady Rothwilde, mistress of the Chase, Cheshire, Rothwilde West, fourth baron Rothwilde, has conceived a new idea toward cutting down the national debt. She is setting suitable people to send her a penny for each year of their lives, on their arrival at another birthday.

Lord Dorilton, the former Rothwilde-Lodge judge, who was 82 years of age the day Lady has sent seven shillings—$1.75—which Lady Rothwilde admits was two pennies too much.

Her capture recently was Alderman W. W. Kelly, prominent citizen of Birkenhead. Mr. Kelly, celebrating his 79th birthday anniversary, promptly remitted six shillings and fourpence.

Cuba has just modified its bankholiday rules.

Soviet Rice expects bumper crops this season.



"Then, on the first landing I met a most disgusting Orcish. I should be ashamed to come home like that. Who lives on the first landing?"

"Nobody—but there is a mirror there."—Cincinnati Enquirer, Lafayette, W. N. U. 2082

B.C. Egg Exports Bring Producers $6,000 Each Day

Province Second Dominion In Supplies From Northern Ontario

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of $6,000 a day.

The B.C. Egg Pool is shipping to the eastern and eastern Canada three and four carloads of eggs weekly. Private firms are selling further shipments, which, according to G. H. Wilson of the poultry division, Dominion Livestock Branch, Winnipeg, bring the total up to one carload daily.

Much interest in Montreal brings to the province of $7,500. There must be deducted from this freight charges of approximately $300 and handling charges of five cents a dozen.

The egg pool expects at present the liveliest department of agriculture in British Columbia. Distribution of eggs on a day among poultry members is found to stimulate confidence in the poultry industry.

Big prices are much lower this year than at the same time in 1930. Production is also lower this year than last. Nevertheless, present prices are satisfactory to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George F. Wallace, president of the B.C. Egg Pool, reports selling of all production of eggs shipped in Canada.

Prof. S. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as on domestic market," said Professor Lloyd.

Catching Insects From Pollution

Tractor Sucks Up Bugs By Fan Caught In Cotton

Three youths are attending the Panhandle State Teachers' College because of their ability to catch butterflies, moths and other bugs.

They caught and sold bugs they caught.

$1,000 worth.

George Hatcher and Lee Spain be some partners of Beadle when the latter was given so rapidly he could not take care of it himself.

"Collecting insects is sometimes dangerous, but it is always fun," Beadle said. "You're forced to stay out in the open air and get exercise. Sometimes to get what you want you have to go through brambles, swamps and other wild parts and wade streams.

"Once we were mistaken for bootleggers. Our faces were red and we carried bottles of preservative containing alcohol. It took persuasive language to convince a deputy sheriff we were just college boys."

Birch is rated one of the strongest resinous woods.

NEW PORTRAIT

Hon. Leopold Macaulay, Minister of Highways for Ontario, from his most recent portrait.

What Worry Is

Fear the Opportunity Of An Imagination Gone Wrong

Come Tuesday says the psychiatrist, requires the greatest self restraint to keep the mind of the average man's imagination for hours before he enters the ring. Imagination is one of humanity's richest gifts, but an overworked imagination may prove a curse.

Worry is the operation of an imagination gone wrong. To prove how futile in most of our worrying it is necessary only to remember how many things we worried about never happened.

Most people with rich imaginations are carrying not only their present worries but a lot of universal fears remotely connected with their own interests and welfare. They worry about the end of the world; the probability of another world war; the depravity of the times; the failure of the farmer; the menace of communism; race suicide, or the danger of overpopulation of the world.

And unfortunately, the people who do the most worrying about these possible but remote evils, have the capacity for solving their own little problems. How good it would be for all of us if we could apply the meaning of that old saying, "Cross that bridge when you get thereof." We need very little philosophy to take care of the simple business of living. Those are those who refuse to fight until they get into the ring and lose the ball.

Queer Sense Of Humour

The Rome, N.Y., Chamber of Commerce suggests that the motion "Pass the butter" be traded to Canada as the best south of the St. Lawrence River before a St. Lawrence waterways treaty is signed. This motion is said by a member of the Rome Chamber of Commerce to be organization of humanism, for does not want any St. Lawrence waterway.

Fledgling spies were recently taken into the bosom of the nation by a research expedition working near Ocmon, Italy.

May Benefit Farmers

New Seed Cleaning Scheme Discovered By Toronto Man

A new system of cleaning seeds which may prove of great value to farmers, has been discovered by Prof. F. C. Dyer and H. L. McClelland in the new mining laboratories at the University of Toronto.

By recognizing and making use of a physical characteristic of seeds, apparently overlooked previously, the two men have been able to reduce weed seeds to infinite, even of the most rust clover and alsike to an infinitesimal easily small number.

Under the new process, Prof. Dyer and Mr. McClelland have been able to take alsike containing 800 seeds fly seeds to the ounce and clean it until there remained only four of the noxious weed seeds. Similarly they have extracted bladder campion and white cockle from the above type of fodder.

Observations in connection with the experiment revealed the wetabilities of clover are not so great as that of the weed seeds. After the fodder seed was wetted to a slight extent its wetability was attained in a manner, while the weed seed continued to be wetted, and by this means the two were able to be separated.

The apparatus utilized was simple, they said. It was little more than a rotating hand and a tub of water.

Inventor Of Pendulum

Switchboxes Who First Proves To Have the Idea.

Mr. J. Drummond Robertson, of Perth, who is a great collector of clocks, tells of the evolution of the clock. In the course of his investigation, he records the fact, often forgotten, that the use of the pendulum as a clock was first thought of by a Dutchman, Christian Huygens, but we first used by Alexander, the second Hart of Kincardine, who, falling out with the Government at home had crossed over to Holland in the middle of the seventeenth century and married a Dutch woman who probably introduced him to the Huygens family. The Hart made many improvements of his own, and his clocks were tried in the ships of various explorers.

A Century Old Engine

Celebrated Birthday By Running On Tracks In Moscow

Old "John Bull," first steam locomotive to pull American freight, marked its 100th birthday by warming up and running, jacked up on rollers in a Moscow factory, and delighted a crowd in the Smithsonian institution just as it shocked the New Jersey gentry into belief in the "iron horse" a century ago. The pioneer was lusty, and it was compressed air instead of wood they fed it to make it go, but it responded valiantly to controls first operated by a top-hatted engineer at Bordentown, N.J., on November 12, 1831.

Rumor is the only American possession south of the equator.

Miners Want Freight By Sea

Would Use Air Transport From Between Coppermine and Great Bear

Interests of mining interests which have spent $2,000,000 in preliminary development of great copper, silver and pitchblende prospects in Great Bear Lake and Coppermine River area for a freight service by sea from Vancouver to Coronation Gulf have been formed to put south at Tree River.

It is understood that San Francisco shipping interests are seriously considering undertaking shipments of mining supplies, particularly gasoline, which is within easy flying distance of the largest operations on Great Bear Lake.

Adding his voice to those of other mining men who have investigated the recent developments on Great Bear, Col. J. E. "Jim" Cornwall, who spent all last summer and many years previously in that country, suggests that Canadian interests should step in while the stepping is good. There is no reason, he says, why Vancouver should not be the port for this business of Great Bear. Ships transported freights on the Mackenzie for years and knows conditions.

"It costs fourteen cents a pound, or $280 a ton to get freight from Waterways, the end of steel, to Great Bear in the summer," says Col. Cornwall. "That could be taken up there for $3.50 a gallon and they depend on seaplanes for a great deal of their freight. The mouth of the Coppermine offers their immediate facilities for seaplanes, and ships would have no difficulty in delivering gasoline and other supplies on the Arctic Coast at that point.

"From the mouth of the Coppermine to Great Bear is only about 120 miles of flying, a mere drop compared with the distances over which northern flyers have been carrying heavy mining equipment during the past two or three years. In addition, the country offers no difficulties for the construction of a landing road from the sea to the scene of present operations."

Soviet Plans a Huge Stadium For Moscow

World's Largest Sport Unit To Be Built In Near Future

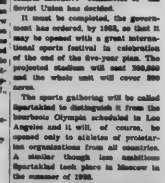
The world's largest sport unit—a gigantic stadium, various necessary structures and sport grounds — will be constructed in the Soviet capital, Moscow, Russia, the presidium of the central executive committee of the Soviet Union has decided.

It must be completed, the government has ordered, by 1935, so that it may be opened with a great international sports festival in celebration of the end of the five-year plan. The projected stadium will cost 200,000 and the whole unit will cover 200 acres.

The sports gathering will be called Spartakiad to distinguish it from the bourgeois Olympic scheduled in Los Angeles and it will, of course, be opened only to athletes of proletarian organizations from all countries. A similar though less ambitious Spartakiad took place in Moscow in the summer of 1928.

The Soviet ideal is mass participation in athletics and all-round athletic development instead of specialized achievements. Not only is the physical advantage of this ideal stressed, but its political importance as well.

The Peace River country, Alberta, has an approximate area of 32,000 square miles.



"Tell me, do you know this water running all night?" — Montigue Chotford.

W. N. U. 2082

CANADIAN HOCKEY STARS PUTTING UP BIG FIGHT

When the Toronto Maple Leafs opened the Hockey Season in the Maple Leaf Gardens in Toronto, the form they produced was below par, but with the new inspiration of a change in coaches, with Dick Irvin of Regina at the helm, the "Leafs" are looking up and playing good hockey. Above left and right are two stalwarts, Joe Primeau, left and Ulma Conacher, right, while inset is a picture of Dick Irvin, the new coach.

THE HOUSE OF DREAMS-COME-TRUE

BY MARGARET PEDLER

Author Of "The Splendid Fool," "The Mermaid," "The Desert," Etc. Hodder & Stoughton, Ltd., London.

CHAPTER IX Continued.

Nick at once established himself at Jean's side kindly informing her that now that his inner man was satisfied he was prepared to make himself agreeable. Upon which Lady Anne apologized for his manners and Nick interrupted her, vehemently pointing out that the fault, if any (which he denied), was entirely hers, since she had been responsible both for his upbringing and inherited tendencies. They both talked at once, wrangling together with huge zest and enjoyment, and it was soon apparent that the two were very close friends indeed.

Blaise took no part in the storm of chatter and nonsense which ensued, but stood a little apart, his shoulder propped against the chimney-piece, his thin handsome face in shadow. Jean's glance wandered reluctantly from one brother to the other. They presented a striking contrast—the stern, dark-browed face of the elder man, with its bitter-looking mouth and that strange white streak lying like some ghostly finger-mark across his dark hair, and the bubbling, blue-eyed charm of the younger. The difference between them was as definite a difference between sunlight and shadow.

Nick was full of plans for Jean's entertainment, suggesting for both tennis and tennis accepting a prominent position in the programme he sketched out.

"It's really quite jolly paddling about on our lake," he rattled on. "The stream that feeds it hails from Dartmoor, of course. All Devonshire streams do I believe at least, you'll never hear of one that doesn't, the Mose leaves our grounds somewhere. Besides, people always believe that your water supply must be of crystalline purity if you just casually mention that its source is a Dartmoor spring. So of course, we all swear to the Dartmoor origin of our domestic watercolors. It sounds pure—even if not always strictly true."

"Miss Peterson must find it a trifle difficult to follow your train of thought," commented Blaise a little sharply. "A moment ago you were discussing boating, and now it sounds as though you'll merely involve yourself—and us—in a disposition upon hygiene."

Nick smiled placidly.

"My enthusiasms get away with me a bit," he admitted with unruffled calm. "But I haven't the least doubt that Miss Peterson will like to know these few reassuring particulars. However—And he forthwith rested enthusiastically to the prospect of tennis and kindred pastimes.

Once again Blaise broke in ungraciously. It seemed as though, for some reason, Nick's flow of lighthearted nonsense and the dense different person he was proposing for Jean's future divertissement, irritated him.

"Your suggestions seem to me remarkably inept, Nick," he observed scathingly, " seeing that at present it is midwinter and the lake frozen over about a foot deep. Quite conceivably, by the time that tennis and boating become practicable, Miss Peterson may not be here. She may get tired of us long before the summer comes," he added quickly, as though in a belated endeavour to explain away the suggestion of inhospitality which might easily be inferred from his previous sentence.

But if the hasty addition were intended to reassure Jean, it failed of its purpose. The idea that her coming to Staple was still particularly acceptable to its master had already taken possession of her. Originally the consequence of the conversation she had overheard at the hotel, Tormarin's reluctantly given welcome when he met her at Combe Regis Station had served to increase her feeling of embarrassment. And now this last speech, though so hastily qualified, convinced her that he at least was regarded by her host in anything but a pleasurable light.

"Yes, I don't think you must count on me for the tennis season, Mr. Brennan," she said quickly, "I don't propose to billet myself on you indefinitely, you know."

"Oh, but I hope you do, my dear," Lady Anne interposed with a simple sincerity there was no doubting. "You must certainly stay with us till your father comes home, and" with a smile—"unless Glyn has altered considerably, I imagine Beirnels will not see him again under a year."

"But I couldn't possibly foist myself on you for a year!" exclaimed Jean. "That would be a sheer impudence."

Lady Anne smiled across at her.

"My dear," she said, "I've never had a daughter—only these two great, unmanageable sons—and I'm just longing to play at having one. You're not going to disappoint me, I hope?"

There was something irresistibly winning in Lady Anne's way of putting the matter, and Jean jumped up and kissed her impulsively.

"I should hate to!" she answered warmly.

But she evaded giving a direct promise; there must be a clearer understanding between herself and Tormarin before she could accept Lady Anne's hospitality as frankly and fully as it was offered.

The opportunity for this clearer understanding came with the entry of the butler, Stapleton, who brought information that a favourite young setter of Nick's had been taken ill and that the gamekeeper feared the dog had distemper.

Nick sprang up, his concern showing in his face.

"I'll come out and have a look at him," he said quickly.

"I'll come with you," added Lady Anne.

She slipped her hand through his arm and they hurried off to the stables, leaving Blaise and Jean alone together.

For a moment neither spoke. Blaise, standing a cigarette, remained silent, looking absently into the fire. Apparently he did not regard it as incumbent on him to make conversation, and Jean, with a sudden sinking sensation, broaching the subject of her visit. At last, however, fear lest Lady Anne and Nick should return before she could do so, drove her into speech.

"Mr. Tormarin," she said quickly—so quickly that none would have caught the flurry of shyness that underlay her cool little voice—"I am very sorry you will have to put up with me for a week or two, but I promise you I will try to make other arrangements as soon as I can."

He turned towards her abruptly.

"Say I ask what you mean?" he demanded. It was evident from the haughty, almost arrogant tone of his voice that he was angry, and Jean's own anger, though whether it was the irritation consequent upon her presence there, or because he chose to take her speech as censuring his attitude to Joan was unable to determine. His eyes were stormy and inwardly she recalled a little beneath their glance, outwardly, however, she retained her composure.

"I think my meaning is perfectly clear," she returned with spirit. "Even at the station you made it quite evident that my appearance there upon you in the light of an unpleasant surprise. And—from what you said just now to Mr. Brennan—it is obvious you hope my visit will not be a long one."

If she had anticipated spurring him into an impulsive disclaimer, she was disappointed.

"I am sorry I have failed so lamentably in my duties as host," he said coldly.

The apology, uttered with such an entire lack of ardour, served to complete the offence for which it professed to sue pardon. Jean's face whitened. She could hardly have felt more hurt and astonished if he had struck her.

"I—I—" she began. Then stopped, finding her voice unsteady.

But he had heard the break in the word, and began, and in a manner his mood of intolerant anger vanished.

"Forgive me," he said remorsefully "and there was genuine contrition in his voice now. "I'm a cross-grained fellow, Miss Peterson; you'll find that out before you've been many days under my roof. But never think that you are unwelcome at Staple."

"Then why—I don't understand you," she stammered. She found his sudden changes of humour bewildering.

He smiled down at her, that rare, strangely sweet smile of his which when it came always seemed to transform his face, obliterating the hard—sometimes—of his lines.

"Perhaps I don't understand, either he said gently "Only I know it would have been better if you had never come to Staple."

"Then you wish I hadn't come?"

"Yes" slowly "I think I do wish that."

She looked at him a little wistfully.

"Is that why you were angry because I've come here? Lady Anne said and Mr. Brennan seemed quite pleased," she added as though in protest.

"No doubt. Nick, lucky devil, has no need to economize in magic moments."

She felt for Jean that that his look he bent upon her, but she forced herself to meet it.

"And you?" she questioned very low

"I have" briefly

It was long before sleep visited Jean that night. The events of the day marched processionally through her mind, and Nick Tormarin figured in chastening round the baffling, incomprehensible personality of Blaise Tormarin.

The extreme bitterness of speech she ascribed to the unfortunate episode that lay in his past. But she could find no reason for his strange, expressed wish to disregard their former meeting at Montavan—to wipe out, as it were, all recollection of it.

That he did not dislike her she felt sure, and a woman's curiously subtle mistake over a man's personal attitude towards her. But for some reason, it seemed to her, he was afraid of her. Afraid! Was he? It was as though he were anxious to bolt and bar the door against any possibility of friendship between them. From whichever way she looked at it, she could find no key to the mystery of his behaviour. It was inexplicable. Only one thing emerged from the confusion of thought, the lost glamour of that night at Montavan had returned—flooding her with its old pulse and pervasiveness. And when at last she fell asleep, it was with the haunting, soul-burdening melody of "Valse Triste" crying in her ears.

THE RHYMING OPTIMIST

By Alice Hicksville

LIVE OAK

All the trees in the forest
Bow to the winter's will,
Flinging their bright-hued leaves aside,
Shuddering, bare and chill.

All the trees in the forest
Scatter their leaves of gold,
Scatter their leaves of red and brown
Naked they stand, and cold.

All the trees in the forest
Saving the oak alone—
Live oak, who clings to his robe of leaves
Clothed with the joy of sunlight hours
And the memories of the past.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy causers of pain, because they promptly remove the worm that causes the pain, and thus the suffering of the child is relieved. With no starving a remedy at hand no child should suffer an hour from worms.

No Boarding House

"Have you a Charles Dickens in your home?" asked the polite book agent.

"No," snapped the housewife at the door.

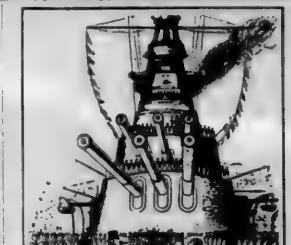
"Or a Robert Louis Stevenson?"

"No!"

"Or a Conc Fields?"

"No, no! what's more we don't run a boarding house here, but they're can across the street. You ask there."

Among Indians dating was commonly a woman's to-do.



"Why did you buy him such a big one, Henry? The child's too young to appreciate it."—The Passing Show, London, England

Canadian Authors

Extract Of Tariff On Work Of Canadian Writers Is Subject Of Discussion

Resolutions on the subject of the tariff against United States periodicals came up at the meeting of the Canadian Authors' Association at Toronto, Miss Margaret Lawrence, of the Canadian Home Journal, said that since the imposition of the tariff the magazine which she represented had been receiving a better class of work. Canadian writers were sending manuscripts to their own publications instead of across the border, she thought.

J. T. Rutledge, editor of the Canadian magazine, stressed the importance of trying to improve workmanship and holding to Canadian ideals. "People will read articles and stories in United States' publications that they would not read in Canadian," he said. So far as the tariff was concerned, he commented, "prohibition never helped anyone to grow strong. We do not want a tariff wall, but an attitude of mind."

Waiter Had His Joke

"Give me an unpunished steak, waiter. Smothered in mushrooms, you know."

"I'm sah! An' shall I bring you a miniature cocktail with it?"

"What's that?"

"You drinks it and in a miniature out, boss."

Many mothers have reason to bless Mother Graves' Worm Exterminator because it has relieved the little ones of suffering and made them healthy.

Sixty languages and dialects are spoken in Manila.

A bulrung straw hat often costs $100 in Manila.

Little Helps For This Week

"Now we exhort you, brethren, warn them that are unruly, comfort the feeble-minded, support the weak, be patient toward all men."—1 Thessalonians v. 14.

What are we set on earth for? Say, to tell.
Near peak to leave the tending of the vines;
For all the hour of day till it declines
And death's mild curfew shall from work assoil.
God did counsel thee with His educe oil
To sweeten, not to reign; and He signs
All thy tears over His pure crystal.
For younger fellow-workers of the soul
To whom for comforts He others should
Take patient labour to their heart, one whole
From thy heart, and thy heart, and thy brave cheer,
And God's grace fructify through all.
—E. B. Browning.

Every man and woman trying to be honest, pure, and helpful in this world finds that the very highest work set before them is self-sacrifice. Your fear of us have the chance of heroic self-devotion, but every day brings the petty, wearing sacrifice which imagines full weight in God's scales.—Samuel Cogood.

Soviet Russia is beginning to ship lumber into Iraq.

Germany is Europe's largest leather-producing country.

Almost every part of the whole has a commercial value.

HOCKEY

The local team journeyed to Lamont last night and defeated their team 5-1 in a fast game.

The locals were minus two of their leading goal getters, Lane and Hockey and things looked bad when they started the ball rolling in the early 1-0 against them.

However after only a few minutes of play Hudson tied up the score with a hard drive from close in. Hockey followed his same period by a nice one up the Fort in the first and clinched the game with a nifty shot from inside the blue line.

All the locals played a nice brand of hockey and scored their win.

Results in the Lamont OHS were again on and certainly saved Lamont from a like score.

Those who journeyed to Lamont to support the team report a pretty combined OH by the boys of Lamont defeated.

Many thanks of Lamont referees, Graham & Hodgson.

Mr. J. E. W. Martin former High School principal here now residing at Camrose, was a visitor over last week-end.

Miss Parker of Vegreville was a week-end visitor at the home of Mr. and Mrs. Watt.

The Misses Aletha and Jean Foster are spending the Christmas holidays with their parents in town.

A regular monthly meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Monday, January 4th at 7:30 p.m.

Present: Messrs. Rogers, Hemers, Todd and Atkinson. Mr. Rogers in the chair.

Minutes of the last meeting were read and on the motion of Mr. Atkinson adopted as read.

Moved by Mr. Atkinson that Mr. W. S. Ross be instructed to place $2000.00 on school building to replace the present policy of $700.00 which falls due on January 9th, that the present building building falling due on the 9th, with Mr. Adamson be renewed and that Mr. Adamson be instructed also to renew the policy covering $2000.00 on the contents as before. Carried.

It was moved by Mr. Todd that— the action of Dr. Emery and Mr. Atkinson in renewing the policy with Mr. Fraser for $6000.00, and also the one with Mr. Adamson for $600.00 on the building and $1200.00 on the contents be approved. Carried.

A letter was received from the Alberta School Trustee's Association was read. Moved by Mr. Atkinson that Mr. Rogers be appointed as delegate from the Fort Saskatchewan School Board and that the Secretary be instructed to send the membership fee to the Association. Carried.

Letter from the Calgary School Board re suggestion to be dealt with at the convention was read and filed.

Moved by Mr. Atkinson that Dr. Emery's action in authorizing the payment of the coal account of the National Elevator be approved and that we authorize the payment of the Alberta Pacific account when endorsed. Carried.

The following accounts were read Hemer Lumber Co. $1.85;

A. L. Pillmore $24.00;

F. W. Smith $96.29

Curling News

The New Years' Bonspiel was one of the best held here for years. The games were all well contested and played off according to schedule.

James Graham met W. Anderson in the finals in the former rink playing out and taking first prize. Anderson's rink taking second prize.

The personnel of these rinks were as follows:—Jas. Graham, skip; R. H. Hay; M. Barnett; J. Westover.

W. Anderson, skip; L. Hodgins; A. Fryer; H. Weenton.

On Saturday two rinks from Leduc journeyed to the Port to play a return game. The Port won out on total points. After the game the players met at the Queens Hotel for supper. The results of the games:—

W. A. Graham 20 — C. Hunt 11

E. Graham 19 — Bond 5

The personnel of the Port rinks were:—W. A. Graham, skip; J. S. Wright; R. H. Hay; F. Collins;

H. Graham, skip; A. H. Gibson; R. Sundry; H. Lawlor.

On Tuesday afternoon two rinks from the Royal Curling Club of Edmonton met the Port curlers in an hour club game. Three games were friendly contested and produced some fine curling. The Port lost out on the total score. The locals entertained the visitors to supper at the hotel.

Results:—Robertson (Edmonton) 12 Rev. Rumsey 7

Dykes (Edmonton) 9

H. Thom 9 (3 ends game.

The personnel of the Port rinks were:—

Rev. [illegible], skip; L. Hodgins; F. E. Harvey; A. Simpson.

H. Thom, skip; W. A. Graham; W. Anderson; R. Carroll.

On Saturday, January 9th, two rinks from the Port will journey to Westlock to play for the Jack Gay-Hern's league.

Will anyone knowing the whereabouts of the Graham Trophy kindly please let

Partridge Hill

The Yuletide has come and gone and we are back at the good old routine again, after a merry round of holiday festivities.

School opened Tuesday morning Mr. Lambly returned Monday, from a holiday at Victoria, B. C.

Bill Barnett and Louis Gordon were hosts at a party in the school on Wednesday evening. Sanford Brothers of Ardrossan provided the music for the occasion.

Mr. Clarence Rye of Spirit River, Alberta was a visitor here Christmas week.

Mrs. Jos. Gubbelmann and little sons of LaPond, Alberta have been spending the holidays with friends here.

Miss Vera Gordon was home from Namayo for the holidays.

Mrs. James Wilson will entertain the W. M. S. and Ladies aid on Thursday of this week.

Alex and Dave Bushell spent Christmas with Mr. and Mrs. Pete Kavan at Chipman, Alberta.

Mr. Southern and family and Mr. and Mrs. Phillips spent New Years with Mr. and Mrs. Robert Gordon.

Mr. and Mr. Wilmot Alton spent Christmas with Mr. and Mrs. L. Hicks of Edmonton.

Castle School News

The annual Christmas Tree and concert was held in the Castle school on December 23rd.

A record crowd filled the school and a very good program of dialogues, recitations, drills and songs was given under the direction of the teacher, Mrs. J. Chisholm, who kindly played the organ. A collection was taken up for the Red Cross.

The results of the Christmas examinations for Castle school were as follows.

WISE DISTRIBUTION OF BUFFALO STEAKS

Wide distribution of buffalo meat from the National Park at Wainwright, Alta., has been made throughout the Dominion and shipments of hides and carcasses from the big game preserve to various Canadian points over the Canadian National Railways now total 13 cars, carrying a total of 600 carcasses. Four cars have been shipped to Quebec three to Montreal, two to Winnipeg and one each to Toronto, Regina, Prince Alberta and Edmonton. Another 600 animals will be slaughtered during the remainder of the winter.

YPRES VALLEY

A card party was held at the home of Mrs. Carl Armstrong's on Monday, January 4th, when some fifty people played whist.

The prizes in whist were seven big turkeys and these taking one home were, Mrs. Geo Thomas, Mr. Clarke Horton, Mrs. J. Chisholm, Mrs. Thomas of Edmonton, Mrs. Bill Pearce, Mrs. Ed. Ashton and Mrs. Art Irvin. Ladies consolation Mrs. C. Flintoff. Gents consolation Mrs. Wm. Ashton.

The ladies of the party captured the bulk of the prizes.

After cards a tasty lunch was served which was enjoyed very much.

When lunch was over the floor was cleared away four tables of bridge were played, with Bill Pearce winning a desk for having the highest score.

The Ypres Valley School started on Wednesday morning for the term.

We are glad to report that Mr. Jos. Brandy is very much improved.

We are all wondering what is keeping Carl Dilcher up north.

Mrs. Fred Steele is spending a week in Edmonton.

Mr. E. Lawrence is visiting friends at Bruderheim.

Josephburg

On Wednesday, December 30th, a meeting was held in the Josephburg school. Jack Temple was elected as chairman for the evening.

The main speaker was Mr. Berrington. He gave a very enjoyable and interesting talk on the Gold Standard of Canada and also pointed out why Canada was declining year by year. Mr. Bristol another speaker spoke on the economics of Canada. At the conclusion of the meeting a silver collection was taken to convey the expenses of the speakers.

Mr. are glad to see Mr. Griffin home again and hope he will be on the job again soon.

Mr. Scarborough is substitute teacher here in Mr. Griffin's place.

On Thursday Jan. 14th, the Junior U. F. A. of Josephburg will hold their Annual meeting. All members are asked to attend, as officers for the coming year will be elected at this meeting.

Local Lady Curlers Play in Edmonton

Opening run of the Granite Ladies Curling Club on the South Side Edmonton, was held on January 5, when Fort Saskatchewan was represented to bring one rink.

Eight visiting rinks attended this opening affair with everyone enjoying themselves.

Fort Saskatchewan was drawn against the Royal rink. Play began at 2:00 p.m. and the ice was in good condition and competition was very keen.

The Fort rink started off in the lead with a score of four in the first end and gradually worked it up to 16-3, then to 12-6 on the last end coming home, thus by a couple of accidents by the locals the Royal ladies counted four making a final score of 12-10 still in favor of the Fort. Lineup that played the Royal ladies rink as follows:— Skip—Mrs. Wright, Miss Simmons, Mrs. Frey, Mrs. Bullen.

After the game a lovely tea was served up in the balcony of the rink by the members of the Granite Curling Rink and was certainly enjoyed by everyone.

Mr. R. Flintoff very kindly drove us up to the game which was greatly appreciated.

We are sorry to hear that—Fred Smith and Ralph Fennell is laid up for the past few days. We hope to see them around soon.

NOTICE

The Annual Meeting of the ratepayers of Yorkville School District, No. 1867, will be held in the School House on Saturday, the ninth day of January, 1932, commencing at the hour of two o'clock in the afternoon.

Mistress. "Did the mustard plaster do you any good, Bridget?"

Bridget. "Yis, mum, but, to spare, mum, it do bate the tongue."

So Short Of Breath Would Have To Sit Down

Mr. C. M. Goucher, Hanover, Ont., writes—"I could hardly do my work, and often going up or down stairs I had to sit or lie down for a while as I would be all out of breath.

I could hardly go down town for if I walked two or three blocks I was ready to fall over.

I took several boxes of Milburn's Heart and Nerve Pills and am glad to say I have been totally relieved of my trouble."

Price 50c a box

Sold by all druggists and general stores, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Leap Year.

The year 1932 is a leap year. What is a leap year, and why do they occur in practically every [illegible] year? The origin of leap years goes back to the time before the birth of Christ. For back in the early years of mankind on this earth, the first division of time devised by men was the day, marked out by the alternation of light and darkness, and determined by the rotation of the earth on its axis.

For longer periods, the lunar month, from new moon to new moon, an interval of about 29½ days, was the standard used by the ancients. Finally, the recurrence of the seasons suggested the year. The duration of the year was determined in various ways by the nations of antiquity, one of the earliest ways being to make it include a certain number of lunar months. Twelve lunar months, giving a year of 354 days, were taken as a near approach to a course of the seasons. In process of time, however, it was discovered that with this rough approximation to the true value of a year the seasons did not correspond from year to year in the same manner, and so it was necessary, in order to prevent them gradually making the round of the whole year, to make some adjustment.

Originally the Romans had a year of ten months, but early in their history they adopted from their belief in the best attendance on odd numbers, a lunar year of 355 days, and added two new months, January and February. To make the necessary adjustment, referred to in the preceding paragraph, Julius Caesar introduced a month from time to time, and at the time Julius Caesar became dictator the spring festivals occurred in the normally summer months. To clear away all this confusion, Caesar, with the help of Sosigenes, an Alexandrian astronomer, established a thorough reform of the calendar. He effected it by making the year now called 46 B.C., "the year of confusion," consist of 445 days, and the succeeding years of 365 days, with the addition of every fourth year, which consisted of 366 days. This method of adjusting the days to the year is called the Julian calendar.

The Julian calendar assumes the length of the solar year to be 365¼ days, whereas it is 11 minutes and a few seconds less. This annual error accumulated as the years rolled on. From time to time proposals were advanced to rectify the error, but the matter was not taken up in earnest till 1577, by Pope Gregory XIII. As in 1582 the vernal equinox occurred at a date (March 11) ten days earlier than it did at the time of the Council of Nice in 325 A.D., Pope Gregory published a bull, dated March 1, 1582, enacting 10 days, so that what would have been reckoned the 5th October, 1582, was to be reckoned the 15th October.

In order also that the displacement might not recur, it was further ordained that three of the leap years which occur in 400 years should be considered as common years. This is done by omitting the intercalary day in common years were those which close the centuries (i.e., which end with 00) and are not divisible by 400. Thus, 1600 was leap year, 1700, 1800, 1900 were common years, 2000 will be leap year, and so on. This method of adjusting the days to the year is called the Gregorian calendar, or the new style.

This new correction was adopted that same year by mandate of the Pope, in Spain, Portugal, part of Italy, in France, and by Catholic Europe generally before the end of the 16th century. Scotland adopted the modern New Year's Day in 1600. The change was carried out in England in 1752. Sweden, Denmark, and the countries belonging to the Greek Church, are now the only countries which still adhere to the old style. There is now a difference of 13 days between the old style (Julian) and the new style (Gregorian), because, in the 10 days originally omitted by Pope Gregory in 1582, there have been added the elimination of the three extra leap year days of 1700, 1800 and 1900.

It is also of interest to note that the same Act which introduced the new reckoning in England in 1752 shortened by nearly three months the year 1751, for it had been the practice to commence the year with March 25, the Feast of the Annunciation, and the year 1751 so commenced, but the year 1752 and all subsequent years began with January 1.

So, the answer to our question is that a leap year, with its additional day in February,—the shortest of all the months,—is to make up the consequence of a day in each year over and above the 365 days. Just because as there are actually 11 minutes and some seconds less than 365¼ days in each solar year, it further helps to decrease to drop three leap years in every 400 years to again make up the reduced average.

Around leap year there has grown up many traditions and customs, the one now most commonly recalled being the alleged privilege accorded to women to propose marriage instead of being obliged to wait upon mere man to offer marriage.

Bank Job Confessed

President Hoteltown Dies

Robert McDonald Of Edmonton Succumbed To Attack Of Pleurisy

Western Canada has one of its most widely known figures removed when Robert McDonald, prominent and noted proprietor of Edmonton's Hoteltown, succumbed to an attack of pleurisy. Mr. McDonald had been ill for two weeks.

Born in Sydney, Cape Breton, Mr. McDonald was 68 years of age. He took keen interest in all forms of sport and is remembered for having promoted some of the longest boxing cards shown here.

He was a director of the Alberta Hotelmen's Association.

A reporter, interviewing President Von Hindenburg, hoped to learn the secret of his great courage and control: "President Von Hindenburg, what do you do when you're nervous?"

"I whistle."

"But I've never heard you whistle."

"I never whistle."

Canadian Legion and Pensions

Provincials Affected Are Those Who Accepted a Final Payment

Following objection of Georges Gauthier, Auditor-General, to reinstatement by the Board of Pensions Commissioners for Canada of certain classes of pensioners, the Pensions Board consisted to the request of the Canadian Legion that a test case be brought before the pensions appeals court.

Next spring Ahlin, the pensioners affected are those who accepted a final payment in lieu of pensions under earlier legislation and who, under the amendments to the Pension Act of 1930, have been restored to pension. According to Legion officials several hundred of these received will be adversely affected." In most cases, payment of pensions has been made only after the applicant has proved his permanency will be required to restore the money to the Dominion Treasury.

The statement issued recently Legion officials state they have obtained restoration of final payment to pensioners in many cases under the provisions of 1930 were passed. "the Legion, and all soldier organizations, have opposed and it was necessary, in order to prevent them gradually making the round of the whole year, to make some adjustment.

Originally the Romans had a year of ten months, but early in their history they adopted, from their belief in the best attendant on odd numbers, a lunar year of 355 days, and added two new months, January and February. To make the necessary adjustment, referred to in the preceding paragraph, Julius Caesar intercalated a month from time to time, and at the time Julius Caesar became dictator the spring festivals occurred in the normally summer months. To clear away all this confusion, Caesar, with the help of Sosigenes, an Alexandrian astronomer, established a thorough reform of the calendar. He effected it by making the year now called 46 B.C., "the year of confusion," consist of 445 days, and the succeeding years of 365 days, with the addition of every fourth year, which consisted of 366 days. This method of adjusting the days to the year is called the Julian calendar.

The Julian calendar assumes the length of the solar year to be 365¼ days, whereas it is 11 minutes and a few seconds less. This annual error accumulated as the years rolled on. From time to time proposals were advanced to rectify the error, but the matter was not taken up in earnest till 1577, by Pope Gregory XIII. As in 1582 the vernal equinox occurred at a date (March 11) ten days earlier than it did at the time of the Council of Nice in 325 A.D., Pope Gregory published a bull, dated March 1, 1582, enacting 10 days, so that what would have been reckoned the 5th October, 1582, was to be reckoned the 15th October.

In order also that the displacement might not recur, it was further ordained that three of the leap years which occur in 400 years should be considered as common years. This is done by omitting the intercalary day in common years were those which close the centuries (i.e., which end with 00) and are not divisible by 400. Outside Plane Loan

Alberta Will Watch Outcome With Great Interest

Commenting on the steps taken to control Canadian purchases of foreign securities, Hon George S. Henry, Premier of Alberta, who recently disclosed that the next loan sought by the province of Ontario will be in the form of a domestic bond issue.

Alberta will watch with interest Ontario's effort to secure that province's next loan in the form of a domestic bond issue, Premier John E. Brownlee said. "I am very hopeful that it will be a success, of course."

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy has not been given the worm will resort to the intest. An effective worm remedy is Dr. Peery's. It goes in Miller's Worm Powders. They are very sweet, so that children will eat up stimulating and soothing effects, so that that child's progress thereafter is painless and satisfying.

Noted Figure Passes

Hon. C. H. Mackintosh, Former B.N.W.T. Lieut.-Governor, Dies In Ontario

Hon. Charles H. Mackintosh, baltimore friend and protege of the John A. MacDonald school, died.

Participant in the stirring political battles of the 70's and 80's, Mr. Mackintosh was born in Ontario, was thrice mayor of Ottawa, twice member of Parliament for the capital and a former lieutenant-governor of the North West Territories, 1888-97. He was born at London, Ontario, 80 years ago.

Persian Balm. Cool and refreshing bathing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth, soft and flawless. Use it for hands and face. Always results in the highest expression of beauty.

The Weather He Likes

A traveller was crossing the moorland, and met an old shepherd. "What sort of weather shall we have today?" he asked the shepherd. "Whatever weather ye like," was the reply. "Whatever weather you like?" said the traveller, surprised. "How can that be? How can you control the weather?" "Well," said the shepherd, "because it will be what God pleases, and what He pleases I like."

"If only we could be so content, and adopt ourselves more and more to His teaching. Who is "to all this world most wonderful, most sure to all this ways."

Dog Makes Long Trip Afoot

From Shoepiac, Manitoba, "Smart" Goes Back To Old Home, Regina

On the trail of his lost master "Smart" arrived in Regina recently, after travelling between 300 to 400 miles afoot.

"Smart" is a black collie dog owned by H. J. Quick, former city editor of The Star. When Mr. Quick left the city some months ago he took his dog and left it with relatives at Shoepiac, Manitoba.

Mr. A. R. Tufts, 1940 York Street, where Mr Quick boarded during his stay in Regina, was splitting some wood in the shed at the back of his home when a black shape shot through the doorway, jumped on him and licked his face. "Smart" was among friends again, but his master was not there.

What route he had travelled, how many miles he had covered, how he had fed en route and how many farm dogs he had fought "Smart" could not tell, but he was able to express his joy and pleasure at being "just among friends" in a canine way.

Banks Will Give Facts On German Loans

Lending Wall Street Bankers Will Give Public All Facts About Short-Time Credits

Lending Wall Street banks have determined upon the step of placing before their stockholders and the public all facts concerning their short-term credits in Germany.

This will be done at forthcoming annual stockholders' meetings. The decision was prompted by reports reaching financiers of disturbing rumors and exaggerations which they are important to refute with reassuring information.

It was asserted their figures will show that substantially less than eight per cent. of the total business done by those having extensive international operations is for German account. Actually over 90 per cent. of their gross business is of domestic origin.

Keep your stock free from blemish with Dingler Egyptian Liniment Reserves inflammation, quickly relieves bruises, sprains, strains, swellings, contractions of cords, stiffness of joints, and sore muscles.

Human Hunting System

On the remains of a Roman Villa at Darenth in Kent, England, are to soon the relics of a central heating system which proves that the ancient wonders understood how to make their homes comfortable. The floor rests below a raised floor bet air passed through hollow tile supports and through flues in the wall to the upper storey.

Everything Would Turn BLACK

Mrs. H. E. Sweezey Considers Use Of Williams' Pink Pills (tonic) Saved Her Life.

"Feeling Like a Different Person."

"I could hardly walk across the room," writes Mrs. H. E. Sweezey, R. No. 1, Colling wood, Ontario, "everything would turn black and I would become so dizzy I would have to rest. I thought I would never be strong—when I was advised to get the Williams' Pink Pills. I used them until I had taken six boxes. Soon I was feeling like a different person. I am now the mother of six strong, healthy children."

The iron and other elements in Dr. Williams' Pink Pills (tonic) increase the amount of hemoglobin, or oxygen-carrying agent, in blood. The result is a keener appetite, a feeling of well-being, restful sleep, and the ability to do your work happily.

Begin now to take Dr. Williams' Pink Pills 50 cents a package 134

Nuisance Tax Unlikely

Saskatchewan Not Considering Imposing Taxes On Cigarettes, Tobacco Or Soft Drinks

It is considered unlikely that the Anderson Government, seeking new sources of revenue at the coming session of the legislature, will attempt to impose any "nuisance" taxes, such as on cigarettes, tobacco and soft drinks.

Although such imposts were discussed at the caucus, they aroused strong opposition among government members, with the result that the government has practically eliminated "nuisance" taxes from their proposals to avoid the provincial treasury next year

On the other hand, an amusement tax imposed by the province next year, is still within the realm of probability. Questioned regarding this matter Hon M. A. MacPherson, described the amusement tax as "provincial if the province wants to take it."

Only Regina and Saskatoon, in this province, exercises an amusement tax, a source of revenue these cities would lose if the province took over the tax.

"Mummy, why does it rain?"

"To make things grow. To give us apples, pears, corn, flowers—"

"Then why does it rain on the pavements?"

Ottawa Physician Has One Of The Strangest And Far-Flung Medical Practices In The World

Pioneer Railroader Dies

W. H. L. Bonnycastle, Dies At Age Of 94, Came To Canada In 1854

The death of W. H. L. Bonnycastle, Montreal, removed one of Canada's pioneer railroad men.

Born in September, 1837 at Woolbridge, Cornwall, England, Mr Bonnycastle early heard the call to Canada, coming to this country in 1854. He immediately entered the service of the Grand Western railroad at Hamilton. He was transferred to Montreal in 1873.

In 1883 he became general car accountant at Montreal for the Grand Trunk Railway, remaining in the service of the Grand Trunk until his retirement in 1907, when he went on pension, after 53 years service.

Active in the work of the Methodist church, Mr. Bonnycastle remained high in its councils until about 10 years ago. He was a local preacher and a member of the Methodist conference.

Bearing his full share of civic responsibility, he was for three as four years alderman of St. Lambert, a suburb of Montreal.

He is survived by four sons. They are W. H. Bonnycastle, J. J. Bonnycastle, and J. M. Bonnycastle, joint controller of the C.N.R., all of Montreal, and A. E. Bonnycastle, Winnipeg.

Regina Minister Opposes Sweepstakes

The Subject Is To Be Discussed By the Ministerial Association

On the grounds that it is "demoralizing," Rev. W. E. Bonnycastle, a clergyman of Regina, Saskatchewan, will attack the plan of the Regina Exhibition Association to conduct a sweepstakes. The association, plans to boost its attendance receipts next summer by giving away $12,000 in cash prizes. A series of monthly "weather estimate" contests. Tickets would cost $1 each.

"I question the legality of the scheme," state Mr. MacNiven, "but that is for legal minds to decide."

The matter will shortly be discussed by the executive of the ministerial association.

Butter Export

Saskatchewan's record creamery butter production for 1931, which is expected to approximate 30,000,000 pounds by the end of the year, has made possible extensive sales outside the province, according to officials of the Dairy Branch of the Provincial Department of Agriculture. Estimates place the amount already sold, this year outside the province, at 12,000,000 pounds, a considerable portion of which found its way to the British market.

Hostess (at evening party): What, going already, professor? And must you take your dear wife with you?

Professor—Indeed, I'm sorry to say I must.

Life Insurance Sales In Canada Higher

Increase Of Life Insurance In Canada For the First Eleven Months Of 1931

A gain of over $20,000,000 in new paid-up ordinary life insurance in Canada and Newfoundland was shown in November as compared with October. For the first eleven months of the year new business to the extent of no less than $442,119,000 was written by 19 companies, having in force 94 per cent of the business done in the Dominion, according to figures given out by the Life Insurance Sales Research Bureau.

November sales were $5,880,000, the totals by provinces being Alberta, $1,900,000 British Columbia, $3,227,000 Manitoba, $2,517,000, New Brunswick, $600,000; Nova Scotia, $1,407,000; Ontario, 15,757,000. Prince Edward Island $196,000 Quebec, $11,838,000; Saskatchewan, $1,950,000, and in Newfoundland, $208,000.

Mussolini Desires Peace With the Vatican

Gaetano Polverelli Appointed To Be Chief of the Press

Premier Mussolini made what was interpreted as another step in the direction of peace with the Vatican recently in appointing the appointment of Deputy Gaetano Polverelli as chief of the press.

Deputy Polverelli was the first Fascist to see Cardinal Gasparri, former papal secretary of state after Mussolini's negotiations with the pope. His visit was unofficial but he sought to learn the Vatican's attitude and to lay a foundation for good relations.

Signor Ferretti, previous editor of the press, who served three years and was very close to Il Duce, was cordially thanked by the Premier for his work.

Yachtsmen Would Like "Bounce"

Little Chance Of American Buying Famous Salt Banker

United States yachtsmen would like to purchase "Bluenose," famous salt-banker that defended her title as champion of the North Atlantic fishing fleets this fall by humbling the American challenger "Gertrude L. Thebaud."

H. Fenwick Bricker, managing director of the stock company that owns the schooner, said two others had been received recently. They would be laid before the directors at an early date, but he said he believed that little chance there is for "Bluenose" going out of Nova Scotia.

Aid For the Shriner

When starting a cold engine, always disengage the clutch as this relieves part of the battery. When the clutch is engaged the starter has to turn not only the transmission gears as well as the engine crank shaft assembly.

Welsh: They say you married Penelope because her aunt left her a fortune.

Foote: That's a lie. I'd have married her just the same whoever had left it to her.

Manchu Emperor Dies

Hsuan-tung Ch'ih, Who Ruled China From 1908 to 1912, Succumbs

Hsuan-tung Ch'ih, who ruled China from 1908 to 1912, died recently. He was the last emperor of the Manchu dynasty.

He was born in 1906 and succeeded to the throne in 1908 on the death of his uncle, the Emperor Kuang Hsu. He was then only two years old. He was deposed in 1912 when the republic was established.

Western Economist Suggests Canada Abandon Gold Standard In Conformity With Britain

Ways Of Disease Germs

Scientists Discover That Bacteria Is Attacked By Virus

Disease germs, like dogs have many fleas, certain bitter sometimes turn the bacteria into raging destroyers and sometimes drag them into harmlessness.

Discovery of a certain profound effect of these bacterial fleas was reported to the Society of American Bacteriologists by Dr. F. D'Herelle of the School of Medicine of Yale University.

The bacterial pests do not merely drive disease germs berserk, but somehow alter heredity, so that a different species of bacteria develops. The new species may be of more dangerous or less so than were its parents.

D'Herelle's discovery suggests the possibility of controlling bacteria by breeding, provided it can be ascertained what kind of flea bites will rob disease germs of their virulence.

The proper scientific name of the fleas is "phage," which means eaters.

Doctor Jailed At New York

Fined $500 and Sentenced To Six Months Imprisonment

Dr. Beverly Sproul, Lake Placid dog fancier and Montreal bachelor, was fined $500 and sentenced to six months in the federal house of detention on his plea of guilty to possession of narcotics without a physician's license.

Dr. Sproul, a graduate of Yale, in 1928 received a suspended sentence of two years, operative at any time within five years upon violation of the prohibition law or departure from general good behaviour.

Mouse Caused Accident

A mouse has been the cause of a serious motor accident in Pinner, it made its nest in a car, and soon afterwards the owner, his wife, and the mouse went for a drive. Suddenly the man noticed the mouse and made a grab at it. In doing so he lost control of the car, which ran into a tree, causing serious injuries to the two occupants.

Time Is the Thief

A small boy asked an elderly gentleman the time.

"In three-quarters of an hour it will be half an hour—no, pardon, twelve as it now is after ten," he said.

The small boy was a bright youngster and quickly told the time. What was it? Answer—10:50 o'clock.

British Jobless Figures

Great Britain registered a decrease of 54,722 in the number of unemployed during the week ended December 12. On that date the total was 2,972,-982, which was 373,810 more than at the same time a year ago.

The only state that has a law against a private citizen having a machine gun is California?

Pioneer Of Printing

A manuscript page was recently sold for a Gutenberg Bible—one of the five surviving copies of the Bible printed on the press of Johannes Gutenberg, of Mainz, Germany. Johannes Gutenberg was one of the first printers, and he is usually regarded as the inventor of movable type. He set up his first printing press at Mainz about the year 1450. His first published work was a book printed from blocks, and later he printed the great Bible, a copy of which has just changed hands at the price of $150,000. Gutenberg died at Mainz in the year 1468, and he was buried, in common says, in the Franciscan church of that city.

When a bullfrog swims, it draws its bulging eyes back into their sockets for their protection.

Mistress "Be that wee poor young man who brought your box. He is very handsome."

Maid "Isn't he? And so are all the others."—Meggendorfer Blaetter, Munich.

W. N. U. 1932

Acceptance by Canada of the need of giving fair value to the currency of Great Britain, is suggested by Dr. W. W. Swanson, professor of economics at the University of Saskatchewan, as a practical means of contributing toward alleviations of prevailing monetary conditions. This, he says, could be signalled by "our abandoning the gold standard for a time, and defining the Canadian dollar as cash and such a part of the pound sterling."

Dr Swanson makes the suggestion in his book, "Depression—And the Way Out." A pre-production review was recently carried by the Toronto Mail and Empire.

Some of the economist in the gold standard is based on his opinion that it is the only method found so far of ensuring the full sanctity of contracts—that faith in the honesty of the other man which he holds to be the very foundation of civilized society.

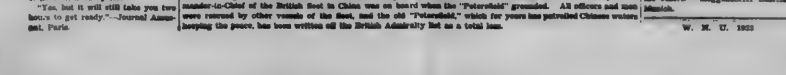
Upon the question of Canadian exchange in New York, and the development of Canada's relations with Great Britain, and the "natural affinity" of Canada with Britain as the Dominion's natural consumer, Dr. Swanson, in part, comments:

"It is impossible to say definitely why the Canadian dollar should have followed the pound sterling to lower levels of value in New York, but it is fairly certain that it must have done so sooner or later. Not a little of the fall experienced is probably due to mere belief that this, as a British nation, must share the fortunes of Britain. In any event there is a powerful force tending to pull our dollar to parity with the pound sterling rather than with the American dollar—our position as a wheat-growing country.

"Our chief item of export business is the selling of wheat to Great Britain. We cannot accept full payment in gold, although we are prepared in a deliberate and pleasant attempt to increase the British proportion of our imports. We cannot have payment in gold, as that would mean that the price of our wheat would be out of line in Liverpool, with the price of wheat competing countries, such as Australia and Argentina, which already have depreciated currencies. We must, in the end, find some means of accepting payment in the British medium which Britain can use — the pound, even if a pound of lessened value."

"You will see, Robert, in a few years we shall only need half an hour to go to London by air."

"Yes, but it will still take you two hours to get ready."—Journal Amusant, Paris



BRITISH ARMED MERCHANTMAN SINKS OFF CHINESE COAST

This photograph shows the wrecking of the armed British merchantman H M S Petersfield, which ran on the reefs at Tung Tung Island while en route from Shanghai to Poochow, China. Admiral Sir W. A. Kelly, Commander-in-Chief of the British fleet in China was on board when the "Petersfield" grounded. All officers and men were rescued by other vessels of the fleet, and the old "Petersfield," which for years has patrolled Chinese waters keeping the peace, has been written off the British Admiralty list as a total loss.

The Sunday Express says the former queen of Spain has opened negotiations for the sale in London of her famous collection of jewelry, regarded by worth at least £500,000 (normally about $2,500,000).

Canadian industry employed 591,-604 persons during November, the Dominion Bureau of Statistics reports This was a decrease of 4 per cent from the preceding month's total of 607,494.

Peavo Murmi, the "Phantom Flea" of the track a few years ago, plans to compete in the 10,000 meter speed marathon race in the Olympics at Los Angeles, next summer. Peavo said he would resume training in April.

Robert Leonard, 15, of Lancaster, Pa., had been discharged from a hospital as cured, though he carried a bullet in his heart. The shot, fired accidentally by a companion, passed through one wall of the heart and lodged in another Doctors dared not operate for fear it would be fatal. Robert feels all right.

SUNDAY SCHOOL LESSON

JANUARY 10

THE FIRST DISCIPLES

Golden Text: "Behold, the Lamb of God, that taketh away the sin of the world." John 1:29.

Lesson John 1:19-51.

Devotional Reading: Isaiah 52:4-12.

Explanations and Comments

A Wise Preacher Of Allegheny.—Verse 35-39. The day following my conversation with the deputation of priests and Levites from Jerusalem John came to me to ask him if he were the Christ. John the Baptist pointed out Jesus to two of his own disciples as the Lamb of God. It had meant much to them to be disciples of John the Baptist. They had realized John's moral purpose, reforming zeal, righteous indignation and passion for righteousness, and had attached themselves to him. Now they rebuke reformer in loyal allegiance. They had also grasped his supposition as a forerunner that he were ready for a great exercise of the soul-changing truths that Jesus came to teach as the Lamb of God, they left the famous prophet for the unknown Galilean whom they and John had been preparing.

"One of the great needs of today is a development of that spiritual insight, intuition, hospitality of heart and mind to make the great centers of faith and to leave John and follow Jesus. In reference for themselves their spiritual development which comes when they transfer their allegiance from the prophet to the Christ, from the reformer to the Redeemer. The religion of many today is a religion of moral reformation and social salvation, the religion of Jesus is that, and something more; it is religion of individual regeneration. —Percy Austin.

When Jesus saw the two men for having Him He said to them, "What seek ye?" His question was asked them because He wished to fill it," observed an ancient writer.

"Rabbi," where abideest Thou?"—The question of the disciples implied, not that they wished to go to Him, hoping that they might have uninterrupted talk, for that scarcely fit, Oriental habits, but rather that they hesitated to prolong the interview until they wished to know where they might find Him another time. From this unsatisfactory issue they were saved by His frank invitation, "Come and ye shall see." —Marcus Dods.

They came and saw where He abode. It was about the tenth hour, 4 o'clock in the afternoon. Those who were reckoned from sunrise to sunset), they stayed with Him that day.

"These two men who followed Jesus did not know definitely what they sought. It was not long before they found it. It was enough that they were following the impulse of the best that was in them. The leading was that they were seeking the spirit of a good man by supposition that it pushed the soul and that God is never far from the seeking soul."—John T. MacPherson.

Fighting Drought Conditions

Hon. James F. Bryant, K.C., Chairman Of Saskatchewan Conservation Committee

Outlined

In view of statements appearing recently in the Western Producer, and issued by S. Barnes of the Swift Current Experimental Farm, and by A. J. Connor, Chief Climatologist for Canada, which tend at least, unwittingly to throw a damper on the work of the Saskatchewan Commission on Conservation and Rehabilitation, the Hon. James F. Bryant, K.C., Chairman of the Commission, has issued the following statement to the press:

"The Commission has done nothing else during November, the month mentioned by S. Barnes of the Swift Current Experimental Farm, and by A. J. Connor, Chief Climatologist for Canada, which tend at least unwittingly to throw a damper on the work of the Saskatchewan Commission on Conservation and Rehabilitation. On the following statement by the press:

"If the Commission had done nothing else but to date the present, it has performed public attention on a study of the causes of the drouth in South Western Saskatchewan it would have more than repaid the cost of its existence. The Commission has secured the services of an experimental statistician, whose findings in due course of time should carry with it a note of authority. To say that we had made a study of the subject the arguments were most superficial and unconvincing, as all those who have read it will thoroughly realize.

As a sample of his lack of knowledge of the facts, he alleges that there is no proof that the area of drouth is steadily becoming worse Let him only step off Water in Southern of South Western Saskatchewan and he will get all the evidence needed. This practice he terms the parallel between Regina and Lumsden for example, when comparing rainfall, the struggle, haines, ravines and creeks were full. The difficulty then was to ford a dry homestead. The same was true in many parts of the drouth area. The people in the early days in taken and sloughs gave the crooks and creeks were dry, and the subsoil water low is the lowest within the memory of living men. Each succeeding period of drouth is worse than the last and the dust storms and drifting of the soil during the past year have never been equalled in any period in the past.

In 1920 the Saskatchewan Government appointed a Royal Commission of inquiry into farming conditions. A most extensive survey was undertaken by the best agricultural experts available and a splendid report was issued.

On Page 94 of that report, issued in 1921, the following appears:

"The precipitation records of Haves, Indian Head, Qu'Appelle and Moosejaw are interesting because of the proximity of Haves to South Western Saskatchewan, and because of the length of the record which corresponds closely with those of Swift Current and Medicine Hat. Perhaps the most striking feature of them is the fact that only during the years 1917-18-19 are there three very dry years in succession. There are two of these separate occasions when at Haves there have been two dry years in succession and several single dry seasons.

Up to 1921, only once in forty years have there been three dry years in succession; within the next ten years we have for the second time three dry years, or nearly half of the period, received less than its normal precipitation. During the first 27 of the years between 1885 and 1909 all but one had more than the normal precipitation. During the period 1917 and 1920 inclusive, except for two years, below the average. These periods drought were preceded by periods of years where crop failures and bank failures, the St. Paul railroad went into a receivership and land values became very low.

When we find throughout a very large area of South Western Saskatchewan land owners and others becoming alarming not only in their prosperity but in the area over which they claimed, when we find that owing to the failure of the crops the very best settlers cannot maintain themselves without subsidies, we think that the matter is of sufficient importance to warrant the most careful consideration. If subsidies are to be given, should they be given to the settlers or to the land? Is the policy of suitable crops adopted to arid conditions, and closely thoughtful study of the conditions which are being carried on in experimental farms in large extent on homesteads soon may be the means of saving the situation which nature has put in his way. On the other hand, if the land is found to be unsuitable, even though settled and prosperous, may reasonably become an opportunity to the government to get out the information of war and peace, and to move the settlers to better lands."

The challenge is, are the farmers of Southern Saskatchewan going to let the whole matter drift or are they going to study carefully to their best interests and to co-operate with the Commission in the solution of the problem.

The suggestions made at the recent meeting of Saskatchewan agriculturists are similar in practically every respect to the suggestions made by the Royal Commission of Inquiry into farming in 1920. Those suggestions have not met the situation in the years and a hundred other examples prove this. It draws moisture from a greater depth than does any other plant organism this affecting the subsoil water of the lower horizontal strata by bringing it again into the general circulation of water at the atmosphere and making it available for vegetation. It refreshes the air above it and increases the condensation of moisture carried by the winds, thus increasing the frequency of rains during the vegetative season. In November 1924, the illustrated Canadian Forest and Outdoors carried this paragraph:

"The terrible famine conditions for several years past in China are a striking example of general knowledge that country owns had a wanton cutting of trees, the equal of the well wooded portions of Canada, but now benighted land that is an arid waste. We are doing in Canada cut away its trees and allowed the land to be burned over. The devastation was destroyed over vast areas where the water swept over the land and carried with it the fertile top soil to the sea. There are millions of acres in China that constitute a barren waste incapable of producing vegetation in any one season over seven years, and in the other years of that period look to the world for assistance to feed her teeming millions. China is poorer and will remain for many years, a land of perpetual famine because she has destroyed her forests." Again, adopting herself to the devastation of alternating floods and droughts, and has inverted the fertile top soil over such a vast portion of her domain.

Mr. Frank Barnum advised me during this summer, that China was one of the two countries in the world that required trees more than south in Saskatchewan. In China the seedlings are nailed down and cracks plastered with paper in order to keep out the dust from even the best cultivated fields.

We had similar dust storms in Saskatchewan this summer.

Dr. Sanford Fleming, on page eight of his report of "Progress on the Extension and Improvement of the Intercolonial Railway up to January 1877, says:

"Although the prairie region is of vast extent, it is not all fertile. A large area adjoining the head diary of the United States midway from Manitoba and the Rocky Mountain zone is arid and unfavorable for agriculture."

John Macoun, Botanist to the Fleming Expedition, states in his report of May 1st, 1873.

"In Manitoba this will soon be remedied, drains will be cut to take off the surface water, trees planted in a consequence of prairie rains will fall; the salts will be dissolved and carried off from the surface, and salt plants disappear. This is no theory sketch, as it is a fixed fact in Physical Geography, that to clothe the land with trees, takes away the salt and gives a greater rainfall. Any one acquainted with the history of Palestine and Northern Africa knows that what were the most fruitful countries in the world 2,000 years ago are now the most barren. Where once rains are well known, the trees were cut down, and never planted in their place. The sun evaporated the rain before it had time to penetrate the soil, salts accumulated and in course of time, the land was given up to perpetual barrenness.

"Our interior plains will yet be covered with wood, there will be a sufficient rainfall, streams will be more frequent, the old channels will contain more water, brackish pools will give place to purer waters, and the country has millions well only now by the buffalo. To a common observer these matters are not so plain as they are to a botanist. A botanist is familiar with the absence of mosses, and asks himself the cause. The answer comes at once, moisture is evaporated too quickly. How shall we prevent this. Cover the land with trees and stop the annual fires. Three-fourths of our prairie is within the limits of mixed forest."

Meyer in his "Hydrology" at page 136 says, "If the changes occur in the natural conditions of the large land areas which increases evaporation, the result must inevitably be an increase in precipitation. On the other hand, if there are changes in the land areas which diminish the amount of water which runs off over the earth's surface or through the rock strata into the ocean, evaporation will consequently proportionately be reduced."

To find the condition in southern Saskatchewan where the trees have been burned off and cut off in past years and where in the last three years the prairie grasses have been destroyed by locusts.

In "Climate Through the Ages," Huntington says at page 196:

"In the past fifty years, the country (South Africa), has been undergoing increasingly from droughts, but the conclusion from expert evidence at hand this is not due to any natural

TRELLE TO SEEK FURTHER HONORS AT GRAIN SHOW

Wembley, Alberta. Herman Trelle, grain expert who sought health and found it along with fame in the Peace River country of Alberta, is back on his farm again, lunched away for a winter of study of seeds and chemistry.

Trelle will be an exhibitor on the grains and grasses at the International Plant Show at Chicago, a degree that the doubling of the oats and wheat crops in the same year stands alone in grain boost annals and may even prove difficult for the northern grower to duplicate Three times he has captured the wheat crown in 1926, 1930, and 1931.

One other Canadian farmer has equalled his three victories in wheat and one of these was in 1931 when among the honor five times of them combining to give Canada 17 wheat crowns to four won by United States farmers since 1911. Charles Galloway has never won the wheat crown, although it has taken premier titles for his livestock.

Seager Wheeler, whose grain from the Reethern district of Saskatchewan won many honors, was the only farmer to win the sceptre five times and coupled with five other wins by Saskatchewan farmers places the century grain possessor on top of the list with ten victories. J. C. Mitchell, Dahinda, won the title three times in 1916, 1920, and 1924, with Wheeler's victories being gained in 1911 1914, 1915, 1926 and 1931.

Paul Gerlach took the title in 1913 and in 1929. R. A. Wilson was the victor in 1917, when Samuel Larcombe exhibited the finest quality wheat.

The four United States farmers to hold the title are H. W. Craft in 1921, L. P. Yates in 1925, and C. Edson Smith in 1927 and 1928, with Manitoba and Saskatchewan each claiming a championship the exhibits of Trelle each year.

Trachoma Menace

Measures Are Taken in Alberta To Deal With the Situation

Edmonton, Alberta. Hon. George Hoadley, Minister of Health, is writing the Minister of the Interior at Ottawa, asking him to permit Dr. J. J. Wall, the Department's specialist in Indian health affairs, who is now in this province, to make a personal check up on the measures taken there by the provincial health department to deal with the trachoma situation.

General approval of these measures has already been expressed by Dr. Wall, who was in Edmonton recently in consultation with the provincial officials, but it is felt that a close-up inspection of the situation by him will be of considerable benefit to the local and government authorities.

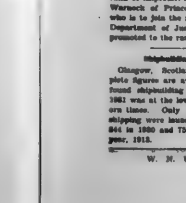
Bavarian Crown Jewels Sold

Emeralds, Pearls and Golden Fetish $100,000 At London, England

Sparkling from myriad facets even on a dreary December afternoon, the Bavarian crown jewels, specialist in the "property of the royal house of Wittelsbach," were sold recently at auction for a total of £20,000 (nominally $100,000).

Emeralds, pearls and rubies wore the diadems in 13 lots comprising the collection, but the greatest excitement was caused by the "Wittelsbach blue diamond," one of the best known stones in Europe.

Circassian walnut grown in the Caucasus under extreme weather conditions are so rigorous as to gnarl and twist the wood fibers into beautiful patterns.



Mr: "Four in the morning. This cereal's terrible mush stuff. We don't sleep, work. We get ill, we grow old before our time."

Her: "Why don't you say you have no more money."—Connaissance Inedite, Leipzig.

Debt Conference

International Parley May Be Held In Switzerland This Month

London, England.—It appears that the International debt conference probably will be held at Lausanne, Switzerland, on January 20 or 25, instead of on January 15

The French Chamber of Deputies meets on January 12 and the French think their delegation would not be able to get away for a conference on January 15.

There is a meeting of the League of Nations Council on January 25 and the disarmament conference comes on February 2 factors which add to the advantage of Lausanne as a meeting place

Official British quarters professed to know nothing about plans for increase in the scope of the conference and plans for a preliminary meeting between Premier Laval of France and Prime Minister Ramsay MacDonald remained in the air pending the outcome of the deliberations still going on between experts of both countries

The importance of the conference is indicated in the report of the Bureau of Statistics covering imports of these items. Imports of butter for the 12 months ended November, 1931, fell to 3,324,786 pounds as compared with 44,469,181 pounds in previous year.

The value of imports of milk and its products for the year ended November, 1931, was $1,660,704, as compared with $15,982,676 the previous year.

Eggs on the shell imported during the year ended November last totalled 73,467 dozen as compared with 2,-910,572 dozen in the previous year.

Potato Embargo

Hon. Howard Ferguson Will Attempt To Have Bridge Duty Lifted

Charlottetown, P.E.I. Hon. Howard Ferguson, Canadian High Commissioner in London, England, is investigating the possibilities of having the British embargo on potatoes lifted, according to word received here from Hon. Dr. J. H. Weir, Federal Minister of Agriculture.

Recently New Brunswick potato shipments were delayed by a request to send a representative to England with a view to urging that the embargo be removed, and they asked the government of Prince Edward Island to support them in this movement.

Hon. C. Shelton Sharpe, Prince Edward Island minister of Agriculture, replied to the effect that he believed action should be taken by the Federal Minister of Agriculture on behalf of the provinces. In a telegram to Hon. Mr. Weir, he suggested that an expert be sent to England from Ottawa.

Order B.C. Lumber

Large Order For Fir Is Received From Australia

Ottawa, Ont.—Recent orders from Australia for some 8,000,000 superficial feet of British Columbia fir cut to specifications, and a generally brighter picture of trade conditions in the Antipodean commonwealth are recorded in the current issue of the Commercial Intelligence Journal issued by the Department of Trade and Commerce.

A letter from D. H. Ross, Canadian Trade Commissioner at Melbourne tells of the lumber orders which were for the Broken Hill group of lead-silver-zinc mines. The initial order for 4,000,000 feet, negotiated some months ago, resulted in a repeat order.

Murders In Italy

Premier Ramsay MacDonald Announces Italian Agitators

Lossiemouth, Scotland. — Prime Minister Ramsay MacDonald, in an outspoken statement, described the situation in India as "most deplorable" and denounced Indian agitators in vigorous terms.

Recent disorders in the northwest frontier province and in Bengal, he said, did not represent a "baffled and oppressed India struggling to be free," but a murderous movement trampling in its own self-will upon Indian progress.

The measures directed at coping with these disorders, he said, did not represent the working out of a government policy, but quite the contrary.

Debt Moratorium

Winston S. Churchill Says Germany Is Not Bankrupt

London, England.—Winston S. Churchill, former British Chancellor of the Exchequer, in an article in the Daily Mail, declares that Germany is not bankrupt and that the Young plan is not dead.

"Germany is not bankrupt," he says. "She is not ruined. She is not destroyed. She is not dying. She is not dead. She is not even prostrate. She is not even disarmed. She is not even occupied. She is not even blockaded. She is not even starving. She is not even starved. She is not even starved. She is not even starved

Search Arctic For Missing Scientists

Royal Canadian Mounted Police and Department Of the Interior Join In Search For Krueger Party

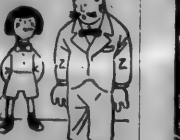
As soon as travelling conditions in Canada's far northern islands permit the Royal Canadian Mounted Police will resume the search for Dr. H. K. E. Krueger the Germán scientist, and his Danish assistant. Mr. R. A. Bjare who have been missing since 1929 somewhere northwest of Ellesmere Island in the Canadian Arctic sector. Through the co-operation of the Department of the Interior and the Royal Canadian Mounted Police arrangements for the continuation of the search have been completed and with improved travelling conditions two parties will leave Canada's farthest north post of Bache Peninsula, Ellesmere Island in an effort to rescue the steps of the missing scientists.

Last summer while the S.S. Beothic was on its annual voyage carrying the Department of the Interior's expedition to the posts in the Canadian archipelago, repeated inquiries were made at the various points visited while R.C.M.P. patrols were also active. Dr. Krueger and his assistant accompanied by three natives left Bache Peninsula in March 1930, to carry on scientific investigations in the area north and west of Ellesmere Island. Two of the natives returned to the post on April 11 bearing letters from the leader of the expedition in which he stated that if the party did not return in August, as they originally intended they would likely do so when travelling conditions improved later in the year. These communications were the last received by which map of the route the party intended to follow. This map will be the basis for the proposed extensive search.

Craig Harbour, Ellesmere Island, and Cape Sabine and Dundas Harbour, Devon Island, were points at which news of the Krueger party was expected, but these were visited by the 1931 expedition and no word of them in" whitest results. At Robertson Bay, North Greenland, the Department of the Interior's expedition made arrangements for a number of Eskimos to cross Smith sound to Bache Peninsula early in the year to meet the R.C.M.P detachment in the proposed patrols.

Corporal Blakeathy is in charge of the R.C.M.P. detachment on Bache Peninsula, the other members of which are Constables Thomlison and Munro.

As at present arranged two march parties will leave Bache Peninsula in March next year. Corporal Blakeathy and two natives and their dog teams will constitute one party, while Constable Thomlison will also lead a similarly equipped expedition. One party will travel to the north around Axel Heiberg Island and the other will work to the south. Dr Krueger was known to hold the theory that the mythical Crocker's land was somewhere north of Axel Heiberg in the Canadian sector. Amund Ringnes, Ellig Christensen, Cornwall and possibly Borden Islands will also be visited by the police in the hope of finding traces of the missing scientists. Although wireless messages are broadcast from the south to the police officers on the Far North there is no means at the posts of replying, so that no word of the success of the search is expected until the summer has gone north next summer.



"You not only smoke, but take my cigarettes. I will punish you."

"But, dad, I have been punished enough: you smoke awful fags." — Der Brummer, Berlin.

Highways and Motor

Revenues From Motor Vehicles Total $60,508,588

A total of $60,161,550 was spent on the construction and maintenance of highways, roads, bridges, and ferries for vehicular traffic in Canada during 1930, according to an official report just issued. Of this total $30,966,353 was spent on construction and $29,195,197 on maintenance The total road mileage in the Dominion at the end of 1930 was 294,272, of which 99,027 miles are classed as highway. The mileage of gravel road was 71,267. The Province of Ontario had 44,740 miles of surfaced highways, which is 55.6 per cent. of the total mileage in Canada.

Gasoline was consumed with 13,202 miles or 16.3 per cent. British Columbia was third with 6,306 miles.

The report states that at the end of the year under review registrations of motor vehicles totalled 1,360,986, an average of one for each eight persons in the Dominion. Passenger automobiles numbered 1,047,694 or one for each 9.5 of the population. Only three provinces had more motor vehicles in proportion to population than Canada, namely, the United States with 4.8 persons per motor vehicle; New Zealand with one each with seven persons per motor vehicle. The United States and France were the only countries having a greater number of passenger cars and these two countries and Switzerland were the only countries having a larger registration of all motor vehicles irrespective of population.

The revenues from motor vehicles amounted to $29,108,393. This was derived from the sale of licences and the tax on gasoline, which is five cents per gallon throughout the Dominion. During the year the total consumption of gasoline in Canada by motor vehicles was 479,554,202 gallons, of which the Province of Ontario accounted for 220,058,168 gallons, Quebec, 83,251,966, and Alberta, 38,709,956 gallons.

Stories in Ice

All-British Yukon Swing Planned to Succeed Ice

Work has started on the first all-British yukon and if plans are successful Ireland will have its own Hollywood.

The film is "Sweet Innisears," written by Augustus Pitou, whose father has managed Irish stars in America for generations.

Scenes are being shot outside Cootehill, in Limerick, Kerry and Cork. The interiors of many famous Irish estates, as well as cabins, will be shown. Emmett Moore is the producer.

Five Bombs Out Again In Fukuo

Five bombs out again in the "Allen Section," a palace built in 1579, and three more firemen were injured before the flames were brought under control. The damage is estimated at more than $1,000,000.

The girl who can neither sing nor play and knows it is always a Soprano.

Hidden Wealth

Gold Known To Abound In Streams Of Alberta Under Prospectors

Gold lies in nearly every river stream and lake in Alberta, but Mother Earth holds tenaciously to her wealth, crushing heartlessly men's onslaught for the elusive mineral. Men have discovered gold in the numerous waters and in various parts of the province, visioning fortunes, but every strike since 1879 has proven a failure.

Fifty-two years ago gold was found in Alberta. Quartz veins ranged high and when the hunters quartzized and one was billed. From then on the treasure has remained locked in the earth like a robber is mankind. A hoodoo seemed to follow gold strikes after the staging.

According to Jos Lemon and his partner, "Slim Jack," one of the pioneers in Alberta. They found gold in the foothills near the Living stone River, about 50 miles west of Pincher Creek. They made $37,000, it was said, but in a quarrel Lemon killed his partner with an axe.

Lemon returned to Montana and brought a party of men to the Livingstone Valley, but he went suddenly mad before reaching his gold mine, the Indians said. Back in Montana again, Lemon was arrested and found guilty of Slim Jack's murder, but died of smallpox before he could be hanged.

In the day, men have sought "the Last Lemon Mine" futilely When gold was reported in the Red Deer River in 1921, a great rush commenced, but the find proved meagre In February, 1931, an Eldorado was visioned by the gold seekers when someone found a piece of quartz in the Livingstone Valley, 35 miles west of Nanton in the southern foothills.

An Interesting Bird-Banding Experience

Information Concerning Mallee Wild Birds Of Canada

Bird banding has afforded much new and valuable scientific information concerning Canada's native wild birds and any person who finds a banded bird is requested to help in the advancement of this work by reporting the fact to the bureau of Economic Ornithology, National Parks of Canada, Department of the Interior, Ottawa. All information of this kind will be of great value to the scientists.

Official band 142987, was placed on a purple finch by Mrs. Frank Hubbard at New Haven, Connecticut, on March 23, 1930. The finch was next found, with a broken wing by Miss Blanche Spurr at Camp Brush, Nova Scotia, on July 4, 1931. Miss Spurr took the bird home and placed it in a large screened-in porch, where, with care, the finch recovered. Its power of flight sufficiently to be released on August 16, 1931. As the finch was still wearing the band when it was liberated, it is possible that it may be again reported.

As Nature Made It

Wonders Of Bird and Fish For Camera Hudson Are Retained

Contrary to what some of the uninitiated may have thought, there's no artificial colouring matter added to Canadian canned salmon to give it the shades of red and pink which are familiar to the users of this nourishing sea food There is nothing on a film of Canadian canned salmon to dupe the fish and some of its guises, and a dash of salt The colour is as Nature made it except that it may be more pronounced than it was in the fresh-caught salmon Canned sockeye is a rich red The other varieties of salmon are of different shades of pink But pink or red the colours are natural

Research carried on in recent years goes to show that the colour of any meat flesh is composed entirely of red and yellow pigments. In the canning process the colouring becomes more or less marked, although it is not yet certain whether an actual fading occurs or only an apparent fading as the proteins become coagulated

Canadian salmon are rich in protein, which is regarded as essential in the human diet since it is not only a source of energy but a builder of tissue as well Neither the growth of the young nor the satisfactory nutrition of adults can take place without an adequate source of proteins in the diet. state medical authorities Salmon also contains various chemical elements helpful to health among them iodine, which is an effective preventative of goitre Recent research has also shown that they have vitamin content comparable to red liver oil Fish are excellent food for children for the reason, among others, that they are rich in the vitamin which tends to prevent such ills as rickets.

Practically all the salmon for canning in Canada is caught in the coastal waters of British Columbia and the rivers of that province. As much as 2,500,000 cases have been packed in a year.

Buttons Still Popular

Millions Of Buttons Were Made In Canada Last Year

With all the modern gadgets on the market for bonding and fastening, the humble button is evidently not being relegated to the discard in Canada. A report on the button industry for 1930 just issued by the Canadian Government Bureau of Statistics discloses that millions of the tons were made last year. The biggest seller in the vegetable ivory button, and last year the Canadian factories produced 477,611 gross. Another fresh water pearl button held second place with an output of 258,260 gross. The patent detachable leather button is not to evidently not now in much demand for only 544 gross were made. The value of the buttons, metal buttons, snaps, hooks, eyes, buckles and metals made in 1930 was $702,479.

There are 12 establishments in the Dominion listed under the button industry with a total capital investment of $1,066,511 and 307 persons are employed in the industry.

Highway To Kenora Finished

Motor Road To Be Opened On July 1, 1932, To Traffic

Next summer, motorists will be able to travel between Winnipeg and Kenora. It is announced that the official opening of the link between Manitoba and Ontario will be held on July 1 but that the highway will be open to traffic before that time. The result will be a great increase in the number of Manitoba people visiting the Lake of the Woods one of the most charming spots in Canada in the summer season.

The completion of the highway to Kenora will be also just the first stage in other highway developments that will lead to an increase in motor traffic to and from Winnipeg The completion of the highway now under construction from Kenora down to the United States boundary on the east side of the Lake of the Woods will soon afford a round trip for motorists United States tourists using the Lund Selkirk Highway one way and the route around the Lake of the Woods the other way.

The Trans-Lake highway between Kenora and Fort Williams is, also, now under construction as an unemployment relief work. Many camps have been established and a large force of men is engaged It is hoped to bring until that section of some 275 miles is completed, especially if continuance of the work next winter is required for the relief of unemployment.

The completion of the highway to Fort William and the completion of the Trans-Prairie Highway running southeasterly from Winnipeg to the United States boundary, will provide another interesting round trip from Winnipeg to Duluth thence along the shore of Lake Superior to Fort William and back by the Trans-Canada Highway. The next year or two may, therefore, see some important results of highway construction to the east of Winnipeg.

Arctic Sea Life

Conditions For Under-Water Life Similar To Those Of More Temperate Seas

The climate of the Canadian North does not adversely affect the sea life according to the records of the North Canada Expedition of the Bureau of the Department of the Interior. During the winter much of the surface of the water is covered by approximately five feet of ice, which forms a clearly defined line of demarcation between the Arctic conditions maintaining above its surface and those in the water beneath, the result being that general conditions in the deep sea areas are much similar to those found in more temperate seas. Those conditions are clearly reflected in the character and quantity of sea life found north of the Arctic circle. The herds of sea mammals have not only supported the local inhabitants for many generations but have also entered the world markets; the fisheries, while as yet undeveloped, have long been an important factor in the domestic economy of the country, the supply of mollusks supports many of the larger sea mammals, while the smaller varieties of sea life maintain the fish and some of the smaller mammals. The marine vegetation is plentiful and is drawn upon by all forms of animal life as an aid to their subsistence.

Iceland has banned the importation of automobiles.

"Our neighbour Leon has been killed as he went to pay his debts."

"There! That is what comes of wanting to pay one's debts."—Monsieur Lepas, Charivari.

CHAPTER X.

Other People's Troubles

Jean woke to find the chill, wintry sunlight thrusting in long fingers through the space between the curtains and the edges of the window blinds. At first the unfamiliar look of a strange bedroom puzzled her, and she lay blinking drowsily at the wavering slits of light, wondering in vague, half-awake fashion where she was. Gradually, however, recollection returned to her, and with it a lively curiosity to view Staple by daylight She jumped out of bed and, rattling up the blinds on their rollers, peered out of the window.

There was a hard frost abroad, and the stillness which reigned over the ice-bound country-side reminded her of the big Alpine silences. But here there was no snow no foaming sheet of white-capped waves, only a steely blue shadows flung across it. Green and chaven the lawns sloped gently down from the terrace, running almost immediately beneath her window, to the very rim of the frozen lake that gleamed in the valley below. Beyond the valley, sentinel woods and copses climbed the hillside opposite, leafless and bare save where a cluster of tall pines showed a deep green defiance against the slate of the sky.

In the farther distance, beyond the confines of the manor park itself, Jean could catch glimpses of cultivated fields the red Devon soil glowing jewel-like through filmy wisps of morning mist that still hung in the atmosphere, dispersing slowly as though loth to go Here and there a little spiral of dowser, blue-grey smoke wreathed its way upwards from the chimneys of some thatched cottage or farmhouse. And back of it all, somewhere in a dim, mysterious purple, the great tors of Dartmoor rose sentinel upon the horizon.

Jean's glance narrowed down to the sloping sward in front of the house. It was all just as her father pictured it to her. On the left, a giant cedar broke the velvet smoothness of moorgrass, its spreading arms rimmed with bone-frost, whilst to the right a tall

25 lbs. OF FAT GONE

Obesities Went With It

A threefold benefit came to this woman when she lost unwanted fat.

"Up to a few months ago I was always troubled with rheumatism. My joints were getting so stiff that it was misery to walk. I was then 153 lbs., which is a great deal, seeing I am only 5 ft. 3 inches in height. I thought I would try Kruschen, although I did not then believe it would reduce weight, but I thought it would perhaps ease the pain. I took half-a-teaspoonful in a tumbler of hot water each morning, and to my great delight I started to lose weight, also pain. That was in May, and now I am 128 lbs., which I think is good positive. My friends are all asking me what I am doing to lose weight, as it is very noticeable. Also I look and feel a lot better in health."—Mrs. M. W.

The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that supersede the system. Then, little by little, that ugly fat goes—slowly, yes but surely. The pains of rheumatism and sciatica cease. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life!

A bottle of Kruschen lasts four weeks and costs only 5/- from any chemist in the world.

your badge, slipped into huge, grotesque resemblances of birds and beasts, divided the lawns from a path which started a walled rose-garden. By evening her mind and almost fell-taining her hose against the wintry haze, she could just make out a sunk lawn in the rose-garden, and in it the centre the slender pillar of an ancient sundial.

It was all very English and old fashioned, breathing the fashionable charm of places that had been well loved and tended by a great succession generations And over all hills and valleys, dark and woodland, lay that faint, almost imperceptible dimmid veil wherewith be it in scorching summer sunshine or frost frost the West Country tenderly contrives to soften every harsh outline into something gracious, and melting and alluring

To Jean, familiarized from childhood with the piercing clarity of atmosphere, the brilliant colouring and the definiteness of silhouette of southern Europe and of Egypt, there was something indefinably restful in the unappealing in those blurred hues of grey and violet, in the warm red of the Devon earth, with its tender overtone of purple like that seen on ripe grape and the rounded breasts of green-clad hills curving passively one into the other with that relief only into the ultimate, rock-crowned slopes of the brooding moor

"I'm going to love your England," she told Nick

They were making their way down to the lake, side by side together, since Blaise had curtly refused to join them, and as she spoke, Nick stopped and regarded her consideringly.

"I imagine you will. England will love you," he replied, adding, with the whimsical impudence which was somehow always permitted Nick Brennan "If it were not for your nature of greeting. Nick Rifled his cap.

"That is Lady Latimer," he said.

Something in his voice, some indescribable suggestion of quality, made Jean look at him quickly. She remembered on one occasion, in a moment of confidence, a battle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Illinois Has Late Summer

It's supposed to be winter in the middle west but trees and plants are lousing tiny blooms and folks are walking around in their shirt sleeves. Yesterday there was a summer-like electrical storm, and the weather man wouldn't be surprised if he received a heat prostration report at any time now.

"That is Lady Latimer," he said. Something in his voice, some indescribable suggestion of quality, made Jean look at him quickly. She remembered on one occasion, in a moment of confidence, a battle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

"I suppose you're thinking how awfully useful it would be," said Jean wistfully. "And to myself generally useful."

"I haven't got the character from my father for nothing," he said. "Environment, but I'll write it out for you when we get back. Meanwhile, I will be your personal stick of fastening on your skates."

They had reached the lake by now. It was a wide stretch of water several acres in extent, and it shimmered about its banks with rush and sedge. At the far end Jean could discern a boat-house.

"It must be an ideal place for boating in the summer," she said, taking a step nearer to the ice appreciatively as together they circled the lake, their swooping strokes, broke interlocked. It was much larger than it had appeared from her bedroom window, when it had been partially screened from her view by rising ground.

"I am all right for punting about," answered Nick. "But there's really jolly boating on our river. That's over on the west side of the park," he pointed in the direction indicated. "It divides Staple from Willow Parry—the property of our next-door neighbours, so to speak. You'd like the boating here," he added, "though I'm afraid our skating facilities aren't likely to improve anyone enough straight from Switzerland."

"I'm sure I shall like skating — or anything else here," said Jean wearily. "It is all so beautiful. I suppose Devonshire is really quite the loveliest county in England? My father always declared it was."

"We think so," replied Nick modestly. "Though a Cornishman would probably object to his lunch me down for saying so! But I love it," he went on. "There's nowhere else I would care to live." His eyes softened, seeming almost to caress the surrounding fields and woods.

Jean nodded.

"I can understand that," she said. "Although I've only been here a few hours. I'm beginning to love it, too. I don't know why it is—I can't explain it—but I feel as if I'd 'come home'."

"So you have. The Peterons lived here for generations."

"Do you mean"—Jean stared at him in astonishment—"do you mean that they lived at Chumleia Manor?"

"Yes. Didn't you know? They used to own Charnwood a place about a mile from here It was sold after your grandfather's death Did your father never tell you?"

She shook her head.

"He always avoided speaking of anything in connection with his life over here I think he hated England is there anyone living at Charnwood now" she asked after a pause

"Yes It has changed hands several times, and now a friend of ours lives there Lady Latimer."

"Then perhaps I shall be able to go there some day. I should like to see the place where my father's people lived" eagerly.

Nick laughed

"You've got the true Devonshire bounding instinct," he declared. "Devon folk who've left the county always want to see the place where their people lived" "I remember, about a year ago, a Canadian girl and her brother turned up at Staple They were descendants of a Tormarvin who had emigrated to one of these generations before, and they had come across to England for a visit. Their first trip was to Devonshire, where many of 'em had lived 'And by Jove, they knew a lot more about it than we did They were posted up in every detail, and insisted on a personally conducted tour over the whole place They went back to Canada rejoicing, loaded with photographs of Staple."

Jean smiled.

"I think it was rather dear of them to come back like that she said simply.

They swung round the head of the lake and, as they turned Jean caught sight of a woman's figure emerging from the path which ran through the woods on the west side of the lake, described the shutters at the same moment, for she stopped and waved her hand in a friendly fashion before starting on her way.

"That is Lady Latimer," he said.

Something in his voice, some indescribable suggestion of quality, made Jean look at him quickly. She remembered on one occasion, in a moment of confidence, a battle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

Sister Cities Have Lioness

Regina Has the Lowest Speed Limit of Western Canada

Regina has the lowest speed limit of six leading western Canadian cities, according to information obtained by the Board of Trade.

Recently the police commission decided against changing the speed limit of greater than 15 miles per hour.

In most other cities the limit is 20 miles an hour.

There is a 20-mile limit at Saskatoon, with greater leniency in outlying sections.

At Moose Jaw the limit is 25 miles with the exception of some residential areas where 20 miles is the limit.

There is no speed limit at Winnipeg and one at Edmonton. Drivers must use caution The Vancouver by-law amounts to about the same thing and Calgary has no definite limit.

In a large number of Ontario cities the limit is 20 miles an hour.

Prairie Pals Anthem Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the quick remedy that will give relief, though for thirteen years he had sought other remedies. Years of severe suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Medical Failure Also Sentenced

Two men sentenced to five years imprisonment each in New Westminster, B.C., have been identified as the international swindlers who posed as eye specialists and obtained hundreds of dollars from Mainlanders, county farmers for fake treatments. The men are William Wallace Anderson and James Henry Howard.

Twenty years ago, it took a month to construct a mile of concrete road; today modern machinery can produce a 1,000 foot strip in a working day.

Gold Output Shows Decline

Production Of Gold During October Amounted To 238,397 Ounces

Production of gold in Canada during October amounted to 238,397 ounces, which is the equivalent of $4,927,663 There is a slight decline ounces, or $4,965,305. It is, however, from the September total of $40,232 an increase of 27.8 per cent. over the output of October, 1930.

During October, 1931, Ontario mines produced 181,671 ounces made up of 95,500 ounces from Kirkland Lake, 50,156 ounces from the Porcupine area, and 5,723 ounces from other sources. The return (less exchange) to Ontario operators for gold produced was $3,756,807 in October. Barry-Hollinger, Canusurium, Howey, Lake Shore, Minto, Parkhill, Teck-Hughes, Vipond, and Wright-Hargreaves reported increased production during the month.

Quebec operations yielded 39,793 ounces as against 36,693 ounces in September; British Columbia production totalled 14,739 ounces; Manitoba, 9,476 ounces, while the Yukon and Nova Scotian produced the remainder.

The Canadian output during the first ten months of the current year totalled 2,000,000 ounces, or about 30.7 per cent. above the total for the same period in 1930.

Pensions Are Nine Pressure

About 200 Canadian war veterans who in 1930 committed their pensions up to 10 per cent. receiving grants up to $1,000, have by new regulations obtained fresh medical examination and in some cases drafts representing arrears from date of commutation, which in some instances totals $1,800. To some men this is a godsend as they were in dire straits.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas' Eclectric Oil. Its healing power is well-known in every section of the country. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

ZIG-ZAG CIGARETTE PAPERS 5¢ 120 LEAVES

Little Helps For This Week

"Surely hour we that we dwell in time, and life in us, because He hath given us of His Spirit." —John iv 13. Alone with Thee, my God! alone with Thee!
Then world of Thee have it still, thou let it be;
Then it is a secret chamber in each mind
Which none can find
But His who made it; none beside can know
The joy or woe.
Oft may I enter it, oppressed by care,
And find Thee there;
So full of watchful love, Thou never canst be still
Or every sigh,
Then all Thy righteous dealings shall be done
Alone with Thee, my God! alone with Thee!
—Littell's Living Age.

Only in the sureness of personal communion with God may we find the secret-hiding God. The strength of resolve, which afterwards shapes life and means itself with action, is the fruit of these secret, solitary moments when we meet God alone.
—Frederick William Robertson.

Costiveness Dies

Mrs. Marshall Brooks, Of Launceston View, Writes Enthusiastically About Dr. Thomas' Eclectric Oil

Ottawa had a centenarian in the death of Mrs. Mary Ann Brooks, of Launceston View. Mrs. Brooks celebrated her 101st birthday anniversary on July 19 last. Until almost a month ago, when she began to fail, she continued bright and cheerful and clear-headed, with an excellent memory.

At the family gathering last July, at the Launceston View home, in honor of her 101st birthday anniversary, 60 descendants and relatives attended.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist.

Captain—"If I let you use our carpets will you try to identify the man who snatched your purse?"

Irate Woman—"I should say I would. I'll point out at least one or two who might have done it."

Nerves on edge. A head that throbs. You can't stop work, but you can stop the pain—in a hurry. Aspirin will do it every time. Take two or three tablets, a swallow of water, and you're soon comfortable. Then a short rest, and away start the action of Aspirin. You will always get complete relief when you take these tablets.

These tablets should be in every shop, office, and home. Ready to relieve any sudden ache or pain. Even an aching tooth is bothersome. Don't suffer with that neuralgia, neuritis, rheumatism, etc.; or lose any time because of colds or sore throat. Get some Aspirin and just follow those proper directions for instant relief.

Aspirin tablets cost very little. You'll probably find you buy them by the bottle. Any doctor will tell you they are harmless. They don't hurt the heart. They don't upset the stomach. So take them as often as you have the least need of their quick comfort. Take enough for complete results. On sale at drug stores everywhere. Made in Canada.

POLICE COURT ITEMS

George Pashniak and Nick Krevchuk appeared before Magistrate Ritchie on the 31st of December and were sentenced to two months imprisonment with hard labor on the charge of theft. It appears they had helped themselves to a necklace and cash during a store fire at Haley Hill last November. Inspector W. J. Ward of the Provincial Fire Commissioner's Department prosecuted.

BORN

Born to Mr. and Mrs. A. Wenman of Fort Saskatchewan on Tuesday, January 5th at the General Hospital Edmonton, a daughter.

Born to Mr. and Mrs. George Stanley on December 17th., at Mrs. F. G. Stanley's Nursing Home. A daughter.

LOCAL NEWS

The ladies aid of the United Church will meet at the home of Mrs. Ramsay on Thursday, January 7th., at 3:30 o'clock.

With weather cold enough for first class ice on both curling and skating rinks and not too cold to enjoy, many people are soon taking advantage of the outdoor sports.

During the past three weeks, a free coupon has appeared in the Empress Theatre advertisement in the Record. This coupon and 25 cents will admit two persons into the show Friday or Saturday night.

The Fort Saskatchewan Women's Institute will hold the regular monthly meeting on Thursday, January 14th, at 3 o'clock at the home of Mrs. Ramsay.

"The East re-visited", will be the topic of the day. A good attendance is requested. Everybody welcome.

The Record during the past week, has gained three new subscribers and one on the week before.

To our knowledge these new readers have not taken the local newspaper for a number of years.

That's not a bad start for 1932.

A new saloon has found its way into the Record this week and we hope everyone will enjoy the little items from week to week.

The Canadian Bank is very quiet these days. The operators are dividing their time between games of bridge and sleepy billiard.

We are pleased to see Mr. Fleming of the United Grain Growers back on the job again, after a sickness of two weeks.

Bill Anderson is busy figuring out his curling problems, for his events begin tomorrow.

Boris Hudson is on the go these days looking after the donations for the Oddfellows relief fund.

Since running this free coupon in the paper, Mr. Cranston has tripled his cost sales and to the course looks for a much larger crowd.

The new sign which the local newspaper has helped to increase business by the advertising in its columns.

Here and There

A new railway record, and a different one, was established recently when John Canoe, called at the Vancouver office of the Canadian Pacific Railway for his birthday pay cheque. Mr. Canoe has 60 years service to his credit.

Canada's gold production in September hit a new record, being 240,222 ounces, as compared with 228,630 produced in August and 170,291 ounces in September 1931. The Dominion has been a gold-producing country for more than 70 years

And now the eyes of the world are focussed on that greatest of all travellers, Santa Claus, who seems to have mastered transportation and financial problems once more. Just a good old Christmas custom!

One can visualize thousands of pairs of skis being made now that the ice once is here to stay. Then it will be a "Ski-sound" for Lake Sand, Field or Riverbanks, or anywhere where there is a real good hill.

And, speaking of Quebec, Jack Sheahan, who won an issue in Lacerte-in-Quebec last winter, is back at the Chateau Frontenac, Quebec, as winter sports director, once more, with a lot of good ideas and a smart staff of instructors. Jack a well known throughout Canada. Incidentally he's a fine performer at the piano

Pacific Coast ports, and indeed shipping circles throughout Canada, are mourning the passing of Captain James W. Troup, 74, a well known citizen of Portland, Ore., pioneer in construction of ships and for 50 years manager of the B.C. coastal service of the Canadian Pacific Railway

Sino-Japanese war reports are causing more sympathetic to be manifested than is popularly imagined. Chin Chun, for example is almost as entertaining to its many readers as the 20 to succeeding stories the comic "Chu" during the days of 1914-1918. Boom. It's the only one we've got.'

The Regina Rough Riders are a result rule from M.A.A.A., although they earned a whole lot of applause. The Montreal team found them just about the same as the Hamilton, whom they had slimmed into 21 to 0 a week before the Regina Rough Riders to the tune of 29 and, so to speak!

SIMPLE GERMAN REMEDY FOR STOMACH TROUBLE

The simple German remedy, Adlerika, reaches the UPPER bowel, removing sour poisons which cause stomach trouble. One dose stops gas coming. F. Smith, Druggist.

IN MEMORIAM

In fond remembrance of Joel Oshalakiuse, who died Jan. 5, 1930.
No one knows how much we miss you,

No one knows the bitter pain,
We have suffered since we lost you,
Life has never been the same.
In our hearts your memory lingers,
Sweetly, tender, fond and true,
There is not a day, dear one
That we do not think of you.
Ever remembered by his loving wife and children.

Further donations for the relief sponsored by the Oddfellows.

HOCKEY

The Fort Junior Hockey team motored to Bruderheim where they played a junior team of that town on New Years Day. The locals were out of their best and trounced the home team to the tune of 7-2.

The Fort Saskatchewan Senior Hockey Club held a dance in the memorial hall on New Years eve.

The dance was well patronized and the boys made a few dollars that will help out down the expenses of the club.

Here's a Little Story for Retailers

A YOUNG tailor complained bitterly about his poor business. "I make just as good clothes as — — — do," he said, "and I sell them for less, yet ———'s get most of the business of this district."

—This young tailor felt that one ought to find out about him—that they should search him out. He didn't see that it was his job to make known to all men the fact that he made good clothes and sold them at attractive prices. ———'s, on the other hand, advertised their business, and, of course, men went to them for their clothes.

It's the same all the world over—buyers go where they are invited to go. They buy, in largest numbers, from those who give them information about their business, service, goods, prices. This is exactly as it should be.

Why shouldn't the most aggressive seller get most business?

The world likes to buy from keen sellers—from retailers who pay them the compliment of telling them about what they have to sell and about their desire for their custom.

Dumb retailers may be fine men, may give good values, may be first-class store keepers, but the buying public prefers to go where advertisements in their newspapers direct them to go.

The wise retailer runs his business in line with what buyers want, because it is profitable to do so.

It made a retailer far more MONEY to advertise than to advertise.

Fort Saskatchewan Record

VOL. 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, Jan. 13th 1932 $1.50 PER YEAR IN ADVANCE

What Was Done At The Council Meeting

A regular meeting of the Town Council was held last Thursday night. Present Mayor Montgomery, Councillors Simmons, Gauf, Lobreck, Smith and J. Rod Graham.

The minutes of the last regular meeting held on 17th. December were read and adopted.

The following accounts were passed for payment The Record $1.50, J. Lorens for Coal $46.80, A. M. Carcaiden 15 Sundary Bushels $46.25.

It was reported to the Council that there were 9 cases of Mumps in the Town at present, and that the Medical Health Officer, Dr. Henry, had placed the different homes under Modified quarantine.

In connection with previous correspondence with the C. N. R., regarding Government St., Crossing, a further letter from the General Sup't. was received and read to the Council in which he says that while his investigation is not complete, he would like in the meantime that an appeal be made to the children and their parents that children and others desist from the practice of crawling through and underneath cars.

A resolution was passed by the Council to the effect that all property owners with general taxes one year in arrears, and Business taxes one year in arrears, shall be required to insure their buildings, and assign said insurance to the Town, as a protective measure to the Town until such taxes are liquidated.

Dog tax for the year 1932 may now be had at the Town Hall. It is hoped that Dog owners will see their license for their animals are taken out at once.

The Annual Meeting of the Electors of the Town of Fort Saskatchewan will be held in the Town hall on Friday the 29th. Instant at Eight o'clock p.m.

The meeting adjourned on the motion of Councillor Simmons.

WEDDING BELLS

STRETTON—WALKER

A quiet wedding took place at the Mount Hill United Church on Monday, December 28, 1931, when Lola Isabella, eldest daughter of Mr. Joseph Franklin Etherton of Fort Saskatchewan, became the bride of Fredrick Henry the third son of Mr. and Mrs. Fredrick Walker of Thorhild, Alberta.

Rev. J. Smith of Radway and Thorhild performed the ceremony in the presence of a few relatives and friends.

The bride look charming in a gown of powder blue crepe and was attended by the bridegroom's sister Miss Vera E. Walker and Mr. John M. Etherton of Thorhild, uncle of the bride acted as best man.

Mr. and Mrs. Fred. H. Walker were the recipients of many useful gifts which show in part the high esteem in which both bride and groom are held by a host of friends.

Mr. and Mrs. Fred. H. Walker will reside on the groom's farm at Thorhild, Alberta.

Fort Ladies Curling Club Hold Business Meeting

A meeting of the Fort Saskatchewan Ladies Curling Club was held in the rink on Friday afternoon January 8th, following the playing of friendly games. Mrs. Ardley in the chair.

The minutes of the last meeting were read and adopted on the motion by Mrs. Hallam and seconded by Mrs. Fray were carried.

Owing to the small number present at the first meeting of the season, it was decided to draw up new rinks. Some discussion followed as to how to choose them. Moved by Mrs. Von Iffland that names of ladies, seconds and first be put in a hat and skips draw. Moved by Mrs Lane seconded by Mrs. Becker that numbers be drawn for and No. 1 choose first and so on.

Following skips were then chosen. Skips—Mrs. Ardley; Mrs. Wright; Mrs. Von Iffland; Mrs. Flintoff; and Miss Simmons. Thirds—Mrs. Hallam; Mrs. Mohr; Mrs. Becker; Mrs. Lane; Mrs. Fray. Seconds—Mrs. McNaughton; Mrs. Thomas; Mrs. Hager; Mrs. Dennis; Mrs. Ketterborn. First—Miss Oxley; Mrs. Butler; Miss Gauf; Mrs Thomas and Mrs. Edwards.

The subject of affiliation fees to the Northern Alberta Ladies Curling Association was discussed and Secretary was asked to write to Mrs. Brock about it before sending the fees.

Donations for friendly games were and Town Commissioner" and "Edmonton" rinks and the skips were asked to consider them and if they found a way to take a rink to let the Secretary know in time to accept the invitations.

It was decided to keep on with Wednesday and Friday as curling days and 2:30 as time for starting, and make the Saturday evening regular.

The following rinks are to be in the hall here for friendly games.

Leaders two rinks for Saturday evening, January 16th.

Granite one rink and Scona one rink for Friday, January 15th.

Royal one rink, Edmonton one rink.

Thistle one rink and North Edmonton one with dates not decided upon.

Moved by Mrs. Ketterborn seconded by Mrs. Lane that names of paid members be put on a board.

Moved by Mrs. Wright seconded by Mrs. Von Iffland that the meeting adjourn.

The following are the officers of the Ladies Curling Club for the 1932 season.

President—Mrs. Ardley.
Vic.-Pres.—Mrs. Wright.
Sec.Treas.—Mrs. Thoma.
Entertainment committee— Miss Simmons, Mrs. Von Iffland, Mrs. Becker.

ARRANGEMENTS COMPLETE FOR UNIVERSITY EXTENSION COURSES

Details of the program for the Annual University Short Course for farm men and women have been completed and programs are in the mail. Judging by the number of inquiries received at the office attendance will be well up to that of last year. Livestock men from all over the province are expected to be in attendance at the meetings of the four Provincial Livestock Breeder's Association meetings which are being held at the University during short course week.

Arrangements have been made to keep the cost of attending the Short Course down to a minimum. Lunch can be obtained in the Normal School cafeteria for 25c while dinner at night will not exceed 35c. For those desiring accommodation for the night in private homes, arrangements can be made through the Extension office.

The dates are January 25th to 29th and a special invitation is extended to everyone interested in agricultural problems to attend.

Local Oddfellows Elect Officers for 1932

On the evening of January 6th., 1932, the officers and members of Fort Lodge No. 14 I. O. O. F., held their installation of officers for the year 1932.

Three well-known members of Lodge No. 36 Edmonton, were present, Bro. D. Wilson, Bro. Robinson and Bro. Sadden, who assisted in the ceremony.

The following are the names of members appointed to offices:—

N. G.—E. Flintoff
V. G.—A. Gibson
Sec.-Sec.—T. Todd
Fin.-Sec.—C. R. W Magor
Treas.—G Frey
Warden—E. Chesbrok
Conductor—Dr. Mason
Chaplain—L. Thomas
R. S. S.—G. Mohr
L. S. S.—E. Hennig
R. S. N. G.—D. Ayles
L. S. N. G.—N Palmer
I. G.—D. Buchanan
O. G.—C. Hager
R. S. V. G.—P. Shaw
L. S. V. G.—S. Thomas

After the installation, Noble Grand Bro. E. Flintoff spoke a few words of thanks to the members on his being appointed to the chair.

At the close of the Lodge an hour was given to the enjoyment of an appetizing lunch.

Curling News

On Saturday night two rinks motored to Westlock in quest of the Ash Cup. The locals lost out on the total score 24 to 31. The Westlock rinks entertained the locals to a splendid banquet after the games and they are to be congratulated for their hospitality.The curling stone. The results of the games were as follows.

Boyd (Westlock) 11 E. Graham13
Dr. Sands (Westlock) 20, J. Wright 11.

The personal of the local rinks were. J. Wright skip; Rev. Ramsay; L. Hodgins; A Simmons.
E. Graham skip. W. A. Graham; F. W. Smith; Jas Graham.

The new rinks are as follows:—

L. Hodgins, Skip; A. Simmons, E. Hodgins; A Mann.
H. Thoma, Skip; H. Dennis; W. McCalls; S. Thoma.
W. Anderson skip; M. Stackhouse; E. Hallam; M. Fields.
F. W. Smith; F. E. Murray; S. Hornby; J. Westover.
R. Pocock skip; F. A. Moore; H. Curtis; G. Robertson.
J. Graham skip; R. Stanley; J. Latour; Alf. Gibson.
W. A. Graham skip; R. M. Ray; F. Collins; J. Wells.
E. Graham skip; I. Haines; H. Roberts; T. Todd.
A. M. Carcaiden skip; C. Ashton; H. Ardley; R. Adamson.
J. S. Wright skip; M. Barnett; R. S. Carroll; G. Sadler.
Rev. Ramsay skip; K. Horne; E. H. Anderson; Ex. Hooper.
A. H. Gibson, rover.

A meeting of the Curling Club was held Tuesday night for the purpose of redrawing rinks. An extra rink has been added bringing the total to eleven rinks. The new draw will be a double knockout competition for the Walker Cup with first and second prizes. All curlers are urgently requested to watch the draws and if unable to curl when drawn to notify their skips early. Please give this matter your close attention. A list of the new rinks appear in this column.

Saturday night a rink from Lamont is coming up to play for the new Carnandien cup.

Rev. G. Hear of Edmonton, will preach at the Josephburg Redwood Church on Sunday, Jan. 17., Rev. Waldenrath will preach in Edmonton at Rev. Hear's Church for the Sunday.

PROGRESS!

"If you want to retain that school girl complexion, said coloma," cancelled the Onion Growers of Canada at a recent conference in Windsor, Ont. "Onions don't tear you down socially, they build you up physically" will be the theme song of the second annual "onion week" which will be held the last week of January. Ontario's premier producing districts of Kent and Essex rusted 1300 carloads of the

Disarmament.—Or War?

In the month of February, 1932, there will be convened a great conference of all nations to deliberate upon the problem of how to bring about mutual disarmament. It will be one of the most representative conferences ever held, while its decisions will be of the most momentous character, fraught with tremendous good or ill for all peoples.

A cynic may be inclined to inquire as to the necessity for a disarmament conference in view of the fact that in 1914-1918 a great war was fought with the declared object of ending all further war. The nations which covered that to be their object won that war. Having won, why the continued necessity for huge armaments; why the necessity for a solemn conclave of the nations to endeavour to bring about disarmament?

The truth is: War will never be ended by war. The Great War 1914-1918 was not the first one to be fought to prevent future war. It was not the world's Sir James Brunton Colwell, an eminent student of the history and customs of the South of France, of how the Duc de Puyrange in the year 1697 endeavored his ten-year-old son in these words:

"Now that we have almost reached the eighteenth century, and all the nations have signed that treaty of Ryswick to prevent there ever being any more wars, and people are riding about peaceably in sedan chairs, and are living in America," etc., etc.

Yet how many wars have been fought since 1697 although even then there was a treaty signed by "all" nations to prevent war?

Following the Great War 1914-1918, the nations set up a League of Nations having as its main purpose the prevention of war. Notwithstanding that two of the greatest nations in the world refused to become members of the League, it has accomplished much, but not enough. Then followed the treaty of Locarno, the Washington conference which achieved a measure of limitation of naval armaments, and finally the Kellogg Peace Pact, signed by practically every nation, declaring war an outlaw and solemnly pledging themselves, each to the other, never to resort to war as an instrument of national policy against any other nation.

And yet, the nations continue to be armed camps. The so-called peacetime armies of today out-number those maintained prior to 1914. War instruments and machines of destruction and horror of suffering previously unequalled in man's imagination.

At a time when millions of men are out of productive employment, when need and suffering stalks through Europe, when nations are facing when practically every nation is plunging deeper and deeper into debt, billions of dollars are being spent annually to increase and strengthen those huge war machines. War is it the semi-civilized, the least intelligent, the non-Christian nations which are the leaders in these insane and criminal acts, thus forcing civilized and Christian people to prepare to defend themselves. No, it is the nations which boast of their higher civilization and call themselves Christians who are setting the pace in preparing for another war.

Soviet Russia, which claims it is setting an example to the whole world in the development of a new order, a better way in which mankind should live, is one of the worst offenders, with its government compelling the people to leave all the arts of war hand in hand with the arts of peace. The United States, for removed and immune from the century old suspicions, animosities and hatreds of Europe, and safe from danger, is one of the most astounding a huge navy and in the maintenance of a huge standing army. France remains armed to the teeth, with Italy a close second. Great Britain has gone further than any nation in reducing armaments, and is prepared to go much further, prepared to go the limit in fact, if other countries will also do likewise.

The hope of the world lies in the success of the forthcoming disarmament conference. War will not end war; rather each war but precipitates another. Disarmament alone will prevent war; it is the sole preventive measure, and in this case prevention alone will provide the cure. Give a boy a rifle and he will not be happy or contented until he uses it. Give a nation a huge army, a powerful navy, airships and submarines, and an urge to fight follows the day, it will, sooner or later, make use of them.

The hope, the prayer, every sincere desire of every such and every individual should be directed to making the forthcoming conference a success, wholly and completely so. Then, indeed, will a new day dawn for all nations and peoples.

Of Interest Topically

Premier Renkin, of Belgium, announced that he intended to introduce one of the greatest powers conferred by the government to increase tariffs and regulate imports. Announcement was interpreted in political circles as foreshadowing imminent defensive measures against protectionist repressions of other countries as a temporary policy.

"Do Fish Have Sleep?" asks a scientific article. Well they ought to with all the free river, lake, and ocean beds.—Ernst Erwin Messenger.

Too Many Middlemen

If the United States took are discouraged to the Canadian cause, and the country's business, the men import raw materials from abroad through agencies in that country? There are too many middlemen getting their "wrench" before the ultimate consumer receives his goods. In addressing a meeting this business the minister of trade and commerce is on the right track.—Toronto Globe.

A yield of 73 bushels of Garnet wheat to an acre was obtained on a small area near Edmonton, Alberta.

Sharp Pains in His Heart Nerves in Bad Condition

Mr. Paul J. Chan, Thunder Bay, Ont., writes:—"I have used Milburn's Heart and Nerve Pills with wonderful results.

My heart would beat so fast I would have to sit down when I was working. I would have sharp pains in my left side when I would lie down at night.

My nerves were also in a very bad condition, I was always tired, and had no ambition to do anything. After I had taken two boxes of Milburn's Heart and Nerve Pills I felt like a new person and have never had any trouble since I have used them."

Price 50c a box

Hunt Full Liars

Chairman Jennings From United States Looked Reverently Enough

Is many United States citizens for got to add an extra one cent stamp to the envelopes bearing their Christmas cards this season that no less than 732,000 letters from across the border arrived short paid in Toronto during the holiday rush.

To avoid a recurrence of the difficulty, Toronto authorities stated recently, Ottawa is making a request to Washington postal administration to make better known the fact that it takes three cents to carry a letter from the United States to Canada.

3 MONTHS OFF WITH NEURITIS

"I suffered awful pain for two years with Neuritis and Sciatica, and was off work for three months. Nothing I took or trying everything I could think of, without getting any benefit. I was advised a bottle of Kruschen Salts. After my second bottle, I started feeling again, and I am very glad to tell you I am still working, and I am getting better from day to day, whatever."—E. H.

The pains of Neuritis and Sciatica are a symptom of deeper trouble—the poisons resulting from constipation, gout and lumbago. They are a sign of an impure blood-stream. They show that poisonous matter is kept into the blood. Kruschen is a combination of six mineral salts, which gently but surely flush and purify the whole system, and help to keep you by. Dose—one pint hastily mixed with the water before the sun.

Seventy Men Start To Work

The Canadian branch of the General Motors of Canada, Ltd., has re-called 1,500 of its employees to work during the month of December, and indications are conditions have helped in restoring the pay roll to a nearly normal condition.

Frontier Notes

Frontier Notes is a true elixir of youth. Refreshes and rejuvenates. Adds a delightful charm to the complexion. Softens and beautifies the skin. Makes it velvety smooth. Indispensable to the woman who appreciates the finer things of life. Delightful to use. Delicately fragrant. Soothing, cool and brilliant skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

How Many?

"Now, boys," said the school teacher, "is there any question you would like to ask me about long measure before I pass on to the next class?"

"You, sir," said Jimmy Brown, "how many policemen's feet does it take to make a Scotland Yard?"

Asthma Doesn't Worry Old Timer.

Do not allow the terrible suffering of asthma to wear away by Hoof. While you may have the disease it is merely gathering a stronger foothold and you live in danger of stronger and more stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent prolonged conditions from becoming chronic and saves hours of awful suffering.

Before the advent of the white man, Indian corn was made from native grass.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can cause in-jury after it has been killed. They also correct the unhealthy conditions in the digestive organs that invite and encourage worms, setting up reactions that are most hostile to the growth of the child. They have attested their power in hundreds of cases and in all these are thoroughly trustworthy.

An evening school started a course in plumbing, and after the first lesson the class forgot to attend.

Dougias' Egyptian Liniment, always quick, always certain. Stops shooting pains, Cramps, Wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Why is that a big heart and a big pocket book seldom travel for together?

No child should be allowed to suffer an hour from worms when prompt relief can be had in a thoroughly old strong remedy—Mother Graves' Worm Exterminator.

Bloom spiders lay as many as 60 eggs at a time, carefully enclosing them in a bag of silk.

Big Hydro Developments

Hydro-Electric Installations In Canada During 1931 Greatly Increased

New hydro-electric installations brought into operation in 1931 total 566,050 horse-power, and capital to the extent of $110,000,000 is estimated to have been expended in providing for that development, according to a review of hydro activities in Canada for the past year, issued by Hon. T. G. Murphy, Minister of the Interior. The amount increased Canada's hydro-electric development by 6 per cent. horse-power, allowing for several replacements of old by new turbines.

Additional to these construction items are some coming the year in a number of projects, and it is expected there will also be 1,000 horse-power development in the Dominion Parks, and some hydro-electric water-power development in the next two or three years. More than $200,000,000 will be required to bring these projects to completion.

Quebec led the Dominion in new installations with 363,300 horse-power. Ontario followed with 100,000 horse-power; British Columbia, 39,300 horse-power; Manitoba, 79,000 horse-power; Ontario, 14,000 horse-power; and Nova Scotia, 1,640 horse-power. Large undertakings are at present being constructed in Quebec, Ontario and British Columbia.

The various developments include: British Columbia — Powell River Co., 74,000 horse-power on the Lois River; Ashcroft Water, Electric and Improvement Co. 600 horse-power on the Thompson River; the West Kootenay Power and Light Co., 87,000 horse-power at Cuves Lake; the Bridge River Power Co., 85,000 horse-power.

Manitoba. North Western Power Co., three 37,500 horse-power units at Seven Sisters Falls; City of Winnipeg, two 12,000 horse-power units at Slave Falls.

Sons Of Mexican President

Give Representation Of Canada To Princess When Qu'Appelle Visit Next Week

Impressions of Canadian business conditions, the hospitality of Canada's people and the rigors of an early winter in Montreal were brought to New York recently by the two sons of President Cirilo Rubio of Mexico. Fernando Ortiz Rubio and his brother, Guillermo, were guests of friends in New York during the holiday season. They are students at McGill University, Montreal. Fernando taking a course in civil engineering and Guillermo studying commerce.

Speaking fluent English, the brothers said they had formed many of their impressions since entering McGill three months ago.

To the keen, analytic mind of Fernando, the great Hennbronnic power project was of paramount importance.

Gold Producing Provinces

Five provinces and the Yukon produced gold in 1930 as follows: Nova Scotia, 1,573 fine ounces; Quebec, 161,747 fine ounces; Ontario, 1,736,012 fine ounces; Manitoba, 36,109 fine ounces; British Columbia, 164,231 fine ounces, and the Yukon, 20,817 fine ounces.

Half of the world's tin production. It is said, is consumed in the United States, and by the appearance of some residents in summer the figure may be conservative.—Christian Science Monitor.

"I enjoyed the seaside, but the food was awful."

"Why didn't you change your lodgings?"

"There was no point in that, my wife insisted on doing the cooking."—Dorfbrieter, Berlin.

New Use For Electric Eye

Enters Problem Connected With Age Old Specimens At Gibbons

The electric eye has been enlisted to detect all sorts of things, from flaws in steel to poisonous vapor, but the National Museum of Canada has found a new use for it in classifying scientific specimens on which information is incomplete.

Museum officials first conceived the idea of using the electric eye when they were confronted with the task of classifying and cataloguing thousands of psychiatric drawings in pigments which they acquired from the Kiergegaard collections of the late Dr. Ali Yd. Jaw, famous head of the Canadian School of Pre-history in Florence.

Dr. Ami died before he could complete his cataloguing and his descriptive work was lost. The archaeologists of the museum have set within reach of 600 horse-power coal boilers and other implements they know what the implements were, but had no way of telling what part of Europe they came from.

It occurred to them that chemical analysis of the articles would lead to the proper geographical region to be hunted. But they could not conduct regular chemical analysis without destroying the implements.

The electric eye solved the problem. Under its ultra-violet rays, invisible to the human eye, various chemicals have distinctive colors, indistinguishable in ordinary light. The archaeologists know in what years the specimens were found, and therefore they know what areas Dr. Ami had covered during those years. It remained only to match the chemical colors of the stone implements revealed by the electric eye with the known geology of the areas in which the dead savant had worked.

Preliminary experiments were marked by success, and, though the work is slow and complex, the archaeologists are salvaging by degrees information which otherwise would have been lost forever.

Tales Of Hot To Nogs

Saskatchewan Farmer Always Knows Where To Raise a Hundred Dollars

Not long ago a livestock truck pulled up to the unloading chute at one of the smaller abattoirs in Saskatchewan. The driver, a farmer of enormous girth who for some years has been making a comfortable living out of mixed farming near Prince Albert, climbed down and got a good beaten type hogs and called for the grader.

After having the load graded and weighed, the farmer asked to be given his cheque so as to do some shopping before leaving for home. The amount was slightly over one hundred dollars. As the farmer walked past the hogs on the way to the canteen's office the butcher's helper noticed that the dropped for a hot look and fiendly lifted his hat to them as he left the pen.

In a joking manner the buyer asked the farmer why he did it. The reply contains some food for thought.

"Well," said the farmer, "I have been farming in my district now for a good many years. All that time I have kept a few sows and fed some hogs, and whenever I was 'stuck' for a hundred dollars I could always go to my pig pen and get the money. Many of my neighbors feel that they would like to be better with hogs at the price they are, but they were would like to have the money I am just going to from year. I always will take off my hat to my hogs; they have helped me out of many a tight place, and I expect always to have some on my farm."

Wheels Of Time

Industry is mobilizing a number of metals and alloys in the chemical war on the waste of rust Chromium, copper, brass and other copper alloys and aluminum are substances whose industrial use, in part at least, has been augmented by the fight on rust. One of the major allies on the nonrust battlefront is nickel.

"Do you finally consented to teach your wife how to drive?"

"Yes, I need a new car anyhow."

Lions in captivity are said to live longer than those living in a wild state.

Unique Charitable Scheme

Shriners Gather Tinfoil To Make Saleable Goods On Holiday Trade

If your Christmas presents instead of nail-trays, book ends or bridges of metal it is quite possible that an old toothpaste tube or tinfoil from a package of cigarettes entered into their composition from the hoard of a Shriner in Toronto, Vancouver or Halifax.

In all parts of Canada, Shriners have for months past been saving up scraps of metal in furtherance of an unique charitable scheme. A foundry in Montreal has been busily engaged in melting down the metal and turning out various novelties suited to the Christmas trade. The money realized will go into a relief fund to establish a convalescent home in connection with the Shriners' Hospital for Crippled Children which contributed to the Shriners' hospital fund.

Canada In 1982 Hollow Path

Total collapse of the sun, such as that which will take place on August 31 next, always arouse very widespread interest both among the public at large and among professional astronomers, and the forthcoming one promises to be no exception to the rule. The Director of the Dominion Observatory, Department of the Interior, states that already preparations are in progress for two scientific expeditions from England which will part to locate somewhere in the belt of totality in Quebec; later there may of course be others.

So far this season, Joe Primeau, Toronto Maple Leafs' star forward, is the best play-making forward in the League. With almost half the season mark reached, Joe has fourteen assists to his credit, or two more than "Sonny" Smith of the Maroons. Primeau is twenty-five years old and weighs 153 pounds. He was the pivot man of the Maple Leafs' big line last season.

Important Discovery

McGill University Announces New Treatment For Infantile Paralysis

Announcement of a discovery of far-reaching importance in the treatment of infantile paralysis was made at McGill University simultaneously with the reading of a paper by Dr. Maurice Brodie, a member of the McGill Department of Bacteriology, at the annual meeting of the society of American Bacteriologists at Baltimore.

Dr. Brodie carrying out extensive research and experiment at McGill, has found in the blood of so-called normal adult individuals the same anti-bodies found in the blood of convalescing patients.

This discovery has led Dr. Brodie to the theory that practically every individual has been exposed to, at one time or another to the germs of infantile paralysis.

Serum has already been prepared from the blood of so-called normal adults and it is now practically assured that this serum has the same properties as serum made from convalescing patients and used in the treatment of infantile paralysis.

Scientist Receives Award

Succeeds In Making Nerve Grow So That All Its Secrets Are Visible

The annual $1,000 prize for an outstanding discovery was awarded by the American Association for the Advance of Science to Dr. Carl Cooper Speidel, of the University of Virginia.

He is the first scientist to make a nerve grow so that all its secrets are visible from its "birth" to maturity. Dr. Speidel cleared up the doubt about how nerve grown. Some scientists had held that it developed like a "chain," others that it grew from a single tiny cell. But no one had been able actually to see.

British Columbia Lumber Trade

May Be Big Factor In Bringing Back Prosperity To Province

That the lumber industry will play an important part and be one of the leaders in bringing Canada, and particularly British Columbia, out of the present industrial and economic depression, is the firm belief of British Columbia's lumbermen.

British Columbia isn't used to becoming more and more popular in England. The London recently counsel recently gave preference to Empire lumber, or both. Its new building ordinance and its maintenance regulations are based on "empire" wood. The new and population in the United Kingdom is also to give preference to Empire wood, and the Scotch Earl of Inverness is considering a similar plan of action.

In the past the Old Country has taken only the cream of British Columbia lumber, but an effort is being made to sell her more No. 2 and No. 3 stock, for construction and home framing.

Owing to the new trade agreements between Australia and British Columbia lumber is gaining favor in Australia. British Columbia's share of Australia's lumber trade is now 75 per cent., home lumber exports to Australia for the first nine months of the year compared with the corresponding period of 1930 show a substantial increase, all of which has been gained in the last three months. Lumber exports to Australia for July, August and September, 1931, were 20,164,000 board feet, while exports for the same period of 1930 were only 7,000,000 feet. This is a gain of 12,000,000 board feet.

Senior Columbia lumber is also being favored with favor in China. Although this year figures to date are lower than last year, they are close enough them up large to figures for the corresponding period of 1929.

Egypt this year purchased more four million feet of British Columbia lumber, which is about 50 per cent the 1930 figure. Last year no lumber was exported to this country.

Practically the whole supply of both cut and finished lumber has been used up.

Remarkably low prices at which lumber is now available will play an important part in the return to normalcy of the industry.

International Aerial Pageant

Planned By the League Of British Empire For Next Summer

An international aerial pageant, to bring planes from all sections of the world in competition, is planned by the Air League of the British Empire for mid-summer, but it is doubtful if Canada will be represented.

Preliminary plans, known at Ottawa, call for the pageant to be held at Heston aerodrome, near London, and for participation of both military and private planes, giving the manufacturers an opportunity to display their machines against the speedy aircraft developed in recent years.

Many factors combine to bar the Dominion from having representation at the great international meet. Distance is a barrier and the financing of planes and pilots for the long journey overseas is another formidable factor.

Question Of Drouth Conditions

Hon. Jos. E. Bryant Replies To Critics on Drought Commission

In considering the question of drought conditions in southern and south-western Saskatchewan, there is the tendency on the part of some parties, particularly those who have not studied the question carefully, to make light of the whole matter. These parties say "There is nothing to worry about, the climate has not changed in the last thousand or two thousand years. We have had good crops in the past, we will have good crops again, we cannot change the climate. Let us change our methods of tillage and everything will soon be alright." Some say we should cut out our summerfallow as it causes the land to drift; others say we should improve on our summerfallow methods and grow crop rotation. These suggestions are good so far as they go, and if we were assured of a normal rainfall, would be productive of excellent results. But if there is a continued lack of moisture in the subsoil, and if the rainfall continues to be below the normal, these suggestions will not be productive of the desired results. Most scientific experts along this line were made in the report of the "Commission on Water Purposes" in 1926, but many other ten years of trial of these various practices were without pursuit in the history of agriculture in Saskatchewan or in any nearby three million acres of what was once supposed to be the choicest wheat lands in the Province, an acreage of several one hundred of grain per acre was harvested.

There is evidence that the rainfall this autumn has been greater than for some years, and if we enter once again on a series of wet years, there will be a tendency on the part of many to forget the lessons of the present years and a reluctance to take steps to prevent a recurrence of similar conditions in the future. It is because I believe that conditions demand more than a change in tillage methods that I offer in this article a few ideas for the thoughtful consideration of the serious-minded farmers of southern Saskatchewan and for all those who have an interest in the future welfare of the Province.

Within the last month a farmer digging a well near Olds, Alberta, found a petrified branch of an apple tree with petrified apples on it. Figs and fig leaves as well as palm leaves of a tropical variety have been found in the deep formations of the bad lands of the Red Deer River in Alberta. Near Estevan in Southeastern Saskatchewan, many traces of forests and tropical vegetation and prehistoric reptiles, prehistoric bones and dinosaur bones have been found. During the Jurassic age the home of a prehistoric animal were unearthed not far from Bradenton. All this is evidence of the fact that in the dim forgotten past, climate conditions were very much warmer and moister than they are today over the southern portion of Alberta and Saskatchewan. The vegetation which existed in the vast deposits of lignite coal throughout southern Saskatchewan, could have grown only in a sub-tropical climate. Over all the area mentioned are great accumulations of fossils, of ice-worn boulders, of scratched rocks which have clearly been deposited by ice existing under polar conditions at some time subsequent to the existence of the apple tree, and the sub-tropical vegetation.

Some revolutionary force in nature created a crisis in the earth's history and brought about what have been called "The Ice Age." Geologists tell us that there have been at least four major ice ages in the history of North America, that the ice fields now in the Arctic gradually extended until they covered a great part of North America. Today in the washed out bottoms of ancient rivers and ravines, sub-tropical vegetation and the bones of prehistoric mammals and reptiles are being unearthed after they have been covered for thousands of years by earth deposits, boulders and gravel.

of brought down by the icefields as they pushed their way year by year from the North during countless centuries. The last glaciation of North America, known as the Wisconsin, began to retreat northwards from southern Saskatchewan and Alberta about twenty thousand years ago according to some of the best scientific authorities. Scientists do not yet know definitely the cause of these great climatic conditions, and we can and therefore be certain that the efforts of the world in our most encouraging great and extensive alterations. From the days of ancient Egypt there has been a belief that weather conditions run in cycles seven years with rain and short crops followed by seven fat years with abundant crops. Most scientific men do not agree with this another cycle and many explanations have been made to study rainfall records in their relation to sun-spots. The most famous of all attempts to foretell the character of weather over long periods was made by Sir Gilbert Walker of India. He brought together all available records of the variations in rainfall, heights of rivers, levels of lakes and other information connected with the fluctuations between dry and wet conditions, and after a study of a mass of evidence, he concluded that a variation of rainfall recurred in an average period of thirty-five years in Europe. By a similar method of calculation Mr. H. E. Hurst of Egypt has traced a period of nineteen years for the variation of the rainfall in Australia. Dr. Lockyer has confirmed this calculation and found that it applies to the Nile valley. Mr. Hurst says after careful study of the records agrees with the thirty-five year period in the case of South Africa.

Dr. Douglas has written that there is unquestionably a weather cycle of 35.4 years and it is stated that Brunhes' one hundred and fifty years of study that the weather cycles ranged in length from 30 to 40 years. Dr. Huntington in the Monthly Weather Review of March, 1925, says in a very interesting article entitled "Notes on Lake Levels" by James W. Schurman, who was Assistant Professor of Physics at the University of Wisconsin 1911-12, that in the light of present day records and further investigation he is inclined to say without pursuit in the history of agriculture in Saskatchewan or in any nearby three million acres of what was once supposed to be the choicest wheat lands in the Province, an acreage of several one hundred of grain per acre was harvested.

There is evidence that the rainfall this autumn has been greater than for some years, and if we enter once again on a series of wet years, there will be a tendency on the part of many to forget the lessons of the present years and a reluctance to take steps to prevent a recurrence of similar conditions in the future. It is because I believe that conditions demand more than a change in tillage methods that I offer in this article a few ideas for the thoughtful consideration of the serious-minded farmers of southern Saskatchewan and for all those who have an interest in the future welfare of the Province.

Today in the washed out bottoms of ancient rivers and ravines, sub-tropical vegetation and the bones of prehistoric mammals and reptiles are being unearthed after they have been covered for thousands of years by earth deposits, boulders and gravel.

"A regular succession of climatic cycles, lasting approximately thirty-five and forty years in duration, each resulting on the average something like three years of drought, and a succeeding aridity, has produced a series of alternating periods of migration and consolidation in Europe and Asia, whereby the effects are clearly traced between the years 2300 B.C. and 1900 A.D.

"Consequences very briefly that the records revealed that climate ran in cycles of roughly thirty-five to forty years. In around these hundred of these years, there was plenty of moisture, and the civilizations were built up, cities and towns were established and agriculture flourished. Then came a period of roughly three hundred years when the rain-fall gradually got less, and terminated in great droughts which drove the people out of the inhabited areas in the

AUDITORS' CERTIFICATE

We the undersigned, duly appointed Auditors of the Royal Bank of Canada, do hereby certify that we have audited the Books and Accounts of the Bank for the year ended 30th November, 1931, and have obtained all the information required. In our opinion the above Statement of Liabilities and Assets is drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the Books of the Bank. We have verified the cash and securities at Head Office at the close of the Bank's financial year and during the year have made frequent and unannounced inspections at several of the important branches.

We have obtained all the information and explanations that we have required, and in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank. The above statement is in agreement with the Returns from the Branches which we have not visited.

R. S. HOLT, Chairman.
H. V. MEREDITH, President.
Montreal, 20th December, 1931.

"I have been fortunate in being able to add to my data a long and detailed and entirely independent record for the climate of the world, such as the Annual Rings of the big trees of America, the Lake and historic records of Europe and China, the Levels of the Caspian, the Dead Sea and other lakes, and the Floods and low water stages of the Nile, and these have shown so good an agreement with each other and with evidence of solar activity as we possess, that I cannot but feel that the climatic fluctuations of the past are definitely real and demonstrate the dominant control of climate by solar changes or disturbing geographical changes."

According to Professor J. Barrell of Yale University, forests at one time extended over South Western Asia and Northern Africa, a well watered plain. Ultimately these forests gave place to desert conditions. In many places in Persia and Central Asia, where desert conditions now prevail, there are traces of ruined cities, filled fields, terraces and irrigation works, showing that the land once supported a large population. History tells us that at one time in Northern Africa, an army could march for days through the forest. Great cities of antiquity once flourished in North Africa, among these Palmyra, a desert city of great dimensions with great aqueducts. Today they are covered with the sand of the Syrian desert and the sands of the Sahara. Rome in the time of Julius Caesar recorded drought in this district occurred in 46 B.C. and again in 1660. There was a flood in 1567 after which came a series of droughts which corrupted by economist Smith which lasted until the close of the eighteenth century. The records of Constantinople a wet period centred about 1050 followed by a dry period during the eighteenth century which corresponded to the records from United States and Europe.

Ellsworth Huntington in his book on "Climate Through the Ages" Mr. C. E. P. Brooks states on page thirteen of his encouraging feature is the fact that the years 1921-22-23-24-25-26 in the last three there very dry years in succession. The years 1927-28-29 have passed we have again three dry years in succession. There is much drier than in the past. Are conditions such that the area is going to be permanently changed? Will not soon be until for grain growing? Are there any indications that we are entering in Saskatchewan upon one of the dry periods mentioned in climatic records in the past? Present conditions are satisfactory, especially to the farmers in the dried out area nor to the Government which cannot continue to supply relief over so large an area of the Province for any indefinite period. The situation must be faced. We cannot close our eyes to it and go on putting in crops, trusting to blind chance. It is time that our climatologist and meteorologist were directing every energy to solve the problem instead of merely making a record of weather data. They should be able to analyze the records in the light of past conditions and give our farmers some intelligent ideas on actual conditions.

In the last few hundred years there has been no major climatic change, but we have records that show at different periods in the past and has been responsible for the overthrow of ancient civilizations. During that period man has progressed in many directions. He has taken advantage of this long quiet period to accumulate knowledge. Has he gained sufficient knowledge to enable him to conquer Nature by the observation of the past? The drought in Saskatchewan constitutes one of the most serious problems facing the Provincial and the Federal Governments. At once what has given a great deal of serious thought to the questions assigned to the Commission on Conservation and Afforestation. I have come to the conclusion that the problem can be solved, provided that all the people in the area affected realize the seriousness of the situation and take united action in conformity with the laws of Nature.

STRONG STEPS TAKEN TO CURB UNREST IN INDIA

Storms In Europe

Herald and Theatre Are the Cause Of Many Deaths

London, England Storms from Portugal to Scandinavia and Russia in many parts of Europe caused many deaths, and damage for several ships.

The British steamer Jersey (136) set at urgent calls for help from a point near the Scilly Islands saying it was out of control with its machinery broken down. A wireless message with in the Thames estuary but the crew of three was saved.

The German steamer Antarktis grounded two miles south of the town of Langesnes Bay in the English Channel and later was refloated.

A violent southwester delayed departure of the liner Paris from Le Havre, France, three hours. A fishing boat sank in a fierce gale off the Breton coast but the crew of two was saved.

The wind had reached a force of 80 miles an hour in some parts of Great Britain Wednesday night and today 6 while the Scilly Islands were in the path of a hurricane. Trees were uprooted on whole villages and towns.

The authorities may make arrests, raids and searches without warrant, or order the detainment of persons without trial They may control public utility services, posts, telegraphs, railroads and steamships. They may search the right of confinement of property.

Banks, retail stores and insurance and shipping companies may be required to trade Nearly all Hindu stores, schools and colleges remained closed in mourning for the arrest of Mahatma Gandhi, the Nationalist leader

As it has become a penal offence for newspapers to print Nationalist programme or any notices that might be construed as inciting, the congress followers adopted the method of writing their announcements, with chalk in huge letters on sidewalks, sides of buildings and other prominent places.

Some damage to property has been employed by the Nationalists in many cities to parade the streets behind the congress flag and shout such slogans as "Boycott British Goods," "Gandhi's Government Is Here," and "Long Live the Revolution."

In his jail at Yeroda, Mahatma Gandhi continued to enjoy every courtesy, even having permitted contact with other Nationalist prisoners.

There were persistent rumors Gandhi and other leaders might be deported.

The Government may seize stocks of commodities from private citizens or corporations compensating them at a price fixed by the Government. The publication of false rumors may be punished by a year's imprisonment.

Bees For Britain

Bear Still Open For Bookable Class With a Little Capital

Saint John, N.B. — The district conference of Liberal settlement superintendents of the Maritime area with officials from Ottawa and Fredericton was in session here.

T. MacGindery, Ottawa, chairman of the Soldiers' Settlement Board of Canada, said the door was "still open to Britishers who come to Canada, with a little investment capital and work hard, and also to other desirables who may become charges upon the community."

Friends Of Soviet Union

Saskatoon, Sask.—The Farmers' Unity League stated recently that delegates sent by it to Russia would shortly leave on lecture tours of Saskatchewan and Alberta. Carl Aronson is to visit points in Northern Saskatchewan, L. P. McManus will appear in the south and Miss Florence Bower will tour Alberta. They have been addressing meetings in Eastern Canada under the auspices of the "Friends of the Soviet Union."

Police Wound Suspects

Vancouver, B.C.—Two alleged burglars were wounded by Vancouver police bullets on city streets and eight other suspects were arrested. Police believe the arrests will clear up a number of burglaries and house breakings reported in the downtown and west end districts in the past few weeks.

CRITICIZED BY PRESS

His Grace Cosmo Lang, Archbishop of Canterbury, who has been severely criticized by the British press for the form of prayer which he has authorized for use in England and when the Church of England will hold united intercessions services.

Mountie Has Narrow Escape

Pilot Misses Countryside Heart By Narrow Margin

Ashcroft, N.W.T. — Pilot Reid of Constable A. W. K. [illegible] M.P., by a retained torpedo [illegible] on the old Union Jack [illegible] the constable's heart by a [illegible] a medical examination of King has revealed. The injured man owed for by Dr. J. A. Urquhart in hospital is recovering.

Meanwhile a patrol headed by Inspector Rumsey is pressing forward its males to reach the Yukon trail ends to arrest John Johnson, who is believed to be the deserted man seen tampering with Indian trap lines and who is blamed for the shooting of the constable

The wounded officer was placed on a sleigh by his companions. Constable R. G. McDowell, and brought to Ashcroft.

Back To the Land

Montreal Que.— In the operation of its scheme for the return to the land of former farmers now living in the city and unemployed, the provincial department of colonization and placed 23,000 persons on the farm, or some 6,000 families during the year 1931, according to a statement of Hon. Hector Lafferte, Minister of Colonization and Fisheries

Appointed Deputy Governor

London, England — Sir George Ernest May a director of the British Linen Bank and well-known actuary, has been appointed Deputy Governor of the Hudson's Bay Company in succession to Sir Frederick Richmond, who has resigned.

Mail Pouch Disappears

Boston, Mass Postal authorities here were notified that a mail pouch containing $100,000 worth of cheques and securities which had been placed on a Boston-bound train in Lowell, had disappeared

For Imperial Trade

Australia Take Strong Stand For Trade Within Empire

Canberra Australia Through the medium of talking pictures Prime Minister Joseph Lyons declared the country's determination to extend trade for the fullest measure of Imperial preferential trade with Great Britain and her sister Dominions. The Government would earnestly strive to have a success of the forthcoming Imperial Economic Conference at Ottawa, he added.

Mr. Lyons also assured the members of the new United Party before the assembly. The session was the gathering of the cabinet to formally take office

Consideration of revised tariff schedules will be the first business of the new Australian Parliament when it assembles on February 17, it was announced after the first meeting of the new cabinet under the Prime Minister this afternoon

The first act of the United Party ministry was to re-appoint Charles Hedding to the board of directors of the Commonwealth Bank.

Churchill Delivers Address

Praises Premier Bennett As a Man Of Vision

Nassau Bahamas In his first public appearance since his recent accident in New York, Rt. Hon. Winston Churchill MP former Chancellor of the Exchequer was guest of honor here of the executive council, the legislative council and the House of Assembly of the Bahamas. His chief delivery the administrator, Hon. Charles Dundas, presided. Mr Churchill showed facial evidence of his injury but appeared in vigorous health.

"The Bahamas should be the garden of Canada Mr Churchill stated in a brief address in which he recommended the closest relations with the Dominion. He praised Rt. Hon. R. B. Bennett, Prime Minister of Canada as "a man of vision." The Empire will not fail to prove It is sound at heart and the workers of Britain have set themselves to keep it safe as of old," Mr. Churchill said

War On Bookmakers

Drastic Campaign Against Betting Anticipated In Winnipeg

Winnipeg, Man Winnipeg bookmakers are reported in for a hot time in the next few weeks. Following the arrest of two officials of the Provincial Treasury Department charged with embezzlement of more than $100,000 and statements from the accused that they had lost money in the city's race track gambling, provincial authorities are turning their attention to the activities of the bookies.

Police officials refuse to discuss the matter, but a drastic campaign against betting is anticipated.

Moslem Leader Dies

Lahore, India—Sir Muhammad Shafi, noted Moslem leader and delegate to the recent Indian Round Table Conference at London, England, died here at the age of 62.

DEBT ACCORD IS BEING SOUGHT BY THE BRITISH

London, England - Indications that the British Government was seeking to form a united front with the French for the international reparations conference to be held at Lausanne appeared at a meeting of a cabinet sub-committee

Contrary to expectations Viscount Snowden of Ickenshaw, former Chancellor of the Exchequer, whose stand for British interests at The Hague reparations conference in 1929 made him a national hero, attended the meeting of the sub-committee on reparations.

Sir Frederick Leith-Ross, British treasury expert, who has acted as a link between the British and French Governments in discussions preliminary to the Lausanne conference also attended.

Prime Minister Ramsay MacDonald and other ministers remained and prepared to leave for London partly to negotiate with France over a date for the Lausanne meeting. Talks are pressing for either January 16 or 30, while the French have proposed that the conference be delayed until January 25.

Japs Capture Port

Hostage Is Taken By Japanese Without Resistance

Mukden, Manchuria — The port of Hulutao, south of Chinchow on the Shih-Ai Railway, was occupied by Japanese troops without resistance, Chang Hsueh-Liang planned to turn into a great outlet for the products of Manchuria, he reported without resistance by the Japanese.

Japanese army headquarters explained the occupation was a part of the campaign to suppress banditry in South Manchuria and that the larger question of the port's future must depend on negotiations with the Mukden Government of Tsang Shih-Yi probably will be considered how to the equity of Chang Hsueh-Liang who was deposed as governor of Manchuria by Japanese troops.

Meanwhile larger industrial Japanese are urging that Hulutao be included in the Japanese-controlled communications system for all Manchuria.

Legislative Sittings

Saskatchewan House To Open On Thursday, February 4

Regina, Sask. The fourth session of the seventh legislature of Saskatchewan will open on Thursday, February 4, according to official word received from Premier J. T. M Anderson.

On the same date the legislature of Alberta will open, and also the House of Commons at Ottawa. In view of this popularity of February 4 as a meeting legislative day, it is considered likely that Manitoba's House will also convene on that day, though official word to that effect is as yet lacking.

Early Chicken Hatch

Seattle Six Main Out.—A hen belonging to Mrs. Robert Moreland of the Seattle has surpassed the feat of the Rhode Island hen reported to have hatched six chicks in the open a few days ago. This hen, a barred rock, hatched nine chickens under the back porch of her Aprenland home. The family is reported doing well.

Noted Aviator is Killed

Miami, Fla.—Dale (Red) Jackson, co-holder of the world's endurance aeroplane record, was killed when an Amphibian plane he was standing above the municipal airport fell approximately 2,000 feet to the ground.

Writer Hit By Truck

Clarison, Ont. Sidney H. Preston, well known author, was struck by a truck while turning in his car on to the Hamilton Highway here, and is lying in a critical condition with concussion of the brain.

Royalty At Sandringham

London, England.—The King and Queen are expected to remain at Sandringham, Norfolk, where they spent the Christmas holidays, until the end of this month.

SUNDAY SCHOOL LESSON

JANUARY 17

JESUS AND NICODEMUS

Golden Text: "God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish but have everlasting life."—John 3.16.

Lesson Text: John 3.1-21.

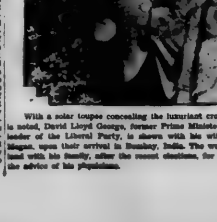
Devotional Reading: 1 John 5.1-5.

Explanations and Comments

The Necessity For the New Birth, verses 1-6.—Nicodemus was a very important man among the Jews. A Pharisee (a member of that sect which was most strict in the observance of the law and most hypocritical) and a ruler of the Jews, a member of the Sanhedrin, the council of seventy men who formed the Jewish Court of Justice (see John 7.45-52, 18.20-42. He was a cautious man, and apparently not wish to be seen visiting the new Rabbi, therefore he sought Jesus out at night. We are told in John 12.42 that some even of the Sanhedrin believed in Jesus, but dared not let this be known lest they be put out of the synagogue. Nicodemus' first words show that he was convinced that Jesus was a divinely-appointed teacher, but Jesus' answer (something unfathomable by his intellect) is not come to listen to the advice of his physicians.

With a solar topee concealing the luxuriant crop of hair for which he is noted, David Lloyd George, former Prime Minister of Great Britain and leader of the Liberal Party, is shown with his wife and their daughter, Megan, upon their arrival in Bombay, India. The wartime leader left Bombay with his family, after the recent elections, for a tour in the East, on the advice of his physicians.

"WELSH WIZARD" ON REST CRUISE



Scientists Have Hopes Of The Ultimate Development Of Radio Power Transmission

Scientists have high hopes for the ultimate development of radio power transmission. Even governments anticipate it. As fantastic as it may seem, other dreams of advancement in science have materialized after experts had discouraged their possibilities.

Lawrence M. Cockaday, New York University professor and noted radio engineer, told the Canadian Press "the boom systems of extremely short waves may yet open up the field of possibility and make feasible the transmission of larger powers along the airwave paths."

"In this eventuality," Mr. Cockaday continued, "power transmission could be used for great air carriers in flight. As well as steam locomotive shops and moving vehicles. Even in this day it is possible to control planes moving carriers by means of radio energy."

The latest development in the discovery of micro-waves, so small that they are only in centimetres in length. Micro-waves permit a high degree of efficiency at receiving stations.

Further, concentration of the radio "beam" in one direction, also a late development, means a higher efficiency of power at the receiving end. Mr. Cockaday has been conducting investigations into the concentration of beams.

The future can easily be imagined.

The initial source of energy would be huge power plants at natural water power developments. These developments would transmit power to various cities and community centres to be redistributed within their domains.

Each community would have a retransmitting station to distribute the energy categorically—domestic appliances, moving vehicles, etc.

The "beams" would be transmitted at various levels for different uses—one perhaps above house tops for domestic use, and another at a level where automobiles might pick up the power. To save loss of power, a receiving station at the far end of the city would pick up unused power, storing it for redistribution.

Applied in vessels at sea, the problem of obtaining fuel would no more trouble the captain. The cannon of the vessel might even be simplified, the power beam acting both as searcher and reverse-director. In the event of storms at sea, storage batteries would reserve enough energy to operate the vessel until it found the "beam" again.

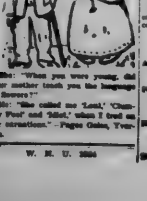
Railroads would be revolutionized, and waterpower might utilize the prefold advantage of the power "beam" as a source of heat and energy.

The Great Debt Shadow

If Germany defaults on her debts Great Britain is bound to follow. There is no use continuing this fiction of international debt and reparation payments. If we don't and it we may have social upheavals in which these reparations and international debts may go by the board.

Speaking of increased taxes, is it sporting to jump on an income when it's down?—New British Herald.

Irish barges are becoming so rare in Ireland that some were sold recently for $300 each.



Ella: "When you were young, did your mother teach you the language of flowers?"

Ila: "She called me 'Lou,' 'Chrysy Pou' and 'Idal,' when I had on her nerves."—Pages Gabs, Yorkton.

Infantile Paralysis

Now Cure Has Yet To Be Found By Any Physician

The medical profession, in United States at least, is still at a loss for facts concerning the cause or cure of infantile paralysis, it was agreed by physicians and scientists attending the health annual meeting here of the Association for Research in Nervous and Mental Disease.

From the convalescent serum, as generally advocated and administered during last summer's epidemic, is not yet proved effective; the most that can be said for it is that it does no harm, most physicians believe in administering it on the theory that it is better to give the patient the benefit of the doubt as to its value, or lack of value.

Decline In Educational Standard

President Of Dalhousie University Says He Noticed It Himself

"There has been a decline in Canadian educational standards during the past few years," declared Carleton W. Stanley, president of Dalhousie University, in a year-end interview on matters in general. "And this accounts in considerable measure for the lack of interest in public affairs that characterizes democracy that has developed her educational system in the past."

Dalhousie's new president hinted that the undisguised epidemic of subscribing to British universities, stressed by the last governor general, is partly responsible for the present lack of interest in Canada. A problem that is embarrassing if not the theory that it is better to give the patient the benefit of the doubt as to its value, or lack of value.

Monster Project To Impound Waters Of North Country To Alleviate Drouth Conditions

Bushing streams of Canada's broad northland may be put to work in the west country's efforts to halt the ravages of drouth most fearful destroyer of Canadian grain crops. Gigantic plans advanced for the consideration of two prairie governments involve formation of a huge inland lake deep into the size of the Great Lakes, and development of the west's greatest power project within 180 miles of Winnipeg.

Moisture would be added to the prairies' prevailing northwest wind by the proposed flooding of a monster basin in the Northwest Territories. Its Manitoba's 600,000 horsepower project.

Announced by Premier John Bracken, the province's Minister of Public Works, in his capacity as chairman of a provincial commission on conservation and afforestation.

"Such a lake would affect the country still unsettled, and that would involve no expense," reads Mr. Maguood's letter to the commission. "Water power in the Coppermine mineral region would be a source of revenue and the damming of the vast stretch of Cambrian shield mineral deposits would also be a reward. Such an inland lake would solve our drouth problems, for it would make moisture from the Pacific, at present filtered out of the winds by the ridge of the Rockies, and scatter it over the prairies."

Bacon Trade Poor

Big Drop In World Prices Is Given As Cause

The action of the Irish Free State Government in placing a protective tariff on bacon from which the various portions of the British Empire are exempt is taken at Ottawa as an encouraging gesture towards Empire trade. However, government experts are worried south through Lakes Superior and Manitoba, which parallel Lake Winnipeg on the west, and a powerful bond of water would be obtained on the Dauphin River, flowing from Lake Manitoba to Lake Winnipeg.

"It has been pointed out that the water-table on the Portage Plains would be higher if the lake levels were higher," Mr. Attwood explained. "Drought drying out in the south draw on the water-table, it is held that in the event of a long period without moisture this year the supply would be greatly reduced, and in most districts wells would be dry. Besides, higher levels are sought by fishermen, duck business and transport shippers."

Though no estimate has been made of the possible cost of the Brochon project, since full information is not available as yet, it is considered that the work would not involve a huge outlay. A dam would be constructed at Grand Rapids and possibly a canal to shorten the course of the Dauphin River where the power plant would be located, but few other works are at present considered necessary.

Shipment of western coal by barge down the Saskatchewan River, which flows from the Rocky Mountains, is one of the possibilities envisaged in the Brochon plan. Once on the Manitoban lakes, the barge coal would be routed by means of canals and locks to the Red River and thence directly to Winnipeg Enquiries regarding the project have been received at Winnipeg from governments of the other prairie provinces, from engineering firms and from municipal governments.

Rough details of the proposal to flood a great area in the northwest by damming the relatively narrow valleys of the north flowing Hoarhead and Coppermine Rivers have been outlined by C. T. Magwood, Herbert, Sask. They are in the hands of Hon. J. J. Bryant, Saskatchewan Minister of Public Works, in his capacity as chairman of a provincial commission on conservation and afforestation.

Such a lake would affect the country still unsettled, and that would involve no expense," reads Mr. Magwood's letter to the commission. "Water power in the Coppermine mineral region would be a source of revenue and the damming of the vast stretch of Cambrian shield mineral deposits would also be a reward. Such an inland lake would solve our drouth problems, for it would make moisture from the Pacific, at present filtered out of the winds by the ridge of the Rockies, and scatter it over the prairies."

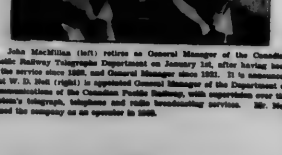
Control Of Trachoma

Regulations Expected To Be Inaugurated In Saskatchewan

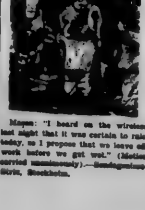
Special regulations covering the control and prevention of trachoma in Saskatchewan areas expected to be inaugurated in the near future, following approval of such action at a meeting of the provincial council on public health, held recently in the office of Dr. F. C. Middleton, Deputy Minister of Public Health at Regina.

Such regulations will be only part of wide changes to be made in regulations for the control and prevention of communicable diseases in the province. Present regulations, Dr. Middleton states, have not been revised since 1923.

NEW RAILWAY APPOINTMENTS



John MacMillan (left) retires as General Manager of the Canadian Pacific Railway Telegraphs Department on January 1st, after having been in the service since 1888, and General Manager since 1921. It is announced that W. D. Neil (right) is appointed General Manager of the Department of Communications of the Canadian Pacific Railway, with supervision over the system's telegraph, telephone and radio broadcasting services. Mr. Neil joined the company as an operator in 1909.



Mayor: "I heard on the wireless last night that it was certain to rain today, so I propose that we leave off work before we get wet." (Motion carried unanimously).—Sandringham Sports, Stockholm.

ACID STOMACH

Excess acid is the common cause of indigestion. It results in pain and soreness about two hours after eating. The cure is corrective in an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet six times as quick. You will never rely on crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal deodorizer for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior toothpaste that safeguards against reddmouth. (Made in Canada.)

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET PEDLER

Author Of
"The Splendid Folly," "The Mermaid Of The Mist," Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER X. Continued

Mastering their pace, she and Nick strolled up to the edge of the lake where Lady Latimer awaited them, and as he introduced the two women by each other it seemed as though the eyes of the woman on the bank asked testily, almost frightenedly: "Will you prove friend or foe?" Ann Jean's eyes, all soft and luminous after every real woman's in the presence of love, signalled back steadily: "Friend!"

"Claire!" said Nick. And Jean thought that no name could have suited her better.

She was the slenderest thing, with almost as far the pliant, delicate grace of a hereboll. Ash-blonde hair, so fair that in some lights it looked silver rather than gold, framed the charming Grecue face. Only it was not quite a Grecue, Jean reflected. There was too much character in it a sensitive gentle firmness, something curiously mild and patient in the closing of the curved lips, and a deeper up peal than that of mere wondering youth in the gentian-blue eyes. They were woman's eyes, eyes out of which no weeping could melt—and the sorrowfulness of some past or present sorrow.

"So you are one of the 'Charnwood Peterson?'" said Lady Latimer in her soft, gently voice. "You won't like me, I'm afraid" smiling "I'm living by your old home."

"I do, I shall quarrel with every one over that," put in Nick "She's got a splendacious castle all her own some where in the wilds of Norfolk."

"I've never been to my home I've never even seen Charnwood," smiled Jean. "But I shall one day" in some day. If you will ask me over."

"Oh, yes, certainly you must come," replied Lady Latimer a little breathlessly. But she seemed unconvincingly hurried, as though Jean's suggestion in some way disquieted her. "But of course, Charnwood now—it's left the whole if it would be when the Petersons had it. I think a place changes with the people who live in it, don't you? I know how influence impresses Nesbi on it. If they are good and happy people, you can feel it in the atmosphere of the place, and if they are people with bad and wicked thoughts, you feel that, too. I know I do." And there was that look in her eyes again as though she hearers that she was referring to the last-named set of influences.

"But I think Charnwood must be lovely, since it's your home now," said Jean sincerely.

"Oh, yes, of course It is my home now." Lady Latimer looked troubled "But other people live—have lived there. It's changed hands several times. Hasn't it, Nick?"—turning to him for confirmation.

Nick was frowning. He, too, appeared troubled.

"Of course it's changed hands—and heaps of times," he replied gruffly. "But I should think your influence would be strong enough to counteract—of—everybody else. Look here, chuck discussing rotten, psychic influences and come on to tea at the house."

"No, I can't," she replied hastily. "I haven't my chaises here."

"That doesn't matter. We've a dozen pairs up at the house. One of them is sure to fit you. I'll go and collect a few."

He wheeled as though to cross the lake on his proposed errand, but Claire Latimer laid her hand quickly on his arm.

"No, no," she said. "I can't think this morning. I'm on my way home."

"Oh, rubbish your self-bossed Jean, noticing with friendly amusement Nick's expression of discontent.

"No, really I can't." Claire's face had whitened and her voice shook. Nick's in a kind of pathetic appeal. "Adrian is not—very well today. My husband," she added explanatorily to Jean.

The latter was conscious of a sense of shock. She had quite imagined Lady Latimer to be a widow, and had been mentally engaged in weaving the most charming and happy-ever-after of romances for her. The moment she had seen that wonderful change over Nick's face. Probably her impression was due to the memory of the first introduction of Claire's name. "A friend of ours lives there — Lady Latimer," without reference to any husband living in the background.

She observed that Nick made no further effort to persuade Claire to remain, and after exchanging a few commonplace remarks the latter continued her way back to Charnwood.

It was an hour before they found it did not seem worth while resuming their skating. Besides, with Claire Latimer's refusal to join them, the companion seemed to have lost its charm, and when Jean suggested a return to the house Nick assented readily.

"She is very sweet your Lady Latimer," remarked Jean, as they walked back over the frostily crisp turf. "But she looks rather sad. And she isn't the kind of person one associates with sadness. There's something so—so—so—I don't know how to describe it—but it's as though she makes one think of spring flowers somehow."

Nick's face kindled.

"I'm, she's like that, isn't she?" he answered eagerly. "Like a pale golden narcissus."

They walked on in silence for a few minutes, the thoughts of each of them dwelling on the woman who had just left them. Then Jean said softly:

"So that's the 'poor child?'"

"Yes," he acknowledged simply "I've never mentioned that I've had a husband connected somewhere. I quite thought she was a widow till you—you mentioned him."

"I never think of him as her husband"—shortly. "You can't make light and darkness—"

"Or a supporter he's an invalid," ventured Jean.

Nick's face darkened.

"He's a drug fiend," he said in a low, hard voice.

"Oh!"

After that one breathless exclamation of horror Jean remained silent. The swift picture conjured up before her eyes by Nick's terse speech was overwhelming in its horror.

Years ago she had heard her father describing the effect of the drug habit upon a friend of his own who had yielded to it. He had been telling her mother about it, characteristically oblivious of the presence of a child of eleven in the room at the time, and some of Glyn Peterson's poignant, illuminating phrases, punctuated by Hilda, stifled murmurs of pity from Jacqueline, had impressed a painfully accurate picture on the plastic mind of childhood. Ever since then, drug-fiends had represented to Jean the uttermost object.

And now, the victim of that slender, gracious woman, Nicky's "pale golden narcissus," tied for life to a man who must ultimately become that which Glyn Peterson's friend had become, filled her with compassionate dismay.

It was easy enough, now, to comprehend Claire Latimer's curious lack of warmth when Jean expressed the hope that she might go over to Charnwood some day. It sprang from the nervous shrinking of a woman at the prospect of being forced to unveil before fresh eyes the secret misery and degradation of her life.

Jean was still silent as she and Nick re-entered the hall at Staple. It was empty, and as, by common consent, they instinctively drew towards the fire Nick pulled forward one of the big easy-chairs for her. Then he stood gloomily staring down into the leaping flames, much as Tormarin had stood the previous evening.

Intuitively she knew that he wanted to give her his confidence.

"Tell me about it, Nick," she said quietly.

"May I?" The words jerked out like a sigh of relief.

He dropped into a chair beside her.

"There isn't much to tell you Only, I'd like you to know—to be a pal to her, if you can, Jean." He paused, then went on quickly: "They married before he was born who she was hardly more than a child—barely seventeen. She's only nineteen now. Sir Adrian is practically a millionaire, and Claire's father and mother were in low water—trying to cut a dash in society on nothing a year. So—they said Claire, Sir Adrian paid their debts and agreed to make them a handsome allowance. And they let her go to him, knowing, then, that he had already begun to take drugs."

"How could they?" burst from Jean in a strangled whisper.

Nick nodded. His eyes, meeting hers, had lost their gay good humour and were dark and hard—hatred.

"You, you'd wonder how, wouldn't you?" he said. His voice rasped a little. "Well they did it. Then, later on, the Latimers came to Charnwood, and Claire and I met. It didn't take long to love her—you can understand that, can't you?"

"Oh, Nick—you! She is so altogether lovable."

Builds Resistance Easy to Take

Strong Position Maintained by The Royal Bank of Canada

Total Assets over $25 millions—Liquid Assets Stand at $348,630,000—Profits of $5,446,327 amply cover dividends and usual appropriations.

The maintenance of its usual strong position and ready ability to meet the rapidly changing trade conditions are among the outstanding features of the annual report of The Royal Bank of Canada. The statement, which is for the fiscal year to November 30th, is now in strong forward to shareholders. It will be immediately accepted as further striking proof of the successful manner in which Canadian banks are dealing with the problems brought about by depressed business conditions.

The general statement of assets and liabilities shows total assets in excess of $325,000,000, a reduction of only about 3½ as compared with the statement reported at the end of the previous year. In the light of the present commodity prices and general slackening of activity, the maintenance of total assets at such a high level should be regarded as a remarkably good showing. In keeping with its policy the Bank's liquid position, as usual, is a strong one. Cash holdings total $46,836,581, or over 40% of liabilities to the public. The principal securities included among them are cash items of $188,788,201; Dominion and Provincial Government securities of $60,473,000 and Canadian Municipal and Public Utility and foreign and colonial securities of $34,641,816. Call loans total $76,793,280 and naturally represent a substantial reduction for the year. Loans in Canada being down $18,947,890, or 33%, and these stood over $7,000,000.

The generally lessened business activity is further reflected in commercial loans, which are $413,245,043, as compared with $444,815,257 a year ago. Letters of Credit also show a reduction nearly $10,000,000 obviously due to curtailed international trade.

Total deposits stand at $347,300,973 as against $355,540,000 at the end of the 1930 year. The decline, as is well known, has been principally in deposits standing to them in Canada, those in the Dominion being down only $7,126,000, and now amount to $479,168,084, as against $486,125,384.

Satisfactory Profits

The many shareholders of the Bank will be particularly interested in the Bank's net profits and what the strong net result would be regarded as available for distribution for the year amounted to $5,446,327. and these added to the amount brought forward from the previous year brought the total available for distribution up to $9,585,165 Payment of the usual 12% dividend absorbed $4,500,000 a contribution of $250,000 was made to Officers' Pension Fund; the usual amount of $400,000 was appropriated for Bank premises and $500,000 was set aside for Dominion Government taxes. After meeting all these charges the substantial amount of $4,135,165 was carried forward to credit of Profit and Loss into the next fiscal year.

Jagson is adding its poultry raisers.

"But understand this, too,"—and the sudden sternness that gripped his speech reminded her sharply of his brother—"we recognize that that is all there can ever be between us. Just the knowledge that we love each other. I think even that helps to make her life—more bearable."

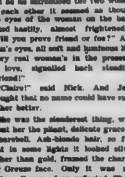
He fell silent, and presently Jean stretched out a small, friendly hand.

"Thank you for telling me, Nick," she said. "Perhaps some day you'll be happy—together. You and Claire. It sounds a horrible thing to say—to count on—I know, but a man who loves—"

Nick interrupted her with a short laugh.

"You needn't count on Latimer's ending out, if that's what you mean. He is an immensely strong man—like a piece of steel wire. It will take years for any drug to kill him. I sometimes think"—bitterly— "that it will kill Claire first."

(To Be Continued.)



When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little hands do their work of carrying the gentle matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective for older children, too. Remember, Castoria contains no harmful drugs, so you can safely use it whenever your baby is fretful with teething or a bad upset, give a closing dose of Castoria. Be sure you get genuine Castoria with the name:

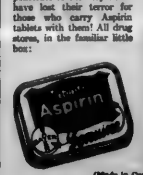
CASTORIA

Neuralgia

THE agonizing aches from neuralgia can be quieted in the same way you would end a headache. Take some Aspirin tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.

Men and women bent with rheumatism will find the same wonderful comfort in these tablets. They aren't just for headaches or colds! Read the proven directions covering a dozen other uses; neuritis, sciatics, lumbago; muscular pains.

Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them! All drug stores, in the familiar little box:



(Made in Canada)

On smiles, we find two legs behind
And two we find before;
We stand behind, before we find
What the two behind be for.

Fort Oddfellows a Jolly Interesting Meeting

On Monday evening, January 18, the local Oddfellows, Lodge No. 14 and Princess Rebekah Lodge No. 32, was visited by the Grand Chaplain of the Grand Lodge of Alberta, Bro. Alfred C. Woodard of Edmonton.

A number of members from the city accompanied Bro. Woodard to the Fort, and honored us to an inspiring address by the Grand Chaplain.

Bro. Woodard holds a high and important office in the order; he has worked hard, and given a great deal of his time in the past twenty-five years to the social welfare interests of the Oddfellows Lodge. A man of fine personality, he is a speaker with the ability to hold the attention of his audience for an indefinite period.

His main address, about his visit to the Sovereign Grand Lodge Convention, held in Winnipeg in Sept. 1931.

This convention was one of the largest ever held on the American continent. Delegates from European countries, and even from far away Australia were visitors to this great gathering of people who belong to the Independent Order of Oddfellows.

The City of Winnipeg gave itself wholeheartedly to the entertainment of its guests and on the day of the parade, all stores and business houses were closed, so that all, might see the wonderful sight.

Twenty Bands distributed through the parade, which stretched for over five miles along the line of march.

Bro. Woodard gave a graphic description of the work that was done at the meetings during the convention and recounted several fine incidents that occured.

At the finish of this part of the speech, Bro. Woodard told the members about some of the good work done by Lodges from the Order, in the welfare work and maintainance of the Oddfellows Homes in Canada, and the United States.

These homes are given over to the caring of children whose parents have died and were members of the I.O.O.F.

Bro. Woodard closed his address with an earnest appeal that everyone do their share in helping to take care of the children that are left orphans.

Noble Grand Bro. E. Flintoff thanked the Grand Chaplain for his fine speech and hoped that he would visit the Fort again in the near future.

YPRES VALLEY

Mr. and Mrs. Art Irwin were Edmonton visitors yesterday.

******

Mrs. Joe Brandy returned home from Edmonton yesterday and reports that Mr. Brandy is getting along nicely.

******

Mrs. Dave Cranston is going to spend her leap year vacation in Edmonton.

******

The Ladies Aid of Ypres Valley met to-day at the home of Mrs. D. Cann.

******

Mrs. Hodgins gave a fine resume of Rev. Oliver's speech, who is speaking in Edmonton at the present time.

******

The Ladies Aid is a year old this month and a bridge party has been arranged for Tuesday, Jan. 26th, at the home of Mrs. Bill Pearce.

Bring a quarter and come along.

THE "HAPPY HEART" C.G.I.T.

The Happy Heart C.G.I.T. group began it's 1932 term with great interest! The girls are undertaking the initiation ceremony, and mean to become a recognized group in the near future. The last meeting was held on Monday, January 18, and was spent in preparing dishes suitable for an invalid.

W. A. Dubuc Honored At Complimentary Banquet

A complimentary banquet was held in the Queen's Hotel last Friday night in honour of Mr. W. A. Dubuc, who is leaving Fort Saskatchewan shortly to take up a general store business at Bonnyville. Mayor G. T. Montgomery was Chairman and Toastmaster and some 60 citizens of the Town were present.

In the different speeches made the guest of honour was spoken of in the highest terms, and all wished him success, and given a great deal of his time in the past twenty-five years to the social welfare interests of the Oddfellows Lodge. A man of fine personality, he is a speaker with the ability to hold the attention of his audience for an indefinite period.

His main address, about his visit to the Sovereign Grand Lodge Convention, held in Winnipeg in Sept. 1931.

This convention was one of the largest ever held on the American continent. Delegates from European countries, and even from far away Australia were visitors to this great gathering of people who belong to the Independent Order of Oddfellows.

The City of Winnipeg gave itself wholeheartedly to the entertainment of its guests and on the day of the parade, all stores and business houses were closed, so that all, might see the wonderful sight.

Twenty Bands distributed through the parade, which stretched for over five miles along the line of march.

Bro. Woodard gave a graphic description of the work that was done at the meetings during the convention and recounted several fine incidents that occured.

At the finish of this part of the speech, Bro. Woodard told the members about some of the good work done by Lodges from the Order, in the welfare work and maintainance of the Oddfellows Homes in Canada, and the United States.

These homes are given over to the caring of children whose parents have died and were members of the I.O.O.F.

Bro. Woodard closed his address with an earnest appeal that everyone do their share in helping to take care of the children that are left orphans.

Noble Grand Bro. E. Flintoff thanked the Grand Chaplain for his fine speech and hoped that he would visit the Fort again in the near future.

Fort Young People Attend Gay Affair

The value of the social side of Church union was exemplified on Friday night last when the Young People of the Methodist and United Churches at the Fort, and others from Fairview and Horsehill, with an odd one or two from Edmonton, met in the Social in the memorial hall. It started with games of varied kinds, it gradually developed into dancing, it broke up to eat supper, and then continued dancing till the gunpowder ran out of the heels of their boots (or at least the toes, some), 'ours, Mr. Ramsay almost flew in his efforts to keep things on the jump, Mr. Read danced like a twenty year old, Mrs. Ramsay and Mrs. Read, supposed to be chaperons, just sat and beamed goodwill. When all was going well in the big hall, the Parsons and wives and other grown ups went off for a hand of bridge, goodness knows who won, and the whole company played their parts at the supper table the Artic Explorers.

In fact it was a hugh success, and one more attempt be on the programme of these societies every year in the future.

Surprise Party

On Monday the 18th of January, at the home of Mrs. George Cranston, a pleasant surprise was held in honor of Mrs. C. McNaughton.

Rev. Ramsay, Superintendent F. Baker and teachers, presented Mrs. McNaughton with a small gift from the United Church Sunday School.

Mrs. Wilmouth on behalf of the Red Cross society also presented a gift and a small of thanks for the faithful service rendered by Mrs. McNaughton.

A delightful lunch was served by the hostess.

All present expressed sincere regret at losing a member who is moving to Vermilion, Alberta.

Fort Junior Hockey Team Defeats Bruderheim 4-2

Coach Mah Tarnow's Junior aggregation handed the Bruderheim Juniors a defeat on home ice, last Saturday afternoon. The game was not fast but produced a few thrilling moments, especially in the last period. The score was 4-2 for the Fort, but it looked as though Bruderheim had the game 2-1, until the Fort scored three goals in the last five minutes of the final period.

The Fort opened the scoring in the first period, H. Woonton getting the goal on his own re-bound

In the second period, E. Sherman evened the count for Bruderheim, scoring from a scramble near the locals goal. E. Sherman scored his second goal five minutes later on a solo rush, which was the highlight of the game. He beat the entire Fort club before netting the rubber The second period ended 2-1 in favor of the Bruderheim team

The final period was the fastest session of the afternoon, both clubs playing hard, the Fort trying hard to tie the score, and Bruderheim trying hard to hold their lead

The Fort was awarded for their efforts when W. Kingsley shot from just inside the blue line to make the count 3-2. The locals playing four men up and Bruderheim boys were kept busy warding off their attacks. Aminute later S. Ramsay broke the ice when he shot the rubber from the right boards to hit Goalie Tarnow's pads and it dropped into the cage. R. Whitson ended the scoring for the Fort, shooting from the right boards to beat the excited goalie Tarnow.

Goalies Coupe and Tarnow were hopthusy, Tarnow having to stop the most shots. E. Sherman and C. Lige shone for Bruderheim, while H. Woonton and R. Whitson were the star of the afternoon for the Fort.

Earl Lees refereed the game.

Lineups of the teams as follows:—
Bruderheim: C. Tarnow, B. Strong, E. Armstrong, C. Rishe, C. Lige, E. Sherman, Subs: C. Sherman, A. Aspenlet, T. Prochnau.
Fort: B. Coupe, R. Whitson, W. Kingsley, H. Woonton, O. Robertson, B. Williston. Subs: S. Ramsay, A. Flintoff.

Badminton Tournament A Hugh Success

On Saturday, January 16th, the Badminton Club held a very enjoyable One-Day Tournament. Play commenced at 2 p.m. sharp and was continued to 10:30 p.m. Interest in the matches was keen throughout, and the players are to be congratulated upon the high quality of play which was in evidence. Class seems seemed to be the rule of the day, the margin of winning points being very small in nearly every game.

The results of the semi-finals and finals were as follows:—
Ladies Doubles.—Miss D. Looker and Miss L. Berg won from Miss A. Dickson and Mrs. D. J. McLean.
Mrs. Henry and Mrs. Calhoun won from Miss M. Trotter and Miss R. Shackleton.
In the finals Miss Looker and Miss Berg defeated Mrs. Henry and Mrs. Calhoun.
Mixed Doubles:—Mrs. Looker and Dr. Henry won from Mrs. Von Iffland and Two Henry.
In the finals Mrs. Henry and C. Shaw defeated Mrs. Looker and Dr. Henry.
Men's Doubles:—F. Berg and F. Smith won from C. Shaw and Dr. Henry.
S. Hambly and Dr. Mason won from Dr. Calhoun and D. J. McLean.
In the finals F. Berg and F. Smith defeated S. Hambly and Dr. Mason.

Some Truths and Lessons

It is in times of adversity rather than of prosperity that the true character and strength of men, communities and nations is demonstrated. The world learns few lessons when things are booming and prosperity seems to shine on every hand. When the sun shines and soft winds blow people are content to idle along, satisfied with things as they are. It is when the sun is hidden behind the storm clouds and the tempest rages that men, communities and nations are tested. It is then they begin to learn, bitter though the lesson may be.

Gathering on the present world-wide depression undoubtedly is, bringing loss and suffering in its train, it is probably serving a needful purpose in bringing the world a few lessons and re-emphasizing a few old truths, lessons and truths which people and nations apparently forgot; which, in the days of their prosperity, most of them refused to learn, or at least they ignored and gave no heed to them. Now these truths and lessons are being remembered and re-learned, and possibly, because of the present world depression is being underscored and more severe than any of its predecessors, the lessons it is teaching will be taken a bit more seriously and have a more lasting and beneficial effect than ever before.

Yet these truths and lessons are no old as this old world itself. The truths are fundamental, the lessons are stern and unshakeable.

One truth is that no man, no community, no nation can live unto itself alone. Not one of them is self-sufficient. Each is dependent to a greater or less extent on all others. God so made the world and puny men, notwithstanding his boasted powers and strength cannot alter it. This truth is becoming more widely recognized and accepted every day this depression lasts. It, alone, is driving the nations of the world closer together.

Another truth that is once again growing into boniferous is that reliance in greater happiness and truer worth than anything and everything that men can invent and devise. Man has made a god of machinery and since men invent and develop machines primarily intended to be the servants of men, to supply his needs and cater to his comforts and well-being. But in his eagerness to invent, and develop, and create a machine-age,—an age in his eagerness to invent, and develop, and create a machine-age,—an age in his supremacy he has, in so-called civilized countries, come into a machine-age,—an age which he has become the slave of machines,—some has over-reached himself until today, in many ways, the machine has become the master and man the servant.

To serve a machine-age, man has built himself huge cities wherein people live together like rabbits in a warren; packed like sardines in a box. Individuals have largely lost their individuality in the mass, with initiative commanding and the fear of commanding to a great extent absent. Many parts has been lost in the great cities where neighbor hardly knows neighbor. That self-respect and self-confidence and initiative inseparable from being a personality amongst one's neighbors has been largely lost in becoming a mere unit in a city's teeming population.

Children grow up today without having contact with nature outside of a cultured life amidst cultured surroundings; all absent them to artificial, and, bred in such surroundings and atmosphere, life itself becomes artificial.

The lesson that the world, perhaps, is beginning to learn is that we must get back to first things, and place them first in the scheme of life. The belief of a city amid a machine civilized must be no more greater wealth than he can profitably and beneficially use, and put forth his life's endeavors to attain; his city larger and larger,—not necessarily greater and finer. Many are beginning to realize that the huge city is an evil, not a blessing, that man was not created to live and struggle in such surroundings. That, on the contrary, the ideal community is by far the happiest and the cheapest place in which to live, and that it contains within itself all the benefits and contentment unknown in huge centres of populations where thousands live from hand to mouth in unsouth surroundings and with less or no prospect of bettering one's condition.

Economic conditions of this depression have driven hundreds of young men and women, attracted by the glitter of the cities, back to the old home on the farm, in village and small town. For the time being, because world conditions are what they are, they may be denied many things they would like, but the wisest of them will stay there, and in the long run they will be on the happier and better off for the staying.

A Big Undertaking

U.S. Spending $5,000 To Move Giant Tree

Uncle Sam is paying nearly $5,000 for moving a giant sequoia tree in the Mail at Washington, to prepare up for road construction there, in a $250,000 programme for improvement of the Mall.

The sequoia is 36 inches in circumference at ground height and will be moved about 400 feet from its present location near the Bill in the Mall, in a northwesterly direction, to near Pennsylvania Street. This involves the moving of a disc of earth about 20 feet in diameter and five feet thick, which weighs about 300 tons, in addition to the weight of the tree, not yet estimated.

It is said to be one of the biggest jobs of its kind in the world.

Centenarian Women

Six Times As Numerous As Men in Great Britain

There were 104 centenarians drawing old-age pensions in Great Britain on January 1st last.

This is stated in the annual report of the Commissioners of Customs and Excise, issued recently.

Of these 91 were women and 13 men. The oldest of all was a woman born in 1833, and therefore then 102 years old. Another woman was 103, three were 104, and seven were 105. The oldest men were three aged 102. Twelve women had reached that age.

Heroes A Complete Wreck Set Up Still The Right

Mrs. John Hoyt, Rock Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night instead of not being able to sit down.

One day a friend recommended Milburn's Heart and Nerve Pills. I used two and got relief, and by the time I had taken six boxes I was as well as ever.

Price 50c a box

Milburn's Heart and Nerve Pills are put up in a yellow box with the name in red. Refuse substitutes. Manufactured only by The T. Milburn Co. Limited, Toronto, Ont.

Pack Polar Bear Quiz

Brings To Zoo Old Information About Person Leaving Show

If your interest, or with theatre you in Paris, it won't do any good to go to the police about it. And that applies to a son or daughter over 21 as well.

For the missing persons' bureau at police headquarters, handling over 30,000 requests a year, keeps its records of people who have chosen to leave home.

Suicides, accidental deaths and serious illness are reported at once to the families of the persons concerned, but since the law does not oblige a son, daughter, husband or wife to stay at home unless he or she wants to, all the police will say is "We have located John, or Marie. He, or she, is well and happy and does not wish you to know where he, or she, is staying."

SEE LAST 21 LBS.

And "Pants Full of Life"

Although she is reducing her weight, she wants "pants full of life." That's why she can't be much wrong with her statement.

"I was putting on weight, and knew I was getting fat," she said, "and tried many of things with no result. But found somebody ago a friend told me of Kruschen Salts and decided I thought I would give them a trial. I have taken two bottles and I am glad to say I have lost 21 lbs. I take a half-teaspoonful in a glass of hot water every morning before breakfast and go on taking them as they suit me. I feel fine! Yes, I do. Kruschen Salts do not reduce you overnight. But in a short period they do. That takes especially over a period of time with a wonderful diet and gentle exercise, half a teaspoonful in a glass of hot water every morning before breakfast will take away any horrible flesh and restore your figure to its natural slimness. Yet at the same time build up health with a great deal more vim and energy than you've had for years."

Prevents Tiram Sleuth

To enable workers in a factory at Hamburg, Germany, to telephone in person, a perambulating telephone booth has been perfected and is being tested.

It has automatic trick walls and doors of sound-absorbing material so that wire conversations can be held near heavy machinery in operation.

Tomato Juice

Tomato Juice is unrivaled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it supply soft-textured. Gives the hands heavenly white. Especially recommended for sunburn, freckles, tan, sores or chafing caused by weather conditions. Obtainable from the dainty woman. Cool and refreshing. Delicately fragrant. Magical in its effects. Leaves a tonique of elation. Persian Balm is the one toilet necessity for the discriminating who crave for charm and elegance.

Saskatchewan Poultry Fed

Women guide the destinies of one of western Canada's largest enterprises, the Saskatchewan Poultry Pool. Last year the pool, of which a majority of the directors are women, grossed a turnover of over $900,000. Its president is Mrs. W. Morrison, of Spalding, Sask. Grower's wife.

Mother's Worm Powders

Mother's Worm Powders not only exterminate intestinal and other worms, but are a remedy for many other ailments of children. They relieve the disturbing stomach agitation and are tonized in their effects where the child is not in perfect health. Under favorable conditions they will be found useful and they will serve to allay pain and pricking in the stomach, from which children so often suffer.

Wage Cuts For Relief

Government relief expenditures of Ontario spent $13,736,000 on unemployment relief in 1930 and 1931, Hon. George S. Henry, provincial treasurer, told a Toronto service club recently. A total of 63,000 persons had been given employment, he said.

Like Canadian Tobacco

The British market is taking his palate to Canadian tobacco. Imports through the port of London of Canadian tobacco for 1931 amounted to 1,070,000 pounds against 736,000 pounds in 1930. Recently Canadian tobacco was branded with official gardens but to a large proportion is now sold separately.

General Dawes

Retirement As U.S. Ambassador To Britain Is Cause Of Regret

There will be regret that Charles G. Dawes is shortly to retire as United States ambassador to Great Britain and from public life altogether. Mr. Dawes has been a useful figure in international politics of recent years. He has also been a picturesque and likeable type

Mr. Dawes was a banker and financier when he first came into international prominence, and it is possible that he may return to this field, in his home State of Illinois. He served as a general under General Pershing with the American Expeditionary Force in the Great War, and later, as everyone knows was author of the Dawes plan for German reparations payments later superseded by the Young Plan, and which plan, in turn may now be drastically revised or even discarded altogether, in the light of Germany's serious economic position. Next came a turn for Mr. Dawes as Vice-President of the United States, and here he found opportunity for some of the plain speaking that has consistently marked his career. General Dawes appeared to enjoy "lecturing" the Senate at Washington.

The retiring ambassador will drop out with very real appreciation of himself at the hands of the British people, of whom he has been an admirer.

A year or two ago he went out of his way to publicly praise Britain's conduct in the War and their pluck and honor in the matter of war debt payments. Mr. Dawes indeed was no outspoken on this occasion that if what he said had come from anyone else Washington might have been hopped to regard it as an "incident."—Regina Leader.

Could Hardly Live For Asthma

writes one man said after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless it has been his suffering. This medicine remedy gives sure help to all afflicted with asthma. Inhaled it smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

Napoleon's Tomato Juice

A campaign for the popularizing of the "tomato cocktail" may be inaugurated if the Eastern Canada Fruit and Vegetable Jobbers' Association acts upon a suggestion thrown out by Hon. Dr. J. J. Maclean, Minister of Railways and Canals. Dr. Maclean addressed the delegates to the association at the seventh annual convention at Ottawa.

More Optimism Is Prevalent In Dominion's Western Northland Than In Other Parts Of Canada

Canada's western northland faces the coming year with more optimism than any other part of the Dominion. Development and activities in mining and rental transportation during the past year, indicate the opening of a new and prosperous empire on the fringes of the Arctic Circle.

Rich and vast deposits of radium-bearing ore and equally rich deposits of silver have been discovered at Great Bear Lake, 1,000 miles north of Edmonton, Alberta. Radium deposits at Labine Point and silver deposits at Echo Bay have proved to be very valuable and could easily meet the high cost of transportation ($400 per ton drastically revised or even discarded altogether, in the light of Germany's serious economic position. Next came a turn for Mr. Dawes as Vice-President of the United States, and here he found opportunity for some of the plain speaking that has consistently marked his career. General Dawes appeared to enjoy "lecturing" the Senate at Washington.

The retiring ambassador will drop out with very real appreciation of himself at the hands of the British people, of whom he has been an admirer.

Canada Producers Reading Empire's Forward

Finds Better Quality In Farm Exports This

"The markets for Canada's agricultural products for the future would seem to depend upon quality as well as quantity of production," observes Dr. J. H. Grisdale, Federal Deputy Minister of Agriculture. "Canadian producers are evidently becoming more and more conscious of that situation, heeding their efforts toward the improvement of the quality of their products. Many of our agricultural products going overseas command a premium on the British and other markets." Dr. Grisdale also points out that prices for all agricultural staples are now on an export market basis, and that while these are probably not quite so satisfactory as they might be, production is definitely rising and the farmer knows exactly where he stands relative to prices, that is to say: Canadian prices are world prices, and are not likely to be seriously affected by any considerable increase in production

Prepare Your Ahead For Dry Land Gardens

Result Of Experimental Work Carried On At Lethbridge

Experimental work at Lethbridge, Alberta, shows that to ensure a fair measure of success in the kitchen garden on the dry land farm it must be prepared at least one year ahead, Superintendent W. H. Fairfield, M.Sc., LL.D. in his annual report just issued points out that it is desirable to resorve twice the area desired, to apply well rotted manure in the part to be summer-fallowed just before ploughing; to cultivate just enough to curb weed growth; to plough about eight inched deep; to make rows wide enough apart to permit the use of the hand cultivator; and to provide a suitable supply of the watered (but not necessarily the northward) side of the permanent garden site. Vegetables in a dry land garden require more water than on irrigated land.

Cost Of Producing Hay

Cost Estimated At Central Experimental Farm At Ottawa

The annual report of the Dominion Field Husbandman, E. S. Hopkins, B.S.A., M.S., Phd., containing an interesting reference to the cost of producing hay (1930) at the Central Experimental Farm, Ottawa. The yield was 4.14 per acre. To produce this crop a total expenditure of $23.83 was necessary. This brought the cost of the hay to $5.69 The crop was valued at $23.63, leaving a profit of $11.53 per acre. Considered on return on annual labor the total payment on this item would be at the rate of 72 cents per acre for production and marketing. However, had the crop been marketed there would have been a further labour cost of $2.56 per ton.

Canada Is Weathering This Period Of Difficulty In Favorable Manner According To Economist

Donald M. Marvin, economist, writing on Canadian business conditions for the Royal Bank of Canada's monthly news letter, says Canada is weathering this period of difficulty in a favorable manner We reproduce his article in part.

The Canadian business situation at the end of 1931 reflects the difficulties resulting from two years of world wide depression. There are few industries which have not been seriously affected. The decline in the price of agricultural products has been particularly severe and the difficult situation created by these conditions was further aggravated by drought in Western Canada. Gold production has continued to expand and the record established by the 1931 output is one of the outstanding features of the year. Industrial activity and construction work have been maintained in reasonable volume and employment has suffered less contraction than in many other countries. Canada, however, is dependent upon foreign purchases for the disposition of a large part of her products and has keenly felt the decreased purchasing power of many of her customers. In addition, Canadian industrialists have had to contend with the confusion resulting from numerous adjustments in her foreign exchange relationships.

The volume of agricultural production was unusually restricted as a result of extreme drought conditions in the Prairie Provinces, particularly in the southern sections of Manitoba, Saskatchewan and other crops were severely damaged and farmers in the affected areas did not harvest sufficient quantities to meet their own requirements. Alberta and the northern districts of Saskatchewan and Manitoba had a more successful season but the Western wheat crop plans in 309 million bushels smaller than in 1930 a year of unusually large production. Elsewhere in Western Canada and British Columbia were more favorable and coarse crops created new records. Apples and potatoes are also plentiful that their disposal has presented a problem; the tobacco crop in Canada is a bumper one and splendid quality. Prices for all farm products have declined to very low levels and, with the reduced crops in the West, the purchasing power of these areas shows a serious reduction from previous years, being officially estimated for 1931 at $441,250,000 as compared with $621,888,000 in 1930 and $903,901,000 in 1929.

Livestock and dairy farmers had excellent pasturage and plenty of feed for their herds. Increased interests in dairying has been shown in Alberta and Saskatchewan, and butter production has been greatly expanded in Saskatchewan, output for the first ten months of the year exceeding 17,000,000 pounds, an increase of 35 per cent. over the corresponding period of 1930. This total is greater than the highest previous full year's output for Saskatchewan, viz. 16,052,760 pounds in 1928. Exports of butter from Canada to Great Britain were resumed in substantial volume after a lapse of some years. The total quantity shipped during the twelve months ended October 31st, was 2,327,600 pounds as compared with 1,357,600 pounds in the previous year. The export of cattle to England has also been "easier than in many years. Trial shipments were also made to the United States, and could no provide a regular supply of high-grade stock for the export market, the Ontario Government has arranged for the finishing during the winter of selected animals from Western Canada by Ontario farmers.

Supplies of wheat are still large but are somewhat reduced from last year. Export shipments increased in volume however, during the year and prices have shown an upward trend. A substantial reduction in the large world stocks of wheat and the return of prices to a profitable level would do much to re-establish Canadian agriculture on a satisfactory basis.

The rapid expansion in gold output was the outstanding feature of the Canadian mining industry last year, the value of production reaching $60,-432,000; for 1932, the total for all Canada is placed at $65,000,000. Ontario production alone equalled the Dominion total in 1920 Quebec, the second largest gold producing province of the Dominion, reached 1,-282,000 ounces, the total reaching $6,000,000 as compared with $3,000,000. Manitoba and British Columbia also report increased gold production. Established mines greatly expanded their output during the year; mill capacities were increased and many improvements made in methods of recovery. New mines have entered the ranks of the shippers, and, in addition to placer deposits, where production has become unprofitable, are again being worked. Exploration and prospecting work have been pushed vigorously and many promising finds have been reported in new areas in Ontario, Quebec and British Columbia. The prospective development of these areas promises continued expansion in the industry.

Canada has been fortunate in maintaining her production and general business activities at present levels when other countries are faced with conditions of the greatest difficulty. Unemployment and its accompanying hardships have been felt less in Canada than in most countries. Promising features in the present economic outlook include the healthy condition of savings deposits, the strong technical position of Canadian manufacturers and a prospective good mining trade has been reflected in the falling off in the volume of current loans and clearing house returns. The most difficult situation in Canada is that of agriculture A revival of world trade and a return of profits to agriculture must precede any general return of prosperity to this country, but Canada is weathering this period of difficulty in a favorable manner and will be in an admirable position to participate in the first material advance.

"Those are your sons?"
"No, my grandchildren. I never had any children."—Cutierres, Madrid.

AS GANDHI CAME HOME TO JAIL

Absorbed in spinning threads for homespun garments, Mahatma Gandhi, famous Indian leader, is shown on the deck of the "Pilma" as the ship neared Bombay. The frail "prophet" of India was greeted by a riot between his supporters and opponents, in which twenty-five persons were injured. Shortly after his arrival Gandhi was imprisoned once more in Poona Jail, from which he is directing a new campaign of civil disobedience, which British officials are putting down with stringent methods.

Recurrence Of Drought Periods

Practical Research Will Assist In Acquiring Better Knowledge Of Climatic Conditions

The Hon. J. F. Bryant, K.C., chairman of the Saskatchewan Committee on Conservation of Water and Afforestation, issued the following statement to the press today.

Believing that a mistake had been made in the past in Saskatchewan and Western Canada in that no systematic or practical research had been carried on in the matter of climate and weather conditions, particularly when the farmers who are the backbone of the Province have suffered so much as a result of drought, frost and flood, and when through the lack of practical knowledge on the subject, an account of drought conditions during the past few years, a large fertile area of southern Saskatchewan has been badly injured by the blowing of the soil, the Committee on Conservation appointed a sub-committee to study weather conditions, climate, rainfall and water supply in their relationship to all external causes and effects operating in the drought areas of the Province and surrounding territory.

The committee consists of Hon. J. F. Bryant, Dr. T. A. Patrick and Dr. W. D. Cowan. The committee have been busily engaged for over two months in reading carefully the latest authorities on the subject, and in order to get the very latest information with particular reference to Saskatchewan conditions, have written to some of the world's greatest authorities on the subject, including C. E. P. Brooks, Honorary Secretary of the Royal Meteorological Society, London, England, Ellsworth Huntington, Dr. Andrew E. Douglass of the University of Arizona, the Carnegie Institute of Washington, the Smithsonian Institution of Washington, and A. J. Ontmet, Climatologist for Canada. We have written to the Secretary of Agriculture of the United States and of the Bureau of Statistics, Ottawa, Canada, inquiring whether they have made any investigation of the subject and requesting that they join with us in the matter of research, so that we can share in the results obtained, and take united action to combat conditions if deemed advisable.

Mr. F. E. Clements in a very able work on "Plant Indicators" makes certain observations on conditions in the western United States which are equally applicable to conditions in Saskatchewan.

"A study of settlement in the West since 1885 reveals the fact that it corresponds more or less closely to the climatic cycle. The exceptions are afforded by the rapid brush after the homestead act, the Klondike Act, etc., or after the opening of new regions. The general movement of settlers had advanced and receded in almost perfect agreement with the wet phases and drought periods of the climatic cycle (of Brueckner, Huntington, 1914: 89). A few years of unusual rainfall have affected unscrupulous real-estate dealers and immigration commissioners an opportunity to dispose of even the most worthless land. The ensuing drought period then led to crop failure and the wholesale abandonment of the region, to be followed by another influx of settlers during the next wet phase. In more than one region of the West this cycle has been witnessed three or four times, and its disastrous operation will continue until the States and the National Government recognize the necessity of proper land classification and of adequate regulation of settlement.

"The knowledge that drought periods will recur is indispensable to any accurate and successful classification of land and to the economic management of dry-farm, grazing range, or forest. These results, which are of the first importance for the west, do not depend necessarily upon the accuracy of predictions based upon the sun-spot cycle. They are clearly indicated by the historical experience of the last 60 years, which not only confirms the recurrence of drought periods, but also suggests the interval. However, it is clear that it would be of the greatest value to be able to forecast the date, duration, and severity of each drought period with some accuracy, as well as to anticipate the impending rainfall of the wet phase. This would not only permit the taking of the necessary precautions against the disasters due to drought, but it would also make possible the development of an optimum system of management. This would enable the farmer to plan crops and methods of tillage to the variations in rain fall and would permit the stockman to increase or decrease his herds or to vary his occupation or forage with the wet and dry phases of the cycle. In short, the cycle management of all affected by the effects of drought would provide the maximum insurance against loss or disaster and would afford the greatest possible annual returns."

"Life a Misery" From Headaches

Thanks to Dr. Williams' Pink Pills (Tonic) and a mother's smile she is well again.

"Headaches nearly drove me frantic," writes Miss. J. J. Anchan-hac, Ingersoll. "The pain would be so severe that my eyes would swell shut. Life was a misery.

"Finally my mother, now whom Dr. Williams' Pink Pills had helped wonderfully, she bought a box and made me take them. I was so sick of dosing I had no faith, but thank to mother's persistence and the pills I am here and well today."

PROVIDE IRON

If your blood condition is below par you probably need the iron which Dr. Williams' Pills provide. You are only as well as your blood is rich. Poor blood means headaches.

Don't let life be "a misery" to you. Get a box of Dr. Williams' Pink Pills at any druggist's, 50 cents a box. Don't delay. Be sure to say "Dr. Williams'" so that the druggist will know exactly what you want. 102

Recipe For This Week

(By Betty Barclay)

COFFEE CAKE

1 cup sugar.
1 cup raisins.
½ cup Crown Brand Corn Syrup.
1 egg.
1 teaspoon cinnamon.
2 cups flour.
1 cup boiling water.
½ cup strong coffee.
1 teaspoon soda.
½ teaspoon nutmeg.

Beat eggs and sugar until very light, then add the syrup and stir in the flour sifted with the other dry ingredients and mixed with the cinnamon and dried raisins. Then add coffee with the spices and bake in a rather quick oven until the cake leaves the sides of the pan.

DELICIOUS CREAM COOKIES

1 cup Mazola.
4 beaten eggs.
1 cup nut meats.
1 cup chopped raisins.
1 teaspoon vanilla.
4 cups flour.
2 cups brown sugar.
½ cup sweet cream.
½ cup Crown Brand Corn Syrup.
1 teaspoon Lemon Essence.
1 teaspoon salt.
½ cup Brown's Corn Starch.
4 teaspoons baking powder.

Cream the Mazola with the sugar, add the eggs and beat until light. Mix the cream with the corn syrup and add to the batter alternately with dry ingredients sifted together and mixed with the nuts and raisins. Flavour and drop by spoonfuls on buttered baking pans and cook in moderate oven (350 degrees Fahrenheit).

SUNDAY SCHOOL LESSON

JANUARY 24

JESUS AND THE SAMARITAN WOMAN

Golden Text: "Christ Jesus came into the world to save sinners." 1 Tim othy, 1:15.

Lesson John 4:1-42

Devotional Reading: Isaiah 55:1-7

Explanations and Comments

The blessing of Jacob and the Woman of Samaria, verses 1-9 (in meeting 26) bar the disciples went to the village (1) but God while Jesus sat down on the curb of Jacob's Well to rest A woman approached She was like a waterlogged ship, not a total wreck, but incapable of movement and needing both to be towed and steered into harbor Great was her surprise when Jesus, a Jew, asked her, a Samaritan woman, to draw water for Him

The Offer Of Living Water, verses 10-14 Jesus replied in words full of yearning tenderness "If you knew what God's blessings are, and how freely He gives them if you knew that He who speaks to you has all His power to give them all; you would be the speaker then, and He would not refuse you. He would give you the living water"

The woman must have been familiar with the figure of speech that Jesus used, and must have known that they held a hidden meaning, but she pretended to treat them literally and said that the well was deep. He had nothing with which to draw up the water; was He greater than Jacob rather Jacob who had dug the well and used it?

"This water quenches thirst for but a short time," solemnly Jesus said. "The water which I give becomes in the well of water that springs into life eternal." Thus by a figure of speech, rather than by a declaration of doctrine, Jesus taught that when one is "born anew" he finds perfect satisfaction.

Under Conviction, verse 15. Has some gleam of Jesus' meaning entered the woman's mind when she asked for this water, that she might never thirst, and might be saved the trouble of coming there to draw? The water of life is not to be had for the mere mechanical asking It must be received (8) "Who understands the gift now, but she neither understands it rightly nor desires it rightly Our Lord, like a surgeon, must disclose the sore before He heals it, must deepen the wound before He can close it. But He would have her convict herself So without making any charge against her, He answers, "I recall thy husband." R. C. Gillie.

"I have no husband," the woman answered. "Thou hast well said, for thou hast had five husbands; and he whom thou now hast is not thy husband"; this knowledge of her life convinced the woman that Jesus was a prophet.

The Dominant Nickel

Mere Five-Cent Coins Issued At Ottawa Mint Then Any Other Denomination.

The great Canadian nickel continues to dominate the operations of the mint, if the annual figures issued by the new Canadian Government Department mean anything. In the year just closed no fewer than 5,630,000 coins of the five-cent denomination were delivered from the mint. The number exceeded even that of the pennies, of which a paltry 5,146,000 pieces issued; while dimes were a poor third, only 2,294,000 being minted in 1931.

The aristocrat of the silver coin — the 50 cent piece—appears to have had little demand in this time of depression, for only 86,000 were issued last year. The humble, but never-to-be-despised "two-bits" was reduced to the value of $212,000, or 84,800 pieces, valued at 25 cents each.

In all, the Royal Canadian Mint struck 11,818,680 pieces in 1931, and issued 13,970,000.

The gross value of rough and fine gold and fine silver received by the mint last year, was $35,684,176. Deliveries from that institution to the Department of Finance had a value of $36,176,551. Trade bars sold were valued at $646,941.

The mint had a year, did not coin any $10 or $5 gold pieces.

Soviet Oil Production Short

The production of oil in the Soviet Republic in 1931 amounted to 22,400,000 tons, 16 per cent. short of the program for the year, but almost 4,000,000 tons in excess of the 1930 figures.

Why kangaroos from Australia are now contributing their tendons to American surgery. The muscle ligament from these animals is used by doctors to make stitches in wound cuts.

To Build Resistance Easy to Digest

Russian Wheat Yields

Soviets Plan Large Increase In Acreage For 1932

Russia plans to sow 346,000,000 acres to crops for harvest next fall 6,000,000 more than last year.

This was reported by the United States agriculture department which also said the 1931 wheat crop of Russia, the world's largest producer, may definitely be considered a poor one.

The 1932 plan for the spring sown area calls for 252,000,000 acres compared with 241,000,000 planted last spring. The largest increase in the area, however, will be in industrial crops, such as cotton and flax, with the spring wheat acreage remaining practically the same. Spring wheat is the most important.

"A most significant factor in the situation," the department's Berlin observer reported, "is the announcement by the Soviet authorities that they intend to concentrate on quality rather than quantity."

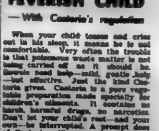
Summing up the 1931 wheat harvest, he added:

"Although yields of winter wheat were fairly satisfactory, much of the spring acreage failed to make a crop, principally because of drouth." As a result, exports have been curtailed. Sowings of winter grain last fall did not equal plans, and are below acreage sown the preceding year. Wheat procurings from collectives are also below announced plans due to interference from peasants.

Helen Keller's View

There was something both touching and beautiful in blind Helen Keller's comment on being taken to the top of the Empire State Building in New York: "I wonder if the view you see, is more beautiful than mine. You see what you see, but I have my imagination to draw upon." Toronto Globe.

The mineral pyrite got its name from a Greek word meaning fire, because sparks are produced when pyrite is struck with iron.



RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle Judy but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the signature

Chas. H. Fletcher

CASTORIA

SOIL SURVEY HELD BY GOVERNMENT

During the summer of 1931 three field parties made soil surveys in Northern Alberta. The first party, under Mr. J. L. Doughty, surveyed the area adjacent to Lac La Biche, the second party, under Mr. G. R. Younge, surveyed the area between Beaver River and Cheecoman, and the third party under Messrs. Ridgway-Cash and Paul surveyed the area between Grouard and Peace River. In all three areas a total of approximately 5,000,000 acres of land were examined. Of that total practically 7,000,000 acres of land consisted of muskeg and third-class wooded soils. About 35 per cent of the area surveyed was composed of muskeg lands and cracked areas.

No large areas of commercial timber were found during the summer, but some excellent stands of young timber were observed. It is thought that in general the unsettled portions of the areas have more value as forest and game reserves than as agricultural or grazing lands.

The area covered by the second party lies adjacent to the Alberta-Saskatchewan boundary. The great majority of this area consists largely of muskeg and third-class wooded soils. There are more muskegs in this area than have been encountered in any survey up to the present time. The third-class wooded soil, which in general covers adjacent to the large muskeg systems, is all somewhat timber covered, consisting very largely of jackpine confined to the ridges and spurs to the east of the muskegs. No great quantity of merchantable timber was observed, although some fair timber is available. It is doubtful if the area in general would ever become valuable as a source of merchantable timber, but it is quite certain that the greater part of the area should be withheld from settlement.

The choicest land in the entire area is found for a distance of about 5 to 10 miles north of Beaver river and south in the vicinity of Moose Lake. These lands comprise only about 77,000 acres in all, and are quite largely taken up at the present time.

The third area from Grouard to Peace River was by far the best of the three areas examined, both in quantity and quality. Practically all of the choice land is taken, but possibly 50 per cent of the second-class soil and timber, or about 150,000 acres, remain to be settled.

One area, about a township in extent and consisting of very good soil covered with jackpine, is a natural Park and would furnish an excellent recreation ground for the people of the surrounding area. It is only about two hours' drive from Peace River by car.

Results of Town Examinations of UPPER VALLEY S. D. No. 5060

Grade VII	
Hollis Pearce	72.0
Hollis Clark	72.0
Grade VI	
Edith White	84.0
Frank's Hoyzell	78.5
Myrtle Pearce	73.0
Grade V	
Addie Pearce	72.5
Clarence Hoyzell — missed all examinations.	
Grade IV	
Ina Brath	91.1
Phyllis Armstrong	85.7
Henry Weiler	80.
Pamela Ashton (missed 5)	
Grade III	
Mary Hughes	72.6
Ethel Brath	72.7
Dennis Simmons (missed all examinations).	
Grade II	
Alethia Brath	82.5
Pamela Dunbar	82.5
Jean Simmons	82.0
Elsie Hoyzell	82.1

Jean Hoyzell	82.5
Grade I	
Gwendolyn Gunn	92.5
Elma Dunbar	82.2
Jean Simmons	82.2
Elsie Hoyzell	82.1
Billy Brath	84.
Jean Hoyzell	82.5

The prizes awarded in Arithmetic were obtained by Gwendolyn Gunn and Clayton Ashton.

The prizes awarded in spelling were obtained by Phyllis Armstrong and Billy Gunn.

HOW IS THE TIME TO ADVERTISE STEADY

Whenever hard times are upon us we are sure to find plenty of good men who are out for what ever little money might be left in the pockets of a few. They are promising everything imaginable from an oil on a toothpick holder to a prosperity day in the old town. Nearly all of these schemes are in some form of advertising. It is easy to convince people that they need some kind of advertising to increase their business—any one knows this—and these grafters charge more than four times the value of what they offer, and a stranger seems to be able to land those who earnestly ever advertise in the home paper, and there is no more effective or cheaper way to advertise than in the home paper known. Your local paper is read all the time by all of the family, and your message reaches out and stays out in there you wish to reach. Not an item is missed. If you have what the reader wishes to buy, you get a customer and results are sure to follow. But if you place your ad with these grafters, the chances are that no one will ever read it, and you get no results from it, consequently you arrive at the conclusion that advertising does not pay. The next grafter that comes your way just tell him that you have decided to try the home paper and keep your money where it has a chance to come back to you, and will help you and help build up the town where you live.—O'Neill (Neb.) Holt County Independent.

FLYING FREIGHTER MAKES FIRST TRIP

JU-52, the largest flying freighter in the world, is now making its first trip with payload. The huge Junkers, recently acquired by Canadian Airways Ltd., and chartered by the Hudson's Bay Company, will be engaged in freighting supplies to various points in Manitoba's northland returning with cargoes of furs. The "flying horses" makes its northern base at Cold Lake on the Manitoba branch of the Canadian National Railways, whence it picks up supplies shipped there by rail. With its crew of four, the plane will be in the north country for a month before it returns to headquarters at Winnipeg.

"Will somebody please pass the cow down this way?" said the farmer boarder, who visited some milk at his coffee.

"Here, here," said the landlady, irritatingly, "take the milk down where the calf is hankering."

SHORT TELLS HOW TO SLEEP DURING SWAY GAS

Myrna V. Flatsbow says: "Stomach gas bloated me so bad I could not sleep. One spoonful Adlerika relieved me all the way and now I sleep well and feel fine." F. Smith, Druggist.

Commercial Printing

Why not check over your supplies? You may need some of the following:-

Dodgers - Statements - Billheads - Loose Leaf Forms

Posters - Letterheads - Billheads - Envelopes

Dance Cards - Programmes - Office Forms - Time Cards

Milk Tickets - Bread Tickets - Receipt Books

Blank Copy Sheets - Carbon Paper - Blotters - Tags

A trial order in Printing will convince you, that—

For service, Quality and Reasonable Prices we can't be beat.

Calgary Power Company Limited

:-: Announce :-:

New Consumer and Dealer Policy

The Calgary Power Company Limited, believes that it has a definite responsibility to its consumers in assisting to promote and develop the use of electrical appliances which will add to the comfort, convenience and profit of its consumers.

Towards this end the Company has developed a Merchandising and Load Building Policy which it believes will be satisfactory to the consumers and to the electrical appliance dealers. Under this policy the Company proposes to assist in the sale of appliances wherever possible through the local dealers except in the case of electric ranges which it believes can be handled and financed by the Company more advantageously than by the dealer.

The Company's Local Managers will gladly co-operate with the local dealers in all matters pertaining to the use of electrical appliances. The advice and service of its Engineering and Technical Departments will always be available.

The Company believes that by co-operation with its consumers and the dealers, advantage can be taken of the existing opportunity for the use of electrical appliances to the mutual benefit of all concerned and any enquiries will be given prompt and courteous attention by the local managers and all other members of this organization.

S. Phillips
Local Manager Edmonton

WOULD PRESERVE GAME ON ADMIRALTY ISLAND

A suggestion to make Admiralty Island, which lies off the Alaskan Coast about 100 miles north of Prince Rupert, and on the route of Canadian National Steamships, plying between that point and Alaska, a game sanctuary, has been made to the special Senate Committee on Wild Life Resources by the American Game Association.

Admiralty Island is about ninety miles long and forty miles wide. Great numbers of the beautiful Sitka deer are found there but its chief importance as a game preserve lies in its very large population of the Alaska brown bear and the grizzly. It is estimated that the island contains some 2,000 of these animals, or more than half the bear population of Alaska. These animals, experts say, are in danger of extermination and the creation of a game sanctuary on Admiralty Island is necessary to prevent it.

A colored preacher was trying to explain the fury of hell to his congregation.

"You all is sum mullun bun yunnin' out from a furnace, ain't you?" he asked.

The congregation said it had.

"Well," the preacher continued, "dey sno dat outfit fo' ten-cents in de place what I'm talkin' about."

Here and There

Hockey sticks to the number of 574,414, valued at $177,220, or an average of 30 cents apiece, were made in Ontario and Quebec factories in the same year numbered 68,305 with a value of $254,503.

The population of Canada, according to last year's census, is 10,353,774, an increase of 1,165,139 or 1,045,320, or 17.52 per cent. The largest provincial population is in Ontario with 3,434,445. Saskatchewan, Alberta and Manitoba rank third, fourth and fifth.

A new rose has been produced at the Canadian Government Central Experimental Farm, Ottawa, hardy enough to withstand the climate of Ottawa without protection. It is a pale pink, blooming until the middle of June.

Brigadier-General S. F. MacDonald, of Vancouver, will command the Staff Winter Carnival Toboggan Slide, December 23. The General, Mrs. Macdonald, and their small daughter Mary made the official opening slide-a-minute run down the slide.

The biggest moose of the 1931 season in New Brunswick, with an antler spread of 52 inches, fell to the gun of Andrew Porter, Philadelphia sportsman. There had been three moose shot this year in Hay Marsh, prize for this trophy, with spreads of 54 inches.

The Eastern International Dog Derby will be held at Quebec from February 28, 29 and 24. It is announced officially. Closing this, among the most colorful winter sport events of the season throughout Canada, the Dog Derby Carnival Ball will take place at the Chateau Frontenac Hotel.

The Oxford and Cambridge teams of riders from the Old Country piloted Canada to the Dominion title this year at the close of their exploits in plain and cross-country sport that thrilled over two hundred thousand fans during the week of January 5.

Creation of a Department of Communications, Canadian Radio Broadcasting, having supervision over the railway's telegraph, telephone and radio broadcasting services and taking the place of the present Department of Railways and Canals, is announced by Hon. Hugh Guthrie, Minister of Justice. Assistant Deputy Minister Gladstone was appointed general manager of the new department, taking the place of Sir Henry Thornton, retired general manager of the Canadian National system. Mr. Gladstone will be assisted by Mr. Thornton, who remains in the service.

With the retirement of J. C. S. Bennett, official deputy minister of the Department of Marine, after thirty years of a colorful career, Canada's merchant marine loses a personality. Mr. Bennett, who was born in Ireland and came to Canada in the 70's, began that career at the age of fourteen as a cabin boy on a sailing vessel. He rose through the ranks of the service, gaining his master's certificate at the age of twenty-one.

PIERRE LAVAL IS AGAIN PREMIER OF FRANCE

Paris, France. Pierre Laval, sturdy Auvergnat, again becomes head of the French Government as Premier in the reorganization of his cabinet.

He also took over the portfolio of Foreign Minister, held for so long by Aristide Briand, and indicated his distinct friend and predecessor in the premiership A. Andre Tardieu, to accept the post of Minister of War, vacated by the death of Andre Maginot.

Thus M Tardieu will go to Geneva as France's principal representative to the disarmament conference on February 2.

Succeeding Premier Laval in the all-important post of Minister of the Interior, on which the outcome of next spring's legislative elections may hinge, is young Pierro Chatenin, a disciple of Laval and Tardieu.

To succeed Tardieu in the agriculture Department, which controls and cares for France's great rural population, the Premier selected Achille Fould, young former undersecretary, who was given ministerial rank.

The French cabinet crisis, one of the briefest in the history of the third republic, thus was terminated. Premier Laval said he had urged M. Briand to participate in the work of the new cabinet in whatever capacity he felt able - presumably as minister without portfolio - so as to lend the weight of his moral influence to the incoming government's endeavor.

After reconstructing his cabinet, the Premier took the new members across the street from his office to the Elysee Palace to present them to President Doumergue, in accordance with custom.

Reorganization of the cabinet was decided upon after the death of War Minister Maginot had caused one group, and the illness of M. Briand, the veteran foreign minister, resulted in at least a temporary vacancy.

The Laval-Tardieu team is one well tried in foreign relations. Premier Laval, although a newcomer to the diplomatic game, was Painleve's spokesman during the past summer and autumn in conversations at London, Berlin and Washington, and was the first premier to welcome a German chancellor on French soil since the war of 1870. M. Tardieu was his country's High Commissioner to the United States, in 1918, one of the drafters of the Treaty of Versailles in 1919 under Premier Georges Clemenceau, and a negotiator at the London Naval Conference in 1930.

Drew May Attend Geneva Conference

Organizations Think War Veterans Should Be One Of Delegates

Toronto, Ont.- "Inclusion of Lieut.-Col. George A. Drew in the Canadian delegation to the Geneva Conference in February is being aimed at by a number of organizations bringing their influence to bear on the Government at Ottawa in this regard," Major Mutt and Shapiro stated it has been authoritatively learned.

"Those behind the move," the paper states, "are understood to be Canadian Legion executives and a number of kindred organizations desirous of having among the Canadian delegation one man who took an active part in the Great War."

Senator Thinks Canada Is Over-Governed

Says There Are Too Many Government Employees

Hamilton, Ont.- Senator George Lynch-Staunton, K.C., declared in an address here there was no reason why people should suffer want "if we lived within our means."

Senator Lynch-Staunton said Canada was over-governed. "The government has interested itself in everything at the people's expense. Practically swears everywhere and every fifth person in Canada is the servant of one government or another."

Visitor—"I suppose this rain will do the crops a lot of good?"

Farmer—"You're right, sir, an hour of it will do more good in five minutes than a month of it would in a week at any other time."

Governor-General Postpones Visit

Trip To Western Canada Will Be Made Next Autumn

Ottawa, Ont. The Governor-General has postponed until next autumn his trip through western Canada it was announced Wednesday night. January 18, at Rideau Hall. Originally planned for the spring, the trip now will be made in time to enable Lord Bessborough to attend the Canadian Pacific Exhibition in Vancouver next fall.

Except for one or two brief excursions to Toronto and Montreal the Governor-General and Lady Bessborough will remain in Ottawa for the parliamentary session. It will be the first session opened officially by Lord Bessborough.

Lady Bessborough will leave for England at the end of February for a short visit. Subject to the date of the Ottawa Imperial Conference, the Governor-General expects to take up his summer residence in Quebec City at the beginning of June.

In Favor Of Union

Manitoba Liberals Endorse Proposal Of Union Government For Election

Winnipeg, Man. Action of Dr. Murdock MacKay, Provincial Liberal Leader in approving Premier Bracken's proposal of a Union Government for Manitoba was endorsed by the Manitoba Liberal Association at its annual meeting here. Sharp opposition to the move of several Liberal and Progressive forces in the Province was expressed but the proposal carried on a standing vote and no amendment to give it the traditional six-months' hoist was defeated.

Premier Bracken some months ago invited the Liberal, Conservative and Labor opposition groups in the legislature to join in the formation of a union government with cabinet representation for all. The invitation was rejected by the Conservative and Labor wings of the Opposition but accepted by the Liberals, Premier Bracken and Dr. MacKay who defended his stand at the convention, and was endorsed.

Ex-Kaiser's Sister Dies

Former Queen Sophie Of Greece Succumbs To Lingering Illness

Frankfort-On-Main, Germany. — Former Queen Sophie of Greece, sister of former Kaiser Wilhelm, died at a clinic here after a lingering illness from cancer. She was 61 years old.

The one-time queen of the Hellenes, had lived in Florence, Italy, since the death of her husband, King Constantine, in exile at Palermo on January 11, 1923. She came to Frankfort last April, under the advice of a specialist, who operated on November 13, but found her ailment too far advanced for successful treatment.

During the last week, she underwent a series of relapses. Her children, George, Paul, Helen Queen of Rumania and Irene, were called to the bedside each time.

Meighen May Be Appointed To Senate

Likely To Succeed Late Sir George Foster In Report

Ottawa, Ont.- The Journal publishes the following:

"The appointment of Rt. Hon. Arthur Meighen, a former Prime Minister of Canada, to the Senate in succession to the late Sir George Foster, and also the naming of the former Conservative Leader to the position of government leader in the Upper House is being favorably considered by the government."

Hon. W. H. Willoughby is the present government leader in the Senate. During the last session Senator C. D. Robertson, Minister of Labor, represented the government in the Senate and assisted in the leadership.

Honor Is Denied

Edmonton, Alberta. Rumors that Premier Brownlee will never communicate with the Alberta for an Ottawa post are not treated with much consideration here. The legislature is due to open February 4. There is not even indication of a cabinet shake-up.

HEADS BRITISH REPARATIONS DELEGATION

Sir John Simon, British Foreign Minister, who will lead the British delegation to the Reparations Conference at Lausanne according to reports from London, England.

Manitoba Farmers Need Aid

Appeal For Dominion Funds Made By Minister Of Agriculture

Winnipeg, Man. An appeal for Dominion aid to hard-up farmers of Manitoba was made Wednesday January 13, by Hon. Albert Prudentaine, Provincial Minister of Agriculture when he conferred with Rt. Hon. Robert Weir, Minister of Agriculture in the Dominion Cabinet. The situation among farmers in Manitoba, generally was the desperate as those of other parts of Western Canada, he said.

Many farmers were facing destitution, continued Mr. Prudentaine, and said that aid in the shape of feed and seed grain was necessary for them to face another year. Unless food was forthcoming many would be forced to part with their cattle, he said.

Trans-Atlantic Flight

R.A.F. Aviator Will Attempt Aeroplane Solo Flight Next summer

Nelson, B.C.—Eric Redgrave-Gunner, of Fernie, B.C., who has announced his intention to attempt this summer a trans-Atlantic aeroplane solo flight, and also a trans-Canada flight from Montreal to Vancouver, is a pilot of many years experience, having taken up flying in 1914 before the outbreak of the war. He has received word of financial backing from England for his trans-Atlantic attempt.

A pre-war pilot in England, Redgrave-Gunner has been a commercial pilot and instructor in the Crow's Nest Pass cities of Fernie and Cranbrook. He was born in Alton, Hampshire, England, in 1896.

Lower Living Costs

Ottawa, Ont. "Cost of living index numbers, with very few exceptions, fell much faster in 1931 than in 1930, which may be taken as a favorable development. Wholesale and retail price levels must come closer together before a substantial improvement in business can be anticipated," says a report on price movements in 1931, issued recently by the Bureau of Statistics.

Condemns Protection Policy

Hon. Mackenzie King Asks Government To Modify Position On Tariff

Winnipeg, Man. With the declaration that, speaking generally if returned to power tomorrow the Liberal Party would restore the tariff levels which were in effect when it went out of office, Rt. Hon. Mackenzie King, Liberal Leader, condemned the protectionist policy of the present administration. He made a plea for action by members of parliament with a view to securing modification in the government of its position on the tariff in order that the coming Imperial Economic Conference might not prove the "fiasco" which that of 1930 had been.

The Liberal leader spoke at a large banquet which marked the close of the annual meeting of the Manitoba Liberal Association. An enthusiastic reception was accorded him, and at the conclusion of the meeting he was the central figure at an informal gathering where hundreds of those present were introduced.

His speech, first of the new year, contained strong criticism of the government on the grounds of waste and extravagance in the conduct of unemployment relief. It demanded why a tariff board had not been appointed. At a time of fluctuating exchanges and depreciated currencies such a board would have been valuable. The legislation had been passed at the last session.

But it was in connection with the railway situation that the Liberal leader voiced his strongest protest. The holding of secret sittings by the commission on transportation which is at present meeting in eastern Canada, he condemned in the most definite terms. "Wrong by indefensible" was the phrase used by Mr. King in dealing with these secret sittings.

The Canadian National was not to be made "the scapegoat for the condition into which Mr Bennett's policies have served to bring this country," Mr. King asserted strongly. It must not be caused to "serve the ends of any transportation monopoly in Canada."

No Sunday Shows

Sheep Proposal To Hold Moving Picture Shows On Sunday Is Defeated

Winnipeg. Man Proposal to hold Sunday moving picture shows here, with revenues to be used for relief of unemployed, has been dropped. Mayor Ralph H. Webb said. Opposition to the plan had been expressed by so many citizens, the mayor said, that he doubted if even the Ammoussi returns would be worthwhile.

Collections were to be taken at the theatres, four of which would put on shows Sunday nights after church services were over.

Reward Superior To Gertrel

Saskatoon, Sask Dr. S. K. Larmour, cereal chemist at the University of Saskatchewan, in charge of the milling and baking laboratory, in reporting on the comparison of Gertrel and Reward wheats, showed that Reward was far superior

JAPAN'S "OLD FOX" AND FAMILY

Here is the first intimate photograph of M. Inuyoshi Inukai, new Premier of Japan, made as the statesman sat in his family circle, at their home in Tokyo. Left to right are Mrs. Inuyoshi Inukai, Premier Inukai, Mrs. Nakadoan, his daughter-in-law, and one of the Premier's many grandchildren. The venerable statesman surely has the opportunity for family reunions when he is directing his country's Manchurian policy, as this photo may be regarded as distinctly unusual.

R. C. M. P. MAY TAKE OVER THE POLICING OF WEST

Ottawa, Ont.- Negotiations for the assumption by Royal Canadian Mounted Police of the policing of Alberta along the same lines as in Saskatchewan are continuing. An announcement of a definite agreement between the Dominion and the province is expected within a few days.

A Calgary despatch asserts that efforts are being made to have Alberta take over the police-work of the city, while the R.C.M.P. assume the work now performed by the Provincial Police.

The statement in the despatch, that the provinces generally were negotiating with the Dominion to the end that the police-work throughout the country might eventually come within the control of the R.C.M.P. could not be confirmed.

Some three years ago the R.C.M.P. assumed the duty of policing Saskatchewan, taking over the work that had been formerly done by the Provincial Police there. An agreement was arrived at between the Dominion and the Province whereby the latter undertook to contribute a lump sum to the federal treasury over a period of years in order to defray the expenditure incurred in the arrangement. The proposal to extend this system to Alberta emanated from the province as a result of the success attending the working out of the agreement in Saskatchewan.

Winnipeg, Man Manitoba would be proposed to consider any proposition leading to the policing of the whole Dominion by the Federal Government, Hon. W. J. Major, Attorney-General of Manitoba, told the Canadian Press.

He added that he had had no word from Ottawa and the matter now had he been in conversation with Alberta. He said he could not predict what reception any suggestion would get from Manitoba, but remarked that such a plan would save the provincial administration considerable money.

"At the present time the majority of the provinces in Canada are negotiating with the Dominion Government for the taking over of the policing of the provinces by the Royal Canadian Mounted Police."

Cannot Hold Two Positions

Civil Servants Forbidden To Accept Municipal Appointments

Ottawa, Ont.- The Government has decided to allow Controllers Finance Charpentier and Daniel McCann to remain at their posts in the public service and also serve on the Board of Control for the balance of the year but will issue an order forbidding all government servants in future to accept municipal appointments," the Journal says.

"The decision of the government forbidding all government employees throughout the country from accepting municipal positions is of widespread interest as it takes in every section of the country.

"It is decidedly understood the order forbidding government employees to accept municipal positions is a general one so that it will affect postmasters serving in rural municipalities and all others paid from the Federal Treasury who add the efforts of their community to their other activities.

"It is not expected the government's decision will affect municipal positions which are not elective and where no fees or salaries are paid such as on suburban roads commissions or on school boards.

"It is understood the aim of the cabinet is to prevent civil servants from drawing two salaries and also having their working hours interfered with by outside matters."

Report Not Confirmed

Winnipeg, Man Officials at wheat pool headquarters here said they know "nothing about" a report published in the Paris edition of the Chicago Tribune that France has agreed to buy 36,000,000 bushels of wheat from Canada. Canadian officials in Paris deny there is any truth in the report.

Incredible Airplane Speeds

Predicted That a Speed Of 500 Miles An Hour Is Not Unattainable

Now that an airplane has been driven at over 400 miles an hour, engineers are wondering just how fast man can fly whether there is any physiological reason to suppose that the human body cannot stand the strain of speeds much greater than those so far attained. The pilots who took part in the last Schneider cup race, when the record was broken, felt no discomfort on a straight course apart from the deafening roar of the engines. For a second all became black before their eyes when they swirled around a pylon, but they never lost their consciousness since the stresses set up in the airplane at 400 times an hour were nine times as great as at 133 miles, the racer must of necessity swoop in wide circles. Apart from this, only pilots trained as carefully as prizefighters can cut corners at high speed. So far there is not the slightest evidence that anything like the ultimate speed limit has been reached. One British engineer who has examined this question with some care predicts a speed of 750 miles an hour within a generation.

High accelerations are more to be feared than continued high speed. What body accelerations mean is driven home when an automobile is started with a bark. The body is flung against the back of the seat. In a 5,000-mile-an-hour rocketship the starting acceleration might be so high that the passengers would be squeezed into a pulp against a vertical partition as if by an invisible band of gigantic power. But if slow starts are possible, there is no reason for any speed limit on a straightaway flight.—New York Times.

Cold Weather Lowers Egg Production

Storage Holdings Less At First Of Year Than At Same Period In 1931

Belief for the heavy stocked current egg market is expected to follow the advent of wintry weather in Manitoba and Saskatchewan, states a report of the Dominion Department of Agriculture.

British Columbia and Alberta, where milder conditions prevail, have had very heavy production and prices have been brought down to new low levels for the season. In the case of Alberta, due to low egg values, marketing of same has increased appreciably.

Preliminary reports of storage holdings on January 1 at Montreal, Toronto and Winnipeg indicate total stocks of 2,123,000 dozen eggs, considerably below the figures for the same period of 1931.

Vancouver's Maternal Mortality

Vancouver's maternal mortality rate last year of 2.8 per 1,000 live births was the lowest in history, and the infant mortality rate of 33 per 1,000 was only slightly higher than the 1930 record of 32.6, it was learned from figures prepared by the civic health department. The 2.0 maternal toll compares with 4.8 in 1930 and 3.7 in 1929. Thirteen mothers died in childbirth in the year.

Huge electric flight bulbs have been put on a Los Angeles speedway to enable auto racing at night.

The Chinese art of carving jade is known to have originated before the year 2000 B.C.

"You must treat me with respect or I am to a certain extent your employer."

"How is that?"

"I have just thrown a pot of rubbish on the personnel."—London Ulenspiegel, Berlin.

W. N. U. 1900

British Coal

Should Be No Objection To Increased Imports Of Australian

There should be no objection to increased imports of British anthracite coal into Canada, officials of the Mines Department have said, in commenting on a London cable to which it was forecast that this subject would be on the agenda of the forthcoming Imperial Conference. The problem in the past it was stated was the difficulty in profitably bringing British coal to Canada because of the lack of return cargoes for the coal-carrying vessels. It was also suggested that there would be more cargo space required on this side if the imports were to be increased.

The London Morning Post said the agenda of the Imperial Conference would include the question of how far Canada would go in taking British coal in return for increased wheat shipments under the proposed quota plan of the National Government.

Imports of British coal have been normal but at that only one ton in thirteen comes in from England. The other twelve come from the United States. Exports to Canada are to October 30, 1931 were about 13 million tons. It is felt this should go to England.

Drink Milk For Good Teeth

Milk Is High In Calcium and Is a Good Tooth Builder

That good teeth have a direct relation to good health and their defective condition may lead to serious illness, are true well-established facts. Medical authorities agree that children every where should be given a sufficient amount of this food to supply the calcium requirement. There will be no danger of a deficiency of calcium if served as a beverage, particularly for children, and generously used in cooked cereals, soups, creamed meat and vegetable dishes, and milk desserts. Department of Agriculture, Ottawa.

Eels For Holiday Fare

Live Eels Captured In St. Lawrence River Sent To New York

Thousands of live eels captured in the St. Lawrence were sent to New York to serve as Christmas fare for the large Italian element in that city.

Reports from New York indicate that the Italian community were in a high fever of excitement over the arrival of the eels. They insist upon having them alive. Prepared with herbs and olive oil, they are served with the best red wine that conditions permit.

From the time an eel is hatched it is two and a half years before it reaches the St. Lawrence from the spawning beds a mile down in the Sargasso Sea.

Germans Steal Gold

The gunboat "Panther," which represented the former Kaiser's method for "at Agadir in 1911, was put up at public auction recently and knocked down to a Frankfurt bidder for 20,315. Bidding started at $750. With shipping in a sad state of depression, there is little likelihood that the ex-man-of-war will be converted into a cargo boat; probably she will be broken up for scrap at the end of the war and until recently, the "Panther" was used as a survey vessel in the German navy.

For falling on injurious, under several proverbs to be taken from it stream, spring, or deep well: an water from reservoirs often contains chemicals or other chemicals.

Visiting Prince Tries Canadian Sport

Prince Commends Lieutenant

Mr. Marquis Childs, in many interesting ventures over the prince's early years, when the fifth Duke of York was the "starvation" of Oxford and Cambridge, visited the Arctic on one occasion with the Labrador expedition. Now Prince Constantin Lieutenant of the Oxford Team, and one of the Duke's former crew comedy rumors. It is advertisingly known among his colleagues as "Cousin" and found much that was beautiful in Canada's mountains. His home land is one of Europe's smallest independent principalities on the Austro-Swiss border.

Potato Disease

Circular Issued In Culture Showing Wide Range Of Diseases

A special circular showing in natural colours a range of thirty-six potato diseases, with a precise glossary of identification and description, has been prepared under the direction of the Dominion Botanist, Dr. H. T. Gussow, which should prove of immense assistance to potato growers and farmers throughout Canada. From the illustration supplied in natural colours and the descriptive glossary a faulty tuber and thus guard against serious loss through planting diseased seed. The most effective way in which to prevent spreading various potato from disease to use only home Seed Canadian certified seed potatoes. Published by direction of the Hon. Robt. Weir, Federal Minister of Agriculture, this circular is available without cost to interested persons on application to the Publications Branch of the Department at Ottawa.

Poor Opinion Of Professor

Prof. T. W. Lobervoord, of Wycliffe College, Toronto, deplores the decline of the reverence of the child for the aged. He told tells the story of a little boy, aged about nine, who asked: "Mr. Lobervoord, do you believe in Santa Claus?" "Do I believe in Santa Claus?" the novent repeated, not understanding that the lad "Of course I do. Why not?" "Well," the little boy retorted, "You must be dumb."

In order to test the fitness of pilots, whether they are too nervous or by fly, a device known as a "probicmeter," has been developed.

Farming and Depression

Agriculture Not Quite As Badly Off As Some Other Industries

The world can be said to be suffering more from over-production than over-production. This opinion was expressed in an emphatic manner by Dr J E Lattimer, professor of Agricultural Economics at Macdonald College, Ste Anne de Bellevue in a recent address delivered here on Some Aspects of the Agricultural Situation."

Farming was not in quite as sorry a predicament as some other industries because the volume of business was fairly well maintained Dr Lattimer observed. As an industry however, it had small purchasing power for manufactured goods at present prices, awaiting more or less a readjustment of prices before entering the market as a buyer This was largely from compulsion, he remarked, but also partly from resentfulness at the present price discrepancy Hence there was the alternative still open to many farmers of either borrowing their prices or taking their punishment in unemployment Dr Lattimer said.

Work For Horse-Shoers

Smithy Shops In Montreal Are Still Flourishing

In these days of motors, horse-shoeing has practically no place as an art in the large cities of Canada. In Montreal, however, there can still be found a few independent blacksmiths besides those employed by livery companies such as the railways and breweries, who do their own work.

According to the proprietor of one of these establishments which looks much the same as it did when the smith and fire of the 18th century. The shoeing of horses is an active enough business as the clients wear out rapidly on the hard city pavements. From three weeks to a month is about the normal duration. Some horses, particularly the heavy dray type, are quite hard on their feet wear and frequently require a change of steel oefords after two weeks of hauling. So long as the door-to-door deliveries are made by baking, laundry and grocery concerns, the horse will remain an integral part of the city's commercial life, he believes.

Waves Of War

A three-cornered conflict, involving Japan, China and Russia was forecast by Dr. T. S. Koo, Chinese representative of the World's Student Christian Federation, who arrived in Montreal for a lecture tour of Eastern Canada. The well-known Chinese scholar expressed his opinion that the three great Oriental powers were slowly drifting into "what may prove to be a very serious conflict."

Views are among the oldest things on earth, and yet history does not chronicle the loss of a single one.

Race For Height

Empire State Building In New York World's Tallest Office Building

At the dedicatory exercises, held on the 86th floor of the Empire State Building in New York which rears 1,250 feet into the sky of midtown Manhattan, Mr R. H Shreve associate architect, revealed some of the astounding features of a structure that is victor in the race for height

Mr Shreve stated that the Empire State Building was built at 200,000, 000 pounds Furthermore as reported in the New York Times

He compared however that the great bulk weighed no more than a 45 foot rock pile that might cover its site

"He explained that 210 columns supported the burden of the building and that the structure was vertical within a variation of five eighths of an inch

The load was distributed so evenly that the weight on any given square inch was no greater than that normally borne by a French heel, he declared.

Col W A Starrett, head of the construction company which completed the building in less than a year from the day work on the first of the 210 columns or legs on which it stands was installed, revealed further interesting facts As reported in the Herald Tribune

"Three hundred tons of chromium nickel steel were used in the pier trims of the building, and 450 tons of aluminum were used to make the spandrels or panels under the windows and in the mooring-mast enterprise

"About 200,000 cubic feet of limestone, of which the building exterior is composed, were used, and 10,000,000 common brick. Six thousand four hundred windows were in the structure.

"The completed building contains 27,000,000 cubic feet."

Has the limit been reached?

"How long will this building, which is 225 feet higher than the Eiffel Tower at Paris, retain its supremacy as the highest building ever erected by man? asks the Literary Digest, and the New York Times replies: Nearly as long as the office skyscrapers of today have approached the limit of economic practicability in height.

War On Billboards

Fleeing Scenic Beauty From One Of the Worst Forms Of Mutilation

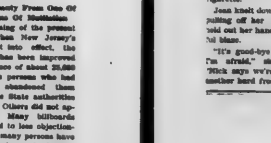
Since the beginning of the present calendar year, when New Jersey's billboard law went into effect, the Jersey tradesmen has been improved by the disappearance of almost 20,000 billboards. Some persons who had erected billboards abandoned them and authorized the State authorities to remove them. Others did not apply for licenses. Many billboards have been removed to less objectionable locations and many persons have ceased to use this form of advertising. On the other hand, some billboards have been erected. The net result, however, is in the direction of freeing scenic beauty from one of the worst forms of mutilation imaginable.

Marbles To End Static

H. L. Mayson, formerly on the staff of the naval hydro department at Barnia, and a practicing engineer, has received word from the United States patent office at Washington that his invention of the "colloidal-dryer" has been allowed for patent. This instrument is said to be the first of its kind capable of arresting static.

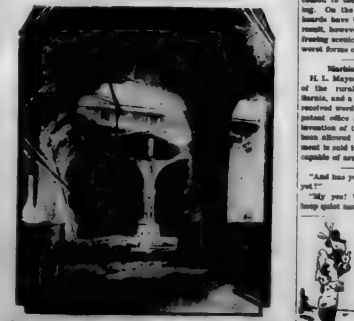
"And has your baby learned to talk yet?"

"My yes! We're boosting him to long quiet now."



"But why don't you go to the dentist?"

"We are enemies."—Kasper, Stockholm.



AFTER THE VATICAN LIBRARY CRASHED

This picture shows the scene of the collapse of the roof in the famous Vatican Library after the majority of the debris had been removed. Five persons lost their lives here when the historic structure crashed, and fifteen thousand volumes, hundreds of incunabula (rare, very old books), were put in work and repairing the books and repairing the damage.

THE HOUSE OF DREAMS-COME-TRUE

BY

MARGARET PEDLER

Author Of "The Splendid Folly," "The Stones Of Babel," Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XI.

"The Sins Of the Fathers——"

A few days later, Jean, coming in from a long tramp across country in company with Nick and a half-a-dozen dogs of various breeds, discovered Tormarin lounging in a chair by the fire. He was in riding kit, having just returned from visiting an outlying corner of the estates where his bailiff had suggested that a new plantation might be made, and Jean eyed his long supple figure with secret approval. Like most well-built Englishmen, he looked his best in kit that demanded the donning of breeches and leggings.

A fine rain was falling out of doors, and beads of moisture clung to Jean's clothes and sparkled in the blown tendrils of russet hair which had escaped from beneath the little turban hat she was wearing. Apparently, however, her appearance did not rouse Tormarin to any reciprocal appreciation, for, after bestowing the briefest of glances upon her as she entered, he averted his eyes, concentrating his attention upon the misty clouds of smoke that drifted upwards from his cigarette.

Jean knelt down on the hearth and, pulling off her rain-soaked gloves, held out her hands to the fire's cheerful blaze.

"It's good-bye to all the skating, I'm afraid," she said regretfully. "Nick says we're not likely to have another hard frost like the last, now that the weather has broken so completely."

"No. It's April next month supposedly springtime, you know," returned Blaise indifferently.

He seemed disinclined to talk and Jean eyed him contemplatively His attitude towards her baffled her as much as ever He was unfailingly courteous and considerate, but he remained, nevertheless, unmistakably aloof, avoiding her whenever it was politely possible, and when it was not, treating her with a cool neutrality of manner that was as complete a contrast to his demeanour when they were together at Montavan as could well be imagined. Indeed, sometimes Jean almost wondered if the events of that day they spent amid the snows had really taken place they seemed so far away, so entirely unrelated to her present life, notwithstanding the fact that she was in daily contact with the man who had shared them with her.

"It was rather uncomplimentary of you not to come skating with us a while since," she remarked at last, in an accent of reproach in her voice. "Was my performance on the rink at Montavan so amusing that you felt you couldn't risk it again?"

He looked up, his glance meeting hers levelly.

"You've phrased it excellently," he replied briefly. "I felt I couldn't risk it."

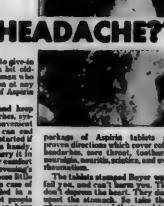
A sudden flush mounted to Jean's face There was no misunderstanding the significance that underlay the curt words, which, as she was vividly aware, were by no means what they ever to her skill, or absence of it, on the ice.

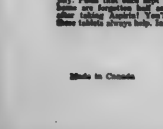
Blaise made no endeavour to relieve the awkward silence that ensued. Instead, his eyes rested upon her with a somewhat quizzical expression, though he were rather entertained than otherwise by her evident confusion. Jean felt her indignation rising.

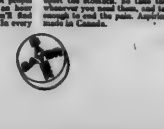
"It is fortunate that other people are not so—nervous," she said disdainfully. "Otherwise I should find myself as isolated as a fever hospital."

"It is fortunate indeed," he agreed politely.

In the course of the three weeks which had elapsed since her arrival at Blaise, Jean had developed several amusing passages-at-arms with her host. Women-like, she was bent on getting the last word of every encounter, forcing him into an explanation or his altered attitude towards her—since a woman can be expected to endure that a man should completely change from ill-suppressed ardour to a cool, impersonal detachment of manner, by declining to know the reason why! But in every instance Tormarin had carried off the honours of war.







"SICK HEADACHE?"

It is not necessary to give in to headaches. It is just a bit old-fashioned! The modern woman who finds a headache coming on at once takes Aspirin, some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your appointments. Headaches, cyclonic pains, come at inconvenient times. So do colds. You can end them before they've fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse and insure your comfort while shopping, your enjoyment of the theatre. Those little coughing notes that bring a cold on "overnight" by day are nailed in a jiffy. Pains that once kept people home are forgotten half an hour after taking Aspirin! You'll find these tablets always help. In every package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, sciatica, and even rheumatism.

The tablets stamped Bayer won't fail you, and can't harm you. They don't depress the heart. They don't upset the stomach. So take them as whenever you need them, and take them straight for the pain. Aspirin is made in Canada.

Made in Canada

WHEN FOOD SOURS

ABOUT two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach contents have been over-stimulated. There is excess acid. It's easy to correct it with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia — just a tablespoonful in water. It is pleasant, efficient and particularly beneficial when almost instantly it is the approved method of physicians for correcting excess acids. Get a bottle—any drug store.

The best dentists — for clean teeth and healthy gums — Phillips' Dental Magnesia, a superior tooth paste that neutralizes harmful acid-mouth. (Made in Canada.)

parrying her small thrusts with a lazy insouciance which she found galling in the extreme

Hitherto she had encountered little difficulty in getting pretty much her own way with the men of her acquaintance, who had remarked at last, the temperament and charm of the red-haired type to compass that But her efforts to elucidate the cause of the change in Blaise Tormarin were about as prolific of result as the efforts of a butterfly at stone-breaking.

Fortunately for the preservation of peace, at this juncture there came the sound of voices, and Lady Anne entered the room, accompanied by a visitor. Her clever, grey eyes flashed quickly from Jean's flushed face to those of her son, back to the second the atmosphere, who made no comment.

"Blaise, my dear, here is Judith," she said pleasantly. "I found her wandering forlornly in the lane, so I drove her back here She has just returned from town, and for some reason her car wasn't at the station to meet her."

"I wired home saying what time I should reach Cosmo's Havre," explained the new-comer. "But as I was rather late reaching Waterloo, I rashly entrusted the wire to a small boy to send off for me, and I'm afraid he's played me false. I should have had to trudge the whole way back to Wilmer Ferry if Lady Anne hadn't happened along."

Lady Anne turned to Jean, and, laying an affectionate hand on her arm, drew her forward.

"Jean, let me introduce you to Mrs. Craig. My new acquisition, Judith," she went on contentedly. "A daughter. I always told you I wanted one. Now I've borrowed someone's else's."

Jean found herself shaking hands with a slender, fair-haired girl, a young man who moved with a slow languorous grace that was almost snake-like in its peculiar suppleness. She gave one the impression that she had no bones in her body, or that if she had, they had never hardened properly but still retained the pliability of cartilage.

She was conventional enough — the consequences of it erupted later, of long residence in India—with suites, mink-coloured eyes, appearing almost purple in shadow, and a straight, chin-tipped mouth. Jean decided that she was not in the least pretty, though attractive in an odd, feline way, and that she must be about thirty-two. As a matter-of fact, as Judith Craig was forty, but no one would have guessed it, and she would certainly not have confided it.

Presently Nick, who had been personally supervising the feeding of his beloved dogs, joined the party, greeting Mrs. Craig with the easy informality of an old friend, and shortly afterwards Denise brought in the tea-things.

"And where is Berlie?" enquired Mother of Mrs. Craig, as he handed her tea. "Didn't he come back with you, so

"Goodbye? Oh, no. He's not coming down till the end of April. You know he detests Wilmer Ferry in the winter. Insanely wet swamp, he calls it! He's dividing his time between London and Leicestershire—London, while that long frost stopped all hunting."

Mrs Craig was evidently on a footing of long-established intimacy with Lady Maple household, and Jean, listening quietly to the interchange of news and of little personal happenings, regarded her with rather critical interest. She was not altogether sure that she liked her, but she was quite sure that, wherever her lot might be cast, Judith Craig would never occupy the position of a nonentity She had considerable charm of manner, and there was a quaint unexpected fascination about her smile —unexpected, because, when in repose, the thin lips lay folded together in a straight and somewhat forbidding line, whereas the moment they relaxed into a smile they assumed the most delightful curves, and two little lines, which should have been dimples but were not, cleft each cheek on either side of the corners.

All at once Mrs Craig turned to Jean as though she had made up her mind about something over which she had been hesitating.

"Have I seen you anywhere before?" she asked, her charming smile softening the abruptness of the question. "Your face is so extraordinarily familiar."

Jean shook her head.

"I don't think so," she answered. "I'm sure I should remember you if we met anywhere Besides I've lived abroad all my life; this is only my first visit to England."

"I think I can explain," said Lady Anne. There was a deliberateness about her manner that suggested she was about to make a statement which she was aware would be of some special interest to at least one of the party. "Jean is Glyn Petersen's daughter; so of course you see a likeness, Judith."

W. N. U. 1900

"For Light, Flaky

Biscuits

use Magic

Baking Powder,"

says Miss M. McFarlane, dietitian of St. Michael's Hospital, Toronto

"I RECOMMEND Magic because I know it is pure, and free from harmful ingredients."

Miss McFarlane's opinion is based on a thorough knowledge of food chemistry, and on close study of food effects upon the body. On practical cooking experience, too.

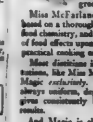
Most dietitians in public institutions, like Miss McFarlane, use Magic exclusively. Because it is always uniform, dependable, and gives consistently better baking results.

And Magic is the favorite of Canadian housewives. It exactly suits their cooking conditions.

You'll find Magic makes all your baked foods beautifully light and tender — and gives you the same perfect results every time.

• • •

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., 21 Jarvis Avenue and Library Square, Toronto, Ont.



Made in Canada

Little Helps For This Week

"If any man will come after me, let him deny himself, and take up his cross daily, and follow Me."—Luke ix. 23.

Miss is a daily cross of petty cares, Of little duties pressing on my heart,

Of little troubles hard to reconcile,

Of wearied trenches overcome in part.

I dare not lay it down: I only ask That, taking up my daily cross, I may

Follow my Master, humbly, step by step,

Through clouds and darkness, unto perfect day.

Christ comes to us morning by morning to present to us for the day then opening divers little crosses, blessings of our own will, interferences with our plans, disappointments of our little pleasures. Do we kiss them, and take them up and follow in the last war, like Simon the Cyrenian, or do we toss them from us scornfully because they are so little, and wait for some great affliction to approve our patience and resignation to His will? Despise not little crosses; for when taken up and lovingly accepted at the Lord's hand, they have made men meet for a crown, even the crown of righteousness and life, which the Lord hath promised to them that love Him.—Edward Meyrick Goulburn.

Try Lydia E. Pinkham's Vegetable Compound

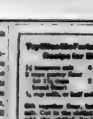
Poor girl . . . she has the same old backaches . . . backaches . . . and blues. She ought to try Lydia E. Pinkham's Vegetable Compound in tablet form.

"Summer Complaint" Danger for BABY'S

If symptoms are mild: 6 tablespoonfuls Milk; 1 tablespoonful Lime Water; 1 tablespoonful Corn Syrup; 1 teaspoonful Cocoa.

If symptoms are severe: Use Milk and Lime Water only.

Milk supplies fever, helping germs and toxins to be carried off in the stools. Lime Water is a disinfectant. Corn Syrup with a thousand times more vitamin B than cod liver oil, is a builder of resistance. Boil milk and lime water before and after adding corn syrup. Feed every 2 hours as usual. Give 1 to 15 minutes.



Athletes and Heart Trouble

No Such Thing As "Athlete's Heart," Says University Professor

"Athlete's heart" is non-existent so far as two University of Wisconsin professors have been able to determine. Coaches have long guarded against overworking athletes in the belief that too strenuous competition resulted in enlarged hearts and a consequent loss to efficiency. Experiments at Madison have shown no evidence of hypertrophy in athletes. Dr. Walter J. Meek and Prof. J. A. H. Ryzler, professors at physiology made observations on 85 men and 84 women at the university. All had indulged in four years of high school athletics and at least two years of college athletics.

LOCAL NEWS

On Thursday, January 14th, of fifteen and members of Princess Rebekah No. 32 presented Sister McNaughton, with a gift of remembrance, before leaving for Vermilion.

Mr. Bill Phalen of Dung Creek district returned to-day after having paid a visit to Rochester, U.S.A.

Mrs. M. Elsas of Calgary, Alberta is spending a fortnight with Mr. and Mrs. C. Magor

A rink from the Strathcona Ladies Curling Club motored down on Friday, January 15th for a friendly game with the Fort Ladies Club.

Owing to the unfavorable weather Granite Rink of Edmonton was unable to send their rink.

The following rinks played:—
Scona: Mrs. Neale, Mrs. Lawrence, Mrs. Morrison, Mrs. Muter.
Fort: Mrs. Astley, Mrs. E. Flintoft, Mrs. E. Hallam, Miss J. Gant.

The local ladies got the first score and Scona won the next five, at this time the local ladies rink thought that they were in for a real trimming however the home team finished with nine and the visitors with five.

After the game Mrs. C. Edwards kindly loaned her home for tea and everyone enjoyed it after the cold. There was a full attendance of the Club present.

Correspondence from the country points is lacking this week, due no doubt to the U.F.A. convention being held in Edmonton.

Notice To Creditors

IN THE MATTER OF the Estate of KATERINA KREBS, late of Bedford, in the Province of Alberta, Widow deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above mentioned Katerina Krebs, who died on the 7th day of November, A.D. 1931 are required to file with the undersigned solicitors by the 1st day of March, A.D. 1932, a full statement duly verified of their claims and of any securities held by them and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

DATED this eleventh day of January A.D. 1932.

"Not the least tossin bit Grandpa, but I frowned up awful the first few days."

Here and There

In 1930 the Canadian Pacific Railway paid out in taxes in Canada $7,647,695 and for the year 1931 its taxes will run to over $7,500,000. This brings the company's total tax payments in Canada from its incorporation to date to more than $21,500,000.

Jim Londos, world heavyweight wrestling champion, on a recent trip into the New Brunswick woods, bagged a black bear, weighing 500 lbs. The animal, wounded by two shots, charged Londos who dropped his rifle and resorted to a knife with which he killed the bear.

Nova Scotia is coming into its own as a holiday province. In 1931 more than a quarter of a million tourists visited the province, the largest number of summer visitors in its history, according to records by Hon. P. C. Black, provincial Minister of Highways.

To have joined the Canadian Pacific Railway at the time of its organization in 1881 and to the last seven years to have examined most of the properties in another rush, than any other employee of the company, is the outstanding record of Albion Meyers, of Toronto, who has just received from the position of Rate Examiner for the Motive Power department at Montreal.

The Brockville Recorder in a recent editorial urges all Canadians who are figuring on holidaying outside the Dominion this winter to remember the advantages of British Columbia where the Canadian dollar stands at par and where the climate is the equal of any to be found in the United States. Great Britain, the editorial adds, has set the example for Britishers when Canadians should be patriotic enough to follow.

FORT [illegible] DRAW WITH LAMONT IN FAST GAME

On Jan. 20th. Coach Cecil Shaw's Senior Hockey Team held the Lamont Seniors to a 3-3 draw. The game was fast and occasionally a fight showed signs of being started, but were soon quelled by referee Carroll.

The Fort took the lead after ten minutes of play in the first period when Earl Lane stick handled his way to the Lamont goal and netted his own rebound. Hutton and Henry made dangerous rushes in this frame also but were outgunned by the rival goalie Howard. First period ended 1-0 in favor of the Fort.

In the second period Lamont evened the count when Jacques, Lamont defence man scored on a three man rush. With five minutes of play, Lane duplicated his first effort and this time he made sure that he had no rebound to play on, drawing Howard out of the goal he netted the puck to break the tie. Hutton, Henry and Karron's efforts to score were all turned aside by the agile Howard. The second period ended 2-1 for the Fort.

The third frame produced some fast skating and close checking. Lamont evened the count when Jacques neared his second goal. Fort forged ahead once more when Lane beat the Lamont forwards, drew the defence to one side and then passed to Bill Caulf who was left uncovered in front of the Lamont goal and he made no mistake in denting the twine. Lamont pressed hard after this and were rewarded by Jacque's third goal which deadlocked the game.

The rival goalies Howard and Peacock turned in fine exhibitions.

Jacques and Egger were the outstanding players for Lamont, while Lane, Hutton, Henry and Karron were the best for the Fort.

Russell Caroll refereed the game.

A fair crowd attended the game and we hope to have a much larger one when Bruderheim plays the locals here Thursday night, Jan. 28.

Line-ups:		
Howard	Goal	R. Peacock
Jacques	Defence	Trelaw
Maydonosky		Kinnear
Ross	Forwards	E. Lane
Egger		Gant
Briggs		Karron
Johnston	Subs	Shenkeld
Sherwin		Flintoff
Lenz		Lamontown.

TOWN COUNCIL MEETING

A regular meeting of the Town Council was held on the 21st., at 7:30 p.m. Present Mayor G. T. Montgomery, Councillors Simmons, Gaul, LeBlanc, Lalonde, Smith, and Graham.

The minutes of the last regular meeting were read and adopted.

The following accounts were passed for payment:—
Dept of Public Health 60c; Fort Hardware 60c; Western Municipal News $3.26 for dog tags: Jas. Graham $1.00, W. A. Graham $4.00; Calgary Power Co. $126.70; St. Joseph's Hospital for J. Foster $11.50; Alberta Gov't Telephones $8.85.

Two applications for relief were received approved and recommended to Government for necessary authority.

A meeting of the Electors of the Town will be held on Monday the 1st. day of February 1932 from 11 o'clock in the forenoon until 12 o'clock noon, at the Town hall for the purpose of nominating candidates for the office of councillors and school trustees, for the next ensuing two years, or the next ensuing year, as may be required.

The Mayor and Council hope to see as many of the ratepayers as possible at the Annual meeting in the Council Chamber at 8 p.m. on Friday the 29th. instant.

Annual Meeting Held of St. George's Church

The Annual meeting of the Congregation of St. George's Church was held in the Rectory on Monday evening, 25th inst.

The chair was taken at 8:30 p.m by the Rev. C. Read and the meeting opened with prayer

After the minutes of the last annual meeting were read and approved, the financial report was read by Mr. Milton Carscadden in the absence of Mr. Harper. After a short discussion this was passed and Mr. Read made a verbal report of the years work, and said that considering the general financial stringency the finances of the Parish were better than had hoped, but that a big united effort would be needed to pull through the coming year. There was a discussion as to the allocation of certain contributions and some other points, followed by the elections to office; as follows.

Rector's Warden (Appointed) Mr. M Carscadden.
People's Warden (elected) Mr. C. Read.
The Vestry.
Messrs G. McLellan, A. M. Carscad-den, W. E. Roberts. Mrs. Wiebe, Mrs. W. A. Graham.
Delegates to Synod
Mr. J. Lowe, Mr. F. B. Redd.
Auditor, Mr. A. M. Carscadden.

Excellent reports were made by the W.A. and A.Y.P.A. the Church Guild and the Junior W.A. The work of the W.A. here, as in practically every Parish in Canada, is indispensable, and the Church owes the Auxiliary more than it can ever repay.

After adjournment tea was served and half an hour of social intercourse made a fitting close to the evening.

Oakwood Mennig, M.L.A. Speaks at Lamont Business Men's Meeting

The business men of Lamont discussed the debt adjustment act with Mr. R. Hennig, M.L.A., at a meeting held in that town last Monday.

Mr. Hennig in opening the meeting pointed out that the farmer was unable to meet his obligations under existing conditions, stating that while nine out of ten farmers are good farmers as far as knowing the land went, they were poor business men as far as art of financing, and that he desired the feeling of the business men in handling the Adjustment Act.

A suggestion was conveyed from the business men present to Mr. Hennig, that a close check-up be made on some of those who are being protected by the Act, as it has being brought to their knowledge that not a few cases has defrauded the Debt Adjustment office.

AROUND THE ELEVATORS

Owing to rushing business all elevators are opening earlier than usual, some are in fact open as early as 9 a.m. Also all elevators are paying 3c over street price for carlots of oats.

Things we notice:— Darcy Ayton covering his dough after having his hair cut—Harold Fred Kennedy waiting to see if she was looking to see if he was looking: Tommy Lane limping around with a bandaged arm: Pete Scow bending for home with a piece of meat, a hand axe, and a wood chisel??

Topics of the day:—
Messrs Anderson and Hallam discussing their record curling game with L. Hodgins. The score not mentioned it being only a minor detail.

Gene Recque gaining 4 lbs while on his Money Moon. A tip would be appreciated, together with the details, and any future progress in this line, however we are glad to see Mr. Recque back on the job after his recent experience.

Junior Red Cross Held Busy Meeting

The regular Junior Red Cross meeting was held in the Senior room of the school on Friday afternoon, Jan 22nd.

The meeting was rolled to order by the President, Lottie Krebs; and the minutes of the last meeting read by the new Secretary, Beth Gunn, who occupied the chair for the first time, since the resignation of the former Secretary, Minnie Cranston. The Treasurer, Harold Mohr gave his report which included the name of one new member.

Following this a short discussion arose concerning the donation of a number of articles collected by the society, together with a portion of the proceeds of the concert to the Red Cross. It was decided to send half the proceeds of the Christmas concert to the Red Cross Branch in Edmonton as soon as possible, and to forward the other articles shortly.

Plans were discussed regarding an Easter party to be held the latter part of March.

Following the adjournment of the business part of the meeting, both Junior and Senior rooms were entertained by a very interesting and pleasing programme conducted by Alma Pearce.

The following items were presented by the students:
Chorus—Juanita.
Piano Solo—Ruth Griffin
Play—"Interrupted Courtship"
Vocal Duet—Marie Cranston and Nora Ashton.
Piano Solo—Nora Ashton.
Reading—Ruth Griffin.
Vocal Duet—Alma Pearce and Ruth Griffin.
Piano Solo—Elenor Mohr
Play—"The Cratch's Christmas"
The story was told to have Mr. Griffin present again after a long absence and enjoyed a reading "Celia's Speciality" given by him as an item of the programme.

The meeting and programme closed with the singing of the National Anthem.

The next meeting will be held on Friday, Feb. 5th.

CARD OF THANKS

Mrs. McNaughton wishes to thank the United Church Sunday School, The Primary Class, The Rebekah Lodge, The Red Cross Society, The Ladies Curling Club, and a number of friends for the beautiful gifts given to her before leaving for Vermilion.

Canada's Wheat Superior

Canada's wheat is 9 to 10 cents higher in the markets of the world than that of any other country, according to Dean Shaw of Saskatchewan University, College of Agriculture.

"Few people know," said the Dean in an address at Toronto, Ontario, recently "that as low as wheat had been, Canada's wheat, by reason of its superior quality, had been bringing, in the markets of the world, 9 or 10 cents higher than the best from all other countries."

Not only to maintain this quality, but to better it is among the many benefits to field crops resulting from the educational activities carried on in making preparation for the great Grain Exhibition and Conference to take place in 1933. From this point of view alone there is sufficient merit in the undertaking to ensure the support of very Canadian citizen.

Seneca, cured and straw—A fund of common sense, good seed and the best straw—will pretty nearly ensure success on the great mass of Canadian farm.

Why milk fed chickens?
Your answer is right. That's why stock men are interested in the World's Grain Show of 1933. It'll be one means of improving fodder quality.

In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a suggestive article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy statesman, we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by that forceful and capable leader of the United States, in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experiences through which the world has been passing for the past ten years is the "loss of faith," and he proceeds to show that if a man has lost his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is that because some have put their trust in things which they have found do not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is easy, to conclude that whatever disasters may have overtaken an individual for him to conclude that they have arisen through no fault of his own; rather that it is the fault of someone, and his to instinctively to blame something be loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered losses heavy losses. Frankly, it must be said that those who trust to chance must gamble by the results of chance. They have nobody to blame but themselves.

In Western Canada, however, production for the past few years has been so large as to be, in Mr. Coolidge's third group, those who have sustained losses notwithstanding the exercise of their best judgment and though events have proved their own individual control. But this simply means that everyone should know that even when surrounded by all the safeguards and all the integrity which is possible to secure, the ownership of property involves a risk. The man who has nothing runs no risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the former rather than the latter.

The men who owns a home may lose it by fire, by flood, by a devastating storm. A man's livelihood may be taken away by accident, by illness, by loss of health, or by death, or lastly, or lastly, or honest posts. World conditions may force prices to a below-cost-of-production basis. He cannot help these things, but that does not excuse him from meeting the most of what he has. The point is that of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortunes upon some source outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a home differs from the individual bricks in it, yet people are not brains, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the rest of being responsible for the results.

If we could lay the blame for present conditions in the world on society at large, against whom is the blame to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness, but who is to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products.

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Hardly can every one of us must assume a share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were riding too high. We shall have to hoop nearer the ground. We may not be an easier lot we shall be much safer.

We must realize that the best recipe for financial security is to live within our means. That is our soundest faith. We have found nothing better.

We must re-learn the old Biblical admonition: "Thine own right hand can save thee." We must realize that Governments are not all-powerful, that present relief measures are but a remedy to help us over a crisis, that we cannot obtain help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our real satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all find we have powers we did not know we possessed.

The total value of building and construction awarded in Canada during 1931, as compiled by Maclean Building Reports, Limited, amounted to $215,462,000. Ontario led all the provinces with $120,453,300, or 39.9 per cent. of the Dominion total. Quebec came next with $106,120,700 or 35.6 per cent.

It has been estimated that Colombia's waterwhite could be harnessed to produce more than 4,000,000 horsepower.

The total expenditures by the different Provinces of Canada on main provincial highways during the year 1930 was $30,502,739.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Sorrie, R.R. 4, Picton, Ont., writes:—"I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around.

After taking Milburn's Heart and Nerve Pills I soon greatly rid of these troubles.

My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful tonic."

Advocate Makes Some Unpleasant Predictions

Says 1000 Head Tons For Cattle and Starved People

Prof Gustave Mercier, of Hoboken, New York, who describes himself as "the nation's economist and American scientific astrologer" cast his eyes unfavorably skyward several years of figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual first-of-the-year forecast, Professor Mercier considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He finds much prohibition is going to have "a terrible time" during 1932, that prosperity is coming back to stay, that Colonel Lindbergh and Henry Ford had better watch their step in February and that most Fall there will be plenty of rain, snow, hail, thunder and lightning, with earthquakes, harsh failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor's charts, are theatrical people, aviators, steamship and airship people, hall traders, naval officers and cabinet members.

Those who will enjoy good luck include physicians, scientific people, astrologers, mining men, real estate agents, President Hoover, millionaires, diplomats and all the unemployed.

Buchanan Elect Officers

Meeting Of Canadian Livestock Co-Operators Held At Saskatoon

Alberta J. H. Evanson, Taber, was elected president of the Canadian Livestock Co-Operators at a meeting of the directors held at Saskatoon. Roy McPhail, Brandon, was elected vice-president for the organization.

Directors for the provinces are:

Alberta J. H. Evanson, Taber; Saskatchewan, D. MacKay, Shaunavon; Manitoba, — Roy McPhail, Brandon; Ontario—W. A. Amos, Palmerston; Quebec—J. T. Desmarais, Montreal; Maritimes—J. McCrimmon, Prince Edward Island.

Pomeroy Balm tones and stimulates the skin. Fragrant as a flower. Cool and refreshing. Helps overcome that beautiful the most delicately-textured skin. Creates complexions of delicate charm which is fatal to the distinct season. Invaluable for sunburn, tan, freckles and making them flawlessly white. Cool and refreshing. Pomeroy Fragrant Talcum to use. Chosen unhesitatingly by all women who care for feminine distinction.

Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to farmers in getting together to market their products is afforded by the results obtained by the Dunlop Cooperative Bay Shipping Club, of Pontiac County, Quebec. This year to date the club has marketed 200 head of cattle, 100 calves, 1,150 lambs and over 12,000 pounds of dressed poultry, representing cash returns to the farmers that district of over $15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme the a success.

Guess Best Quickly.—Have you a problem that you want to beat? Then, try Dr. Thomas' Eclectric Oil in the evening. It will stop coughing, carry away the proud flesh, draw out the pain and prepare a clean way for the new skin. It is a recognized healer among old and members of the family can tell that it healed where properly applied.

Cannot Hoard Gold

Visitors who have taken to hoarding gold in their cellars in the form of fillings, crowns and bridgework have bitten off more than they can chew. Fines which soon start, Wolfgang Gunther assured her dentists, have been doing a good business lately. The National Bank, which now has the sole right to sell gold, says temporary fillings will have to do until the gold crisis is past.

The modern telephone instrument consists of 301 parts.

New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimentation on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers remain radical at first glance, but are a forecast of what may be expected for future automotive transportation. Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasoline-electric airplane, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large tenders and a combined roof and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

Drop In Living Costs

Reduction Of Fifteen Per Cent. During Last Two Years

Cost of living has dropped by over 15 per cent. during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations the United States leading with a drop of 16.5 per cent.

Germany comes third with a 12.9 per cent. drop, Great Britain fourth with 9.6, and France fifth with 8.9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

Toothache and neuralgia are instantly relieved with Dodds' Kyp-Thin Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

Land and Water Ferry

Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller is set up in the water. Music is sent to the ferry through water.

In 1897, the first rafts of pine cut in the Ottawa Valley reached the City of Quebec.

Man Without a Country

Pitiable Plight Of Negro Who Was Deported From Canada

Chained to a grating in the hold of a ship in port, where he has remained for more than a month, another man without a country

He is Cecil Jules Scott 29 year-old negro deported from Canada and committed in his alleged homeland of Jamaica. He was put aboard the steamer Hororund at Halifax, and when permission was refused to land him at Bermuda or Jamaica, where the authorities had no information concerning him, the only alternative was to bring him back to Canada. Having previously been deported from the Dominion, he was refused admission when the Hororund arrived at St. John and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a $1,000 fine if the deportee escapes. By "chain below," is an improvised coil formed by a grating, in the "man without a country," his right wrist fastened to the steelwork and a blanket serving for a bed.

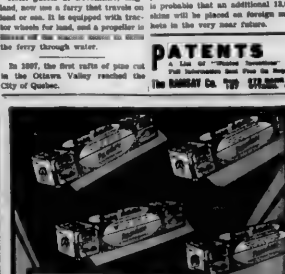
Complete in itself Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Ship For Skins

Seven Thousand Foxes Leave Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-Operative Fur Animals Raisers of the province of Quebec. This shipment of skins, the largest ever sent out from here, is valued at $300,000 and consists only of skins of the best quality.

In the face of orders on hand at present, Co-Operative officials say, it is probable that an additional 12,000 skins will be placed on foreign markets in the very near future.



Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Favorable Trade Balance

Canadian Exports Are Now Two Million Over Imports

Canada has now overtaken her previous unfavorable balance of trade for the present fiscal year and has converted it into a favorable balance amounting in value to $14,744,900, according to a report issued by the Department of National Revenue For several months back this country has been showing an excess of exports over imports, and the cumulative effect of this has been to offset the unfavorable balance in the early months of the current fiscal year.

Exports for the nine months had a value of $461,797,941, while imports into Canada were valued at $451,052,-206. At this time last year the country's trade registered an unfavorable balance amounting to $73,736,519

During December exports of Canadian produce amounted in value to $35,255,475, as against $66,819,668 for December, 1930, while imports were $40,286,925, a decline of $39,650,999 from the same month a year ago

Outlook Of a Feminist

Says Man Destroyed the Home a Post Generation Knew

Man himself destroyed the home a past generation knew by the invention, now constantly expanding possibilities of machinery. Then when woman, laboring in the world of business and professions, reached a sufficiency comparable to that of man she became a menace and he invented the old platitude "woman's place is in the home." These opinions were expressed at Montreal by Mrs. Beatrice Forbes-Robertson Hale, noted feminist, author and lecturer, speaking at the People's Forum

Before the invention of machinery, said Mrs. Hale, a wife and children were assets and not liabilities. Today, however, the wife was an economic liability, unless she worked outside the home, because to which she was driven for lack of work in her home. There was nothing new in the fact that a woman worked, said the speaker, the departure came when she began to earn money.

Mrs. Hale urged those who were the "housemaker type" to find a business and "settle down" but advised others "to go out and earn your living."

Has Faith in Business

Canadians Are Justified In Looking To the Future With Confidence

"Canada is in a relatively satisfactory position, and we are justified in looking to the future with confidence," Sir Herbert Holt, president of the Royal Bank of Canada, told directors and shareholders of the bank at the annual meeting in Montreal.

"I have witnessed many depressions during the course of the last 50 years and I see nothing in this one which weakens my faith in this country," Sir Herbert continued.

"It has been said that it is darkest just before dawn, and in previous depressions conditions have seemed most discouraging at a time when improvement had already set in. The violence of the depression most of itself tend to produce a strong reaction.

Safety First

MacPinch —"I'm, my daughter has eloped."

MacPinch —"Not until after they have located a place to board."

"There is only one objection to this wireless, we can't sleep in either hours."—Jagend, Munich.

Ostrich Is Long-Lived

And Oldest Birds Have the Most Beautiful Plumage

Just 45 years ago the first shipment of ostriches was brought from Africa to California, marking the introduction of ostrich farming in the United States. There were 42 birds in that original flock and more than three months were required for the long voyage

Because of the prevailing high duty on feathers subsequent shipments were prohibitive, so reduced to a few pairs at most, and practically all of the ostriches now found in this country are the descendants of the original 42. These were brought to America by Cawston and Cockburn for the pioneer Cawston ostrich farms of South Pasadena and Newhall, California.

The South Pasadena farm so still in existence and several of the majestic birds that made the long trip from Africa 42 years ago are still producing beautiful plumes

The older the ostrich, the lovelier the plumage. Indeed the veterans of the flock, 30 or 40 years of age yield the finest feathers. A full-grown ostrich weighs about 275 pounds and stands nearly eight feet high. All ostriches are a brownish color until eighteen months old, when the cocks turn black and the hens gray

Just how fast an ostrich grows can be estimated when it is stated that the bird reaches maturity in six months almost two pounds a day! Height is attained at the same remarkable rate, or about a foot every four weeks The average span of an ostrich is 70 years.

Why Fat People Are Fat

Today More Food Than They Expend At Muscular Work

Dr. Lenal H. Newburgh, professor of clinical investigation at University of Michigan, declared that fat persons are fat simply because they eat too much. He contradicts the time-honored belief that obesity is caused by diseases or maladjustment.

Dr. Newburgh studied closely controlled observations of fat persons in University Hospital over a period of months, and measured accurately the amount of food eaten by patients and its value as energy. He found that fat persons consumed the building of more energy than was expended in muscular work.

Dr. Newburgh claims that obese patients regularly deceive themselves and their physicians by "cheating" in their dieting. He said the "easy-going" fat person was the typical "easy-going" but an extremely nervous individual who found constant eating a relief from nervous distraction.

Have One Yourself

Every Man Should Buy His Own Newspaper

Recently The Leader, published at Fort Macleod, Alberta, offered a prize for the best answer to the question: "Why is a newspaper like a woman?"

Some of the answers were as follows:

Because they are thinner now than they used to be.

Because they have bold-faced types.

Because they are easy to read.

Because they are well worth looking over.

Because back numbers are not much in demand.

Because they are not afraid to speak their minds.

Because they have a great deal of influence

Because if they know anything they usually tell it.

The correct answer was given as this:

Because every man should have one of his own and not run after his neighbor's. — Regina Leader-Post (Evening).

Still Hope For Peace

We still cling to the ideals of peace. The League has not abolished, reparations are still subject to negotiation, the disarmament conference has not been abandoned, but there have been many observers of the European scene who have declared that beneath this facade of international co-operation the old forces of militarism are at work and who have questioned whether Europe can really keep the peace.—New York Evening Post.

Improving On Nature

Writer Marvelous On Discovery Made By Curator Of Botanical Gardens

Occasionally the human improvement becomes positively monstrous. It annoys to make better what is perfect. It eliminates some cherished peculiarity. So here it is that Arthur Burr nerve-ably the purpose of interest or beauty. An illustration comes from the botanical gardens in Cambridge, England

The curator, after much patient experimenting, it is reported has produced a straight banana. Under mathematical test the elongated fruit is said to display not even the slightest hint of a curve. What it has got, however, is considerable more delectable to taste than one which has been gently bent by Nature—fingers? It caused far more solicitude to look at it. Perhaps it's conformity is the shortest distance between two points makes it more easily reachable but that is in question.

What does English know about bananas, anyway, that her horticulturists should tamper with them? Bananas are an American joy and beauty and the more lovely because their yellow length is curved seductively There is nothing seductive in a straight line Ask the mosquitoes. The proper retort to the curator of the Cambridge botanical gardens is, "Yes, you have no bananas"

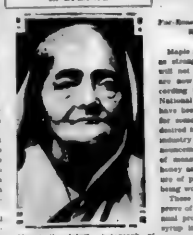
Chicago Daily News.

The Gulf Stream

Has Not Changed Its Course, As Some Statements Made It Appear

As if there were not enough things to worry about already, another attempt is making to convince mankind that the Gulf Stream has changed its course This is a subject on which even the defenders of the past can afford to be dogmatic The Gulf Stream is a conservative; ages ago it made its bed and it is content to lie in it Though the Bank of England quit selling gold, though Gibraltar has its daylight again and a small voice was lifted in wonder

It's tomorrow!" exclaimed the small boy



Here is the latest photograph of Mrs K Gandhi, wife of Mahatma Gandhi who was arrested shortly after her husband was sized at Poona

Improving Quality Of Maple Sugar and Honey

Fuel Smoking Discoveries Of National Research Council Are Announced

Maple syrup fifteen to twenty times as strong in flavor, and honey that will not spoil through fermentation, are now practical achievements according to an announcement by the National Research Council. Scientists have been working on these subjects for some time and the improvement desired in the maple sugar and syrup industry has been obtained, the announcement stated, while the means of measuring the water content of honey and thereby providing a measure of protection against spoilage, is being worked out satisfactorily

These discoveries are expected to prove of considerable value as the annual production of maple sugar and syrup in Canada is normally worth about six million dollars, while about thirty million pounds of honey is an average yearly output

Although a popular delicacy the great bulk of maple products exported is used in the manufacture of tobacco in the United States One feature prejudicing the greater use of the maple sugar as a food has been the fact that the cakes of sugar become hard and mottled after a short time. A discovery by L. Shazin, a member of the staff of the National Research Laboratories, formerly of MacDonald College, now makes it possible to prevent this deterioration

Mr. Shazin's discovery also enables the manufacture of a syrup fifteen to twenty times stronger in maple flavor as heretofore, and of concentrates of the same flavor for use in various manufactures in which heretofore the syrup itself was used. This is accomplished by the addition of the right kind and amount of a certain substance to the syrup, which is then heated to the boiling point. The proper return to the temperature of the Cambridge botanical gardens is, "Yes, you have no bananas"

Honey will not spoil through fermentation, resulting in early fermentation, prompted the research council to seek a means of combatting this evil Dr. H. D. Chutney of the council laboratories, after a year's work, has succeeded in working out suitable methods of measuring this moisture

Dr. Chutney's discovery will aid in the avoidance of loss by fermentation and will also enable the honey farmer to offer the product with a guaranteed sugar content.

Other problems relating to honey on which work is being done in the laboratories with every promise of success, the announcement stated are connected with granulated honey which it is shown can be converted into a high-grade honey by appropriate treatment, and the development of honey products which it is hoped will help to extend the market

A Short Night

It was Willie's first ride in a railway train, and the succession of sundens reduced him to a state of enormous astonishment The train roamed a night bend and with a shriek of its whistle plunged into a tunnel

There were gasps of surprise from the corner where Willie was. Suddenly the train rushed into broad daylight again and a small voice was lifted in wonder

"If you like it I will buy it for you."

"No. I don't like it—but wait a minute. I have nearly finished it."—Boss Horner, Madrid.

Swine Illness In Winter

Caused by Many Sleeping Quarters and Lack of Exercise

The crippling of swine is usually a concentration of rickets or osteomalacia, or both, but one cannot always diagnose crippling as the result of dietary deficiency or a lack of mineral nutrition The condition is practically unknown among swine running outside in summer and is almost as rare in winter in the Province Provinces among swine sleeping in a straw pile or in a straw shed well provided with bedding On the other hand, crippling is common among hogs wintered in lumber buildings or in barns with other kinds of stock These facts indicate definitely that sunshine and dry sleeping quarters are conducive to good health in swine. Cripping is frequently traceable to damp sleeping quarters, constipation and lack of sunshine and minerals.

At the Dominion Experimental Station Scott Sask., crippling has never been observed in swine provided with dry comfortable beds in straw shelters and fed some grain from the sleeping quarters Serious crippling has often resulted from compelling pigs to sleep in lumber piles banked with straw and manure, or in a well constructed lumber building known to the piggery It has also been observed that in case of fall pigs, those born before September 15, and allowed to run outside seldom crippled during the winter but when good grains and remained thrifty sometimes under adverse conditions Pigs born later in the fall have not the same chance to become well grown and thus are not so prepared to withstand the rigors and lack of sunshine during the winter. There is nothing to fully replace sunshine in preventing crippling, but cod liver oil, pickard oil, and mineral supplements have been used by different investigators with a certain degree of success.

Seed Change Of Wheat

World Must Begin Anew On Some Commercial Varieties

The fact that there has been an undue concentration of gold in some countries to the exclusion of others is not the fault of the gold standard, but it to because the world is pursuing policies which have this as their inevitable result It is folly to suppose that the outcome would be different under any other standard The necessity for huge unnatural payments in international trade, the innumerable obstructions placed upon international trade, and the political discord and jealousy which afflict the nations are the real sources of difficulty

What the world needs is a change of heart, and to learn something of the "futility of speculation" of which Emerson spoke The world must begin anew on some common ground something that gives hope and faith and encouragement for the future, rather than a mere repetition of accusations and suspicions Monthly Report of the National City Bank of New York

Heavy Fur Catch

Catch This Year Promises To Be Best In Past Decade

The fur catch in the north country this year promises to be one of the best in the past decade Prices early reports received from the fur north trapper, will bring down heavy shipments of furs this spring

The quality of the furs, a feature that varies from year to year promises to be high, north trappers claim, because of the climatic conditions that have prevailed in the sub-Arctic regions this year.

While the catch in the more civilized portions of the province will be only average, north of Churchill and in the southern Indian Lake area the catch marks the spectacular Prices for pelts this year are only average, dealers advise and the royalty and heavy cost of bringing them into the United States will prove a handicap to despatch this spring it is feared

The huge Junkers plane purchased this year by the Canadian Airways will probably bring the furs down from many of the isolated posts in the far north to Winnipeg

Wanted to die . . . she'd lost that schoolgirl complexion! Dear Dr. Pinkham's Vegetable Compound gave her relief.

Delightful Cruises

Cunard and Anchor Line Steamers Furnish Fine Voyages For Those On Holiday Bent

That the world and his wife are going to see for their holidays more than ever before is evident in the fact that no less than fifty-six cruises have been arranged for Cunard and Anchor Line steamers during the remainder of this winter, spring, and summer. This does not include the departure this week from New York of the "Franconia" for her annual five-month cruise of the world.

The Mauritania and the St. Lawrence will get a good share of this cruise tourist business. For twelve cruises will call at Canadian ports which will form their main attraction for thousands of New Englanders expected on these short trips from New York. Last summer the "Transylvania" made three Canadian voyages to Quebec and Halifax from New York, with a 60-mile cruise up the Saguenay River. She is the largest vessel ever to navigate this famous waterway, and on each voyage she was booked to capacity.

Her sister ship, the "Laconia," will be six such 13½-day cruises, by this steamer and her sister ship the "California" which will then spend the rest of the season on the St. Lawrence Other cruises in which Canadian ports will be featured are three 10-day cruises from New York to Halifax and Bermuda on the express "Mauretania," during the summer. The Anchor Line "Caledonia" will make a 9-day cruise to Halifax, on August 27th, and on October 20th, a 10-day voyage will be made to the same port by the "Transylvania."

Several short summer cruises on express liners, and two Labor Day week-end cruises by the "Transylvania," and the "Berengaria," largest steamship, have been scheduled as well at Halifax. Elaborate arrangements for seeing Acadia are being made for these passengers.

Short, leisurely trips to the West Indies continue to be popular, their success being indicative of the price trends of today. A call at Miami has been introd ed into the itinerary of eight 9-day cruises to Havana and Nassau by the "Columbia," the visit to the Florida playgrounds of the wealthy proving a great attraction.

More leisurely visits to the West Indies will be made on three voyages of the "California," and two on the "Scythia," ranging from 12 to 28 days each, visiting all the high spots in the islands as well as calls at Panama and the South American mainland.

Bermuda reigns its hold on the imagination of the cruise tourist public, the "California" and "Samaria," each of 17 days' duration, being listed to make Easter cruises from New York of 9 and 8 days respectively.

This Independence

A farm laborer in England who had been out of work for a long period and had been living on the dole, remarked to his physician one day: "Doctor, do you know I used to work a good many ago which would have given me five shillings more a week than I am getting from the dole, but after thinking it over carefully, I prefered to remain independent."

By Annette

GIRL FOR THE FRESH CHARM OF SPORTS CLOTHES THAT PASS ABOARD

Here's a delightfully smart model called the "Caledonia" for the young woman in deep bright blue mixture, or navy serge.

It gives the impression of suit styling. The collar is white piqué with a bow tie in navy blue. The belt is navy blue suede.

The skirt is pleated.

It's such a splendid type for office or college wear.

Style No. 815 may be had in sizes 14, 16, 18, 20 years, 34, 36, 38, 40 and 42 inch bust. To requires 3½ yards of 39-inch material with ½ yard of 35-inch contrasting, 5½ yards of binding and ½ yard of 1½-inch ribbon.

Jersey is a favourite this season and adapts itself perfectly to this style.

It may also be made of combinable crepe silk.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

JANUARY 31

JESUS PEEDS THE MULTITUDE.

Golden Text: Jesus said unto them, I am the bread of life: he that cometh to Me shall not hunger, and he that believeth on Me shall never thirst. John 6:35

Lesson John 6:1-71

Devotional Reading: Psalm 34:3-11

Explanations and Comments

Jesus and the Multitude.—verses 1-4. With His disciples Jesus crossed to the eastern side of the sea of Galilee (or the Sea of Tiberias as it was also called from the City of Tiberias which Herod Antipas had built on the western shore of the lake in honour of the Emperor Tiberius) and, climbing the hillside sat down for a quiet, confidence with Jesus.

The Testing of Philip.—verses 5-7. When Jesus saw the crowd He turned to Philip and asked him where they were to buy bread for them. Philip was a practical man of affairs and he made a hasty calculation. "Two hundred shillings' worth of bread would not supply even a little for each one."

The Evangelist adds, "This He said to prove him. For He Himself knew what He would do." The difficulty of the task tested Philip's faith.

One thing necessary was that he should have the problem over to the Master with full faith that He could solve it, and should offer to help as the humble instrument by which the people could be served.

The Lad's Supply.—verses 8, 9. Andrew, Peter's brother, then said to Jesus that there was a lad among them who had five barley loaves and two fishes, "but what are these among so many?" As unchilled as the neighbour is on the word "but." Andrew sees the poverty of his resources, and has failed to see the richness of the impossible Power.

The Miracle.—verses 10-13.—At the direction of Jesus the people sat down on the grass, about five thousand men besides the women and children, (Matthew 14:21. They sat in companies of fifty, that the distribution might be quickly made Taking the five barley loaves in His hands, Jesus offered thanks, probably repeating the customary words of Blessing on Jehovah our God, King of the earth. Then He brake the loaves from off the earth."

That Jesus distributed the loaves and fish till all were abundantly satisfied.

When all were satisfied Jesus bade His disciples gather up the broken pieces that were left, undistributed, that nothing be lost. Those fragments filled twelve baskets. Probably each of the Twelve had a provision basket with him. The scantiness of the source, five barley loaves, is again mentioned to emphasize the greatness of the miracle.

Cleaning Units Needed

To Ensure Distribution Of Clean Seed To Farmers

In order to ensure that the cleaning of seed grain for distribution to needy farmers this spring between 600 and 800 travelling seed cleaning machines will probably be necessary.

In addition to this, it is believed by grain men that every privately owned seed cleaning machine should have to be utilized if seed grain is to be properly cleaned in preparation for the coming spring work.

Over 6,000,000 bushels need wheat and at least 2,000,000 bushels of seed oats will be required for distribution before spring, entailing an expenditure of approximately $9,000,000.

According to C. B. Daniel, manager of the Saskatchewan Relief Commission, the seed grain relief plan in Saskatchewan is a gigantic problem and it is essential that a plan be put into effect as soon as possible.

Definite steps forward adopting a scheme whereby clean seed can be supplied to the farmers of Saskatchewan through the Saskatchewan Relief Commission are being formulated, it is learned unofficially, Thursday, Jan. 14.

Across Alaska By Train

Important Event That Was Calmly Accepted By the World

The first railway train to cross Africa from coast to coast started July 1, last year on its journey from Lobito Bay to Beira, a distance of 2,-900 miles. The event was a vastly important one, but the ceremony of achievement was worthy of note, but it was calmly accepted by the world. Yet when David Livingstone, the first white man to cross Africa, made the journey in two years, there was heralded a supreme triumph, all the world who didn't dwell in his grand adventure, and hardly a home where it was not a topic of burning interest. —Wall Street Journal.

SAFE, SPEEDY PROVEN!

Rub Buckley's mixture on your chest—swallow a dose—and watch the symptoms disappear. Stops any person from coughing, relieves the tightness, and the longest night of any cough, cold or bronchial trouble. Relieving evidence of 30 million. 37-12

BUCKLEY'S MIXTURE

To Assist Agriculture

Quota Systems Between Canada and Great Britain For Canadian Products

Establishment of a quota system between Canada and Great Britain for Canadian wheat, was visualized as one of the great hopes for Canadian agriculture in 1932 by J. H. MacFarlane, president of the Saskatchewan Agricultural Societies Association, who presented his annual report to an executive meeting of that association at the University of Saskatoon.

Mr MacFarlane also said a change in the styles of obtaining credit by the countries of the world was essential to economic recovery, and he believed cancellation of war debts, to enable world buying power to improve, was necessary if 1932 was to be a better year than the past year

Even adoption of these changes did not offer much hope for the present year, Mr. MacFarlane believed, but he thought they would tend to make next year more normal and would restore agriculture to a place where merely up production.

Impairment of the high rates of interest paid by one country to another would materially assist, he thought. He believed an international banking committee could render help in the situation, functioning similarly to the League of Nations, but dealing with the financial obligations and requirements of the countries of the world. Each country, under this system, would issue its own currency, instead of borrowing in New York or London, England.

A New Explosive

Driven Bullet Five Times Faster Than Sound Travels

The modern rifle bullet has a muzzle velocity of 3,000 feet a second. It strikes a tremendous blow, measured in hundreds of pounds. Now a German named Verteh has invented an explosive that will speed the bullet more than a mile a second faster, and will triple its striking power. That is more than five times faster than sound travels.

It is said that 300 different kinds of material are used for the manufacture of shoes.

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby frets, cries and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a baby just before retiring. Yet it is so effective for children of all ages. In a few hours your baby will bring relief, comfort and restful sleep to your home. Caution: Refuse substitutes. Insist on genuine

Chas. H. Fletcher

CASTORIA

RADICAL CHANGE IN MONETARY SYSTEM IS URGED

Edmonton, Alberta In a smashing frontal attack on the existing financial system the United Farmers of Alberta, in convention here, condemned the gold standard, called for the complete nationalization of the monetary system and the extension of credit to industry on a basis of cost, not of profit.

The farmers, refused, however, to declare themselves in favor of nationalization of all the banks. They thought, with a national credit system, the banks would either not be needed or would have to render as good service as the national system.

The resolution passed with the belief that we, the delegates of the U.F.A., in convention, do endorse the complete nationalization of the monetary system to advance credit on a basis of cost, not on a basis of profit."

Considerable with the demand for a national credit system came a proposal for intensified political action to bring this about. A resolution call for this was defeated only on the ground that the United Farmer members in the Federal Parliament had done all possible.

Complaint was made that the United Farmer Government of Alberta and the former members of the legislature had not taken the strong stand on the question which had been taken by the Federal members. The convention called on the Provincial Government and all officers and members of the association to proclaim publicly their belief that monetary reform was the only way out of the depression and so give moral support to the members of Ottawa.

This implied a censure on the Provincial Government; said William Irvine, M.P., of Westlock. "But we must remember that we are the Dominion Government alone and the Provincial Government had to work under the present system and borrow money from the banks.

"It will soon be apparent that every provincial government in Canada is at the beck and call of the financial interests in Wall Street," said Mr. Irvine. "This, he thought, might be good propaganda for the cause of monetary reform.

Farmers should unite with industrial workers to secure political power and so change the system, said Karl Axelsen. There was nothing wrong with the Bank Act except it was in the hands of the wrong people. The producing classes should wrest control from the vested financial powers.

As the convention passed a resolution calling for the abandonment of the gold standard, Henry Spencer, member of parliament for Battle River, said Canada had already gone off the gold standard although the government did not admit it.

Deflation of currency was also favored as a means of increasing the sale of farm products. The suggestion that instead of borrowing money and paying interest "to the great financial powers" for unemployment relief works, the government should issue new paper money, was endorsed.

Amendment of the Bank Act to provide a penalty for any bank or banal official charging higher interest than seven per cent. was asked. This was an amendment of law already made in the House of Commons last year by Mr. Spencer.

Another resolution passed called upon the government to make wheat certificates legal tender. It would enable a farmer to take the receipts for wheat delivered to an elevator and use them to make purchases.

The Canadian tariff system was denounced and a resolution declared the time had come for an "all round reduction in our customs duties to the point where it ceases to be a means of raising revenue for governmental purposes." Such a reduction, it was declared, would bring relief to the consumer without hurting the producer.

It is now possible to select certain sounds for transmission by wireless while other sounds from the same source are suppressed.

Plane Makes First Trip

Giant Liner Inaugurates Weekly Air mail Service To Cape Town

London Aug Promptly on the dole time the giant Imperial Airways liner Heleia, Lieut.-Col. Clyndon Newstrom, Jan. 30, inaugurating a weekly airmail service to Cape Town.

The plane carried 20,000 letters and 160 parcels, including a large box of eggs. The passengers were Air Vice-Marshal Sir Vyell Vyvyan, Lady Vyvyan and F. G. L. Burtman, Deputy Minister of Civil Aviation.

The London-Cape Town route follows established routes as far as Egypt and then plunges south down the "dark continent," travelling a route worked out first by members of the Royal Air Force who did the pioneer work only a few years ago.

Offered Fellowship

Fellowship In Royal Geographical Society Awarded To Western Aviator

Edmonton, Alberta A fellowship in the Royal Geographical Society has been awarded to Pilot Walter S. Gilbert, Canadian Airways Limited, according to word received in the city. Such an award to an aviator is believed to be unusual.

Pilot Gilbert, Canadian Airways, Limited, machines from Edmonton to the Arctic Coast, and was instrumental in the search for the latter's trip to King William Land and the north magnetic pole in the fall of 1930. He piloted the airplane CF-AAK on that search. This machine, known for steady service and which has been flown steadily by Gilbert since 1928, is in the air almost as well known as its master.

Scholarships For Argentine Students

Will Provide Same Facilities As Given To Canadians

London, England.—The Prince of Wales announced the establishment of a scholarship for Argentina students at Oxford University at a dinner of the Argentina Chamber of Commerce here.

The Prince said the scholarship would provide the same facilities as were given to Rhodes scholars from the United States. It would be open for two students from the University of Buenos Aires annually for at least three years. Each student would stay at Oxford for two years.

More Air Mail Business

Post Office Officials Report Increase In Western Provinces

Ottawa, Ont.—Air mail business in the prairie provinces has increased, post office officials declared, compared with a similar period in December, Alberta, which said the U.F.A. convention had passed a resolution favoring the abandonment of unprofitable services.

Departmental officials are busy on the estimates for next fiscal year, it is said, but mail will receive attention among other branches of post office activity. It could not be learned whether the appropriation for this will be increased or cut.

Value Overestimated

Furs On Bayshore Not Worth Over Thirty Thousand

Winnipeg, Man. "Ridiculous" was the expression voiced by officials of the Hudson Bay Company in regard to report that the missing fur-trade vessel "Bayshore," lost in the Arctic Circle carried fur pelts valued at $1,-500 000. Officials stated that the total value of pelts on board would not exceed $80,000. A quantity of pelts had been saved before the vessel disappeared they said.

Don Grahame, 25, Alaska air mail pilot, is reported flying to find the cause and solve the fuss under oath.

The salmon pack in British Columbia reached a record figure of 2,321,-329 cases last year, exceeding the previous record attained in 1926 by 184,-669 cases.

WAR DEBT ADJUSTMENT

Right Hon. Neville Chamberlain, Chancellor of the Exchequer who will attend Reparation Conference.

Aviators Stranded In China

Pilots From Canada and U.S. Cannot Get Jobs

Shanghai China Two Canadian aviators and five from United States, who came to China expecting to be given jobs at $1,000 a month piloting Chinese military airplanes found themselves stranded here.

The aviators said they were promised by Chinese organizations in Canada and the United States the aviation bureau of the Chinese Ministry of War was seeking pilots and would pay the salary mentioned for competent men.

The aviators have come with practically no money left. To be told the government bureau is making no plans at all

The five pilots from the United States and posters appeared at numerous Pacific coast airports advertising for pilots.

Dr. Philip Chen, Chinese physician at Vancouver, the Canadian said, is president of the Chinese society there and was directing the enlistment of Canadian flyers.

The aviators said they understood Canadian and United States air pilots are coming to China as a result of the promises. The trade commissioners have investigated their respective governments, hoping to forestall the coming of others.

No Franchise For Women

Bill Introduced In Quebec Legislature Is Defeated

Quebec, Que. Attempt of the women of the provinces of Quebec to secure the franchise in provincial elections failed again in the legislative assembly.

The Women's Franchise Bill, sponsored by Dr. Isabelle Pinsis (Lib., Mercier), went down to defeat by a vote of 32 to 22 on an amendment moved by Arthur Belanger (Lib., Quebec), seconded by J. P. Giguere (Lib., Dorchester), giving the bill a six-months hoist.

President Of U.F.A.

Robert Gardiner Unanimously Chosen To Lead Organization, For Second Time

Edmonton Alberta Robert Gardiner was unanimously chosen president of the United Farmers of Alberta for a second term at the annual convention here.

The veteran farm leader who represents Acadia in the House of Commons and is also leader of the United Farmers of Alberta group in Dominion politics, was given an ovation when no other nominations were offered.

Mr Gardiner satisfied the members they had better look around for another president for 1933. He said he found the burden of carrying the two posts of leader of the group in the House of Commons and president of the association too heavy.

Norman F. Priestly, Calgary, was re-elected vice-president by acclamation. A. F. Allen, Battle River, was also nominated, but withdrew in favor of a renewal of Mr. Priestly's term of office.

Railways and Truck Competition

Resolution Made That Railways Must Eventually Co-Operate With Bus Operations

Toronto, Ont. Further co-operation of railways with bus and truck operators was urged by Hon. Lemuel Mercenby, Ontario Minister of Highways, here, Co-operation of provincial and Dominion Governments to that end is essential, he said.

Railways themselves are partly to blame said Mr Macauley if truck and bus traffic is making inroads upon the business of the steam transportation systems. "Advisability of co-ordinating the two Canadian railway systems and all phases of transportation would become increasingly evident as time went on, he believed.

"I am looking forward to many suggestions from the royal commission on transportation as to means whereby the railways may co-ordinate truck and bus traffic with their own operations," he declared.

Cathedral Is Being Turned Into Museum

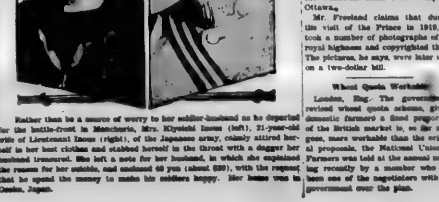
Soviets Will Use It For Anti-Religious Exhibits

Leningrad, U.S.S.R. The Soviet government has announced that the Kazan cathedral here would be converted into the largest anti-religious museum in the Soviet Union.

When completed, the museum would contain exhibits of various objects of a religious nature, interpreted along the lines of the late Karl Marx's doctrine, adopted by Soviet Russia, that "religion is opium for the people."

The Kazan cathedral was started in 1801 and completed in 1811 at a cost of approximately $2,000,000.

TRAGEDY OF SINO-JAPANESE WAR



Rather than be a source of worry to her soldier-husband as he departed for the battle-front in Manchuria, Mrs. Kiyoichi Inoue (left), 21-year-old wife of Lieutenant Inoue (right), of the Japanese army, calmly attired herself in her best clothes and stabbed herself in the throat with a dagger her husband treasured. She left a note for her husband, in which she explained the reason for her suicide, and enclosed 60 yen (about $30), with the request that he spend the money to make his soldiers happy. Her home was in Osaka, Japan.

BOYCOTT AGAINST BRITISH GOODS WEAPON IN INDIA

Bombay, India—The merchants' organization, comprising representatives of merchants and exchanges that have been closed for 16 days, laid plans for a mass meeting to protest the arrest of Mahatma Gandhi, Nationalist leader, and ordinances directed against the Nationalist civil disobedience campaign.

Statistics from "authoritative sources were published purporting to reveal the effect of the Nationalists' boycott against British goods. They show Japan has shipped nearly 15 - 000 000 yards of cloth to India in one month, compared with less than 2,-000,000 yards shipped by concerns in Great Britain during the same period.

Two 5-year-old students from the University of Bengal went to trial before a special tribunal in Calcutta, charged with the murder of Magistrate C. G. B. Garlick, who died due to death a month ago. Both pleaded not guilty.

The British police sergeant was stabbed in the head at Dacca by an unidentified assailant who stole his revolver and fled. Two suspects were arrested. When a crowd attempted to seize several prisoners in Gorakhapur police fired two rounds of buckshot, wounding many demonstrators.

Sen Gupta, former mayor of Calcutta and a prominent Nationalist, was arrested as he stepped off an Italian ship. No specific charge was lodged against him.

Rev H. W. Hivn, a young American who has accused authorities in the northwest frontier provinces of oppression, cruelty and "things that ought to make an Englishman ashamed," said he had been arrested and deported from that area. He blamed general unrest on the economic depression and paid tribute to the regular British police force, describing its members as real friends of the people.

Suggests Bonus For Buyer

Proposal Would Benefit Used Furniture Instead of Manufacturer

Calgary, Alberta—Any step towards improvement in the Canadian coal industry meets the approval of Alberta operators, it was declared by officials commenting on a proposal for a government bonus to the purchaser of coal instead of the producer.

M. J Kelly, manager of the Dominion Steel and Coal Corporation, in Sydney, N.S suggested the government pay a bonus to the mine operator, but to the purchaser of Nova Scotia coal.

"At present the subvention from the government benefits the railways, not the purchaser," declared F. H. Shields, manager of the Empire Collieries Company, Limited. "Any subvention should result in a lower price to the consumer in order to be of any advantage to the industry."

Claims Copyright Infringement

Damages Asked For Use Of Photograph Of Prince Of Wales On Canadian Bonds

Toronto, Ont.—Damages for the use of copyrighted photograph of the Prince of Wales on Dominion of Canada two-dollar bills are being sought by George F. Freeland, local photographer, in an action started against the Canadian Bank Note company, Ottawa.

Mr. Freeland claims that during the visit of the Prince in 1919, he took a number of photographs of his royal highness and copyrighted them. The pictures, he says, were later used on a two-dollar bill.

Wheat Quota Workable

London, Eng.—The government's revised wheat quota scheme, giving domestic farmers a fixed proportion of the British market is, so far as it goes, more workable than the original proposals, the National Union of Farmers was told at the annual meeting recently by a member who had been one of the negotiators with the government over the plan.

Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 20 years would see the emancipation of agriculturists from domination by banks and businessmen, H. S. Arkell, secretary of the Canadian Livestock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agricultural men of the Dominion. In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to study the condition of agriculture. It was for the betterment of agriculture that they had received their training.

From the point of view of the farmer the selling machinery under the old methods had failed them, the credit machinery had fallen down and they would find that the majority of farmers believed that the business machinery of agriculture was failing to accomplish the purposes of the farmers.

Agriculture had taken care only of production and isn't someone else to take care of marketing. In all other businesses increasing prosperity of the broker was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production.

It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the eastern conferences.

Dr. L. H. Reek, Dominion Apiculturist, suggested that other businesses had perhaps devoted too much attention to merchandising and propaganda, leaving the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Southern experimental farm, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included Dr. H. Gilbert, Big River, spring wheat champion at the Chicago show, and Andrew Anderson, Allanah, recently designated "master farmer."

Greater Precipitation

Report Of Meteorological Service For Months Of December In Saskatchewan

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twice that of December of the normal year according to the report of the Dominion meteorological service for the month.

In average years, precipitation in December varies from four-tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several months' precipitation was reporting less than four-tenths of an inch of precipitation received during December.

Alberta replaced in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch.

A dry December was the experience of Alberta where most sections reported less than half an inch and some less than one-inch.

In the dairy belt of Alberta, December precipitation is slightly greater in amount than in Saskatchewan, ranging from one-half inch to one inch.—Regina Leader.

Apples Are Cheap Food

Essential Part Of Diet and Suitable For Every Meal

In a period like the present, when the demand for money overrides for need may be insisted, apples are an essential part of the diet, says Miss Flora Cyril of the Missouri College of Agriculture. Apples are suitable for every meal in the day and are often enjoyed between meals also," she says on. "As meats or baked, apples serve as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. In dinner they are especially good with fresh cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple deserts is almost unlimited."

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are kleptomaniacs.

Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, to the neighborhood of $5,000 a day.

The B.C. Egg Pool is shipping to the provinces and eastern Canada three or four carloads, of eggs weekly. Private firms are taking further shipments, which, according to G. R. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of $7,000. There must be deducted from this freight charges of approximately $300 and handling charges of five cents a dozen.

The egg industry is at present the busiest department of agriculture in British Columbia. Distribution of 65,000 a day among poultry ranchers in the province is considerable in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices have also lower labor costs help to make up for the reduced prices received for the product.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

Frozen Eggs Buying Wheat

French Government Contracting For Two Million Bushels Of Grain

Delivery has started on a French government contract to buy 50,000,000 bushels of Canadian hard spring wheat, the United Press learns.

The agreement reported is a ratification of an order for a similar amount in 1931. Delivery will continue for two months.

It was understood that France exported a reciprocal concession from Canada favoring either French wines or silks, but no agreement has been reached.

It was estimated that France still requires 11,500,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign order would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

Nearly 40 irrigation projects are to be launched in Jugo-Slavia in the next four years.

Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations in Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the cattle cast up to when a storm is approaching. They wander restlessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their holes carefully before hard weather comes. Dunlops invariably keep hastily before rainy weather, and if bees return to the hive and do not come out again for a time rain is interested.

Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operating on 15 acres at Mercier, Montreal, the only one of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and where not claimed within a reasonable time are placed with new owners. At this home there are admirable kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from geese to canaries. Horses whose owners are too poor to have them properly taken care of within a short time returned in good condition.

The society's six years of unfriending the dumb animals, it has had four Christmas trees set up in various parts and squares here distributing hay, corn and oats to 300 horses yearly.

Nelles Affords Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the country areas is one in every 100. An eye specialist said: —"During the war one of the effects of diet which was a narrowing of the victim's vision. Perfect eyesight depends on perfect nerves, and town dwellers today are exposed to a nerve-shattering life. Coverage of noise which differs only in degree from a great gun cannonade.

Hidden away in vaults in Dominion observatories at Victoria and Ottawa are scientific records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary. Dr. Alfred Wegener, the Austrian geologist who lost his life in Arctic exploration, laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean. Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory.

Canada is vitally interested in getting the Wegener theory because Greenland is supposed to be the "spool hing" among the continents, drawing westward at a rate estimated as high as six miles a year. Meteorological conditions, especially along the Labrador Coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Delicate scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitude and measurements were extended around the world with the aid of wireless. Results were that the coasts of America, Greenland and other countries were plotted as minutely as possible.

The survey will be repeated in 1932 and again in 1934, and any variation in the plottings will be noted. By this method it is hoped to establish the soundness of Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1917 by J. B. Kerr, German explorer. In 1823—24 years earlier Sir Edward Sabine, British scientist, made longitudinal observations in Greenland in 1870 Kerr took similar readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

Great Natural Asset

High Grade Clay Deposits in Saskatchewan May Prove Foundation Of Great Industry

One of the greatest natural assets of the prairie provinces is concealed in the high grade clays of southern Saskatchewan, said G. M. Hutt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers' association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing the valuable resource, Mr. Hutt told of the general work of his department in fostering Canadian industry by locating deposits of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

Advertising Always Pays

The business man has not been found in which "advertising does not pay." What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroad.

"You are handy-legged, Pronto."

"That is nothing. You ought to have seen my brother. He was so handy-legged that he had to be kept in an old bean vial."—By Rolf Klint Thuren, Gothenburg.

"How did you get so much strength in your mouth?"

"I have exercised my teeth with your stable."—S 620, Florence.

BRITONS SPEED REPRISTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a group of the best drivers in the Motherland. The Italian "Mille Miglia" or the history of the race, as English cars competed, driven alternately by an English and an Italian driver, neither of whom could speak the other's language. It finished successfully, much to the surprise of the Italian people. In this year's race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by Italians, and Sir Henry Birkin (right), will be one of the drivers. It is reported Lord Howe will explain the lessons.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Outcast," "The Hurst Hollow" & "The Rotted Timber" Etc.

Hodder & Stoughton, Ltd. London.

"—visit the sins of the fathers on the children."

"Why, no, I shouldn't," replied Mrs. Craig, with apparent frankness. "It was only that, for the moment, it was rather a shock to learn that she was that woman's—child."

"Of course it was," sympathized Lady Anne. "Goodbye, dear Judith."

But notwithstanding Mrs. Craig's assurances, a troubled look lingered in Lady Anne's grey eyes long after her guest's departure.

CHAPTER XII

A Sense Of Duty

Jona was immensely pumped at the abrupt change which had occurred in Mrs Craig's manner immediately upon hearing that she was the daughter of Glyn Peterson, and, as soon as the visitor had taken her departure, she sought an explanation.

"What on earth made Mrs. Craig freeze up the instant my father's name was mentioned? Did she hate him for any reason?"

Tormarin looked serious at her.

"No," he answered quietly. "She didn't hate him. She loved him."

Jona stared at him in frank astonishment. She had never dreamed that there had been any other woman than Josquinne in Glyn's life.

"Mrs. Craig and my father!" she exclaimed incredulously.

Tormarin looked at Craig in those days. She was Judith Burke."

"Well, but——" persisted Jona, decorously. "I can't take it in!" she cried impatiently. "I still don't see why."

"Why what?"—unwittingly.

"Why she looked as if she loathed the very sight of me. Then suddenly—quite the effect you would expect from two peahens?"

There was a curiously abstracted look in Tormarin's eyes as he made answer.

Love is productive of very curious effects on occasion. More particularly when it is without hope of fulfilment, he added in a lower tone.

"Then you mean that Craig couldn't help not falling in love with Mrs. Craig," protested Jona with some impatience. "She could be the object of her caring for him. And it's certainly illogical of her to feel any resentment towards me on that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "And, after all, you're the child of the woman who stole her lover away from her, so you can hardly expect her to feel an overwhelming affection for you."

"He woman who stole what had been my own!"—repeated Jona dazedly. "I don't understand. What do you mean, Blake?"

He glanced at her in some surprise. "Good heavens—— Don't you know the circumstances?"

She shook her head.

"No. I simply don't know in the least what you are talking about. Please tell me."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flare of the match revealed a worried expression on his face, and though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue, "it's all ancient history now. Let it go. There's never anything gained by digging up the bones of the past."

Jona's mouth set itself in a mutinous line of determination.

"Please tell me, Blake," she reiterated. "As it is something which concerns my father and a woman I shall probably be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

"Very well—if you insist. But I don't think you'll be any happier for knowing." He paused. "Still insisting?"

She bent her head.

"Quite" firmly—"whatever it is, I'd rather know it."

"On your own head be it, then." He seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like that—that your father and Judith Burke were engaged to be married at the time he met your mother, and that well, to make a long story short, he run away with Miss Mavory on the day fixed for his wedding with Judith."

A dead silence followed the disclosure. Then Jona uttered a low cry of dismay.

"My father did that? You did not say so!"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewilderment, and the pride in the child who has met with a totally unexpected rebuff.

"I can't take it like that" he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments."

Jona smiled back rather wanly.

"I don't know that I should worry much if he had done so in the circumstances. But—don't you see?—it was so cruel, so horribly selfish!"

"You got to remember how things in justification——"

"Justification? "—scornfully. "There wasn't any. There couldn't be."

"Well, excuse, then. If you like One thing is that Jacqueline Mavory was very much in love with your father, and the other, that your father's engagement to Judith had really been a mere engagement by just convenience parents adjusting properties, friends of long standing, and so on. It was no love-match—on his side."

"But on her wedding-day!"—pitifully. "Oh! Poor Judith!"

Tormarin smiled a little cynically.

"That was the root of the trouble. It was Judith's pride that was hurt—as well as her heart. She married Major Craig within the year, but I believe they were really fond of one another and comparatively happy. But the home never prospered. Perhaps from that day to this. And you, being Jacqueline Mavory's daughter, will come in for the residue of her bitterness, Unless"—insistently—"you can make friends with her."

"I shall try to," said Jona simply. "Is Major Craig living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jona tried to fit in the new facts she had learned with her knowledge of her father's character. She was a little afraid that Tormarin might misunderstand her impulsive outburst of indignation.

"I only think that I am sitting in judgment on my father," she said at last. "In a way, I can even understand his doing such a thing. You know, for the last five years of my mother's life I was with them both constantly, and anyone living with them could understand their doing all kinds of things that ordinary people wouldn't do." She paused, as though seeking words that might make her meaning clearer. "They would never really mean to hurt anyone, but they were just like a couple of children together, gloriously irresponsible and happy. I always felt years older than either of them. Glyn used to say I was 'cursed with a damnable sense of duty' laughing rather ruefully. "I suppose I am. Probably I inherit it from our old Puritan ancestors on the Peterson side. I know I couldn't have cheerfully run off and taken my happiness at the cost of someone else's prior right."

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

W. N. U. 1936

When PAIN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food rests. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude carbonate when once you learn the efficiency of this. Go, get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 25c a bottle—any drug store. (Made in Canada.)

COULDN'T COMB HAIR

Crippled by Rheumatism

"I had been suffering with rheumatism for almost 3 years, and about this time last year was laid up for 10 weeks. My hands and arms and knees were the worst affected. I could not get about at all. I could not wash my face or comb my hair. All this had to be done for me. At the beginning of this year I started taking Kruschen Salts every morning, and I am pleased to say I am quite well now and able to see to my home and look after all kinds of washing without it affecting me. If K. Bloomstone is associated with an excess of Uric Acid in the system. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid so as to render it capable of being easily washed out of the system. Other ingredients of Kruschen assist Nature to flush out this dissolved acid through the kidneys. Other ingredients still, prevent food fermentation taking place in the intestines, and thereby check the formation of more uric acid and lost of other impurities which poison the blood and pave the way to ill-health.

Uniform Monetary System

Proposed What Effective Measures Be Taken By the British Empire

A memorandum strongly advocating the introduction of a uniform monetary system for the British Commonwealth of Nations was adopted by the Federated Chambers of Commerce of the British Empire

The memorandum declares since most empire countries are now off the gold standard the struggle to attract and retain gold has ceased. But, in order to remain competitive in the world's markets, the nations are obliged to force down prices by currency contraction which has led to similar contractions by other nations, neutralizing the first advantage and depressing prices below the cost of production.

This, the memorandum says, has reduced the purchasing power of 91 per cent. of the world's population. So-called over-production, it continues, is really under consumption, owing to restricted purchasing power. Only when nations can prevent inflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, which the memorandum would insulate themselves from external competition while re-expanding their currencies, action which would make possible the establishment of zone co-operation.

In all intensive complaints that are the result of the depredations of worms in the stomach and intestines Miller's Worm Powders will be found most effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs bring back a healthy working of the system, without which the child cannot long remain its strongest or thrive. These powders mean health and improvement.

New Treatment For Anaemia

Scientists Claim Extract Injection Will Combat This Trouble

A new and simplified treatment for pernicious anaemia eliminating many of the inconvenient and difficulties of present treatments, has been perfected by research scientists at University of Michigan.

The new treatment involves intravenous injection of concentrated liver extract and obviates the necessity of swallowing large doses of liver, or substitutes administered by mouth against which patients rebel.

Prior to the injections of the new extract into the veins of a pernicious anaemia sufferer have restored the blood to normal. After the blood has been restored to normal by injections it is possible to maintain this state by single injections at intervals of from four to six weeks.

When You CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, snap and end carry-on in comfort.

Aspirin was meant for just such times, for it insures your comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Aspirin tablets when you travel. Have some at home and keep some at the office. Like an efficient secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours. Aspirin is harmless, so keep it handy, keep it in mind, and use it. No man of affairs can afford to ignore the severe and more or less unpleasant in the *severe* directions. From a grumbling tooth to those rheumatic pains which seem almost to bend the bones, Aspirin tablets are ready with quick relief—and only 2 cents a unit. Neuralgia. Neuritis. Any nagging, needless pain.

Aspirin

Get the genuine tablets, stamped with the Bayer cross. They are of perfect purity, absolute uniformity, and have the same action every time. Why experiment with imitations costing a few cents less? The saving is too little. There is too much at stake. But there is economy in the purchase of genuine Aspirin tablets in the large bottles.

Made in Canada

You're Worried

When your child is sick you're terribly worried. Of course you can't always avoid sickness, but you can remedy and often prevent children's ailments with Baby's Own Tablets. They are the ideal laxative for children. Doctors prescribe them.

Baby's Own Tablets relieve fever, sour stomach, constipation, expel colds, prevent constipation, regulate the stomach and help to clear up colds. 25 cents a package at druggists.

BABY'S OWN TABLETS
[Dr. Williams'] 119

Little Helps For This Week

"That the Lord thy God may bless thee in all the work of thine hand which thou doest."—Deuteronomy xiv. 29.

No earnest work
Of any honest creature, however weak,
Imperfect, ill-adapted, fails so much
It is not gathered, as a grain of sand,
To enlarge the mass of human action used
For carrying out God's plan.
—Elizabeth Barrett Browning.

Our life is but a little holding, lent
To do a mighty labour. We may rise
With Heaven and the stars when it is spent.
To serve God's aim.
—George Merriddth.

"Find your niche, and fill it. If it be ever so little, if it is only to be hewer of wood or drawer of water, be content to bring in the coal battle for God and truth.—Spurgeon.

Mr Anthony Bourne Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its worth.

Britain and War Debts

So far as this country is concerned there is certainly a widespread belief that general cancellation of reparations and war debts would facilitate economic recovery and, therefore, be generally beneficial; but the British taxpayer would not lightly entertain the idea of cancelling reparations while retaining the burden imposed by war debts. London Times, England.

OBITUARY

The death took place at Manville on January 18th, of Adam Bier, born in Josephburg, Austria. He died at the age of 51 years, 9 months, 5 days. In 1879 he married Katherine Bender, and in 1899 he came to Medicine Hat, two years later he made his home at Fort Saskatchewan. His wife passed away in 1908, and in 1916 he moved to Edmonton. Five who predeceased him two years ago. 1916 he moved to Edmonton, five months ago he went to live with his daughter, Mrs. Schreyer at Manville.

Interment took place in the Josephburg cemetery. Rev. Wiesbrenner officiated at the service which took place at 2 p.m. on Jan. 21st. H. J. Bowen of Vegreville had charge of the funeral.

Pallbearers were:—John Mohr Sr., Henry Mohr, John Mohr Jr. Frank Thomas, P. B. Mohr and J. M. Thomas.

Their first union was blessed with five sons, eight daughters, three predeceased him when to Josephburg and two at Fort Saskatchewan. Four sons, John of Edmonton, Rudolph and Gus of Bruderheim, Reinhold of Smithland, and four daughters, Mrs. E. Bruder of Horse Hills, Mrs. M. Schreyer of Manville, Mrs. L. Hauer of Buffalo, N. Y., Mrs. J. Holland of Victoria, B. C. mourn his loss, also fifty-four grand children and fifty-seven great grandchildren.

Many beautiful floral tributes were received.

When is the matter with the hockey fans of the Fort? Just what is the matter. Standing on the fence watching the game last Tuesday night, one could not help but see the attendance, mostly high school girls and boys, and a few, a very few adults. How about it, is the matter? In past years the fans showed up in cold or in ideal weather. If very cold donned like Eskimos, nevertheless they showed up.

The few fans that did come were twice disappointed through no fault of the "Locals" but it will not happen again I'm sure.

I hear they are playing Bruderheim at the Fort on Thursday January 28th. Lets go fans and give the boys the support they deserve.

A fan.

PRESENTATION

Members of the Beaver Hills congregation paid a surprise visit to Rev. and Mrs. Hodgins taking advantage of the fact that it was Mrs. Hodgin's birthday.

Toward the consumation of a pleasant social hour, an address was read by Mrs. J. W. Dane in which reference was made to the many ways in which Mr. and Mrs. Hodgins were rendering service to the congregation.

A gift of linen was presented by Mrs. Wesley Fisher. Mr. and Mrs. Hodgins made a suitable reply thanking the people for their good-will and hearty support in the work of the church.

LETTER TO THE EDITOR

Pleasant View School.
Jan. 25, 32.

To Whom it May Concern,

My attention has been drawn to a statement made on January 9th, which read in substance as follows:—

Mr. Monk, Teacher of Pleasant View School, has not been teaching for 6 years in Canada. He taught for only 3 months at his first school, and 9 months at his second, from both of which he was summarily dismissed. As a "Public Servant" I not only resolute such an accusation, but "warn" whoever made it that "the formation of Character" is a serious charge.

H. A. Monk.

Notice To Creditors

IN THE MATTER OF the Estate of KATERINA KREBS, late of Bentford, in the Province of Alberta, Widow deceased.

NOTICE is hereby given that all persons having claims upon the Estate of the above named Katerina Krebs, who died on the 7th day of November, A.D. 1931 are required to file with the undersigned solicitors before the 1st day of March, A.D. 1932, a full statement duly verified of their claims and of any securities held by them and that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to his knowledge.

DATED this eleventh day of January A.D. 1932.

CORBETT & HARPER
609 Tegler Building,
Edmonton, Alberta,
Solicitors for the Administrator.

SKI RUNNERS OF THE CANADIAN ROCKIES

With a field of activity unsurpassed the world over the new winter sports association the Ski Runners of the Canadian Rockies is rapidly taking form and shaping itself for a mighty winter season in the mountains. The new organization is patterned largely after the Quebec Ski Club and its basis, membership, activity and business is the same. It will probably attempt a rival even to Revelstoke, in itself, in the heart of the Rockies with runs and trails varying from one to ten days in duration and covering such points as Banff, Lake Louise, Field, Emerald Lake, Yoho Valley, Paradise Valley, Moraine Lake and Lower Lake Louise. Each year some of these runs is to fall away as new ones are opened up, but the general scheme is to fall along as here pictured.

The season will open with tobogganing, coasting and tramping, running and hiking, in the valleys below. But the snow begins in November and stays.

A thousand feet above Banff and about an hour and four miles from town in the old Indian Reserve will be the new Ski Club house, between Mount Norquay and Mount Rundle. From the club house runs various trails of all distances with ski-hut and shelters at strategic points for rest and refreshment. There is a 15-metre Jump at Buffalo Park and every year in February (this year February 7-14) a tournament is held where the pick of Canadian and international jumpers compete.

Lay-out shows: (1) Ski track across virgin snow with Mt. Assiniboine, 11,860 feet high, in background; (2) Canadian Pacific Transcontinental Camp at Ski Jump Stadium at Mt. Assiniboine; (3) Mount Norquay Ski Lodge, 1931 first snow; (4) Ski Jump at Mt. Assiniboine; (5) Mount Rundle and the Towers, on Wonder Pass, near Mt. Assiniboine, one of the finest winter scenes in the Rockies.

School Board Holds Interesting Meeting

A regular monthly meeting of the Fort Saskatchewan Board was held in the office of the Town Clerk on Monday, Feb. 1st. 1932.

Present Dr. Henry, Messrs Dubue Atkinson and Todd.

The minutes of the last regular meeting and the minutes of the special meeting held on Jan. 25 were read.

It was moved that the minutes of the regular and special meetings be adopted both motions carried.

Dr. Henry announced that he had obtained a ruling by telephone from the Deputy-minister of Education in reply to the Secretary's letter of Jan. 20th., to the effect that W. A. Dubec remained a trustee of the Fort Saskatchewan School Board.

Mr. Dubec protested very strongly against the letter being sent to the Deputy minister Mr. Bens, regarding a ruling by giving false information as it was only to hurt his stand which he had taken regarding the motion made by Mrs. Rogers endorsed by Dr. Henry that he was no longer a member of the Board as they later repealed Section 66 of the School Ordinance and the ruling was in his favor in this dispute.

The Secretary apologized for any incorrect statements given in the letter to the Department of Education.

A letter from the Secretary of Elkford School District was read requesting that the Fort Saskatchewan Board fix the amount due for Miss Nancy Bytrebs.

Moved by W. A. Dubec that the Secretary notify the Elkford School District that Miss Bytrebs was taking grade 11 last term and that the Fort School Board hold Elkford S.D. responsible for the fees.

Dr. T.W.E. Henry reported to the Board that there had been several complaints with regard to head-lice in the school.

It was moved by Mr. Atkinson that the secretary notify the teaching staff that if they have any reason to believe that pupils have head-lice, the teachers shall send them home with a letter to the parents or guardian of such pupil requesting that this matter be remedied before the child returns to school.

It was over that the Secretary be instructed to look after the ordering of paper towels for the school as required.

Mr. W. A. Dubec submitted his resignation and on the motion of Mr. Todd was excepted.

Dr. Henry read a letter from Mr. J. B. Adamson tendering his resignation as Sec.-Treas. to date from 1st of March.

It was moved by Dr. T.W.E. Henry that this Board regretfully accept resignation of Mr. J. B. Adamson and wish to thank him for the way in which he has served the Board in the past 24 years.

An account from A. M. Carmichie for $13.15, was read and on the motion of Mr. Dubec it was ordered to be paid.

It was moved that the meeting adjourn.

ST. GEORGE'S A.Y.P.A.

The Young People met at the Rectory on Thursday evening last and after the usual short business session, three new members were admitted, and the matter of taking the play "Beautiful Mr. Bobbs" to Edmonton was discussed. Mr. Read reminded the members of their own special Evensong on Sunday night, and of the Corporate Communion next Sunday morning.

After business Mr. Read gave an interesting talk on life in the Yukon in early days, Mounted Police yarns, stories of curious weddings, and other such incidents of a Mining Camp.

Then after a very good supper songs and music concluded a very pleasant evening.

Partridge Hill

Partridge Hill United Church held their Annual Congregational meeting on Monday, Jan. 25th, at 7 p.m. when about 70 sat down to a well laden supper table in the church basement.

Rev. E. J. Hodgins presided over the interesting program, reports from the various departments of the church and Sunday School, W.M.S. and Ladies Aid were received and showed all obligations met and steady growth in every branch of the church.

Business disposed of a pleasant hour was spent and the following is a list proposed.

Mr. Leslie, Mr. Gillison.

The Church, Mr. Wm. Cobaldenton.

The Sunday School, Mrs. C. H. Flintoff.

Reception'ist by Mrs. E. J. Hodgins

Our Bible Class. Mr. G. Lawrence

Responded by Mrs. H. Rye

A short feature of the program, was a vote of appreciation moved by Amos Cobaldenton seconded by R. Warring to Rev. and Mrs. E. J Hodgins for their untiring services to the congregation. Also the presentation to Mrs. Flintoff, Mr. C. H. Flintoff and Wilmot Alton on behalf of the congregation, Bible Class and Sunday School of a brush to Mrs. Hedgins, Candle Sticks to Mrs. H. Rye and Gold cuff links to Mr. W. Attersell.

oooooo

Mrs. H. Rye was an Edmonton visitor for a few days last week.

oooooo

Mr. and Mrs. E. Smith are receiving congratulations on the birth of a daughter in the Royal Alex. Hospital, Edmonton, on Jan. 23rd.

oooooo

Mr. and Mrs. Wm. Gillison were delegates to the U. F. A. convention in Edmonton last week. Quite a number attended the sessions as visitors.

oooooo

Mrs. F. Lawrence is hostess to the W. M. S. and Ladies Aid this week.

oooooo

Robert Gordon, Percy, Robin and Herb. Whitson left last week to do homestead duties on their claims at Campsie, Alberta.

oooooo

Mr. Lambley is holding a meeting at an early date to arrange for a debating society or an much pastime.

Rebekah Lodge Installs Officers at Last Meeting

On Wednesday evening, January 27th, Princess Rebekah Lodge No. 62 held installation of officers.

Sister Morgan D.D.P., accompanied by Sister Burpage, Sister Pinnock and Sister Poulter installed the officers, who were as follows:—

N.G. Sister E. Roger.
V.G. Sister D. Hudson.
Rec. Sec. Sister C. Gibson.
Fin. Sec. Sister H. Thomas.
Treas. Sister H. Thorne.
Ward. Sister K. Chesluck.
Con. Sister P. Frey.
R.S.N.G. Sister K. Dennis.
L.S.N.G. Sister M. Simmons.
R.S.V.G. Sister D. Ayles.
L.S.V.G. Sister C. Becker.
Chaplin Sister L. Flintoff.
I.G. Sister B. McAdie.
O.G. Bro. F. Baker.

Sister K. Dennis P.N.G., in a few well chosen words presented Sister Morgan D.D.P. with a gift and thanks from the members, for her many trips to Princess Lodge. Sister Morgan D.D.P. replied suitably.

Then Sister Morgan, D.D.P. presented Sister K. Dennis, P.N.G. with the P.N.G. Jewel from the members. Sister K. Dennis replied suitably.

A lovely luncheon followed. The members were pleased to have as a visitor, Sister Swan, M.G. from Onward Lodge in Lamont.

A very pleasant evening was enjoyed by all.

Annual Meeting of Town Well Attended

The annual meeting of the ol st ra of the Town was held in the Town Hall last Friday night Mayor G. Y. Montgomery occupied the chair by request. He dealt at length with every phase of the affairs of the Town, and his remarks were listened to with much interest.

The report of the School District, and the report of the Finances of the Town, up to the preceding 31st of December, were submitted to the meeting and adopted a vote also the yearly report of Dr Henry, Medical Health Officer. The Chairmen of the various committees presented reports upon the activities of their departments during the past year and were well received by 11 large number of electors that turned out, in spite of 40 below zero weather.

Town Council and School Trustees Elected

A meeting of the electors of the Town of Fort Saskatchewan was held at the Town Hall on Monday last for the purpose of nominating Candidates for Councillors and School Trustees. Mr. J. Ritchie was returning officer.

School Trustees Mrs A. H. Rogers, Dr. T. W. E. Henry, and Councillor J. Earl Graham, whose term of office had expired, did not seek re-election.

The following were nominated for Councillors for the 3 vacancies on the Council, and were declared elected:—J. T. Lalonde, E. T. LaBoss and A. S. Pillmore, the two former were members of the previous Council.

For School Trustee Mr. H. A. Brown, Dr. C. H. Grunert, and Dr. W. F. Calbeun were nominated for the vacancies created by Mrs. A. H. Rogers and Dr. Henry. At the School Board meeting, held on the evening of nominating day, Mr. Dubec resigned from the School Board, and on the Returning Officer being notified of its acceptance by the Board, he, after consulting the Department declared the three candidates above mentioned, elected to the Board of Trustees, viz: Mr. H. A. Brown, Dr. Grunert and Dr Calbeun.

Provincial Coal Staff Makes Presentation to Retiring Board; Mr. H. F. Rudd

The staff of the Provincial Coal gathered on Wednesday, Feb. 3rd, to give Mr. F. H. Rudd, who is retiring from the service, a hearty send off.

In presenting Mr. Rudd with a very nice smoking cabinet, Warden J. D. McLean dealt on the high moral character, and keen sense of duty, with which Mr. Rudd rendered service.

Mr. McLean also added it such high standard of character and loyalty were rendered by all, the administration of institutions would be much simplified.

Mr. McLean's remarks were loudly applauded, all present agreeing such praise was truly deserved by Mr. Rudd. On behalf of himself and the staff he wished Mr. Rudd many years of life to enjoy his deserved rest.

In replying, Mr. Rudd remarked that his life had been spent in uniform, serving the country, and it was hard to get used to the idea of any other kind of life. He was gratified to have such praise from one whom he had served the last 15 years.

The Lament impertorate School Festival booklet is being distributed to the teachers this week.

The Festival will be held in the Town of Brudderheim this year on Friday, May 13th.

The Book is four pages larger than the one of 1931, and contains 22 advertisements, which is over one third better than last year.

WOMEN'S INSTITUTE

At a well attended and enjoyable meeting of the Women's Institute on January 14th, at the home of Mrs. Rogers, the following officers were elected for 1932.

President—Mrs. L. H. Walton.
1st. Vice-President Mrs. F. Murray
2nd. Vice-President Mrs. S. Yeaby
Secretary Mrs. J. Whelo
Treasurer Mrs. J. Astley
Directors Mrs. S. Dennis
" Mrs. W. A. Graham
" Mrs. A. Carmichie
" Mrs. J. R. Adamson
Flower Committee Mrs. Earl Graham
" " Mrs. Ed. Graham
Cemetary Fund Committee—
Mrs. Rogers and Mrs. J. D. McLean

Are We Over-Governed?

The current economic depression, and the resultant financial stringency, —possibly the order of these two conditions should be reversed, have led to the advancement of many suggestions and ideas having as their object the effecting of economies in municipal, provincial and co-operative spheres of government and administration. Unquestionably people generally are in a frame of mind to give that serious consideration to these matters which they deserve but which would have been denied it them a few years ago.

Mounting national, provincial and municipal debts, resulting in the turn evils of curtailed public services and higher taxation, reacting adversely upon all individual and community business; is leading serious-minded men and women to realize that there must be a reduction in the cost of our governmental business, and that such reduction must be on a fairly large scale. that the mere lopping off of a few minor services, a percentage reduction in salaries, will not suffice; that, on the contrary, savings aggregating many millions of dollars annually must be effected.

The issue is one extending far beyond the bounds of partisan politics; rather it rests within the domain of higher politics, that is, it is a vital, integral part of the true science of government. As such it can and must be discussed openly, boldly, fearlessly, and to that discussion, and ultimate consideration of facts and proposals, every thinking man and woman should be patriotically inspired to make their contribution. It is their own best interests, their own future, as well as the business and future of their Dominion which is at stake.

Herbert Spencer once wrote: "The man who, expending his energies wholly in personal matters refuses to take part in public affairs, planning himself on his vision in minding his own business, is blind to the fact that his own business is made possible only by the prosperity of all."

There are some people who still pride themselves on their boast of participation in public affairs. They even assume a superior attitude and treat with condescension those who take an active interest in community affairs, politics, and international relationships. But the trend of events in recent years has shattered the self-complacency of many of these individuals, and compelled them to recognize the truth of Herbert Spencer's dictum that the business, the success, the welfare of the individual is made possible only to the extent that these things are enjoyed by all.

Even powerful nations which gloried in and boasted of their "splendid isolation," their indifference to the fate of other nations and peoples, and who regarded themselves as self-sufficient unto themselves, are being forced to alter their views and change their attitude. Geographically and in a physical sense the world may be just as big as it ever was, it may even be bigger in other respects, but it is very much smaller in so far as the relation of one nation to another is concerned. The factor of time in international relationships has been almost annihilated by wireless, radio, the telephone, airships, fast steamships, steam and electric railways, and automobiles. A man living 100 miles away is nearer to us than one only 10 miles away half a century ago.

We are confronting to these radical changes in many of our personal, business, economic and social relationships, but in many respects we have ignored them in the development of our governmental functions, adhering rather to systems and policies laid down in by-gone years and in an altogether differently constituted world. Only in recent years have people been commencing to this fact, and the dissatisfaction with which all peoples and governments have been confronted within the last few years is largely traceable to forcing upon them the conclusion that it is high time that something was done to bring governmental institutions into harmony with the new era in which we are living.

Without assuming to say what ought to be done, and without attempting even the least of differing suggestions, the writer proposes in succeeding articles to discuss some of the suggestions that have been advanced in certain quarters. He proposes to do so with only one object in view, and that is to encourage readers of this column to give consideration to these matters, to think them over, to study them, to discuss them with friends and neighbors; in a word, to assist in creating and developing a live public opinion in relation to the whole subject of our legislative and administrative machinery, that is, our entire governmental structure and the object of it, that it exists, upon what are at present regarded as essential revenues and expenditures, involving not only present but the ever steadily increasing taxation of the individual.

B.C. Salmon Pack

Boasting to business conditions the world over during the past year, British Columbia canned salmon industry shows the lowest pack in ten years, according to figures compiled by the canned salmon section of the Canadian Manufacturers' Association and released recently.

Among the birds that have longer lifetime than man's three score years, and ten are the parrot, the raven, the goose, the swan, and the falcon.

If you trust to luck for anything you will be lucky if you get it.

Preston Rubber promotes cleanliness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Healing, caressing, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most fastidious appearance. Makes the skin "Smooth as Velvet." Truly a practical toilet requisite for every discerning woman.

A remarkably durable floor covering is now made of leather, cut into squares and laid like tile.

The sodium-vapo lamp is the most efficient artificial light source.

Her Heart Was So Bad Couldn't Do Housework

Mrs. E. Duperow, R.R. 2, Milford, Ont., writes: "I was troubled with heart trouble for many years.

"I couldn't get my housework done I was so weak. I took three bottles of Milburn's Heart and Nerve Pills and felt much better, and now I could not be better. I am strong and well."

Price 50c a box

Not Enough For One

Smallest Christmas Pudding Was Only Inch in Diameter

The smallest Christmas pudding in the world, made entirely of fragrant produce and weighing less than ½ ounce, was exhibited side by side with a mammoth 36-lbs plum pudding at the Royal Albert Hall, Kensington, S.W., London, England.

It was one inch in diameter and weighed half an ounce, and was specially made for the Christmas market in aid of the People's Dispensary for the Sick Association of the Poor, by Miss Lily Dalton, who required the assistance of a mathematician and a chemist in working out and weigh the various ingredients. "It was made," she said, "from a recipe handed on to me by my grandmother. The 12 ingredients had to be chopped many times before they were sufficiently fine."

Acids In Stomach Cause Indigestion

Create Sourness, Gas and Pain. How To Treat

Medical authorities state that nearly everybody suffers at times from indigestion—the direct result of hyperacidity of the stomach. Sour, heavy risings, gas, bloating, nausea are due to excess hydrochloric acid in the stomach. The delicate stomach lining is irritated. Spasms in adjacent nerves send pains, sending the digestive juices into the esophagus and causing heartburn.

Artificial digestants are not needed in such cases and may do real harm. Try buying some oil digestive and acid corrector put up in double capsules. Magnesia and take one capsuleful after meals. The first dose should relieve you. The combination of correct acid and there is no nausea, gas or pain. Magnesia Magnesia or bismuth or tablet form are used by physicians who treat those with too much fear of indigestion.

Expedition To Antarctic

Plans Vessel To Need Full

It was announced in London, England, recently, that H. G. Watkins, Australian explorer and pilot, and Lord Gort's Oxford and exploration party, would head an expedition into the Antarctic next fall.

The expedition, which will sail in the early autumn, will attempt to cross the Antarctic from Weddell Sea to Ross Sea, and map the southwest coast of Weddell Sea.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Eclectric Oil. It will relieve the pain as it follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by its penetrating qualities. A trial will convince any who doubt its power.

Close London Office

Office Of Alberta Agent-General May Be Closed In Economy Measure

Office of the Alberta Agent-General in London, England, will be closed as an economy measure, it is understood.

The office was opened in 1913 and Hon. Herbert Greenfield, former Alberta Premier, was in charge for four years, retiring in March, 1921. Hugh M. Baker, Mr. Greenfield's secretary, has been in charge of the office since.

It is estimated here that obtention of the office will save the Alberta Government approximately $20,000 annually.

A Chinese Artist

Has Five Accepted For Exhibition At Ontario Art Show

Yee Hon, 26-year-old Chinese of Toronto, is "very kind" than of his canvases has been accepted for exhibition at the fourteenth group art show in Ottawa. He is the first Chinese to have a picture accepted. He was born in Canton and came to Canada in 1919. Five years ago he entered the Winnipeg Art School and, later moving to Toronto, studied at the Ontario College of Art.

"All-copper" houses are on immediate in the construction industry in Germany.

A poll taken in December is worth three taken in pre-season.

Athletic sports are becoming popular in practically every city of China.

Invented Differential Gear

Alexander Gallinger Failed To Get Patent For Idea

Alexander Gallinger, 87, inventor of differential gear, is dead at his farm home Oshkosh, Wisconsin. In 1877, Gallinger and John Mayo, owner of a foundry there built a tractor which employed the differential principle. They drove it from Green Bay to Madison to claim a $5,000 award offered by the legislature for demonstrating the invention's practicability. Gallinger failed to patent his invention and consequently never earned anything from it, outside the legislature's award. The differential later came to be an important part of the automobile.

Gallinger was born in Gallingtown, Ontario, in 1844, and went to Oshkosh at the age of 15.

Giant Flying Boat

May Build Airship To Furnish Three and a Half Day Service Between Britain and Canada

The London Sunday Express said: drawings were under preparation for a giant flying boat to be used on a three and one-half day service between Great Britain and Canada via the Azores, Bermuda and the United States.

An official of the Imperial Airways, interviewed by the Express, said negotiations were being carried on between Imperial Airways and Pan-American Airways in connection with the proposed service. He said also that the flying boat would be the biggest ever known.

Attacked By Actinos.

The first fearful sensation is of suffocation, which lasts for hour because more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy comes nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Cigarettes that extinguish themselves soon after they are thrown away are a new product, which may aid in fire prevention.

Daughter, singing to her own accompaniments: I'm afloat, I'm afloat; Father: You'll jolly soon be engaged by such a squall as that!

"What is an optimist?"

"A man who doesn't mind what happens so long as it doesn't happen to him."

Northern Rhodesia is preparing to move its capital from Livingstone to Lusaka.

Lose Fat

—and Feel Better for It!

How would you like to lose 15 pounds of fat in a month and at the same time increase your energy and improve your health?

Many people who have tried our new home treatment say they get a bottle of Kruschen Salts lasts 4 weeks. Take one half teaspoonful every morning in a glass of hot water before the food supply—it's your daily assurance and when you have finished the first bottle weigh yourself again.

Now you can laugh at the people who spend money galore to lose a few pounds of fat—now you will know the pleasant way to lose unsightly fat, and you'll also know that the 4 vitalizing salts in Kruschen will help your blood, nerves and glands must have to function properly—but perspiration will help.

After that you'll want to walk around and say to your friends—"See the bottle of Kruschen Salts is worth ten dollars of any fat person's money."

Western Canada Fairs

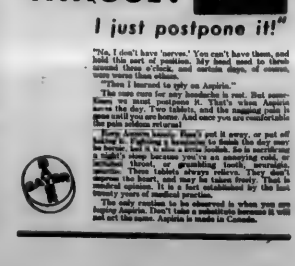
Grand Stand Attractions For Class "A" Exhibitions Well Up To Standard

In the opinion of J. E. Nettie, secretary manager of the Brandon Provincial Exhibition the grandstand attractions to play around the western Canada circuit of class "A" exhibitions this year, are well up to the standard of other quality programmes arranged in other years. The payroll selected for evening performances is called Canada Marching On," and there is an entire ballet, vocal and dancing unite connected with this production. It carries 64 people, but this will include 20 girls engaged locally.

The other acts on the programme include Duncan's collies, the Five Juggling Jewels, the Les Ovidas, three people in synchronized acrobatics, Elden Dan on the shack wire. Happy Jack Lucky, comic acrobatics, and May, Teddy and Eddy in dancing numbers.

While every class "A" exhibition in western Canada is putting on running races, Brandon will feature only harness events. Regina and Brandon are staging the horse shows in 1931, but this year Regina plans on a return to the galloways.

A writer prophesies that underground locomotives will come soon. Then we shall probably see New York going in for hell-scrapers.



"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, tears were then others.

"Then I heard to rely on Aspirin."

The sure cure for any headache is real. But remember, we insist, postpone it. That's what Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And once you are comfortable the pain seldom returns!

Every Aspirin tablet, Bayer's put it away, or put off before it, is a mistake, to finish the day; every is better, but it is also a little foolish. So is sacrificing a night's sleep because you've an upcoming night, or spending tooth, neuralgia, sciatica. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact, established by the last twenty years of medical practice.

The only caution to be observed is when you are taking Aspirin. Don't take a substitute because it will not get the same. Aspirin is made in Canada.

New Way To Raise Grain

Wheat Farmers Should Try Three Quarter Fly Summer Fallow

Successful experiments in the use of chemicals aged in spreading up the growth of wheat plants are being continued at the Victorian state research farm at Werribee, near Melbourne. The results are proving of practical value to wheat raising and in the introduction of varieties from other countries.

Ordinarily 30 years are required to produce new cross-bred wheats, from the time of cross fertilization until distribution to the farmer. By including the plants in a vapor entirely illuminated with electric light it is possible to grow the first three generations of plants in one year, and thus reduce the total time by two years.

Sometimes into varieties possess qualities, such as size of head or grain, which it is desirable to introduce into early varieties. As these two types are different at the same time, it is not often possible, without artificial aid, to cross them. The use of electric light is a valuable time-maker it possible to hasten the development of the late types sufficiently to allow the cross to be made.

The Australian experiments were begun by Professor Wadham in 1929 as a result of observations on the growth of Australian varieties of wheat in England, and of English varieties introduced to Australia. The Australian varieties in England, Professor Wadham noticed, produced very short, pale shoots, with early tillers. On the other hand, English varieties in Australia remained long-culmed and green until the autumn, and were then adversely affected by the winds in November and October.

Experiments showed that the combined effect of light and heat on the natural early had an important effect on its development. By increasing the daily "day-length" of plants to twelve hours, it was found, the maturity could be hastened. Similarly by lengthening the period of light to twenty-one hours, the plants remained green and vigorous, and by keeping them continued productivity for 60 days.

The minerals necessary for good tooth are, fortunately, supplied in the ordinary foods we eat. Milk, cheese and eggs are particularly rich in them, as also are the older tooth tissues, and it is of vital importance that the diet of the growing child should contain a sufficient amount of the foods to supply the calcium required, especially during the period when the teeth are forming. Dr. Helen Mackay, Agriculture, Ottawa. There will be no danger of a deficiency of milk is served as a beverage, particularly during the period of pregnancy and lactation, and of green vegetables, cereal products and vegetable fibres, and sunlight.

It's "the old home" to dad and "the old man" to his family, but it's always "the car" to mother.

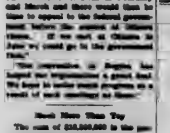
Only a Superstition

Why Did Everybody Think Jones Was Dead?

It is a current superstition that the pig is naturally a filthy creature, but it is only a superstition. The experimental farm which is run by the West of Scotland Agricultural College at Auchincruive in Ayrshire is demonstrating that the poor porker has been maligned in this regard. On a recent visit of a party of students they were just coming out morning in a glass of hot water before the food supply—it's your daily assurance and when you have finished the first bottle weigh yourself again.

Now you can laugh at the people who spend money galore to lose a few pounds of fat—now you will know the pleasant way to lose unsightly fat, and you'll also know that the 4 vitalizing salts in Kruschen Salts must have to function properly—but perspiration will help.

After that you'll want to walk around and say to your friends—"See the bottle of Kruschen Salts is worth ten dollars of any fat person's money."



Prince Governor: "Any complaints?"

Convict: "No, but I would like a cushion for the little monkey in my cell."—Dartmouth, Nova.

Final Crop Estimate

Wheat Crop Of Canada For 1931 Now Placed At 283,165,000 Bushels

Aggregate value of all field crops in Canada in 1931 is estimated at $430,080,100 as compared with $561,-948,900 in 1930, the Dominion Bureau of Statistics reported recently. The report is the final estimate of the season, yield and value of all crops in the Dominion for the past crop year.

The wheat crop of Canada in 1931 is now estimated at 283,165,000 bushels as compared with a revised figure of 566,079,000 bushels for the crop of the previous year. The new estimate for 1931 represents a slight increase of about one million bushels over the provisional estimate of November 15. Increases occur in Ontario, Saskatchewan and Alberta, with the estimates for the other provinces practically unchanged.

Total area under field crops in 1931 is estimated at 37,966,000 acres as compared with 34,314,870 acres the previous year with an aggregate value of $430,080,900 There was a decline of 1,350,000 acres in the area devoted to field crops in 1931 as compared with 1930. The decrease being principally confined to Saskatchewan, Manitoba and Saskatchewan.

Order Has Increased

French People Are Developing Taste For Canadian Apples

We are delighted to know that our friends in France are developing a taste for Canadian apples. Ottawa has just announced "week-by-week" statistics of apples shipped to Paris for varying the applicable fruit. One of the largest fruit-importing houses in the Republic has placed an initial order for 10,000 boxes of apples, valued at $13,000, and correspondingly large orders are now being received in the future. Public auctions will be held, in addition to the distribution of two thousand of Canada's finest apples to the consumer. It is good to hear that Canada is finding new markets for her fruit. Of the crop of 1931 we learn, only 2,415 barrels were sent to France, while last year the figure reached to 32,363.

Does Not Deserve Sympathy

Public Opinion Unsympathetic Against Drunken Drivers

Liquor is nowhere so much out of place as in the persons of men and women who are in charge of a motor car. Public opinion is fast coming to realize more severe against the indiscriminate carnage on the lives of citizens by taking to what is called "motor" under the influence of liquor. And rightly so. The driver who injures or takes the life of another person as a result of an accident for which intoxication was responsible is subjected to no sympathy and no leniency.

Senator Wood Problem

Senator Wood Recently Elected To Represent Manitoba In Senate

Senator Manitoba is most heavily infested with noxious weeds of the Canadian prairies, the Red Fame River district suffers by the heaviest infestation, according to a report presented at the annual conference of agriculturists, of Association of Canadian Agricultural Research Council, by J. H. Haynes, chief investigator for the council.

Mr. Haynes's report was based on exhaustive weed survey for the research council. This report showed that weed infestation was greatest in a large extent by the moisture and types of soil. Irrigation districts and areas around lakes suffered severely. Last year southern Saskatchewan was listed almost ten day for even result, but recent spells, following the rains were become practically nothing but weeds grow there this year.

An interesting experiment proving the value of clean farming methods was reported by Dr. L. E. Kirk, formerly of the University of Saskatchewan, now agrostologist for the Federal Department of Agriculture. The Federal Department acquired about one million bushels over the provisional estimate of November 15. Increases occur in Ontario, Saskatchewan and Alberta, with the estimates for the other provinces practically unchanged.

Total area under field crops in 1931 is estimated at 37,966,000 acres as compared with 34,314,870 acres the previous year with an aggregate value of $430,080,900 There was a decline of 1,350,000 acres in the area devoted to field crops in 1931 as compared with 1930. First Rule Of The Road

Be Absolutely Sure Your Brakes Are In Working Order

A great humanitarian moved suddenly out of the railway road, and the other morning preparatory to being coupled to a long train for a fast run and numerous stops. In the line of business which he represents, especially the requirements of his car, a young man must be ready to go on a moment's notice, day or night, in all kinds and ends. Suddenly the general engineer reminded out his head as the engine gathered speed and explored the countryside with a smile. That's one of the first rules of the road, he seems to say, to prepare to change plans owing to lines of emergency."

A number of rules of the road will be applied with equal to another form of transportation. the motorist who has many years of experience behind him, and many miles to his credit, knows the importance of the mechanical condition of the machine. He may guide down the highway thoroughly conscious of the fact that one of the chief causes for accidents is the poor condition of the brakes. Before starting out on a long trip he will be certain that his brakes are "set to taking hold as they should," ought to be "adjusted to themselves" of the road until they are "just right."—Cochrane Times-Post.

The Port Of Missoura

Prospecting Party On Ground Has Many Claims Staked Out

Right a new name on the map of Canada—"Missoura."

It is on Peace River. Only a few years ago it might be reached by dog team. Formerly, when it became necessary to get supplies in or anything of a place at all, it was necessary to go by boat. Three years ago a party of Americans bought several claims there and took out a number of leases. Last year was the start of a rush that saw 1,200,000 staked. Another year saw 2,000,000 staked. There are now 5,500,000 acres in Canada, while at the end of last year there were 3,500,000 staked. Of this area of 5,500,000 acres in Canada, as compared with a total of 500,000 at the end of that time. At the beginning of the present year there were 405,376 cases, or one for every 13 persons in the Dominion, while the population of Canada is given in total of 1,350,000, or seven persons to each one.

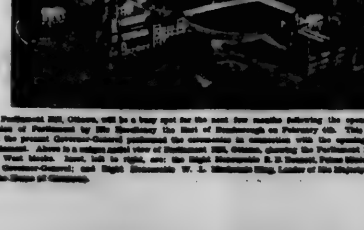
Honor For British Regiment

The College, distinguished medal, one of the highest honors which can be conferred by United States in recognition of meritorious service in the world war, was awarded to Brig.-Gen. Thomas Bentley Mott, C.B., C.M.G., D.S.O., of the Royal Canadian Dragoons, who commanded the first cavalry brigade of the American Expeditionary Force in France.

"Sonny, do you love me still?"

"Yes—better than any other way."

Talking about life is dumb things most of us have seen a watch spring.

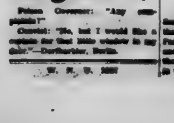


PARLIAMENT WILL BE THE CENTRE OF INTEREST FOR NEXT FEW MONTHS

Parliament Hill, Ottawa, will be a busy spot for the next few months following the opening of the Second Session of Parliament by His Excellency the Earl of Bessborough on February 4th. This was the first time that the present Governor-General opened the session in person, on the occasion of the Golden Jubilee of Confederation in 1917. Above is a panoramic view of Parliament Hill, from the Chateau Laurier, showing the Parliamentary Buildings and West Block. Inset, left to right, are: the Right Honourable R. B. Bennett, Prime Minister; His Excellency the Governor-General; and Right Honourable W. L. Mackenzie King, Leader of His Majesty's Loyal Opposition in the House of Commons.

Birth Rate Wins Toy

The sum of $35,000,000 is the proposed capital outlay of the Red Toy Army, announced in China, during 1932. Yet the great inventor could not prevent upon a single citizen in Switzerland, Canada, or Italy, in connection with what was loudly regarded as an interesting toy.



First Baby Of The Year

Is Always Welcomed

A great humanitarian moved suddenly out of the railway road, and the other morning preparatory to being coupled to a long train for a fast run and numerous stops. In the line of business which he represents, especially the requirements of his car, a young man must be ready to go on a moment's notice, day or night, in all kinds and ends. Lower Construction Costs

Approximately Eleven Million Dollars Saved By Canada Last Year

Approximately $11,000,000 was saved in Canada last year in the cost of construction of dwellings and other buildings, in 61 cities, by the reduced cost of materials, the department of trade and commerce reports in a statistical review. This amount represents roughly one-fifth of the reduction in the total value of building permits issued during the year as compared with 1928.

A report shows that the aggregate value of building permits in 61 cities last year was $110,971,450, a reduction of $53,000,000 from 1928. The index of prices of building materials dropped 20 per cent. during the year. Compared, however, with figures for 1926, the peak post war industrial period, the cost of building materials has dropped by nearly 40 per cent. while the total value of permits issued was more than three per cent.

Detailed figures from 59 of the 61 cities show that permits were issued during the year for the construction of over 10,000 dwellings and 23,000 other buildings.

VARIETY IN JACKET-LESS FROCKS IS UNENDING
Don't you love this model, so distinctly individual?
It has the wrapped bodice closure, so youthfully attractive.
And it combines the two smartest colours—black and vivid-red supple woollen.
It's a charming dress to wear by itself for the cool. It dazzles with a rather sporty air. And a cross kind is that you can wear it correctly sporty smartly without a top-coat.
You can also make it as a complete dress, with matching coat, or separate blouse and skirt. Cut in sizes 14, 16, 18, 20 years; 34, 36, 38, 40 and 42 inches bust measure.
Wool jersey, velvet and many spun novelties are also suitable.
Size 16 requires 2½ yards 39-inch for blouse with 1 yard 36-inch for skirt.
Price of pattern 25 cents in stamps or coin. Send to publication. Write coin carefully.

SUNDAY SCHOOL LESSON

FEBRUARY 7

THE SLAVERY OF SIN

Golden Text. "Every one that committeth sin is the bond-servant of sin. John 8.34

Lesson John 8.31-36.

Devotional Reading Romans 6.1-10

Explanations and Comments

A Test Of Allegiance, verses 31, 32 —Jesus has been speaking of Himself as the Light of the World and John records the fact that many then believed on Him. Next he tells that Jesus therefore spoke to "those Jews that had believed Him." "Believe on" implies surrender as well as intellectual assent. Having stated that it was of the hearers believed on Jesus John hesitates himself in verse 31 that others had only "believed" not believed on. They had given a sort of assent, but had not really surrendered of themselves." These men Jesus tested when He said to them: "If ye abide in My Word," if you surrender yourselves wholly to My guidance and make my words the standard of your conduct, "then ye are truly my disciples." It was not enough for them to believe that Jesus spoke the truth in claiming to be the Messiah they must accept Him as their Messiah.

"And ye shall know the truth, and the truth shall make you free." Those who were intellectually and spiritually free, though in bondage to men, were more truly free than those who were politically enslaved but were the bondservants of sin.

A Proof Of Slavery, verses 33-34 —"We be Abraham's seed," they answered, "and have never yet been in bondage to any man." The first words of the Decalogue are a reference to their bondage in Egypt. The descendants of Abraham had been successively under the dominion of Egypt, Babylon, and Syria, and were at this time in subjection to Rome. The Roman legions were quartered in their holy city. Their indignant words were an empty boast by which they sought to declare themselves superior to the Romans to whom they were subject politically.

Verily verily is a solemn way of emphasizing the thought that follows; every one that committeth sin is the bondservant of sin. The freedom of which he has spoken was freedom from sin, and he who habitually sins is a slave.

A Proof Of Freedom, verses 35, 36 —The slave might be sold or expelled from the house at the will of his master, but the son is the heir; second only to the master of the house where he continually abides. "If therefore the Son shall make you free, ye shall be free indeed."

B.C. Coal Production

Coal production in British Columbia for all of 1931 was 1,890,170 tons, a slight decrease from 1,897,130 tons mined in 1930, it was stated at the Provincial Mineralogist. Production last year was 171,311 tons, compared to 177,304 tons in December of the previous year. Total decrease from the previous year was 108,960 tons, shared evenly as between nearly all districts.

Higher Taxation

Financial Institutions In Saskatchewan must Be Unattached Investor

Such Saskatchewan financial institutions as banks, trust, loan and mortgage companies, are going to contribute a greater share than they do now to the revenue of the province, Premier Anderson announced.

Under such measures under the provisions of the Corporations Taxation Act, Saskatchewan now derives a revenue of slightly more than $400,000, the percentages coming from insurance companies.

In the effort to balance the budget by increasing revenues and reducing some forms of public services, the government proposes to make amendments to the Corporations Taxation Act with a view of bringing the revenue from that source to upwards of $600,000, the banks to pay a fair share of the 100 per cent. increase.

A New Industry

1 unemployed Men To Be Given Work In Manitoba Forests

Jackpine from Manitoba's forests is to be cut this winter for use as telephone and hydro poles and as square timber, thus giving the province a new industry and a number of unemployed men work. Announcement was made by Hon. W. R. Clubb, Minister of Public Works, that a contract for cutting jackpine in the Lac Du Bonnet district had been let.

Hitherto this wood had not been considered suitable for poles, but recent tests carried out at the suggestion of the Industrial Development Board of Manitoba now said to have proven its value.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

Scientists have found what they believe to be the tomb of the Pharaoh Pepi Ovid on the site of the old Grecian city of Tanis.

The ancestral line of the cabbage is traced back to the cliff cabbage of Europe and Asia.

SAYS JAPANESE AIM DOMINATION OF THE PACIFIC

Shanghai, China — The Chinese assertion of Shanghai prepared the way for negotiations to the Japanese ultimatum that they suppress anti-Japanese agitators and boycotters Japan now has 24 ships of war in the Whangpo River off the city.

Chinese forces said the municipal government had ordered the Bureau of Public Safety to close the local branch of the National Salvation Society, one of the leaders in the boy[illegible]

This decision was reached after new formal demands were made by Japan.

While the negotiations were going on 2,000 British and United States marines prepared to land for the defence of the international settlement and about 10,000 Chinese troops took up stations.

Eugene Chen, who recently resigned as China's Foreign Minister, declared the Japanese policy toward China eventually would mean war between Japan and the United States today, he said, was determined to master the Pacific, and to achieve that aim conflict with the United States was inevitable.

First, he asserted, Japan looks to [illegible] domination of Manchuria, from which she can dominate the entire Asiatic mainland and then to the conquest of Australia.

These steps, he said, are "being carried out by the mediaeval-minded military autocrats in the form of a general staff which is the real government of Japan."

"Men of this type planned the Chino-Japanese and Russo-Japanese wars," said Dr. Chen, "now they see Japan dominating all Asia, including Australia.

"Between her and this goal stands the United States. Therefore, she plans for war. While other nations disarm, she arms Manchuria is but a preparatory step for her greatest conflict in which she hopes to launch forever the influence of western nations in the Pacific Ocean."

The Chinese made extensive preparations to repel a possible invasion. Military patrols were established outside the city so that both the foreign settlement and the Chinese sections were completely surrounded.

Fast Mail Planes Ordered

British Hopes To Double Speed Of Mail Delivery

London, England.—The air ministry has ordered planes whereby it hopes to double the speed of air mail delivery on all Empire sky routes.

The specialty placed an order with Boulton and Paul, Ltd., builders of the famous Royal Air Force high speed bi-planes, for a new type of all-metal plane, capable of a cruising speed of 200 miles an hour and a service ceiling of 12,000 feet.

This machine, it was said, would be the forerunner of a fleet of similar craft which would carry two pilots and 1,000 pounds of mail. Each machine would have a cruising radius of 1,000 miles with full load.

Makes New Swimming Record

Boy Swims Five and Half Miles In University Pool

Saskatoon, Sask.—Swimming six lengths of the University of Saskatchewan swimming pool, William Crave, Emmanuel College student, beat the Saskatchewan record for a five mile underwater swim. The previous record, Jes Griffiths reports, was that of Leslie Lowe, of the College of Medicine, made in 1928. As the pool is 60 feet in length the distance would be over five and a half miles. Craven was in the water from 7:18 to 11:36.

Police Make Seizure

Montreal, Que.—More than 1,000,000 lottery tickets were seized here when provincial police descended upon a printing plant. No arrests were made but officers took printing plates to police headquarters pending further investigation. About 30 men were busy running the presses when the officers entered the plant.

Sir Hubert Wilkins May Build Special Type Of Submarine For Purpose

Victoria, B.C.—In a new type of submarine, differing from any underseas boat yet designed, Sir Hubert Wilkins, Australian explorer plans to make the Antarctic expedition next year [illegible] from ice.

"I may take a holiday over the Antarctic in the fall and am also considering another submarine expedition under North Polar ice the following summer," he said.

"For my latest under-ice expedition," said Sir Hubert, "I have in mind the building of a special type of submarine which will be hydraulically propelled. In 1925, I discussed with Vickers engineers a type of submarine which would be suitable for exploration work under Polar ice." He said he did not know where his new [illegible]

Sir Hubert, it was said, would be used for the propulsion of the underseas boat, in place of batteries. It was stated that the cost of such a craft would be about $150,000 to $200,000.

Trouble In India

Lord Irwin Says Responsibility Lies With Nationalist Congress Party

London, England.—Lord Irwin, former viceroy of India, said in a speech here that responsibility for the present trouble in India lies with the Nationalist Congress Party.

"I think there is little doubt that Mr. Gandhi did not want this campaign to develop as it has," he said. "I believe that while he was in this country for the Round Table Conference some of his lieutenants in India created a situation which he could not control when he got home.

"If I had been in India as viceroy I don't think I should have acted any differently than Lord Willingdon has done."

To Overcome Drouth

Need For Outlay Of $500,000,000 To Irrigate Seven Or Eight Years

Montreal, Que.—There is an urgent need for an outlay of $500,000,000 to irrigate land in the prairie provinces with the next few years in order to save western farmers from further drouth loss, R. G. Sweeney retiring president of the Canadian Forestry Association, told the convention of that body here.

Agriculture is dependent upon the forests, Mr. Sweeney said, and the great drouth in southern Saskatchewan and Alberta, and other nations disarm, she arms Manchuria is but a preparatory step for her greatest conflict in which she hopes to launch forever the influence of western nations in the Pacific Ocean."

The Chinese made extensive preparations to repel a possible invasion. Military patrols were established outside the city so that both the foreign settlement and the Chinese sections were completely surrounded.

Fast Mail Planes Ordered

British Hopes To Double Speed Of Mail Delivery

London, England.—The air ministry has ordered planes whereby it hopes to double the speed of air mail delivery on all Empire sky routes.

The specialty placed an order with Boulton and Paul, Ltd., builders of the famous Royal Air Force high speed bi-planes, for a new type of all-metal plane, capable of a cruising speed of 200 miles an hour and a service ceiling of 12,000 feet.

This machine, it was said, would be the forerunner of a fleet of similar craft which would carry two pilots and 1,000 pounds of mail. Each machine would have a cruising radius of 1,000 miles with full load.

Makes New Swimming Record

Boy Swims Five and Half Miles In University Pool

Saskatoon, Sask.—Swimming six lengths of the University of Saskatchewan swimming pool, William Craven, Emmanuel College student, beat the Saskatchewan record for a five mile underwater swim. The previous record, Jes Griffiths reports, was that of Leslie Lowe, of the College of Medicine, made in 1928. As the pool is 60 feet in length the distance would be over five and a half miles. Craven was in the water from 7:18 to 11:36.

Police Make Seizure

Montreal, Que.—More than 1,000,000 lottery tickets were seized here when provincial police descended upon a printing plant. No arrests were made but officers took printing plates to police headquarters pending further investigation. About 30 men were busy running the presses when the officers entered the plant.

World's Champion Hen Dead

Lady Victorine Becomes Famous Through Record Egg Production

Saskatoon, Sask.—Her record of production standing at 604 eggs — said in her brief existence of four years—Lady Victorine, world's champion hen, died in one of the poultry houses at the University of Saskatchewan.

During her pullet year Lady Victorine eclipsed all previous records by laying 356 eggs in 365 days. In her second year she laid 270 eggs, in the third 111, and the year she managed to have 18 in the trap nest.

Free To Make Agreements

British Government Entering Imperial Conference Entirely Unfettered

London, England.—The British Government will enter the Imperial Economic Conference at Ottawa, free and unfettered, no prior commitments will be made with foreign countries which might prejudice free discussions and possible trade agreements at Ottawa.

July 21 and 23 are two of the dates which are being rumored for the opening of the Imperial Economic [illegible]

Claim To Be Investigated

Ottawa, Ont.—Chief Justice Murray, of the Alberta Supreme Court has been appointed commissioner to probe into circumstances surrounding the payment of $71,270 as war reparations to owners of the "Cyprus Queen," a schooner which was requisitioned and sunk by the enemy July 21, 1918, about 60 miles off the coast of Ireland. Subsequent information alleging irregularities in the claim have caused the investigation.

Depression and Apathy

Premier Of Wales Plays Tennis On Tour Of Youngster Convention

London, England. Depression and apathy are the devil's own, the Prince of Wales told 10,000 boys and girls in Albert Hall at a meeting arranged by the National Council for Social Service.

"They're not English," he cried, "and by with them!" and the roof rang with cheers.

Emerson said a good many years ago, that the Englishman is the one who stands firmest in his shoes," said the Prince, "and I know this is true of the rising generation of today.

"So far as I am concerned, many paths in life are closed to me much that I would like to do I cannot, but I have tried to bring the people of the Empire closer together I have had my failures I know but in these years, with few precedents to guide us, to have had no failure is to have attempted nothing.

"There is a danger that some people are getting too used to the present critical situation," he said.

"It's no use waiting for that doubtful thing of a good time coming We have got to fight, and have I put my faith to the younger generation to keep England 'a bulwark for the cause of man,' to keep our great heritage in trust for those who come [illegible]

Appointment Of New Minister Of Finance

Rumor Names Hon. Edgar Rhodes Will Take Office

Ottawa, Ont. Hon. Edgar N Rhodes will be Minister of Finance when parliament opens. Prime Minister R. B. Bennett intends to relinquish the duties of that department shortly; and Mr Rhodes will then be sworn in Intimation to this effect is made in highest circles. For the early part, if not the whole of the session, Mr Rhodes will retain also the administration of the Department of Finance.

Hon. W. A. Gordon, Minister of Immigration and Mines, will very probably take over the portfolio left by Canadians, who had emigrated to that country to complete their education.

Receive Life Sentence

Two Bengali School Girls To Be Transported Following Conviction On Murder Charge

Calcutta, India.—Wearing red sarees and with their hair adorned with lotus flowers, Miss Santi Ghose and Miss Sunity Chowdhuri, Bengali school girls, were sentenced to "transportation for life" for the murder of Magistrate C. G. S. Stevens.

As it no longer is the policy of the government to send prisoners abroad, it is believed the two girls would be exiled to some part within the confines of their country to be held in restraint.

While the terms of their sentences were translated to them they seemed [illegible]

Life sentences carry remission amounting to two months yearly for good conduct, so the girls may expect to be imprisoned for about 16 years. They probably will be nurse or clerical assistants, although their sentence theoretically calls for hard labour.

Fought For Twenty Years

Two North African Provinces Finally Conquered By Italy

Tripoli, Libya, Africa.—Over the dead forms of 2,000 rebel tribesmen and after 20 years of incessant warfare, Italy's banners float across the "spacious" of north Africa which knows as the colonies of Tripoli and Cyrenaica. Marshal Badoglio, military governor of Libya, formally reported to the government that the province had been thoroughly pacified and occupied for the first time since Roman days. He is lauded in 1913, when Turkey renounced her rights.

France In Mourning

Paris, France.—The naval affairs committee of the Chamber of Deputies, by a vote of 16 to two, went on record as favoring the immediate construction of a 26,000-ton battle cruiser as the French answer to Germany's "pocket battleships."

LEADER RESIGNS

TAKE OVER CANADIAN PREVENTIVE SERVICE

Commander Rose (left), head of the Naval Branch of the Department of National Defence, and Major-General James H. MacBrien (right), Chief Commissioner of the Royal Canadian Mounted Police, who will direct Canadian preventive work both on sea and land, according to reports from Government officials. Previously the highly responsible work of preventing frauds against the revenue on the high seas and in remote parts of the Dominion was carried on by the Department of National Revenue, and the change has been made in order to make the preventive work more effective and more economical.

NATIONAL POLICY FOR RETAINING BEST BRAINS HERE

Vancouver, B.C.—An appeal to industry to encourage the use of Canadian materials and to stop the flow of the best brains among the youth of Canada to foreign countries was made by Dr. M. M. Tory, president of the National Research Council of Canada, addressing the Canadian Club of Vancouver at a luncheon meeting in the Hotel Vancouver here.

More than 70 delegates from points as far east as St. John, N.B., and about 200 delegates from British Columbia centres heard Dr. Tory's appeal for support for the youth of the nation engaged in scientific research.

"A national policy is needed to keep the young men of Canada at home," he said. "The time will come when it will be only necessary to tell the governments of the provinces that we have young men that should be encouraged to stay at home, and it will no longer be a question of cost," he said. "We must use the first class brains of the nation. Of a nation that uses only the third and fourth class can't expect to be anything more than a third and fourth class country.

"No nation is doing more today to encourage scientific investigation in co-operation with industry than Great Britain Dr Tory said And we will find that when this depression is over that Great Britain will come out on top. I only hope that we can keep pace with her," he said.

Foundation of national research councils throughout the British Empire, he said, was the outcome of [illegible] reform in western continentals of industry. Before the [illegible] was made in highest circles. For the early part, if not the whole of the session, Mr Rhodes will retain also the administration of the Department of Finance.

Hon. W. A. Gordon, Minister of Immigration and Mines, will very probably take over the portfolio left by Canadians, who had emigrated to that country to complete their education.

Possible Changes In Our Present Economic System Stressed By Robert Gardiner

Possible changes in the present economic system of government were stressed by Robert Gardiner in his address to the annual meeting of the convention of the United Farmers of Alberta last December. U.F.A. president for the ensuing year. Mr. Gardiner, who succeeded Henry Wise Wood as president of the organization, said in part: "Mr. Wood retired last year after 20 years in head of the organization.

"I do not believe that there is anybody in this room who has not already had in the interests of the success of the next," he told the 350 delegates from the various parts of Alberta present. "The economic world dominates the existing political system and undoubtedly endeavor to guide the processes by which the surrounding system may be controlled. Those clients are to be found outside the province. Our primary business is to be in the light of recent history it is becoming increasingly apparent that primary place in the economy of the country."

The president declared that governments apparently "do not realize" even before the threat of bankruptcy that conditions have to be only the people to be paid rather than the money that is to be paid. "It is only a matter of time," he said, "until the 'real thing' gets us and we will be 'running' with the whole machinery of government and industry, and the whole of the country.

"Some of the most influential of these people are obsessed by the evil to power, by the desire to control the destinies of others. Some of them would not like to be called dictators, but if they do succeed in establishing the control of the government in this country before they submerge it, by the most powerful force, of the private interests, the individual interests, it will only be, for the people of democracy, a change from one dictatorship to another, or to put it more bluntly, a change from the frying pan into the fire."

Mr. Gardiner continued: "If we should be confronted with a crisis, I am sure that it would be better and more democratic to meet it under the leadership of the government of the day than under the leadership of any other group of men. Democracy is the strength of the people, and it is the duty of the people to see that it is kept sound and vigorous and responsive to the needs of the time."

Unemployment and the gold standard were referred to by the farm leader. He believed that if the investment policy of the Canadian people had been permitted full play it would result in a higher standard of living and would provide all people with an abundance of leisure for self-development, but it was increasingly manifest that this could not occur under the present system. Depreciation of the Canadian dollar, he continued, would be followed either by a single commodity

"I have been compelled to take the matter into my own hands."

"I don't know. If you really love him, let him be happy—if you can."

Despite Mournful Predictions, Social Economist Says That England Still Leads The World

A world-wide economic conference within the next 12 months, at which representatives from all countries in the world would gather to consider the whole question of trade, was the proposal made by Dr. J. A. Hobson, famous social economist and author, before the Canadian Club, Toronto. Dr. Hobson declared that Britain had receded from her position as the outstanding exponent of free trade. Dr. Hobson stated that Britain had receded from her position as the outstanding exponent of free trade for "purposes of political expediency United States and France by their tariff stand had made free trade with England almost impossible, and new England was "giving" them a dose of their own medicine."

"International commerce can't be run on a one-way street" was his comment.

Dr. Hobson believed a world economic conference such as he had in mind would mark the beginning of a swing to greater free trade among the nations and the tearing down of the super-national tariffs barriers. United States and France were now beginning to realize that nations were an individual could not live unto themselves, he said.

"Where now stands England?" was the topic upon which Dr. Hobson based his address. "England to-day stands he told of personal observations made during his 10 years of retirement from active life. Britain's day of glory was far from being past, he said, in spite of the financial position which were being made for her from many quarters.

England, following the war, had "muddled" matters, said the speaker, in spite of her tremendous sacrifices of men and resources, she was still leading the way in the councils of the world. If England was on banking in 1913 the pound sterling was 76 per cent. of by her "protracted recovery," it was to be considered at that at the present time the bank of England was again quoted results on last and not.

"And these records were all won during unemployment, conceived and made by British workers," he declared.

Big Land Old Home

Given to a taxpayer in Bromley, Kent, England, in the reign of King Henry, but Cook, a police dog owned a short time ago for one month, turned up at the house for her former master. Cook had traveled 50 miles either losing herself or finding her way.

Bankers Record

Conviction In Alberta Shows Increasing Fine Discouragement

Conviction in Alberta, showed increasing fine discouragement in cases involving the four main offences against the bank act, according to Mr. Justice Ives, in the Supreme court of Alberta in charging the grand jury. The offences mentioned in the charge were theft, fraud, embezzlement and false pretences. Mr. Justice Ives said that in 1926 there were 1,000 convictions in the province for these offences, as compared with 15,187,000 for the year 1925, and 14,000 in 1924, or 16,000 in 1923, or 18,1 per cent. over

BORN

Born to Mr. and Mrs. Charlie LaPage of Fort Saskatchewan on January 25, a son at their residence.

Born to Mr. and Mrs. Joy of Ardrossan on January 30th, a daughter, at the Royal Alexander Hospital.

Born to Mr. and Mrs. Pete Gielinger of Josephburg on Monday, Feb. 1st, at LePage's Nursing Home. A son.

CARD OF THANKS

Mr. H. Thome and Family wishes to thank the many friends for their kindness shown during their recent bereavement.

LOCAL NEWS

The Ladies Aid of the United Church will meet at the home of Mrs. Geo. Bunker on Thursday, Feb. 4th., 1932 at 2.30.

Ramsay Thome of the Bank of Commerce Staff at Kelvington, Sask. is spending a few days at his home before returning.

A representative of the British and Foreign Bible Society was in Town on Monday afternoon collecting contributions for that society. He reported that although collections were coming in, they were not quite as large as the previous year.

The Government snow plow went through the Fort going east on the highway on Tuesday night.

Mr. S. O. Jones and Mr. A. O'Brien are paying a visit to Waskatenau this week.

We hear that Jim Harkness has joined the R.C.M.P. in Edmonton during the past week.

Another three vendors have been added to the Record subscription list during the past week, this makes seven new subscribers this year.

If you are not a subscriber to the local paper, why not? A paper is a small town needs the support of all readers and advertisers which is necessary to keep publishing a paper. What's a town without a paper!

We could mention the names of small towns not so far from here that the paper has had to quit publishing on account of lack of support on the part of readers and advertisers. Now the towns are trying to get a newspaper.

Keep your paper alive by supporting it either by being a reader or by forceful advertising in the columns of the Record.

The Regular monthly meeting of the Women's Institute will be held in the memorial hall on Feb. 11, at 2 p.m.

The speaker for this occasion will be Professor E. A. Corbett of the University of Alberta who will speak on "Early history in Alberta". Prof. Corbett is an outstanding speaker and a large attendance is expected.

Visitors always welcome.

IN MEMORIAM

In loving memory of our dearly beloved daughter Effie Morris who passed away Feb. 6th 1930 at Lennoxville Hospital.

Tonight the Stars are gleaming on a Silent Grave,
Where Sleeps in Dreamless slumber,
One we loved but could not save,
No one knows the silent heartaches,
Only those who have lost can tell.
Of the grief the one we Loved so well.

Sadly missed by her Parents, Brothers and Sisters.

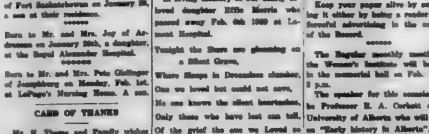
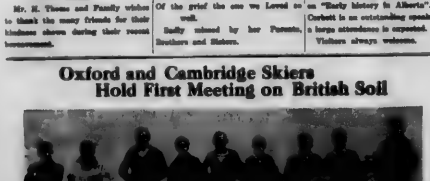
Oxford and Cambridge Skiers Hold First Meeting on British Soil





History was written in Canadian Pacific Rockies, over the end of 1931 and the beginning of 1932, when the ski teams of the Universities of Oxford and Cambridge met their Inter-Varsity meet on British soil for the first time. Established by the famous British Universities here a dozen years ago, competition here changed without interruption to Switzerland, the second visit to Canada being made in the light of the "first British" meet. Arrangements for the accommodation of Universities Ski Teams between Christmas and New Year's Day are handled by the Canadian college teams, were entertained at Glacier by the Rockies by the Government Railways, and were accorded the courtesies of a number of Canadian Ski Clubs. The pictures and (Dark Cambridge) and Mary Jane Varsity meet on Mount Revelstoke, Canadian Rockies, in Glacier National Park, Selkirk Mountains, and Rogers Pass, Glacier, B.C. Left to Right: Alexander Keiller, President of the Ski Club of Great Britain and Honorary Manager of the team; Lieutenant-Commander Walker, (Oxford) Individual champion, W. D. Bruce, Canadian Ski Champion, and Captain of the Canadian team; Captain Wilson, (Cambridge), who won the Individual Championship event; and (in group) Lieut.-Commander Walker, Oxford Captain and Wilson, Cambridge Captain, who were the Individual Champions of their respective teams; Lieut.-Commander Walker, Oxford Captain and Wilson, Cambridge Captain, who were the Individual Champions of their respective teams; Lieut.-Commander Walker, Oxford Captain and Wilson, Cambridge Captain, who were the Individual Champions of their respective teams.

First Meeting of New School Board Held

The first meeting of the new School Board was held in the Secretary's office on Monday, February 8th.

Present Dr. Grauert, Messrs Atkinson, Brown and Todd.

Moved by Mr. Todd that Mr. Atkinson be elected chairman for the coming year. Carried.

The Secretary reported that the new members had all signed the declaration of Office as required by the School Ordinance.

The Chairman, Mr. Atkinson extend a word of welcome to the new members of the School Board.

The minutes of the last regular meeting were read and on the motion of Mr. Todd adopted.

The question of purchase of paper towels was left in abeyance.

Moved by Dr. Grauert that we hold the Board meeting in the Council Chambers at 7.30 p.m. the first Monday, of each month.

Moved by Mr. Brown that the Chairman and Dr. Grauert interview Mr. Jas. Ritchie with full power to engage him as Secretary of the Fort Saskatchewan School Board.

Moved by Mr. Brown and seconded by Mr. Todd that the Chairman and the Secretary-Treasurer (when appointed) be authorized to sign the usual form required by the Royal Bank of Canada, the same having been read.

An account from the Fort Hardware for $3.80 was read and on the motion of Mr. Brown it was ordered to be paid.

Meeting was then adjourned.

Around the Elevators

All elevators are doing a rushing business, the rushing being done at usual times.

Of course the elevator men 'rent their representatives to the Lady Findlay Bridge Party, and of course they brought home the bacon, or I should say the smokes without the bacon, all elevator men are now enjoying a quiet smoke.

Things we noise:

Sam Flemming helping Spring along by thawing out the pipes in his engine room, although the engine room sounds better.

Fred Rowland hitting west along the track with a smile on his face.

John Bemerfeldt looking at the moon and saying it is going to be dry.

Bill Anderson suppressing the fine points of the English language, when his elevator got plugged a few days ago.

E. Hallam feeling like a million dollars, and looking like 7-it does not matter, on Monday morning.

Topics of the Day:

Russia and how to get there three persons allowed—for further particulars ask Tommy Lane.

C. Ashton explaining the Art of Bridge, it appears by doubling or re-doubling you either get more or less. Cecil got the former and his signature are getting the latter.

INAUGURAL MEETING OF NEW COUNCIL

The Town Council for the current year will, as required by law, hold its first meeting on Monday the 15th. February.

Thereafter the regular meetings will be held on the first and third Thursdays of each month in the Council Chambers at 7:30 p.m. There is only one change in the personnel of the Council and that is Mr. A. E. Fillmore who takes the place of Councillor J. Earl Graham who did not seek re-election.

Country Constable: "Pardon, miss, but swimming is not allowed in this lake."

City Flapper: "Why didn't you tell me before I undressed?"

Constable: "Well, there ain't no law against undressin'."

FORT HOCKEY TEAM DEFEATS BRUDERHEIM IN SLOW GAME

Fort Hockey team and Bruderheim tangled in a slow hockey game on hand ice on Tuesday night before a small crowd of fans.

The first period was fast under way, when Tom Henry shaved the boards of the rink and drove a hard shot at Gonlo Christie, but the shot was blocked and as the puck rebounded Stuckey dashed in and netted the rubber for the first goal of the evening. Tom Henry getting the puck down by his own goal shortly the entire length of the ice to the opponents blue line and sent a drive at the goal the puck never left the ice, but it was rounded to Ed Lee visiting goalie and the count stood 2-0 for the Fort.

In the second period play evened up. But once again the locals jumped ahead, when Lane beat the Bruderheim forwards and just as he approached the goal he let go a peppering shot which passed Christie and caught in the goal twine.

In the third period some close checking on the part of the visitors who pressed hard against the Fort team to get counters, but the Fort warded off their efforts and the game ended 3-0 for the local squad.

Gauf, Lane, Flintoft, Stuckey and Warren were the pick of last nights game, although at times real hockey was displayed by both teams.

Miller and Nesbitt were the outstanding players on the visiting team. Line up: Bruderheim.

Christie, Berg, Frederking, Frederking, D. Henne, A. Henne, Miller, Nesbitt, and Kroening.

Fort Lineup.

Pocock, Towler, Henry, Lane, Gauf, Karren, Stuckey, Hutton, Flintoft, and Lamoureux.

Josephburg Junior Red Cross To Hold Party

The Josephburg Junior Red Cross Society held their regular meeting in the senior room of the school on Friday, Feb. 5.

The meeting was called to order by the President, Lorna Krebs, and opened with the singing of O'Canada and the repetition of the Pledge.

Following the reading of the minutes of the last meeting, by the secretary, Ruth Gunn; the circulating magazine's and treasurer's reports were given by Margaret Mann and Harold Mohr.

A short business period ensued during which it was decided to send stamped Easter Greeting Cards to the Red Cross to be distributed among disabled soldiers. These cards may then be addressed by the soldiers who wish to send Easter tidings to their friends. All cards must be in before Feb. 26.

A motion was carried to have a combined Easter and April Fool's party in the school. This will be held on the evening of Thursday, March 24th at 7:30 o'clock. Arrangements for the party are under the directions of a committee, consisting of Ruth Gunn, Ruth Griffin, Margaret Mann, and Dave Fisher.

Any suggestions will assuredly be appreciated.

The business meeting adjourned with the singing of God save the King.

The Senior room then proceeded to Mrs. Griffin's room where they were entertained by a program sponsored by the Junior pupils.

The next meeting will be held in the senior room on Friday, Feb. 19.

Cost of living in Canada has dropped by over 15 per cent during the past two years, the Dominion bureau of statistics reports. This is the second largest decrease among the leading nations. United States leading with a drop of 16.5 per cent.

YPRES VALLEY

The birthday party held at W. E. Pearce's was quite successful.

The party being held close to Robert Burn's Anniversary, most Scotch songs were part of the pro gram Thom were highly enjoyed by everyone.

Songs were contributed by Mrs. Meikle'l, Mrs. H. Brenton, Mrs. D. Gunn, Mr. D. Gunn, Jr., Mr. Harry Brenton and Mr. Jim Campbell.

Reading by Mr. W. Pearce. Musical selections by Cecil Simmons on the Harmonica. Mr. H Brenton on the Cornet, and Mr. H Hughs on the Accordian.

After the musical selections two contests were enjoyed.

Lunch followed and the cutting of the Loaf in Aid birthday cake which was shared by all.

On Wednesday, Feb. 3rd a few friends called on Mr Jos. Brandy to welcome him home from the hospital and played whist and bridge till early Thursday morning.

W. Dodds spent last week in Edmonton.

Toby has a new record! We wonder what kind of a record it is.

Mr. and Mrs. W. E. Pearce and Mrs. L. Clark, Mrs. Jos Irwin, were Edmonton visitors Monday. They attended Mrs. Clark's and Mr. W. Pearce's birthday at the home of their mother.

The Young Peoples Club are busy these days practising a play to be presented in the near future.

The Ladies Aid have a Leap Year Party in view for Feb. 29th, at Ypres Valley Hall.

The Ladies Aid will meet next Wednesday, Feb. 17th, at the home of Mrs. E. Lawrence.

Here and There

Figures of United States motor cars survive New Brunswick in 1931, issued by the provincial bureau of information and bureau of travel, show an 8 per cent gain over 1930 The new record for 1931 is 58,583 as compared with the former record of 54,068 for 1930.

Approximately $11,000,000 was saved in Canada last year in the cost of construction dwellings and other buildings in 61 cities owing to reduced cost of building materials. Aggregate value in these cities of building permits was $110,371,416.

The aid of Hon. G. Howard Ferguson, Canadian High Commissioner in London and of Lord Beaverbrook will be sought by the Maritime Provinces representatives who left aboard S.S. Montcalm from Halifax recently, in an effort to secure the lifting of the British Government's embargo on Canadian potatoes.

A railroad career that has seen many changes and several of the widely separated territory without another man—save when Robert E. "SALADA" TEA

"Fresh from the Gardens"

Are We Over-Governed?

Even before existing conditions and present difficulties began to force them to public life, the leaders in finance, industry and business, and overburdened taxpayers in general, to give heed to the cost of operating our governmental businesses, national, provincial, municipal and educational, the question "Are We Over-Governed" had sporadically arisen. Many people believed we were, and probably the average man if asked the question would substantially have answered "Yes," adding, "But what can be done about it?"

In answering "yes," Mr Average Canadian would recognize the fact that in the far-flung and sparsely settled Dominion we have ten Provincial Governments, ten civil services, to administer to national and provincial affairs of ten million people That, in addition, we have Commissions, Bureaus, Boards, of all kinds, thousands of municipal units, and tens of thousands of hands of school trustees, with a multiplicity of taxing bodies, legislative and higher courts of law. He would be contemplating the enormous annual output of school board and municipal by-laws, Provincial and Federal statutes, rules and regulations beyond computation. "Yes, we are over-governed," he would say, and, without actual knowledge of the local government institutions in the Old Country, possibly add: "Look at England, Scotland and Wales with only one Parliament and one Government for forty odd millions of people."

But in asking, in reply, "What can be done about it?" Mr. Average Canadian would have in mind the fixed constitution of Canada (B.N.A. Act), the written constitutions of the Provinces with their stated boundaries, the strict division of legislative and administrative authority between the Dominion and the Provinces. He would be giving thought to racial differences, to language difficulties, to differences of creed, to separate systems of schools, and, perhaps above all else, to those many local jealousies, sectional ambitions, business considerations, in a word, all the subsistence of mere human individuality, and in the aggregate as communities, which would stand in the way of co-operation, co-ordination, amalgamation to bring about a reduction in governmental units. So, with a fatalistic shrug of the shoulders, he exclaims: "What's the use, what can be done about it; It's a mess, but there is no way out, so we might just as well grin and pay the piper."

But now the Canadian people have been paying the piper so long, and the cost of the tunes played have become so excessive, that the grin has faded from their faces, and many are beginning to ask themselves a new question, namely: "Are we as a people as lacking in initiative and determination, so averse of labor and ability to solve difficult problems, that we have become useless and helpless? Is it not time that we grappled with this thing that is crushing us and cut off some of the tentacles sucking our economic lifeblood away in taxes?"

The outcome of this new orientation in thought about these matters in the suggestion that the unit of representation in municipal bodies be enlarged, thus reducing the number and size of such bodies. For example, it is suggested that the small rural school districts be abolished and schools within a municipality be administered by one board; that several adjacent rural municipalities be merged into one.

To illustrate, and taking the Saskatchewan rural municipal system for this purpose. A rural municipality consists, as a rule, of nine townships, that is as near as 36 miles square. This system was adopted, and the Province subdivided, when there were no good roads as we know them, only trails; when there were no automobiles and people travelled on horseback or by buckboard; when there were no rural telephones. Under these conditions an area 18 miles from east to west and 18 miles from south to north was considered quite large enough for local municipal purposes. But today how much communities could be merged, providing a municipal unit 36 miles by 36 miles which, with rural telephones, good roads and the automobile, could be administered even more easily than the one-quarter of the same area now used to twenty-five years ago. Yet the expenses of three municipal councils would be saved, including three municipal officers, three paid secretary-treasurers, three auditors, and many other costs entailed by duplication in councils, administration and management.

This is but a sample of the suggestions being advanced. It is deserving of consideration and discussion at least. The same idea as applied to Provinces will be dealt with in the next article of this series.

One of the most important parts of a new instrument used to measure heart-beats in a gold-plated wire that is as fine as to be invisible to the naked eye.

For Horses and Saddle.—Dr. Thomas' Eclectric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will cease and in a short time cause complete

Sorry To See Night Coming She Could Not Sleep

Mrs. E. McElroy, Kirkfield, Ont., writes:—"I was very nervous and run down, was short of breath, and had unpleasant feelings, and was sorry to see night coming as I could not lie down or go to sleep.

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now completely restored; can sleep fine all night, and have gained in weight."

Price 50c a box, 3 for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

This Year's Dead Subject

The death of the eclipse of the sun on August 31, 1932, roughly by 100 miles wide, passes from the Arctic regions via the east coast of James Bay, continuing down through the provinces of Quebec and crossing the St. Lawrence just east of Montreal; thence it continues southeastward and passes into the ocean by way of Maine.

Stenson: "Why did you bargain for a reduction of 15c. on that suit when you know you don't mean to pay for it?"

Bright: "So that the poor tailor won't lose so much."

A "One-Man" Dog

Animal Crosses 1,500 Miles In Arctic To Find Master

One of the most unusual dog stories in the north country was revealed at The Pas, Manitoba, on the arrival of George Harrison, widely known trapper. Harrison, who returned from trapping north of Indian Lake, 1,500 miles north of The Pas, Manitoba, told of his former lead dog whom he left with a friend there about a year ago.

The dog was growing old and he decided to give it a good home with a friend whom he came in with his catch of furs last season. He left the dog in September of 1931.

Late in January the dog was missing from his home. Three months later, with Mounting Eagle, was introduced to a skeleton, he was waiting to greet Harrison when he got up one April morning. The dog, through tremendous trail hardships, made its way in some of the worst weather in history.

Harrison will keep the dog with him because he does not believe he would survive another such trip.

Rheumatism So Bad He Had to Quit Work

Edmund Burgess' Old Reliable Home Remedy Set Him Right Again

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Mr. Albert Berger Wright, of 12 Bruce St., Toronto. "I had to stop working and that is the last thing I want to do. A friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for those suffering from Rheumatism, Lame Back, Sciatica, Neuralgia and kindred ailments this the blood very much." Dr Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Really good for all troubles or money refunded. Sold by Dr Thos. At your druggist's. 50c.

Honored For Dedicated Service

The first woman to complete a record of almost half a century of service in Canadian railroading was honored at Montreal when Miss M. A. McLeod, an employee in the comptroller's office of the Canadian National Railways, received a presentation. Miss McLeod joined the old Grand Trunk Railway in 1886.

Persian Rules preserves and ordinance women's cultured heritage of beauty. For sheer intensive loveliness it is unsurpassed. Tones and rejuvenates the skin, and makes it exquisite in turn color, delightful in touch, smooth and velvety. It imparts a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make beauty soft and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

Was Mightily Mixed

"Who is the King of England?" asked His Honor Judge F. A. G. Causley, while presiding at the naturalization examinations in Swift Current.

"R. B. Bennett," guess back the reply from a dazed-looking citizen of European extraction.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

Determined by Figures

A mathematical formula to enable scientists to determine just how much vitamin "B" a person needs to improve his system has been reported to the National Academy of Sciences by Prof. George R. Cowgill of Yale University.

The young man—"Do you prefer a home wedding?"

The young miss—"Yes, but our home is being sold for taxes."

Institute Of Pacific Relations

Invitation Extended To Hold Next Conference In Canada

An invitation will be extended to the Institute of Pacific Relations which met last year in Shanghai, China, to hold its next biennial conference in Canada, it was decided at a meeting in Toronto of the executive council of the Canadian Institute of International Affairs. The Canadian Institute is the national unit of the Institute of Pacific Relations in Shanghai.

Steps were taken at the meeting to participate in a round-table conference on diplomatic relations within the British Empire, which it is hoped to hold next year, possibly in Canada.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a severe Constipation, Sick Headaches and Indigestion, Mr. V. H. Wigney, Fernie, B.C., says he can now answer from a friend regarding Carter's Little Liver Pills. Results have been marvellous.

Because they are PURELY VEGETABLE, they have effective tonic to both liver and bowels. Dr Carter's Little Liver Pills are without equal for correcting Acidity, Biliousness, Poor Complexion and Indigestion. Sic. & 25c. and plugs. Ask for Carter's by NAME.

The modern hen lays as many as 250 eggs in a year, in contrast to about 36 eggs laid by her distant jungle ancestors.

Another thing that nations owe one another is a living.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

After being engaged for 43 years, a Missouri couple have been married. They were both from Missouri.

After having engaged for 43 years, a Missouri couple have been married. They were both from Missouri.

"I'M going, anyway"

THE modern Miss needs no "time out" for the time of month.

If you've ever taken Aspirin for a headache, you know how soon the pain vanishes. It is just as effective in the relief of those pains peculiar to women.

Don't dedicate certain days of every month to suffering. It's old-fashioned. It's unnecessary. Aspirin will always enable you to carry on in comfort. Take enough to assure your complete comfort If it is genuine Aspirin it cannot possibly hurt you. Aspirin tablets do not depress the heart. They do not upset the stomach. They do nothing but stop the pain.

Headaches come at inconvenient times. So do colds. But a little Aspirin will always save the day. A threat so sure that you can hardly swallow is made comfortable with one good, gargle made from these tablets. Neuralgia. Neuritis. Rheumatism Pains that once kept people home are forgotten half an hour after taking a few of these remarkable tablets. So are the little nagging aches that bring fatigue and "nerves" by day, or a sleepless night.

Genuine Aspirin tablets cost no very little after all, that it doesn't pay to experiment with imitations!

Made in Canada

Most Of Our Pork Products Go To Great Britain In The Form Of Wiltshire Cut Sides

Canadian swine producers who have made any study of the breeding, feeding and marketing of bacon hogs have come to realize that most of our exportable pork products go to England in the form of Wiltshire-cut sides. They have learned that the term 'Wiltshire' is a trade name given to any carcass of pork which is cut in a particular manner A Wiltshire side is simply half of the hog with the head and feet cut off, the shoulder blade pulled out, and the backbones removed.

Unfortunately these sides are exported from Canada in a pickled or mild cured state. The smoking operation is performed later in England by the large wholesalers and distributors, who vary the degree of smoke with the preferences of the particular market to which any lot of sides is to go.

Questions are often asked as to what cuts are made of the Wiltshire sides for retail selling. An explanation of the method of cutting, together with interesting comments on the various cuts and their relative value, is found in a comprehensive publication by the Ministry of Agriculture and Fisheries in England, entitled "A Report on the Pork and Bacon Trades in England and Wales." The three outline figures reproduced herewith are taken from that report, adapted slightly in order to conform with the weights and percentages of Canadian standard bacon hogs and their product.

Figure 1 is of a bacon hog of approximately 200 lbs. live weight. This hog will cut into two Wiltshire sides, each weighing about 90 lbs. in other words, Wiltshire make up 90 per cent. of the live weight of our bacon hogs. After the head and feet are removed the middle of an ideal bacon hog should measure about 30 per cent. of the weight of the side, with the shoulders and hams about balance.

Figure 2 sets out the relative position of the various retail cuts to the live hog. The comment in the report on these various cuts is interesting and instructive.

"A long and level back is required because the middle of the carcass fetches the highest price per pound and contains the greatest proportion of the entire weight, as will be seen in Figure 1. Cut "B," known as the 'thick back,' contains a relatively heavier proportion of the rib bones than the remainder of the back; the back fat also tends to be thicker at this point, and leaner: the meat begins to be of the nature of that of the 'collar.' Hence this cut has a lower selling value than the remainder of the best except cut "D," the loin, where an awkward bone, known as the 'spoiler bone,' must be removed, which makes slicing difficult and somewhat reduces the value

"The 'prime back' (cut C), provides the best rashers in the side as a whole and is in greatest demand. It is usually the most valuable portion because the necessity for length in the back, which is required to be level also, is dished or scooped back meanwhile the head and less depth of loin An important requirement is that a transverse section of the back cut over the shoulder should be some what arched Where this section is flat above the shoulder it is excessive ly fat and consequently heavy in that part

"A straight underline and thickness are essential in the belly, as they do not fetch their full price in the 'flank' cuts if not and it will not be distended and consequently thin When the belly is thick the value of these cuts is increased. The 'flank' has usually a fair proportion of lean, but this does not penetrate deeply The 'flank' rashers are generally narrow and, if the cut is excessively thin, they become objectionably attenuated when fried. This 'flank' slightly differs from the same dismemberings, but it is normally thicker than the 'flank.' The 'thick streaky' (Cut G), depends for its value upon the thickness of the belly at H and I, contains alternate layers of lean and fat, and is of more value than the remainder of the bacon cuts on account of its greater thickness and lean'meaning.

"Breadth, width, and depth in the back are required in the hams, as these features denote plenty of flesh which is highly desirable in a cut joint. The ham is responsible for the fact that the 'gammon back' (cut K), is retained at a relatively lower price than other back cuts. The small part of the ham, known as the 'corner gammon' (cut H), contains valuable lean bones; it constitutes entirely of lean flesh and is one of the highest priced cuts of the carcass. The high setting of the tail in bold pigs is a distinct proportion of hind, in cut "E" then when the tail is set low; on the other hand, a tail set too high generally denotes an excess of hock fat.

"Lightness of the fore-end and shoulder is essential. The 'collar' (cut A), containing overlapping muscles and much gristle, is a cheap cut. Its value being also reduced by the fact that the shoulder blade is removed prior to curing of the side, and this makes it a difficult cut to effect. The 'thinnings' (cut J?), suffers from the same disadvantages as the 'gammon back,' namely an excessive proportion of bone; it also contains much gristle and must be the 'bone' in the cheapest cut of the side."

Figure 3 simply pictures the cuts which have been described above in relation to the trimmed Wiltshire side Slight differences in the appearance of some cuts as between Figures 2 and 3 can be accounted for by the fact that when the hog carcass is being frozen the rail it naturally stretches out to resemble Figure 3.

From the remarks on the relative retail values of the various cuts it will be seen that the producer, if he could turn out a product commanding the highest wholesale and retail prices, must continue to keep before them the objective of the bacon type hog light of shoulder, lengthy between shoulder and ham, with a full loin tapering ham meated well down towards the hock, and with a straight underline denoting fullness and firmness of belly.

Now when Canadian hog producers must set themselves to a policy of continued production for the overseas market, the point of quality in the hogs, and those in the hundred pounds that they will kill shortly, and the difference between an unprofitable and a profitable export bacon trade of considerable proportions

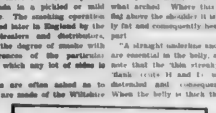

Fig. 1. Relative weight of Fore end, Gammon, and Middle of an ideal bacon hog.

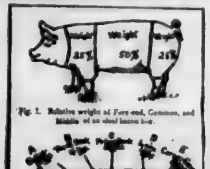

Fig. 2. Standard English retail cuts of Wiltshire bacon in relation to live pig.

Fig. 3. Standard English retail cuts of a Wiltshire side.

Policing Of Alberta

R.C.M.P. To Take Over Duties Under Three Year Agreement

Superintendent H M Newson, director of the criminal investigation branch at Royal Canadian Mounted Police Headquarters in Ottawa, will be placed in direct charge of the policing of Alberta when the federal force takes over the Alberta provincial police on April 1. He will hold the rank of chief superintendent.

Information to this effect was released by Hon. J. P. Lymburn, Alberta Attorney-general, a description of the terms of the three-year agreement just completed between province and Dominion, by Commissioner the R.C.M.P. in Alberta will be in Edmonton.

The agreement specifies that a force of 220 men is to be maintained in Alberta and that all men, in good standing in the provincial force are to be retained. At the date in March 31, 1932, the combined strength of the provincial police will be performed by the R.C.M.P

Did Not Check Right

The Freight agent on the C and N. W. Railroad received a shipment in which was a donkey, described on the freight bill as "one burro." After checking his goods carefully the agent made out a report: "Sheet, one burrow; cover we jackass."

Magistrate "The defendant swears he was perfectly sober."

Policeman "He was absolutely intoxicated. If he had been perfectly sober he would have known he was drunk and not made a disturbance."

Farmers Meet To Study Methods Of Combatting Soil Drifting And Moisture Conservation

One of the most unique Agricultural meetings ever held in Canada was held Tuesday, January 26th, in the chapel at the Regina Jail by the farmers in the area surrounding the jail, by the call of the Saskatchewan Department of Public Works. The meeting was largely attended, practically one hundred per cent. of the farmers in the one-half township area surrounding the Jail being present Some seventeen carloads of farmers drove in to the Jail yard Every chair in the reception room was filled as that it was necessary to move up to the Jail chapel in order to accommodate those who attended.

Mr C M Learmouth, the Superintendent of Institutional Farms, acted as chairman. The first speaker was the Hon J F Bryant, Chairman of the Commission on Conservation, and Minister in charge of Institutional Farms. Mr Bryant welcomed the farmers and remarked that this was the first time in the history of Canada that a large body of farmers had willingly come to Jail to study Farming At Dartmoor recently the prisoners tried to get out of Jail because they did not get sugar on their porridge, whereas today a large number of farmers in Saskatchewan had willingly come to the Jail so that they could discuss improving farming methods.

Mr Bryant dealt at length with the Commission on Conservation, pointing out the work which they had accomplished to date and what they were endeavoring to do, giving information, in a description of conditions, on conservation of water and on the afforestation programme, and pointed out the object of the meeting.

Mr. W. H. Gibson, Superintendent of the Experimental Farm at Indian Head, advocated the plowing in fallow surface cultivation. He thought that more of this should be done. The farmers had worked their land too much and made it too fine in the past. He recommended the duck-foot cultivator rather than the disc-harrow He did not advocate harrowing after the drill but rather the use of the packer. He stated that the precipitation in 1931 was one-half of the normal precipitation.

Mr. S. H. Vigor of the Department of Agriculture, Regina, discussed strip farming and the benefit in preventing soil drifting, without advocating general strip farming all over the Province. He also spoke of forage growing, recommending a trial of brome grass, western rye and sweet clover. His address was followed by an interesting discussion by the farmers present.

Norman Rose, Director of the Forestry Service, Indian Head, stated that it was a combination of different methods that would produce the desired results. There was a liability in regard to forget the trying experiences of bad years. He developed the thought that if shelter belts were good for the garden and buildings, it was logical that if planted on a large scale they would be of benefit to the crops. He produced evidence indicating successful fence plantings all over Western Canada and advocated the commencement of a demonstration area and continuing of different methods in a very convincing speech, after which he answered a number of questions asked on tree planting

W. H. Ford, a prominent farmer from the Indian Head, had his experience with reference to a half-section which he divided with a single caragana hedge planted north and south at right angles to the prevailing winds. Mr. Ford was very enthusiastic about the hedges, and stated that the first thing he would do in the light of his years of experience, if he were coming to the Regina plains to farm, would be to plan his farm and then lay out and plant caragana hedges Mr. Ford farms on a large scale with power machinery He was strongly in favor of planting caragana hedges one mile to one and one-half miles long

In 1921, Mr. Ford threshed from a one-hundred acre field protected by hedges, 1,800 bushels of No. 1 Northern wheat. In a dry season, only less than 5 bushels per acre on similar land with similar methods but without the hedges From years of experience and observation, he strongly endorsed the planting of hedges Mr. Ford has a beautiful home farm with buildings surrounded by very fine trees, including firs, elms, ash and pine, which enable him to grow apples, plums, raspberries, strawberry hybrids and the small fruits very successfully.

Mr. C. M. Learmouth then outlined the proposed Township Farm Improvement Area, and suggested the forming of an organization of the farmers in the district surrounding the Institutional Farm to carry out the combination scheme of strip farming, grass and clover growing with wind-breaks and shelter belts, and fields protected with caragana hedges He pointed out that there were already planted on these 320 caragana seed for seedlings on the Jail farm which would produce approximately one million seedlings for free distribution in 1933, and a similar acreage would be put in the spring of 1932.

The farmers in the district were very much interested in the meeting and the action of the Government in taking the proposed step, the first of its kind in the Province, and the fact that their area was chosen for experimental and demonstration purposes, and that they had the opportunity of working together in the interests of all the farmers of the Province to show the best methods of combatting soil drifting and present climatic conditions A committee composed of three was agreed upon to interview individual farmers in the one-half township area with a view to getting them to agree to follow the suggestions made. The committee consists of C. M. Learmouth, representing the Government, but traditional Conservative, a representative farmer in the one-half township area, together with a representative of the Provincial and Federal Governments. This meeting was the first concrete proposal to carry out the recommendations of the sub-committee of the Commission on Conservation and Afforestation, with reference to the prevention of soil drifting.

Just His Class

They were parting at the door after a little quarrel. He had tried to make it up, but with no success

"Very well," he said, turning to depart. "I'll marry a girl that can take a joke."

"We doubt about that," was the crushing reply. "That's the only kind of a girl you'll get."

Noted Britishers in Bahamas

Completely recovered from the injuries he sustained when he was run down by an automobile in New York, the Right Honourable Winston Churchill, former Chancellor of the Exchequer of Great Britain, and one of the Motherland's most versatile statesmen, is shown with his beautiful daughter Diana, as they enjoyed the gorgeous sunshine at Nassau, Bahamas. The British statesman has returned to United States for his forthcoming lecture tour.

Saskatchewan Motor Licenses

Minister Of Highways Explains Reasons Why Increase Was Necessary This Year

Decision of the Saskatchewan Government to increase motor license fees by 25 per Hooten, has been subject of some criticism, and some protests have been received by the Department concerned, according to the Hon. A. C. Stewart K.C., Minister of Highways.

Discussing the situation, Hon. Mr. Stewart stated suggestions had been made that further increases in the gasoline tax might be used as an additional source of revenue and that the motor license fee might be revised downward, if at all. This matter had been carefully considered, said Mr. Stewart, and the decision to make the increase ultimately decided upon for revenue purposes. Maintaining his consistency, the Minister said that 75 per cent, or three-quarter of the proportion of the province not only incapacitated from contributing to the revenue, but needing the help necessary to sustenance from the Government, the urgent need for increased revenue was obvious. The taking of this extra the Government is merely placing the license fee back where it was prior to the reduction. At that time a regulation reducing the motor license fee by two dollars was adopted. It has been found however that following the reduction more than the number of motor licenses have decreased. In 1929 when the higher fee prevailed there were 162,000 licenses issued, in 1930 the figure had fallen to 160,000 and in 1931, in this year increasing their license to the same extent as in this year.

During the years being sketched in the northern portion of the province, considerably more cash came in that area as compared with last year. Last Monday however, the Saskatchewan Government received more than at any previous time as its history. Renewal of operators' licenses should be made when the motor vehicle is registered, and the old license should be sent in on the application for a new one.

Tells Dyspeptics What To Eat
Saint Meals Often Unnecessary

It is a well known fact that sour foods have a strong tendency to produce excessive stomach rumbling and consequent indigestion. By omitting from daily meals those foods that cause this trouble, many dyspeptics find relief. Bisodol, the sweet powder, is a splendid corrective for sour stomach. Just a pinch or two in a little water is usually sufficient to overcome the distress. Bisodol is absolutely safe, and has no unpleasant after effects. Keep it in the stomach keep the stomach sweet. Bisodol is sold by druggists and their confidence in it is shown by the fact that they use it themselves. Thousands of people use it daily. Get a 25c package now and a Bisodol Illustrated Magazine, containing many interesting articles, will be sent to you free. Address Bisodol Illustrated Magazine, Dept. 1, 10 Church St., Toronto. Bisodol is manufactured in Canada and sold by druggists everywhere.

Robots Supplant Soldiers

London Finds Automatic Traffic Signals Equal To Efficient and Cheaper

Hundred of policemen have been released from traffic duty in London because robots have proved equally efficient and much cheaper.

Automatic signaling will be adopted on a wide scale before long, and all clergymen and emmarrads will have their flashing traffic lights. "A jolly good job, too," commented one traffic policeman on hearing the news. "Do you think we like to spend our time remonstrating with motorists who say they cannot see our signals? Do you think we will sit a man's job? It was pushed on us by the traffic potentates, but we have got plenty of more important jobs."

JESUS AND THE MAN BORN BLIND

Golden Text: "I am the light of the world: he that followeth Me shall not walk in the darkness, but shall have the light of life." John 8:12

Lesson: John 9:1-41

Devotional Reading: Isaiah 42:1-7

Explanations and Comments

The Question Concerning the Cause of Sin: Between Blindness and Sin, verses 1-5. The Jews held that calamities were the result of sin. Recall how insistently Job's friends tried to make him acknowledge some sin as the cause of all of his troubles. One day the disciples came upon a man who had been blind from birth, sitting where beggars were wont to sit at the gate of the temple, and they said to Jesus, "Rabbi, who sinned, this man or his parents, that he should be born blind?" The disciples seemingly were voicing here the popular theory in regard to reincarnation for a man born blind could have sinned only in a previous existence if his blindness were a punishment for sin. The pre-existence of the soul was the ancient Greek idea, and it is the dream of the modern Hindu agnate.

Sin causes suffering, but the disciples' problem, how suffering through sin was quickly solved by Jesus. He threw the responsibility on the man's kindness to God when He answered: Neither did this man sin, nor his parents that the works of God should be made manifest in him." How could his blindness show forth the works of God? It gave Jesus the opportunity of showing God's power by restoring his sight.

The Blind Man's Sight Restored, verses 6, 7. Jesus spat on the ground and made clay and with it anointed the eyes of the blind man. Doubtless He did this in order to let the man feel the moistening touch, to awaken expectancy, to arouse the man's faith through the use of means generally supposed efficacious, and to test his obedience.

The Miracle's Effect Upon the Jews, verses 8-12. The opening of his eyes naturally so changed the beggar's appearance that those who knew him recognized whether it could be actually he or whether it were some one like him. They questioned him and he told them of his cure.

Pharisees Finds the Outcast and Reveals Himself, verses 35-38. At once Jesus looked for the man and on finding him endeavored to draw out his faith by asking him if he believed on the Son of God. The man did not understand the title, but when Jesus represented it as His own, the man exclaimed, "Lord I believe," and worshipped Him he had received not only seeing eyes but spiritual vision.

The True Significance Of the Event, verses 39-41. The comment of Jesus was that He brought spiritual enlightenment to those who, like this man, realized their need of him, and he increased the blindness of those such as like the Pharisees, believed not in Him nor in their need of a Saviour.

India exported 55,000,000 pounds of tea in a recent month.

CABINET CHANGES ANNOUNCED BY PREMIER BENNETT

Ottawa, Ont On the eve of the opening of parliament, government appointments were announced by the formation of cabinet reorganization and the sitting of all four vacancies in the senate constituted the basis of an official announcement by Prime Minister R. B. Bennett which in one sweep cleared the decks for the session.

Premier Bennett handed over the portfolio of Minister of Finance to Hon. E. N. Rhodes, Hon Alfred Duranleau, Minister of Marine becomes acting Minister of Fish eries on the resignation of the ministration of Finance Department by Mr. Rhodes. Hon. W. Gordon, Minister of Immigration and Colonization becomes Minister of Labor and Hon. Senator Gideon Robertson resigned the labor portfolio on account of ill health. Hon Arthur Meighen appointed senator and the cancelled choice of Conservative senators their leader in the upper Chamber —enters the Bennett government as Minister without portfolio.

Four new senators were named With Mr Meighen the new members of the Upper Chamber are W. H. Dennis, Halifax, newspaper proprietor, Dan. C. C. Ballantyne, Montreal, former minister in the Borden and Meighen administrations, and Dr J. A. Macdonald, former Conservative member for Richmond-West Cape Breton.

Santiago Earthquake

Eight Are Killed and 200 Wounded in Disorder

Santiago, Cuba. A series of earthquakes caused much damage in Santiago, leaving a known death toll of eight and a casualty list of 200 wounded.

The agonizing series of tremors left hardly a building in the city untouched, and a few were destroyed.

Governor Jose Barcelo of Oriente Province estimated that the earthquake damage to the city of Santiago would exceed $100,000,000.

In the first confusion, as all the 150,000 residents fled to open spaces, newspapermen and other eye witnesses so estimated the death toll at from 500 to 1,000. Official figures were found to be an exaggeration, however, as down and a measure of calm came to the city.

Importing Less Coal

Canadian Purchases Of Anthracite From United States Show Decrease

Ottawa, Ont.—Canada is diminishing its purchases of anthracite coal, an important fuel. During the last five years imports from United States have dropped 1,000,000 tons and the increase from Great Britain, 350 000 tons, has not been sufficient to offset it. In the calendar year 1931, according to the Dominion Bureau of Statistics, Canada bought 2,236 000 tons of anthracite from United States, 676,300 tons from Great Britain, 63,-700 tons from Germany and 4,000 tons from French Indo-China.

Looking For Investors

Montreal, Que.—Merchants and shoppers in the British Isles are looking forward to tangible results from the Imperial Economic Conference to assemble at Ottawa in July," said P. A. Chevs, acting European manager for the Canadian National Railways, on his arrival in Montreal for conferences with Sir Henry Thornton and other officers of the system.

Delegate Has Measles

Paris, France. Joseph Paul Boncour, head of the French disarmament delegation now in Geneva, was reported ill in his Paris home. His ailment was measles.

U.S. Ambassador To Britain

Washington. Secretary Andrew Mellon of the United States Treasury accepted the ambassadorship to Great Britain.

Pleads For Faith in League

People Should Also Support Says Hon. Vincent Massey

Winnipeg, Man. "The free and unreserved support of both sides to the perative to a permanent peace basis in Manchuria and the Far East," Hon Vincent Massey former Canadian minister at Washington, told members of the Canadian club here in an address on "The Manchurian Crisis."

However ineffective it may have been in this controversy we must now return, to the League of Nations, we pledged ourselves, for recent developments at Shanghai the course should be rather to give it the moral support of our intelligent support."

The Manchurian situation he rashed as something more than a conflict between two peoples it was really a collision between twentieth century international machinery and a nineteenth century viewpoint.

On his western tour Mr Massey will address meetings at Regina Calgary Lethbridge and Victoria. On his way back he will speak at Edmonton and Saskatoon.

Farmers Holding Grain

Over Twenty-Seven Million Bushels In Three Prairie Provinces

Winnipeg, Man. A total of 27 790 000 bushels of grain still remains in the hands of farmers located near lines of the Canad an National Railways in the three prairie provinces, according to a census taken by the railway company on February 1. Of this total, 19,205,335 bushels are wheat, and 6,333,560 bushels are coarse grains.

Alberta farmers appear the most reluctant to part with their grain. They still retain 9,347,000 bushels of wheat and 4,111 000 bushels of other grains. In Saskatchewan, the figures are 6,731,000 and 1,744,000 bushels of wheat and 2,120,000 bushels of coarse grain, while in Manitoba, 2,304,000 bushels of wheat and 1,384,000 bushels of coarse grains remain to be marketed.

International Plot Suspected

Belief Expressed That Japan Is In Alliance With France and Russia

Ottawa.—Jean Lesage Member of House of Commons and retired lieutenant-commander in the British navy, declared Canada believed Japan is in secret league with France and Russia in her "seizure of Manchuria and invasion of China proper."

"Oh, I know that sounds sensational," he said, "and I know it has been denied by both France. But we believe it just the same, and have reasons for our convictions."

Cambouris Deeded Property

Medicine Hat.—Authorities throughout Spain began confiscating Jesuit estates, amounting to approximately 5,500 former inmates peacefully disappeared into towns and cities as private residents or embarked for other countries.

Insurance Rate Increased

On Freight Shipped From U.S. Through Chinese Port

San Francisco, Cal. Since the start of hostilities between Japan and China in the vicinity of Shanghai, insurance rates on freight shipped from the United States through the Chinese port have increased 1,500 per cent., it is revealed by insurance brokers here

Prior to the outbreak of hostilities, the rate was ten cents per $100 valuation. Today it costs $1.50 to insure $100 worth of freight.

Export Report Soon

Ottawa, Ont The report on Canada's five biggest port developments, Halifax, Saint John, Quebec, Montreal and Vancouver, being prepared by Sir Alexander Gibb, British expert, was made on investigation last year at the request of the Dominion Government, is expected to be placed in the hands of the Prime Minister before February 15.

Wage Tax For Manitoba

New Plan Recommended To Next Government One Million Dollars Annually

Winnipeg, Man. A special tax levy of one per cent on wages, which it is estimated will net the government $1,000,000 annually is planned as part of the Manitoba administration s new taxation programme, it was said in government circles. The tax would be substantially the same as that levied by the British Columbia government.

The tax will be collectable from all employees in the province on their wages, salary or other source of income, on the indemnity of members of the Legislature, the House of Commons and the Senate, and of judges of the courts whether their salaries are paid out of crown revenue in the right of the Dominion or Province.

An exemption of $30 a week is to be allowed the wage-earner married and with dependents and $15 a week in the case of other employees.

Opening New Northern Road

Will Connect Hudson Bay Junction, Saskatchewan, With The Pas, Manitoba

The Pas, Man C'tizens of this Northern Manitoba town are looking forward to their first highway connection with the outside world next summer Word received that the right-of-way for a road from here to Hudson Bay Junction, Sask., will be cleared by spring and ready for grading. A stretch of 16 miles through muskeg remains to be cleared in the Saskatchewan section.

With a new road being opened from Hudson Bay Junction to Prince Albert and Saskatoon it is expected motorists from the south will be able to drive here before the end of this year's tourist season.

Soviets So Loss Wheat

Decrease On Fall Programme Mapped Out By Government

Ottawa, Ont Autumn sowing for all grains in Soviet Russia last year amounted to 88,400,000 acres reported ng a decrease of 10.8 per cent from the official fall sowing programme mapped out by the governmental, according to a cable received by the Department of Trade and Commerce.

Official soviet plans call for an increase of two per cent. over last year in the spring sowing of wheat. The cable says Russia plans to seed 64,-700,000 acres this spring wheat, as compared with 63,500,000 acres last year.

Bandits Get Big Haul

Vancouver, B.C.- Two youthful bandits, one of them armed with a revolver, held up Miss Ethel Wheeler, stenographer in the employ of the Vancouver Dry Goods Company, robbed her of $565, the weekly payroll of the company, and escaped in a stolen car. Miss Wheeler, who was returning from the bank with the money, was struck on the head with the butt of a gun.

MISSING SUBMARINE M-2 HAS BEEN LOCATED OFF PORTLAND BILL

The admiralty has announced that the submarine M-2, missing since it dived January 26, with 61 men aboard, had been located at the bottom of the English Channel, nearly six miles off Portland Bill. The vessel, virtually given up as lost after a desperate search for days failed to show a trace of it, was located by the destroyer "Tervid," with powerful apparatus which detected tell-tale sounds. Above is a photograph of the M-2, the first submarine to carry aircraft, and considered one of the finest diving vessels in the British fleet. The map shows the area where the search has been carried out since the accident.

CANADIAN IS HONORED

Prof. C. T. Currelly, director of the Royal Ontario Museum of Archaeology, who has been created a Fellow of the Society of Antiquaries of Great Britain This society was founded by King Charles II at the same time as the founding of the Royal Society Professor Currelly understands, is the first Canadian to be honored with the initials F.S.A

Radio League Asks For Federal Policy

Delegation Told Government Can Do Nothing At Present

Ottawa, Ont A delegation from the Canadian Radio League headed by Graham Spry, chairman urged a national policy for radio programmes, a definite broadcasting policy formed in the industry, fewer and more high-powered stations, protection for existing radio broadcasting and an increased license fee from $1 to $2.

Hon. Mr Duranleau, Minister of Marine, replied the government could do nothing until the special committee of the Privy Council renders its decision on the control of radio in the Dominion.

Opening Of Exhibition

With Centennial Celebration Of Canada Lead Of Events

Toronto, Ont. Engineering Institute of Canada, in convention here, issued its annual list of medal and prize awards for outstanding achievements in engineering during 1931.

Engineering Institute prize winners included

H. C. Anstis, University of Alberta. H. M. Van Allen, University of British Columbia.

G. L. Cook, University of Manitoba. R. Johnson, University of Saskatchewan.

DATE IS SET FOR IMPERIAL ECONOMIC MEET

Ottawa, Ont.- Monday, July 18, is the date for the opening of the Imperial Economic Conference at Ottawa, it was intimated by highest authority

Great Britain, the Irish Free State Australia, New Zealand, South Africa Newfoundland and India will send delegates to the conference in the Canadian capital. For some time the question of the date has been the subject of communication by cable with the various parts of the Empire

The question of the agenda is now expected to be considered. This matter, likewise, will be dealt with by cable communication with the different countries.

In the past, Imperial Conferences have occupied from four to eight weeks. The coming conference will probably last from three to six weeks.

Intra-imperial preference will be the dominating note of the conference, and the greatest expectation is that the conference will evolve trade arrangements between the different parts of the Empire carrying out this principle.

Alberta Income Tax

Government Expects To Raise Revenue Of $1,000,000 From This Source

Edmonton Alberta. A revenue of $1,000 000 is expected to be garnered by the proposed provincial income tax.

Government circles indicated the proposal would be introduced early in the session and that it would in no way interfere with the service tax in effect in Edmonton and Calgary.

Premier J E. Brownlee and his financial colleagues, it was intimated, were considering making the minimum income for taxation $750 yearly for single persons and $1,500 for married persons, with an exemption of $300 for each dependent in the latter case. Rate of taxation is expected to be from two per cent. upward

Prizes Awarded

Engineering Institute Of Canada Names List Of Awards For Outstanding Achievements

Engineering Institute prize winners included

H. C. Anstis, University of Alberta. H. M. Van Allen, University of British Columbia.

G. L. Cook, University of Manitoba. R. Johnson, University of Saskatchewan.

Sir John Martin-Harvey

Noted Actor Now On Seventh Tour Of Canada With New Play

Sir John Martin-Harvey and his London company will be seen at the leading theatres throughout Canada in "The King's Messenger" his new play This is Sir John's seventh tour in Canada and he likes Canadian audiences. He finds them very appreciative of educational drama. They do not like "little plays," as he expresses modern comedy. He brought to the Dominion the largest repertoire of plays ever touring eight productions, including "Hamlet," "Taming of the Shrew," "Oedipus," "Burgomaster of Stilemonde" "The Cruels," "David Garrick" and "Cigarette Maker's Romance."

Sir John has played mostly what are termed costume plays, and this, as he explained, because he was brought up in the tradition He fell into the path naturally "after being weaned on costume productions." He carried on two of the parts created by Irving, the lands in "The Lyon's Mail" and in a version of Scott's "The Bride of Lammermoor" under the title of "The Last Heir."

For three days, commencing Monday, Feb. 15, Sir John Martin-Harvey and his company will be seen at the Dacha Music Hall in Regina, in "The King's Messenger."

An Opportunity For Canada

Good Time To Build Up Tourist Business From Britain

Canadians who have been accustomed to paying a visit to California or Florida during the winter season are staying at home this winter. The heavy discount demanded by United States bankers on our exchange is the reason. When one has to pay as high as $125 to secure $100 in American money the reason is obvious.

Conversely Canada ought to enjoy a heavy influx of United States tourist this year. When one of our American cousins can take $100 convert it into Canadian funds and have $125 to spend on a holiday it ought to be an inducement. There is little doubt that many will be induced. Then will not be the most important of the host of Americans to take our expensive trips to Europe this year, and with a small people of visit to Canada where their money will bring such a large provision in order to be an attraction.

Canadians ought to cash in on this situation and it can be done by a judicious advertising campaign in United States newspapers and periodicals, telling our American friends what they ought to worth in Canada, what they will see in Canada, and what they can buy in Canada which they can take home with them under their customs ruling allowing them to return with purchases valued at $100 upon which no duty is levied.

It seems to us that some agency in Canada should undertake such a campaign of publicity in the United States without delay. And we can think of no better agency for this task than the Canadian Chamber of Commerce. It should be possible, by a canvass for funds from railways, hotel concerns yes, and governments, too, to secure a respectable sum of money with which to acquaint the people of the United States with their opportunity to have a flying visit to a friendly neighbor and saving an enjoyable time at small expense. It would appear to be Canada's opportunity to build up tourist business the year and bring our dollar nearer parity. Editorial in Lethbridge Herald.

Hog Grading Regulations

To Ensure Original Producer Receiving Premium On Select Hogs

Elimination of trading on a flat price basis by consumers next to one of the features of the revised hog grading regulations promulgated in the current edition of the Canada Gazette. They go into immediate effect.

The new regulations ensure to the original producer the benefit of the improvement existing with the packing industry under which a premium of one dollar is paid on all hogs graded "select." All trading that will be done on the basis of official grades with a price differential between each grade.

Official grades were introduced ten years ago and the effect of the new regulations is to make them applicable to all hog trading. Trading on a flat-price basis will be eliminated with the premium for quality passing on to the producer.

One of the strongest buildings in the world will be built on Pennsylvania Ave., of the coast of Washington. It will withstand severe earthquakes and winds of 120 miles an hour.

A mechanical robot is proving useful as a letter sorter.

"My husband wants you to charge $ 25 note for him."

"With pleasure. Where is he?"

"He will personally send it to the agency."—From Vienna.

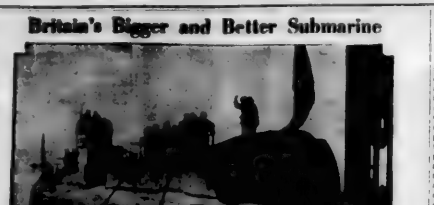
Britain's Bigger and Better Submarine



Said to be the world's largest submarine, this huge undersea craft, bearing the colorful name of "H.M.S. Sturgeon" is shown at Tilbury Dock, London, soon after her launching. The sleek and sturdy vessel, which has passed its tests to the complete satisfaction of the British admiralty, embodies many features heretofore regarded as impractical for submarines. Besides her fore and aft torpedo chambers, the undersea monster carries batteries of disappearing guns and anti-aircraft artillery.

Bonus For Better Hogs

Ottawa Scheme Is Announced By Minister Of Agriculture

A new policy to stimulate the production of the bacon type hog, which commands a premium in both the domestic and export market, has been announced by Hon. Robert Weir, Minister of Agriculture. It will make available to breeders throughout the Dominion suitable bacon type boars, and provides for a bonus to farmers' clubs purchasing animals under the new plan.

The statement reads:

"Under the terms of the policy the Federal Department is to purchase boars of suitable bacon type at cost per furrowers' clubs, and to pay transportation charges in point of delivery, provision is also made for the payment of bonuses of $20 where a sow purchased, regularly bred is used, and $15 where a sow approved boar is used, on production of a service record.

"To secure the benefits of the new policy at least 10 farmers in a community, covering at least one breed per each, must form a club, each member contributing pro rata his share of the purchase price of the boar supplied. Bonus may be claimed only for such boars as are purchased or approved under the terms of the bonus policy.

"Payment of the bonuses provided under the terms of the policy is to be made jointly by the Dominion and provincial governments."

Should Work Both Ways

Freighters Supplied Cheap Coal Might Also Use Spare Time

An English clergyman owned a good farm and ran it on very economical lines; sometimes, however, he carried his economy a little too far. As he was taking a stroll over the broad acres, one hot, oppressive morning, he saw a ploughman sitting on the handle of his plough while the horses rested. It occurred to the clergyman that he paid this man five-pence an hour, which at the present moment he was not earning, and he stopped and said gently, but reproachfully: "James, wouldn't it be a good plan for you to have a pair of pruning shears here and be cutting the hedge whilst the horses are resting?"

"Surely," James replied, "only might I suggest to you, sir, that you should take a drop of beer to the knight and post 'em when the 'osses 'ooves was on?"

The Difference

Janice: "I hate you, Sandra, I dare not end the difference between me and an ornament at all."

Janice: "What—that is it?"

Janice: "Well, a mantel pie ornament is a thing that you dust twice a day, and a husband is one whom you dust but once a year."

Doctor: "Your wife is suffering from a bad cold, with four inspirations to a minute, a temperature of 104 and a heavy rate of 60 a minute."

Husband: "Good heavens, doctor, what's wrong with her?"

Cattle Rates Reduced

Shipments To Old Country From St. John To Be Carried At Lower Rate

Rates on live cattle shipped from Saint John, N.B., to Birkenhead or Glasgow, have been reduced from a top price of $15 per head to $13 for large cattle, and $10.50 for smaller. This reduction of $2 per cent., it is freight, secured after some months negotiations with the steamship companies, equals the difference in the price of cattle at present or compared with this time last year. Announcement of this reduction was made by Hon. Robert Weir, Minister of Agriculture.

The sailings at present schedules and for ten departures from Saint John between February and April with a total carrying capacity of between two and three thousand head of cattle. Small reductions in various Landing charges have also been effected, Mr. Weir said, and every effort is being made to make a further saving where possible all along the line.

Milk and Butter Record

Alberta Cow Owned By C.P.R. Creates New Record For Canada

Mona Pontiac Walgor, four-year-old Holstein cow on the Canadian Pacific Railway farm at Strathmore, Alberta, created a record for Canada when she produced 30,664 pounds of milk and 1,162 pounds of butter during 1931. She is the first cow in Alberta to produce more than 30,000 pounds of milk during one year.

Princess Lily Pietje, another Holstein cow on the same farm, carried off the butter record for Canada in the same year, producing 1,210 pounds. She was second highest in milk production also.

The man who is too busy to be happy, is to be pitied.

New Plane Designed For Cheaper Flights

To Meet Need For Economy in Canadian Air Mail Service

Canadian in design and construction and designed expressly for Canada's air mail trails, a new aeroplane was flown on test at Curtiss-Reid airport, Montreal, in the presence of Royal Canadian Air Force officials who flew down from Ottawa.

The "Courier," as the new aircraft will be called, was designed by I. Fedden, airmail pilot, R. H. Bell and A. D. McCurdy, the first Canadian aviator.

The new 'plane was designed to meet the need for a mail carrier that will transport mail at the same speed as the larger aeroplanes and yet be more economical to operate. If the new 'plane is approved; it is expected that Canadian airmail service will be able to operate at a much lower cost.

The new airmail 'plane flies around 140 miles an hour and has capacity for 8½ hours sustained flight. Of high-wing monoplane type, the "Courier" is of metal lining construction, powered with a Cyprey 111 inverted type engine. The 'plane is to be small, with a wingspread of only 30 feet and an overall length of 21 feet.

The pilot occupies an open cockpit, well back of the wings, with excellent visibility forward and downward.

The new 'plane was also flown to Ottawa for demonstration before post office department officials.

San Francisco's 4,300-foot suspension bridge will be for a time the "longest," but not the longest possible," for engineers set the practical limit at about 10,000 feet.

One-third of the Indian Empire consists of 700 states of various size and character, governed by separate Indian rulers.

GOOD NEWS FOR CAR OWNERS

"Now is the time for all good men to come to the aid of their party". The good men in this case being our old and trusty owners and the party of the second part being the Provincial Secretary's Dept. It seems that with the depression in the old back roll will have to be depressed a little more. And when the funeral of the 10 dollar bill is over we can decorate our cars with the familiar colors of a black and white license plate for 1932.

******

For this is what the shows in a couple of months means—1932 car owners are now past due.

The following warning is issued by the police and the Licence department:

"Under the Vehicles and Highway Traffic Act all licenses expire December 31st, and the Department is of the opinion that all owners who have been and who are now operating

their motor vehicles have had a reasonable length of time in which to obtain their 1932 plates, and all motorists operating their pleasure car, truck or livery should proceed to obtain their license at least by the 15th of this month."

Obeying this warning will save the added inconvenience of "call it in the Judge" as the police are apt to suggest to you.

Truck drivers are also warned at the same time that dirty plates and broken, unlevers or no universes at all will be strictly checked up on this year, as numerous complaints are coming in from motorists that careless truck drivers leaving the courtesy of getting half the road to other vehicles. These drivers are also warned that action with the facts that the weather could not be used or that the truck had no mirror with which to see a car approaching from the rear.

1932 ?

Some things are facts. Some things can't be denied. Some things are sure, certain and altogether sure. And here is one of those things:

....the year 1932 is not going to dump any sudden wealth into your lap.

Those who make money from business in 1932 will have to earn it. Not by mistake a Board, not by following them and by staying right.

To make money in 1932 you've got to sell merchandise. And you've got to sell a lot of it. That's number four.

Getting will not be easy. But the coming year can be a GOOD YEAR for you; especially your; a year of progress. But it is going to take some real selling. Real merchandise selling. We've got to tell the New Deal. We've got to take the seconds out of a seconds and as a figure and that business is not coming without and effort. But there is always room business for those who have the energy and courage to go after it. This is old stuff, but true, as Holy Writ.

More and more people are coming to regulate their shopping by the store ads. More and more people are getting out of the habit of going to "the nearest place" or the place they have usually visited for certain purchases.

More and more people are coming to notice things from reading the ads—and depend upon the name and the facts contained in the ads—for guidance in planning purchases.

Since the coming months then ever before will your advertising be the best by which all else shall stand or fall—so plan it liberally, plan it as winning lines.

The people of the surrounding district in which the Record circulates cannot be so effectively or so economically reached by any other medium or method of advertising as by the columns of this paper.

If you want to reach the people, use The Record.

Skating Party Voted A Huge Success

On Friday, February 12, the pupils of grades 5, 6, 7 and 8, under Miss Dinon and Mr. Hambly, held a outside skating party at the local rink commemorating Invernaby St. Valentine's Day.

The program included distribution of Valentines on Friday afternoon at the school.

At 7:30 the pupils met at the school and proceeded forthwith to the rink.

Despite the intense cold of 35 below zero, the boys and girls enjoyed the best of conditions and stayed till near nine. Finding the temperature a little too severe everyone repaired to the canteen where a few games were enjoyed while the committee prepared the eats.

By 9:30 all were seated comfortable around tables suitably decorated with sandwiches, salads, cakes and steaming cocoa.

Following the repast a few songs and games were thoroughly enjoyed by all.

The evening was concluded by the singing of God save the King. Every one voted a good time.

Friend—Well, I see in the evening paper the doctors have discovered a new disease.

Householder—For the love of Mike, throw that paper away before my wife sees it!

Legal Hockey Team Defeats Fort 1-0

The local council locked horns with Legal in the local rink on Thursday evening, Feb. 11th, and though defeated by the slim margin of 1-0 they displayed a brand of hockey which did them credit and which was worthy of the patronage of all local fans.

The two teams skated at a dizzy clip throughout the three periods and there was little to pick between the two except that Legal was an older and heavier team.

The locals were without the services of their stellar defenceman Tye Hall, his scintillating rushes were missed by the local rooters.

Lamoureux who replaced Tye made a very good job of it and proved himself to be a most capable relief man.

To pick a star on the local team would be a difficult task. Gauf, Lane, and Karvan the first string line sent on the ice skated and checked like fiends. Lane had the misfortune of being tripped at the goal mouth several times, one on occasion he scored but the referee's whistle had blown and the goal could not be allowed.

Bill Gauf certainly can skate. Watch this kid's progress and if he isn't just about as fast as any man this far north when he gets a little more experience and coaching well he will be missed our guess.

Liberty Karvan was 'in there' doing his bit and how he did back check! Stanley, Hutton and Flintoff our other time while not as flashy as the 1st string were nevertheless right up in form and just missed scoring on several occasions.

Going into the third period one goal down the locals held the Legal team behind their own blue-line and only smart goal tending and several rabbit's paws kept them from scoring at least three goals.

Mann and Carrol referred to the entire satisfaction of both teams as well as the spectators.

COMING EVENTS

Under the auspices of Fort Lodge No. 14 I.O.O.F. and Princess Rebekah Lodge No. 52, a Bridge and Card Party will be held in the Union Hall on Monday, Feb. 22, 1932 at 8:30 p.m.

The proceeds of the evening are to be donated to the Woods Christian Home in Calgary.

Lunch will be served. Admission 25c. Prizes for the winners. Everybody welcome.

Cod Liver Oil Improves Metabolism of Bone

Cornell experiments show that cod liver oil fed to laying hen improves the metabolism of their eggs from ten to twenty-five percent; green food, five to ten percent; and milk, from five to fifteen percent. Both milk and green food with cod liver are necessary for the best results.

Similar results to the above were obtained by Prof. MacFarlane of the University of Alberta when working on this problem at Guelph a few years ago.

Full information can be obtained by writing to the Poultry Department of the University of Alberta.

Town Council Elects New Committees for Coming Year

The first meeting of the new Town Council was held in the Council Chambers on Monday the 15th, present at 11 a.m. Present Mayor Montgomery, Councillors Simmons, Le Riche, Lalonde, Smith and Fillmore

The Secretary reported that all new members of the Council had made and subscribed a declaration of Office as required by the Town Act. His Worship, in a few well chosen remarks, extended a welcome to the members of the Council recently elected and re-elected, and outlined the policy of the Chair for the coming year.

The minutes of the last regular meeting were read and adopted.

Councillor LeRiche was elected Deputy Mayor for the ensuing 3 months.

The following were appointed to the various committees of the Council.

Finance—Councillors Lalonde (chairman), Fillmore and Gauf.

Fire, Water and Light—Councillors Fillmore, (chairman) Simmons and Smith

Public Works—Councillors Simmons, (chairman), Gauf and Lalonde.

Health and Relief—Councillors, LeRiche (chairman), Lalonde and Smith.

Licenses and Police—Councillors Gauf (chairman), Simmons and LeRiche.

Town Properties—Councillors Smith (chairman), LaRiche and Fillmore.

Mr.E. Danby, Chartered Accountant, was appointed Auditor for the current year at the same remuneration as last year.

Three applications for relief were considered by the Council and approved, and recommended to the Department. The report of the Medical Officer of Health, Dr. Henry, was submitted for the month of January, in which he stated that there were 30 cases of contagious disease during the month of January. Whooping cough, Scarlet fever, Measles, Mumps and no serious case had been reported.

Applications for Provincial and Town restaurant licences were received from the City Cafe, Club Cafe and Royal Cafe, and approved.

The following resolution was moved by Mayor Montgomery, and adopted.

That, to secure order and decorum so highly necessary in a properly conducted Town Council, certain rules and regulations must be observed by the Mayor and Council, so that no overlaping of responsibilities or privileges be allowed to continue to exist.

In the past this Town has suffered considerable losses by the orders of irresponsible persons by ordering the Fire Brigade from the City of Edmonton on two different occasions, both times unnecessary, and in defiance of resolutions passed by former Councils which authorized only the Fire Chief, or Deputy Chief when the Chief was absent, the Mayor, and in the absence of all these, three of the Town Council were the only parties had the authority to order the aid of the City of Edmonton Fire Brigade.

Now then this Town Council enacts as follows: That any person or persons, other than the parties mentioned above, and in the order mentioned, the Fire Chief, the Deputy when the Chief is absent, the Mayor, and in his absence along with the Chief and Deputy Chief, then three of the Town Council, who should sign the request to the Telephone operator authorizing the call for assistance, shall be held personally responsible for the expenses incurred in calling the Fire Brigade from Edmonton.

A copy of this Resolution be furnished to the Telephone Office with the names of the persons authorized to give the order during the current year. The Secretary-Treasurer shall furnish the names immediately in each year when the Council takes office, together with the names of the Fire Chief and Deputy Fire Chief.

The following accounts were passed for payment:- J. Lavoie $62.40 for Coal; Alta. Gov't Telephone rent $7.50; Lamont Milling Co. $2.70; St. Joseph's Hospital January account for

J. Foster $11.00. The Town's proportion of 10 per cent for Old Age Pensions for 1931 was $980.04.

$1000.00 paid to school District No. 91 on 1st. inst.

The meeting adjourned on the motion of Councillor Simmons.

Are We Over-Governed?

Premier Bracken, of Manitoba, has editorially advanced the suggestion that the three western provinces of Canada be united as one province, governed by one Legislature. He makes the suggestion solely in the interests of economy in administration, claiming that several millions of dollars could thereby be saved to the taxpayers. His suggestion is approved and supported by Hon. W. F. A. Turgeon, for many years attorney-general of Saskatchewan and now a justice of the Court of Appeal of the same province. Premier Stevenson, of Alberta, has expressed doubt as to the feasibility of the proposal, while Premier Anderson, of Saskatchewan, says it is deserving of consideration but, in any event, could only be adopted following an affirmative referendum vote of the people of the three provinces and new legislation by the Dominion and by each Province.

Premier Bracken, Mr Justice Turgeon, and others who have given support to the proposal, frankly admit there are many and great difficulties to be overcome in bringing it about, but they do not regard these as insurmountable. To mention some of these, not necessarily in the order of their importance, but as indicating the problems to be solved and difficulties to be overcome:—

Today there are three capital cities, Winnipeg, Regina and Edmonton, with three magnificent and costly parliament buildings, three distinct civil services, three large and expensive universities, three sets of district, intermediate and higher courts of law, three codes of law, except the Criminal Code which is uniform as a Dominion enactment. In addition, Saskatchewan and Alberta have separate as well as public schools, while Manitoba has no separate school system.

United as one province there would, of course, be only one capital city and one government representative of the people in all the present three provinces. No doubt one of the present capital cities would be selected as the capital of the united province. The other two would object, and object strenuously, but, after all, such objections of a local and more or less selfish nature would have to be over-ridden in the larger interests of all concerned.

Inasmuch as the writer is not presenting an argument solely in favor of union, it is right to say there are other, and more serious, objections. It is argued that the individual costs imposed on people having business with the Government would be greatly increased. If Winnipeg was not selected as the capital, people and deputations from Alberta would be put to heavy expense of time and money in journeying to Winnipeg, while if Edmonton was the chosen site, Manitoba people would be the sufferers. To offset this, branch offices of the central government might be maintained in each present province, but, if so, the savings to be effected by union would be greatly reduced. In like manner the expense entailed in all matters of government inspection services would be increased, while provincial offices were required to make long journeys over the entire prairie country instead of within the smaller areas of existing provinces.

And what is true in regard to government itself would be equally true of only one university was maintained, and students had to travel much longer distances. This, however, might be partly overcome by maintaining all three but restricting the number of courses at each, instead of all attempting to cover the whole field. For example, one might specialize in law, another in medicine, another in science, etc., instead of three departments in three cities, with a continued demand for more buildings, more professors, more everything.

In the matter of law administration, district courts could still be essential, although possibly the districts could be somewhat enlarged as to new the tendency in the existing provinces. But one high court of appeal could easily serve a united province. It could be a supreme court for the West, and possibly the decisions of such a court could be made final, accepted as final, thus reducing the number of appeals to the Supreme Court at Ottawa and the Privy Council in London.

Unquestionably, too, the number of civil servants could be substantially reduced, and a large saving thereby effected. In the matter of such institutions as Schools for the Blind, the Deaf, correction homes for delinquent boys and girls, homes for the aged, etc., there is, of course, no necessity for one of each in each of the present three provinces. This is already recognized, but sometimes there is difficulty in getting initial action in regard to them.

Where the conditions prevailing but the interests of the people are no smaller as throughout the prairies, one code of laws would eliminate much confusion and simplify administration immensely.

Finally, there is the argument that one Legislature could just as efficiently, and at much less cost, govern the whole country instead of maintaining three such bodies. In the opinion of many people this reduction in legislative representatives and expense would be the outstanding saving. The writer does not quite agree. There are at present upwards of 175 members of legislature in the three provinces, and possibly half that number would suffice, but all that would be saved would be the indemnities and the actual costs of two Legislatures while in session, but the one Legislature would have to remain in session for a much longer period, thus offsetting some of those savings. On the other hand, constituencies would have to be just twice as large, the effect of which would be two-fold,—either ability to stand for election would be restricted to men of considerable means who could bear the expense, or sectional indemnities would have to be so increased as to enable the average man and woman to continue to be candidates.

Admittedly, only some high spots have been touched upon in connection with this big question; it cannot be otherwise in a short article. In the fourth and concluding article in this series, some of the broad aspects of the whole subject of duplications and costs of governmental services will be discussed.

Sharp Pains in His Heart Borne in Sad Condition

Mr. Fred J. Chase, Thomaston, Maine, U.S.A., writes: "I have used Dr. Miles' Anti-Pain Pills for Heart Trouble and Nervousness and they have done me more good than anything I ever used. I was in a bad condition when I got them. I had sharp pains in my heart, could hardly get my breath at times, and was nervous and restless. My nerves were also in a very bad condition, but after using three bottles of Dr. Miles' Anti-Pain Pills I have been entirely well ever since. I have taken no medicine of any kind for the past year, and can recommend your medicine to all who suffer as I did."

Dr. Miles' Anti-Pain Pills

Truck Load Of Petitions

Six Million Names Attached To Peace Petition At Geneva

A truck of rather was sent to the disarmament conference when a tractor-drawn truck, loaded with petitions signed by 6,000,000 names, began from all parts of the world drew up at the League of Nations building at Geneva.

On the boxes and bundles of signatures sat 15 women each carrying a blue and white banner "for peace" in various languages. Streamers around the base of the truck carried the inscription, "International Women's League for Peace and Freedom."

A deputation from the truck paid a brief call to President Henderson.

Simple Remedy For Bad Stomach Gives Swift Relief

Sig. Need Of Strong Medicines Or Diet. Lady and Doctor Praise Recipe Keeps Many Well In This Condition

If you are a victim of Stomach Trouble—Indigestion, Gas, Sour Stomach, etc.—you may have quick and certain relief by following a simple advice. It doesn't take strong medicines, artificial digestants or put nerve your system with starvation diets. Just try within an hour after eating what little or if they will keep down. Remember you must chew them well so that they will mix with the juices of digestion.

And the best and easiest way to do this is to take them mixed with three or four tablets of Bisurated Magnesia (a pleasant, harmless, effective and tasteless tablet form of Bisurated Magnesia) and chew them with your food. Then drink a mouthful of water and chew.

A week's trial of Bisurated Magnesia tablets at any druggist's will convince you of its truly wonderful merit. Should gas-fully stomach distress is absolutely unnecessary. Ask for the genuine Bisurated Magnesia Tablets.

Results Worked Out

British Columbia Is Considering Plan Of Health Unit

Dr. Charles H. Hincks, director of the national committee for mental hygiene of Canada and the United States and British Columbia was entertained by members of the committee of health insurance measures which would be applied to all municipalities having populations of not less than 25,000 persons.

Dr. Hincks, who has returned from a western tour, said Dr. H. E. Young, provincial officer of health for British Columbia, had worked out detailed plans for operation of the scheme.

For Piles of Piles and Children.

Cuticura soaps from tender exposure in almost ice cold and frost-bite from most of cold weather, excellent preparation the icy winds of winter. In the treatment by Dr. Tyrone Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Better Market For Honey

Larger Demand In British As-tabished For Canadian Product

With 150 members in attendance the Canadian Honey Producers' Association held its annual meeting in Toronto. Morley Pettit, president, and W. A. Wood, manager, presented reports showing that progress was being made in spite of world conditions. As a result of tariff changes it was anticipated there would be a larger demand for Canadian honey in the British market this year which would be able to compete on even terms with the California product.

Proven Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating fortune and whitens the hands. Makes skin soft-textured and youthful by women as a powder base and as a powder aid to lovely complexions. Used by men as an effective hair dressing or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

Fish Lived In Tree

A number of fishes were deprived of their winter home when workmen engaged in cleaning up the river bed at Verona, Michigan, hauled to shore a huge felled tree that had lain on the bottom of the river for many years. As the large tree was drawn out of the water, observers were astonished to see fishes of various sizes slip back into the water. One large-mouthed black bass among the lot was estimated to be two feet long.

Four of every five policemen in London and vicinity are married.

Chinese Library Destroyed

Destruction Of Oriental Library At Shanghai Is Irreparable Cultural Loss

By Rev. Bernard Meland in The Christian Century

The Oriental library was at first attached to the Commercial Press he said, "and was named the Hai Fen Lou Library famous for its collection of old and rare editions. Some years ago, the company with the help of the local government provided a special fund and erected a large modern library building of six storeys to house the collection.

"According to last year's report, it had on its shelves 360,000 volumes in Chinese, and over 100,000 in other languages. It contained 700 editions of the early Sung editions dating back to the 10th century and about 10,000 volumes of unpublished manuscripts."

"The Commercial Press," Dr. Kling went on, "is a purely Chinese business concern and is known as the largest publishing house in the world. It employs 15,000 men and women and its output amounts to many millions of volumes a year."

Loss On Grain Adjustments

The Dominion Government sustained a loss of $350,367 during 1931 in the adjustments of seed grain and other indebtedness in the three prairie provinces, according to a return tabled in the House of Commons on account of principal the government's loss was $160,100 and $110,306 on account of interest.

After 10 Years Of Asthma Dr. J. D Kellogg's Asthma Remedy proved the only relief for which I was grateful and this is but one case among many Little wonder that it has so become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is surprising it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

To Map South Pole

It was announced that H. G. Watkins, youthful leader of last year's Australian expedition to the Antarctic, will lead an expedition into the Antarctic next Fall. The expedition, which will sail in the early Autumn, will attempt to cross the Antarctic from Weddell Sea to Ross Sea and map the southwest coast of the Weddell Sea.

The botanical name of tobacco, Nicotiana, is derived from Nicot, the name of the French Ambassador to Portugal, who introduced it to France about 1560.

HEADACHE

A hard day at the office, and a headache homeward bound. All for the want of two little tablets of Aspirin! Don't let helpless when you need to get a headache; carry Aspirin with you. The pocket tin doesn't take up any room, but what a comfort when it's needed!

Perhaps will frequently bring on a headache. It lowers the vitality and fosters a cold. Take Aspirin and throw it off! Don't wait until you are miserable. There is nothing in Aspirin to hurt the heart or upset the stomach or leave the system in any way. Your doctor will tell you that! But, get Aspirin—not a substitute!

Follow the proven directions to be found inside each package. They cover colds, sore throat, headache, toothache, neuritis, neuralgia, rheumatic pains, lumbago or rheumatism, earache, and other pains and aches for which these tablets are a positive relief. Keep your pocket tin filled from the bottle of 100 tablets. Keep drug store buys Aspirin in bottles, as well as the familiar little box.

Aspirin is made in Canada.

Mixed Farming To Solve Many Difficulties Of Western Farmers Declares Hon. Robert Weir

In balanced farming lies the solution to the difficulties confronting western Canada farmers, declared Hon. Robert Weir, Federal Minister of Agriculture, in an address before the Canadian Club at Toronto.

Outlining the progress of western farming from its inception until the present, the Minister made a strong appeal for the support of the east. He spoke optimistically of the manner in which the western farmers had faced disaster and expressed the belief that through mixed farming, the west would soon return to its customary state of prosperity, thus benefiting the remainder of Canada.

As far as possible, he said, the government wanted to make each farm a self-sustaining one. He suggested the planting of ten acres of land with a hardy, drought-resisting grass. This ten acres, if properly cultivated, would hold moisture enough to raise feed for enough stock to maintain the farmer and his family during periods of distress.

He did not believe that quite so much grain would be grown in the western provinces in the future. The northern section of those provinces were better adapted to the raising of livestock, he said. Because of the lower expense in raising cattle in the west than there was in the east. Poultry too he maintained, could be more profitably raised in the west than the east.

Not all sections of the western provinces, he pointed out, were adapted to the raising of livestock, but in those sections which were adapted, he felt this action should be taken.

With the aid of a map Mr. Weir outlined in his address the scientific research work being carried on by the Dominion Government. Dr. Saskatchewan, he declared, 75 municipalities had had crop failures for three years in succession. The area was one of approximately 30,000 square miles of the richest wheat growing country in the world. During the drought, not one green thing was grown for man or beast. As a result the government was providing relief for 240,000 people.

A provincial relief commission was operating without remuneration. And this commission, he went on, was operating at a cost of 2½ cents per dollar of administration. It had been estimated, he said, that it cost 50 cents to administer every dollar for relief.

He paid a strong tribute to the westerners, whom, he said had faced the tragic drought situation with courage and hardihood. They had refused to have charity forced upon them. They could not borrow money but they gave their notes for repayment of all assistance advanced to them. "Their determination to take no charity was one of the brightest things in the disaster," he said.

"I have absolute faith in the west. No one knowing the westerner as I do could have any doubt of that. They are not of the ilk to quit. They do not ask for sympathy or pity. They will win through in spite of all obstacles. I know you will do all in your power to hasten the day when again the billions of wealth of the west will flow through the channels of trade into the coffers of the east. I think the path is clear."

Mr. Weir was introduced by Rt. Hon. Arthur Meighen, former Prime Minister, who also paid tribute to the relief commission, which, he said, was working admirably.

"What does 'misuse of alcohol mean?"

"Using it for purposes other than drinking."—Kathleenan, Oslo.

Tomatoes From Bahamas

Shipments To Be Made During Off Season In Canada

Word comes from Nassau, in the Bahamas, that Canada's supply of tomatoes for the cold months ahead will come from those islands, that an initial shipment of 2,500 crates has been made to this country, and that it is the intention to ship not less than 5,000 crates a week. This is a new development which follows a trade embargo between Canada and the West Indies, and means that during the offseason, when tomatoes are not produced in this country except in very limited quantities, instead of getting them from the United States, they will come from the Bahamas, our sister member of the British Empire. It is worthy of mention in this connection that if Canadians they are not discounting Canadian currency, but are taking it at its par or face value, a matter which should not be overlooked.

It has been aptly pointed out that these developments are further British self, by British subjects, and are handled by Canadian ships through Canadian seaports and brought to their destination by Canadian railways, an excellent all round argument in favor of a ready market in this country.

Send Him To Tokio

More People Should Adopt Stoney Philosophy Says Negro

The story is told of a colored man who entered a store in the small town in which he lived. He was known to the merchant as an industrious, hard-working man. On the occasion of this visit, in response to the merchant's query, he declared that he was out on a blanket, and he had a hearty appetite. Some of how much he could afford to pay.

The merchant showed him something better than the article he asked for and told of its superior quality, which the negro customer admitted, but said that he could not afford the price, adding by way of explanation: "I 'spect hangs my hat higher up than what I kin reach."

And there is quite a deal of homely philosophy in that saying. The colored man knew what he had in mind, and he had no desire to owe the dealer anything as a record of their payment.

There are those with a good many pecans, companies and nations, in that may have been hanging their hats higher than they need a step ladder to reach them, and some person seems to have taken the ladder away.

When the Power Goes Off

Only Those We Realize Have Yet Learned How Dependent On Electricity

We never realize to what extent we are living in an electrical age until the power goes off, and the hair have turned the switches on the electric range, but the kettle has not boiled, nothing has been toast in the oven. We have turned more buttons and electric bells have failed to give forth the response. Those who have depended on motors to produce flour of some sort or another in the furnace have had to make the best of it and be thankful that the weather was not severe.

The vacuum cleaner and the radio have had to take a holiday; the toaster on the corner of the breakfast table has been good for nothing at all. In many homes the sewing machine has not run, and the curling tongs have failed to take on the permanent wave look—all because the power was off.

We can imagine of nothing more helpless than a city newspaper office when the power ceases. The telegraph machine comes to a halt; it will fail to notify all of what is going on in the wide world outside with which it is so adequately connected with its far-flung connections. The linotype machines cease; the metal in them, instead of remaining liquid for operating purposes, becomes hard as stubborn metal can be; there can be no plates (or pages) cast for the big press, and the press itself will not budge nor spin a wheel. Wise men and skilled there are who know all about these machines. They can speed them up when it comes close to press time; they can doctor them when they get out of condition, but they can do nothing at all when the power goes off.

Learned men can not tell us very much about electricity. To be sure they can use it and harness it and all that. But there is more adequate defining in those two words "harness it" than in volumes of over read or heard about electricity. Then it is we begin to realize how powerful and mysterious are some of the strange forces which we get from the wires which man have strung for us all over the country.

A Worth While Career

Be sure married women are rest-less for a career. If running a home and raising a family isn't a career, then the professions as well as business, politics and the arts are just nothing at all by comparison. A wife and mother is about the most important individual on earth, if for no cause less arguments will not be reduced unless no armaments are reduced. Because reduction of armaments is, in general, tied up with international political stability, which is, in turn, largely dependent on economic appeasement.

Why is it impossible to consider reparations alone, or war debts alone, or currency problems alone, or tariffs alone? Why must all these things be settled as part of a coherent world policy?

Because, as the Wiggin committee said last August, and as the Basle committee report emphasized, "In reparations the world has been endeavoring to pursue contradictory policies, in permitting the development of an international financial system which involves the annual payment of large sums from debtor to creditor countries, while at the same time putting obstacles in the way of the free movement of goods." Reasons, as the Basle report points out, "If barriers are imposed to the free movement of goods, the world cannot readily adapt itself quickly to important changes in the forms of credit and trade." That follows from the fact that other countries in the international payment of amounts, and also to meet expenditures and immigrant remittances, are not very flexible. And "attempts to maintain the international balance of payments by means of larger and abnormal movements of gold have weakened the monetary foundations of many countries."

A Boy Yankee

Nelson Pardoes Become Duke Of Bedford Before Cremorne

Trying a new stunt last year, with apparently satisfactory results, one of the railway camerons on the Fraser River in British Columbia skinned part of the hockeye catch before putting the fish through the canning process and reported obtaining a fairly premium for the fish so treated.

Salmon are ordinarily canned without removal of the skins and the advantage obtained by the new process which has been experimenting with the use of skinned fish is said to lie in the saving of ammunition in the appearance of the finished product.

The skinning process, as explained by members of the Canadian Fisheries Department by the manager of the cannery, is not difficult or complicated and is accomplished in about three cents per fish. It is carried out by hand workers with the use of a knife, and a wooden board, which consists of two pieces about three-quarters of an inch square fastened together at one end by a rigid hinge, and a handle at the other end to fit the hand. After a cut has been made in the skin of the fish, the board, the tail, the fish is attached and rolled toward the head. As it is moved along, it peels off a strip of the skin in each operation. After the fish has been cut into pieces of suitable size and packed in cans, the containers are sealed and the cooking process is carried out in the usual manner.

Simply a point of incidental interest, it may be noted that hockeye skins weigh several ounces each. For example, ten skins weighed this summer averaged a little more than a third of a pound each.

Would Be Prepared

An Irishman, signing articles on board a ship, began to write his name with his right hand, and then changed the pen to his left hand and so finished. "Do you can write with either hand?" asked the officer.

"Yes, sure," replied Pat. "When I was a boy me father always said to me, 'Pat, learn to cut yer finger nails wid yer left hand, for some day ye might lose yer right hand.'"

"He trained me like an old fool."

"What about? And you are hardly forty."—Pages Gates, Yvorden.

PARLIAMENT OPENS WITH SPLENDOR AND TRADITIONAL CEREMONIES

The main picture shows the scene in the Senate Chamber of the Canadian House of Parliament when His Excellency the Governor-General opened the second session of the Canadian Parliament. Her Excellency the Countess of Bessborough is shown seated on His Excellency's left, while the Senators and beautifully gowned ladies occupy the seats on both sides of the Upper Chamber. When the photograph was taken the Right Honorable R. B. Bennett, Prime Minister of the Dominion, was standing on the dais on the right of the Governor-General, making a short speech. Inset shows the Earl of Bessborough taking the oaths from the Clerk of the Senate on his arrival at the Parliament Buildings to perform the opening ceremonies.

American Newspaper Tells Why The United States Must Help To Settle The Reparations Question

Why must the United States help to settle the reparations question? The answer is set forth in an article appearing in the new Republic, published in New York, and is as follows:

Because, unless reparations are cancelled, Germany cannot recover. If Germany does not recover, American investments abroad will be further imperilled, and Europe will not be able to resume her pre-depression purchases of our products. But reparations cannot be cancelled by Britain unless her debt to us is correspondingly reduced; for that would complete her ruin. And France will not cancel reparations, even the unconditional part, unless her correspondingly payments to Britain and the United States are simultaneously remitted. Use by France and Britain of the moratorium privileges of their debt agreements with us would merely postpone the bothering read hours confidence unsettled.

Why is the United States responsible in part for lack of monetary stability abroad?

The outflow of gold from Great Britain and Germany, which undermined the gold standard of the one and the credit of the other, was caused in part by the inability to create a sufficiently large export surplus of goods, an inability due largely to tariff barriers, especially that raised about the United States, and increased by the Smoot-Hawley bill after the depression was under way.

Why cannot tariff wars be abated without reconsideration of the United States tariff?

Because, under present conditions, the United States is the ultimate creditor nation, which must be willing to accept a surplus of imports over exports if the international debts, public and private, are ever to be paid.

Why is the United States necessarily involved in armament discussions.

Because we have spent on armaments more than any other nation, and far more than we did before the war. Because we have a navy second to none. Because Great Britain and France will not reduce their navies unless we reduce ours, and because land armaments will not be reduced unless our armaments are reduced. Because reduction of armaments is, in general, tied up with international political stability, which is, in turn, largely dependent on economic appeasement.

Will Interest Collectors

Limited Quantity of Envelopes Air Mail Stamps Overprinted

A notice of interest to stamp collectors and collectors of "first flight covers," is an announcement made by postal officials that, in order to meet immediate demands for a six-cent air mail stamp arrangements have been made to overprint a limited quantity of the first five-cent air mail stamp issue with a surcharge raising the value to six cents.

It is expected there will be a heavy demand for the stamps, postal authorities say, and advise those interested to send requests for the surcharged air mail stamps to the superintendent, financial branch for postage stamp division, post office department, Ottawa, together with covering remittance at the rate of six cents for each stamp.

To meet the wishes of "first day cover" collectors, arrangements have been made to furnish advance supplies of these surcharged stamps to postmasters throughout the Dominion.

Mrs. Phoebe Pink Has Dr. Williams' Pink Pills Make Her Well

Sent Free Book Sample.

I became run-down and unable to do my work for a family of seven," writes Mrs. W. P. Fitzgerald Manitoba Beach. "I was told I had anaemia, and I took treatment but with very little improvement. Finally my sister, who had had the same disease, advised me to try Dr. Williams' Pink Pills, as they had done her—soon I had been taken seven boxes. Today I'm well, able to do my own work, no more tired feeling at week end. I can run upstairs without pulling. I sleep and eat well. My friends are astonished at my changed appearance and ever and so ask me, 'What is it?' I'm taking My reply is 'Dr. Williams' Pink Pills.'"

Dr. Williams' Pink Pills actually create new blood in the veins and so reach all the reasons why they have given new vitality and strength to thousands who were seriously exhausted and overtaxed women. Equally helpful for growing girls. Try them. Sold by dealers, or by mail post paid, 50c. a package. 12 50 per box, Dr. Williams' Co., Brockville, Ont.

Money and Distribution

Saskatchewan Editor Publishes Interesting Booklet on Economics

C. C. Richardson, editor of the Dundurn Enterprise, has recently published an interesting booklet of fifty pages, in which he sets forth a thought provoking discussion on the economic and social conditions under the title "Money and Distribution."

Nationalization of the banking system and abolition of the gold standard are advocated by the writer as possible methods of relief, and also as stabilizing prices. Gold, he declares, is not a reasonable basis for currency, since it is not a useful commodity, and there is no real demand for it. Money is valued only for the goods which it may purchase or represent. It should be issued on a basis of the national wealth.

Mr. Bunert advocates a national clearing house, in which records are kept of the wealth of the nation in terms of the goods it produces, and in which there are also records of the credit due each individual. On this basis, tokens could be issued, which could be used by the people in Canada.

Gold or silver is not necessary in international trade, he continues, since "if international trading is carried on, the commodity prices must rise and fall together in each country." He goes on to say in this connection that the relation between wheat and the dollar will vary in like proportion as between wheat and the dollar.

The relation of such a standard of currency to industries, holding of property, and other phases of economic life are discussed in a clear and logical manner, and the result is written in a direct and interesting style.

Copies may at secured from Mr. Bunert by forwarding fifty cents to his office at Dundurn.

Study Tuberculosis At University

Dr Leask Directing Five-Year Campaign At McGill

Direction of a five-year campaign against tuberculosis which Canada's university students has been entrusted to Dr. A. B. Leask, director of the Department of Hygiene at McGill University, who has returned from the twelfth annual convention of the American Student Health Association, held in New York City.

Alarm at the prevalence and spread of the "white plague" in university student circles was revealed in a paper read by Dr. J. A. Myers of the University of Minnesota. The convention, therefore, undertook to launch on a five-year period of study, during which time a reformatory lore is to be established and statistics also will be obtained.

Comparatively little information is available on the extent of the ravages of this disease among university students, it was stated, and Dr. Leask was assigned to direct the study throughout Canada.

Speaking on the importance of the campaign, Dr. Leask declared the menace of tuberculosis to university students a "very serious one." Due possibly, as some specialists believe to the strain of studies, tuberculosis is inclined to develop much more rapidly in students than might otherwise be the case, he said.

Many miles of railways in Britain are to be electrified this winter.

SUNDAY SCHOOL LESSON

FEBRUARY 21

JESUS THE GOOD SHEPHERD

Golden Text "The Lord is my shepherd, I shall not want." Psalm 23:1.

Lesson John 10:1-42

Devotional Reading Psalm 23.

Explanations and Comments

The True Shepherd and the False Shepherds, verses 1-5. Jesus is still speaking to the man to whom He gave sight, and to the Pharisees who had excommunicated the man and had announced Jesus as a sinner for having this deed on the Sabbath day. Hence the scene.

Verily verily. Jesus began this drawing attention to the importance of the character that was to follow. Then he pictured an Eastern sheepfold a large open enclosure with only one entrance, where the flocks of several shepherds were kept during the night into which a thief could easily enter by climbing over the wall that encloses it, but the sheep never enter by the right way, although his door which the porter opens for him. The sheep know the shepherd's voice and come at his call. He leads them out, going before them and they follow, but from a stranger they will flee, for they do not know his voice. A thief or sheep is not driven in the flock as in our country.

Jesus' method is not that of compulsion, but that of attraction. He does not drive, he draws." Francis Greenwood Peabody.

Jesus As the Door, verses 6-10. The Pharisees who claim to be the spiritual guides of the people, could not see that Jesus was describing them under the picture of thieves and robbers, and the man formerly blind could not grasp the comforting thought that he was independent of the Pharisees because they were false shepherds who did not themselves enter the way into the fold, into the Kingdom of God. The Pharisees thought that by excommunicating the man they had closed the door into heaven for him. Jesus therefore explained the picture he had drawn, "I am the Door of the sheep," He announced, "the Door through whom the sheep may enter the fold."

"One only Door leads up to God.
The Christ His Son.
Faith is the key that swings it broad:
And every one
Who takes this key may upward plod." Donald A. Fraser.

Jesus As the Good Shepherd, verses 11-18. With the statement of the purpose of His coming, Jesus changes the figure of Himself as the Door to that of Himself as the Good shepherd. Good here does not mean kind, but genuine, true, as is known by the contrast with the thief and the hireling, verse 12. The good shepherd layeth down his life for the sheep, while the hireling flees when wolves come, leaving the sheep to their fate. "I am the Good Shepherd; and I know Mine own, and mine own know Me, even as the Father knoweth Me, and I know the Father", in these beautiful words Jesus declares the depth of the love existing between Himself and His people.

The starch in cooked potato digests more rapidly than any cereal.

Using Convicts To Settle French Guiana

France Is Encouraging Ex-Prisoners To Open Up New Colony

Administrative reforms and a new spirit of colonization are rapidly changing the atmosphere of Devil's Island the world's most famous prison colony.

Officials of the Colonial Office at Paris revealed the new Imini terrory in French Guiana. Hard-bitten convicts who have served out their servitude under a tropic sun are looking southward to a new El Dorado, said to be rich in mineral and agricultural wealth.

No new colonists are to be sent there but ex-prisoners are being encouraged to settle. Formerly the only thing for a liberated man to do was to try to find work in St. Louis, Maconuria or some one of the other coast towns.

About thirty years ago an attempt was made to transport Indo-Chinese colonists to the district, but it was a failure. Instead of clearing and farming the rich jungle land they became town merchants and servants for the households of the French officials.

Arabs, Negroes and some native Indians make up the greater part of the free population. These men have refused to open up the country. Some Indo-Chinese fishermen, the last of a band of pirates sent here years ago, cast their nets in the coastal waters.

Almost all sentences to the prisons carry with them exile for a number of years after the completion of the term. Thus men who have done twenty years penal servitude must remain another ten or fifteen years. These men France expects to use as colonists.

A scientist says he can photograph the human mind in the act of thinking but he's got to catch it doing it.

SERVICE IN TIMES OF STRESS

The rural telephone of this insurance has peculiarly merited favorable attention in recent years while some of its other features have received universal emphasis. If this tendency has been a greater evidence in periods of special prosperity, it is perhaps, natural that the trying condition of the past two years should cause people to realize the old primary values on which life insurance is based. During a time when all forms of business suffered severely and many succumbed, life insurance has withstood every attack, and has justified every claim. Not a single company on this continent has failed to meet every demand, even though thousands were usually heavy. Within a decade and a half, life insurance has successfully survived the tests of a world war, of pestilence, and of unexampled depression.

Its steady, unobtrusive, but tremendously helpful service to its policyholders is amusingly phrased in a reference by President T. B. Macaulay at the annual meeting of the Sun Life Assurance Company of Canada held recently. He pointed out that the Sun Life Company has paid out over $80,000,000 to policyholders and beneficiaries, and that since organization it has paid out nearly $900,000,000. In the ordinary course of business, there will be paid out to policyholders and beneficiaries during the present generation the whole enormous billion dollars of assurance now enforced in the huge Sun Life business to force.

The stabilizing and constructive factor of the Sun Life and other companies in modern economic life is but lightly appreciated.

The annual report of the Company indicates that its new paid-for assurance last year amounted to $127,000,000, indicating how generally the public, during a trying period, turned to life insurance as a sure and tested refuge.

With assets of $624,000,000 and total assurances in force of over $3,000,000,000 the Sun Life Company continues to set new records in the life insurance field.

SKINNING SOCKEYE FOR CANNING NEW VENTURE

Trying a new venture last year, with apparently satisfactory results, one of the salmon canneries on the Fraser River in British Columbia skinned part of the sockeye catch before putting the fish through the canning process and reported obtaining a price premium for the product.

Salmon are ordinarily canned without removal of the skins and the advantages claimed by the canners which has been experimenting with the use of skinned fish is said to lie in an added attractiveness in the appearance of the finished product.

The skinning process, as outlined to officers of the Dominion Department of Fisheries by the managers of the cannery, is not difficult or complicated, and is estimated to cost about three cents per fish. It is carried out by female workers with the use of a knife and a wooden chopping bowl, which consists of two pieces about three inches thick, the lower piece fastened together at one end by a light metal bolt and rounded at the other end to fit the bowl. After a cut has been made in the skin of the fish, near the tail, the stump is attached and rolled toward the bowl As it is rolled, it peels off a strip of the skin in each revolution. After the fish has been cut into pieces of suitable size and packed in cans, the liquid medium is added and the canning process is carried out in the usual way.

Simply a point of incidental interest, it may be noted that sockeye skins weigh several ounces each. For a time they were weighed but now are averaged a little more than a third of a pound each.

Glue of good quality can be produced from the waste fragments of the reduction plants manufacturing meal from fish waste, according to experiments made by Canadian scientists engaged in fisheries research under federal auspices.

I am sure of very few things in this world . . . I should be tempted to put very large question marks after all that I write, all that I say, and all that I think.—Anatole France.

SAYS CANADA EQUIPPED TO LEAD IN RECOVERY

Canada is better equipped to advance from the present depression than any other country, declared F. V. Sulbert, Winnipeg, superintendent of natural resources for the Canadian National Railways, in a recent address before the Saskatoon Rotary Club.

"There is no country with the same amount of raw products readily available while, in the way of equipment of production and transportation of all products, the Dominion stands second to none. It is noticeable that, although the severity of the present depression, we have had no bank failure and our government loans have been oversubscribed. It is, perhaps not appreciated just what progress this country has made in recent years and few people realize the extent of Canada's still unused resources."

******

Hair seals taken in Canada's fisheries are used in making oil and some business is done in the sale of their skins. In 1930 the skins and oil had a marketed value of nearly $8,000.

A PRACTICAL PUZZLER

BY F. ALBERT BUDD

One cogent criticism of the High school phase of our educational system today is its lack of practical training. It is said that High school graduates as a rule do not impress the business men with the need for a profession of that initiative ability so essential in practical relationships. Whether true or false this criticism may be, it would seem that the study of instruction but of the subjects of instruction. If these in themselves are the occasion for it is highly difficult. If not impossible, in our crowded curriculum for an instructor to make time for practical drill.

In this respect the subject of History may in these times well bear close examination. If there was ever a period in the history of the world when growing youth required careful systematic training in these principles which will act as foundations for permanent world peace it is at the present moment. It is to be regretted that since the great World War the question of the League of Nations there has not been considered by the departments of education in all the provinces of Canada systematic graded instruction in the principles which will act as foundations for permanent world peace. It

WANT FURTHER FEDERAL AID FOR HIGHWAYS

Laurens, Que.—The election of Hon. A. C. Hoey, Minister of Highways for Saskatchewan, as president of the Canadian Good Roads Association, lengthy discussion as to the part to be taken thereby in the work of continuing the country's highways, a review of the tourist traffic and its "invaluable support" of Canadian scenery and pleasures, and a debate on local road grants, featured an active closing day of the Associations three-day annual convention here.

Further Federal aid for the construction of highways and the elimination of level crossings was recommended in resolutions adopted by the association.

Tourists for commercial vehicles should be much higher, G. W. Fuller, chief of the Province of Ontario Department of the Canadian National Railways stated. He counted a motor vehicle tourist equivalent to two persons and thereupon plunged into deeply into highway expenditures without making adequate plans for a return on the investment.

While the efforts of the Board of Railway Commissioners had increased level crossing conditions, a total of 341 railway crossing accidents had occurred in 1929 in Canada, and a total of 113 lives and 475 injured had resulted, Mr. Frank Oliver, advisory officer to the Board of Railway Commissioners, stated.

Railways and tunnels have been built where feasible and financially possible, and highways diverted to avoid crossings the right-of-way, he said. The Dominion still had, however, some 28,000 level crossings from coast to coast.

W. G. Robertson, manager of the Ontario Motor League, disputed a remark by Mr. Oliver who contended that Ontario held the leadership in roadless driving. Two other provinces had a higher accident rate than had Ontario, Mr. Robertson said. The number of cars in Ontario, he larger motor mileage by many tourists and the province's 7,000 level crossings were among the factors contributing to Ontario's accident total.

Other officers elected were: Hon. W. H. Hoble, Minister of Public Works, Newfoundland, first vice-president; Hon. R. W. Brahn, Minister of Public Works, British Columbia, second vice-president; Hon. Leopold Moreaux, Minister of Highways, Ontario, third vice-president.

Many directors elected were: Hon. W. Finlayson, Minister of Lands, Forest and Northern Development, Ontario; Hon. Leonard MacNeil, Minister of Highways, Prince Edward Island; Mr. Justice Fullerton, Chairman of the Board of Railway Commissioners; Charles H. Bloch, President of the Royal Automobile Club of Canada, and J. L. Stewart, General Manager, Canadian Automobile Chamber of Commerce.

Coal From Chian

Contract Landing Of Cargo In Mats At Halifax

Halifax, N.S.—A protest against the landing of Chinese coal in Canada, was telegraphed to Rt. Hon. R. B. Bennett, Prime Minister, by Hon. W. A. Hesk, M.P., and Fetir P. Gahan, M.P., Provincial Members for this constituency.

The protest followed the announcement that a Norwegian freighter was on the way from Port Bowen, Baffin Lands-China, with a cargo of 6,000 tons of Chinese anthracite for sale in Nova Scotia and New Brunswick.

Hopes From Ice

Point Barrow, Alaska.—The Shulcan's Bay Company trading steamer "Nanuk," which for several days had been in danger of being crushed and benched, has escaped the clutches of the Arctic ice pack and headed southeast along the coast to safety.

Hudson's Bay Chief In West

Winnipeg, Man.—With the object of obtaining first hand information about the business of the company, Major Patrick Ashley Cooper, new governor of the Hudson's Bay Company, is in Winnipeg conferring with head officers here of the company.

W. N. U. 1929

Plea For Independence

Malcolm Ramsay Speaks Strong Words For Self-Government For India

London, Eng.—Two hundred members of all parties in the House of Commons met in the historic grand committee room at Westminster, which Mahatma Gandhi, Hindu Nationalist delegate to the Indian Round Table Conference, made his strongest demand he has yet made for Indian independence.

Speaking by the homespun cotton robe with a group of followers, Gandhi, in easy conversational tones and a gentle voice, declared he would be satisfied with nothing less than complete independence. Safeguards were unacceptable, he said. But Britain's complete independence would not exclude partnership with British trade on a basis of equality, he added.

"I will not accept the bonds of independence, carrying with them economic and financial disabilities," he said. "Rather would I declare myself a rebel . . . thousands of Nationalists have shed themselves of the fear of death."

Mr. Gandhi spoke for an hour and 40 minutes. At times questioners were raised upon him by the members, but many of these were hostile in sympathy. To one member who asked to know what the word "nationalism" meant, Mr. Gandhi answered, "It means an independent person." The chairman explained the term meant "the embodiment of a great soul."

Among Gandhi's audience were Miss Nancy Lloyd George, Joseph Rothschild and two members of the old Labour Cabinet, Rt. Hon. J. H. Clynes, and Rt. Hon. Tom Shaw.

Many Returning To Britain

Move Inward Bound To Old Country Than Going Out

London, England.—For the first time in history, during the year—more people are returning to Great Britain from the Dominions than are emigrating to them, according to latest reports, millions will starve to death during the coming winter.

"Against from the moral aspect of the question which is important, it seems to me that this is an absurd position from an economic standpoint. That is to say, we can not use our wheat and it is doing us no good lying in elevators. If we could dispose of it, however—if we could get anything for it at all—we should clear the way for the sale of the next crop at least.

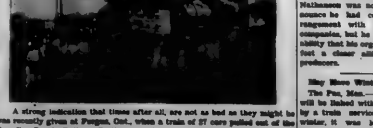
"The obvious thing, it seems to me, is to ship our surplus wheat to China and take China's note in return for it. We might to some time getting in our money, but we could at least keep better off than we are now, with our grain choking the ports for want of business."

"Another important point, too, is that if we unloaded our wheat surplus in China now, we would create a vehement appetite against the Chinese. We would be building up a huge potential market for our grain."

Retired In Boro Town

Moose Jaw, Sask.—Retrial of J. H. Kerr, Dr. J. H. Mims, Jr., and D. H. Mims on charges of conspiracy to defraud was ordered in court of King's Bench when the jury brought in its final verdict of disagreement. The case will come up at the next jury sittings of King's Bench court in this city, next January.

Who Said Depression?



A strong indication that times after all, are not as bad as they might be was recently given at Fergus, Ont., when a train of 27 cars pulled out of the Canadian Pacific Railway Station, carrying products of Beatty Bros., Limited, manufacturers of electric washing machinery. With all the talk about "produced in Canada goods" and employment for Canadians, the event, which has become one of the town's regular events of recent years, was that year vested with special interest and the employees of the plant and the townspeople in general turned out to cheer the train on as it sped away to distribute its freight from coast to coast throughout the Dominion.

SIR ROBERT

Travelling faster than most has ever done before in any land, Sir Philip Lloyd Lloyd, G. H. Stamforth (above), of the British Schneider Cup team, who nearly averaged 330 miles an hour over a three kilometre course, and he will shortly attempt to establish a speed record which will stand for a number of years.

Proposal Made To Dispose Of Surplus Wheat On Credit

Victoria, B.C.—That Canada ship its surplus wheat to China and take a chance on receiving payment for it later, when China is in better financial shape, is the proposal advanced by Hon. Lloyd George, Japanese Minister of Agriculture. Mr. Atkinson will discuss his plan with the Dominion Department of Agriculture shortly.

"We find in the world today," Mr. Atkinson said, in making public the proposal, "an appalling situation. The wheat producing nations, Canada particularly, are embarrassed by huge surpluses of wheat and yet in China, according to latest reports, millions will starve to death during the coming winter.

"Apart from the moral aspect of the question which is important, it seems to me that this is an absurd position from an economic standpoint. That is to say, we can not use our wheat and it is doing us no good lying in elevators. If we could dispose of it, however—if we could get anything for it at all—we should clear the way for the sale of the next crop at least.

"The obvious thing, it seems to me, is to ship our surplus wheat to China and take China's note in return for it. We might to some time getting in our money, but we could at least keep better off than we are now, with our grain choking the ports for want of business.

"Another important point, too, is that if we unloaded our wheat surplus in China now, we would create a vehement appetite against the Chinese. We would be building up a huge potential market for our grain."

To Secure Evidence

Raid Conducted In Ontario On Motion Picture Companies

Toronto, Ont.—Books and papers of seven motion picture companies named by Peto. White, K.C., as being members of an illegal combine, were seized here in a raid conducted by a combined force of provincial and city police. The seizure followed an announcement by Hon. W. H. Price, Attorney-General of Ontario, that the province would prosecute several motion picture organizations in connection with the alleged combine.

Offices of the Canadian Paramount Corporation, Famous Players Canadian Corporation, the Bloom and Pine Theatres, Regal Films, Ltd. and Exhibitors Distributing Co., Ltd., were among those visited by police.

Seizure of the books and papers was merely carrying out necessary details in securing evidence in connection with the impending prosecutions, Col. R. H. Greer, K.C., who will conduct the prosecution for the province, explained. There were no objections raised to the seizures in any of the offices.

Prosecution is scheduled to commence October 5 at the fall criminal assizes, with several other provinces co-operating with Ontario in the action.

Indictments are at present in the course of preparation and counsel have been instructed to move at once to bring the cases before the courts.

Both the provinces of Alberta and Saskatchewan will, it is understood co-operate with Ontario in one set of prosecutions against the alleged combine.

Some 30 companies are affected by Ontario's action, the writs being issued by Commissioner White as parties to the combine.

Japan Shaken By Severe Earthquake

Houses Collapsed and Telegraph Lines Put Out Of Commission

Tokyo, Japan.—Mid-Japan has been shaken by another earthquake which caused 14 deaths and injuries to 60 in Saitama and Gunman prefectures alone.

In Saitama prefecture 150 houses collapsed, including the famous temple of Hikawa in Hanzagi.

Landslides interrupted rail travel on various lines and 17 telegraph and telephone lines were put out of commission, cutting off communication with Kobe, Dairen, Kumamoto and Hakodate.

Seismologists said the "quake was the most severe this year.

Children Perish In Fire

Six Burned To Death When Farm House Destroyed

Hague, Sask.—Six of the nine children of Mr. and Mrs. John P. Unruh, of Hague, Sask., were burned to death when their farm house was destroyed by fire. Three of the children managed to escape from an upstairs window, but apparently the fire had overcome the others, who perished from one year and ten months to 13 years of age.

The bodies of the six little victims were practically reduced to ashes. Four of the children had apparently been huddled together as their remains were discovered in a heap while another was found at one side and the baby had been burned to death in her bed.

GENERAL SMUTS PICTURES A NEW ERA OF SCIENCE

London, England.—A tremendous ovation was accorded General the Rt Hon Jan C Smuts as he entered the Central Hall at Westminster to deliver his presidential address, opening the centenary meeting of the British Association for the Advancement of Science. General Smuts, distinguished South African soldier statesman and scholar, was accompanied by several renowned past presidents.

The hall was filled to capacity and three overflow halls were also jammed as General Smuts furnished a "fiction-like world picture of today" in which he set the keynote for one of the greatest gatherings of scientists the world has ever seen.

"The new concept has made it possible to construe matter, mass and energy as but definite measurable conditions of the curvature of space time," General Smuts declared. "We may say that matter and energy will have disappeared as independent entities and will have become mere configurations in space-time.

"The space-time world, however novel, however alluringly attractive to some, is not at either with reason pressed, the space time world is largely a discovery of mathematical reason and is an entirely rational world."

But in the new scientific drive General Smuts said, it is recognized the world consists not only of electrons and—although not also—of vast range aspirations. Beauty and holiness are seen as much aspects of nature as energy and entropy. "We need to have deepened and extended the subtlety physical world into a twilight where prophysical and metaphysics meet; where space-time does not exist and where strictly casual law in the old sense does not apply."

Such a fairy be said science is perhaps the clearest revelation of God to our age," General Smuts said. He may get that matter and energy will have disappeared as independent entities and will have become mere configurations in space-time.

"The space-time world, however novel, however alluringly attractive to some, is not at either with reason pressed, the space time world is largely a discovery of mathematical reason and is an entirely rational world."

But in the new scientific drive General Smuts said, it is recognized the world consists not only of electrons and—although not also—of vast range aspirations. Beauty and holiness are seen as much aspects of nature as energy and entropy. "We need to have deepened and extended the subtlety physical world into a twilight where prophysical and metaphysics meet; where space-time does not exist and where strictly casual law in the old sense does not apply."

Such a fairy be said science is perhaps the clearest revelation of God to our age," General Smuts said. He may get that matter and energy will have disappeared as independent entities and will have become mere configurations in space-time.

"Science itself must help to close that dangerous gap in our civilization which threatens the disruption of our civilization and the decay of our spiritual life. Its final and perhaps most difficult task may be found just here. Science may be destined to become the most effective drive toward ethical values and in that way render its most priceless human service. In saying this I am going beyond the scope of science as at present understood.

"The ancient spiritual goods and heirlooms of our race need not be ruthlessly thrown by the way. The great values and ideals retain their unfading glory and derive new interest and force from a cosmic setting."

British Motion Pictures

Toronto, Ont.—Wider distribution in Canada of produced-in-Britain moving pictures is promised by W. L. Mathieson, recently returned from a two-months' tour of England. Mr. Mathieson was not prepared to announce he had completed any arrangement with British production companies, but he indicated the probability that his organization would effect a closer alliance with British producers.

Ship Shoes Winter Train Service

The Pas, Man.—Chartered this year will be fished with the outside world by a train service throughout the winter, it was learned unofficially here. Once a week over the frozen lakes that stretches along the 500-mile bay line from here to the new bay port, engines will plow through the snow to bring mail and supplies to the few that will remain at Churchill throughout the winter.

W. N. U. 1929

SOCIAL RESEARCH PLAN ADVOCATED BY WESTERNER

Ottawa, Ont.—Creation of a research laboratory where the economic system might be dissected in an effort to remove the malignant growths, depression, was advocated in the House of Commons by Alfred Speakman, U.F.A., Red Deer. He would establish a "national council of social and economic research," patterned after the existing council on industrial and scientific problems.

The government said Hon. H. H. Stevens, was willing to give serious study to the suggestion of an economic council. It was prepared even to pass the Speakman resolution if it were made contingent on the ratification of the government.

The machinery already existed for a scientific study of social and economic problems, said Rt. Hon. Mackenzie King, Liberal Leader. The National Council of Scientific Research might be enlarged and such questions as unemployment, unemployment insurance and subdistribution of commodities and wealth, referred to it for consideration.

Organized science had solved such industrial problems as production, said Mr. Speakman. The Dominion, in furthering that work, had created the National Council of Scientific Research. He asked why Canada should not establish a similar council to grapple with social and economic problems. A ready field existed with such unsolved problems as unemployment, poor distribution and low community values. Systematized research might find a key to the riddle of depression.

The resolution, explained Mr. Speakman was identical with the one moved by him last year. The value of work performed by the National Council of Scientific Research was well known. Another body should be created which would be supported by the state and which would deal with the problems indicated.

It was a curious, significant and yet sinister fact, said Mr. Speakman, that people who had held property which thousands of dollars are today receiving relief. The world today demanded leadership back to normal conditions or to what some might call a return to better society. The two steps which had been taken so far in the present depression were not of a kind which were necessary and essential, but would increase the burden. (1) The 10 per cent. cut, which reduced the purchasing power of civil servants. The conditions under which the people of the world were suffering were the consequence of human error and rectification must be susceptible of human control.

W. T. Lucas, U.F.A., Camrose, declared that before any real progress or prosperity could be achieved many of the old ideas would have to be scrapped. The big problem today was the proper distribution of wealth among the people who created it.

Rail Provides Market For Western Fish

Two Special Trains Carried Consignment From Prairies

Winnipeg, Man.—Shipments of fresh and frozen fish from the west to distributing centres in eastern Canada and the United States reached a peak last week when two special fish trains were operated by the Canadian National Railways. A train of fifteen cars of frozen fish left Prince Rupert with its cargo consigned mainly to Toronto, Montreal, Windsor, Chicago and New York. The movement of fresh fish from the prairies was featured by a consignment of seven loaded cars which were rushed east on an extra section of the Continental Limited.

No Information Available

Ottawa, Ont.—The government has no information as to when the report of the Royal Commission on Transportation will be made, nor whether further sittings of the Commission will be held, said Premier Bennett in the House of Commons. He was answering a question by C. H. Mahoney (Lib., North Battleford).

W. N. U. 1929

Favorable Wheat Situation

Increased Demand For Export Grain Has Made Its Net Felt

Ottawa, Ont.—Increased export demand for Canadian wheat during the next two months, with resultant higher prices, appears inevitable

In a statement issued recently by Hon. H. H. Stevens, Minister of Trade and Commerce, favorable factors in the wheat situation are enumerated and it is declared a large continental demand is even now making itself felt.

Broomhall, noted Liverpool authority, who has just been elected Vice-President of the American Pomological Society

Cold Wave In Europe

Eleven Men and Women Freeze To Death In Rumania

London, England.—Snow and bitter cold has swept over most of Europe and numerous deaths were reported from several points.

In Roumania 11 men and women in a village were found frozen to death and their homes are perished on a country road. All the members of two families were reported to have frozen in a Bessarabian village and the Danube was covered with ice for several miles.

In Czechoslovakia three persons died, and the snows interrupted shipping and train service.

The lowest temperature in France was five degrees above zero but there was snow as far south as Bordeaux.

London had the first real snowfall of the winter and in some of England's rural districts the snow was a foot deep. All small craft in the channel took shelter from a strong easterly gale.

Won Oats Championship

Calgary, Alberta, Peter Sebastian, of Wembley, Alberta, won the oats championship at the provincial seed fair Sebastian's sample of Victory oats weighed 52¾ pounds to the bushel. The grand championship, open to professional exhibitors as well as others, was won by Nels Linder of Wetaskiwin.

Trade Vessel From Scotland

Montreal, Que.—Scotland is to send an official trade mission ship to Canada th's spring, according to Graham Donaldson of the Anchor Donaldson Line of Montreal, who arrived in Montreal to conclude arrangements at this end.

Vessels Protected

Canadian Ships Are Safeguarded At Port Of Shanghai

Montreal, Que.—Despite repeated bombarding by air and by Japanese naval craft movements of foreign shipping at Shanghai have not been interfered with according to a cable received here by George Stephen, vice-president in charge of traffic, Canadian Pacific Railway, from Alan Cameron, the company's Oriental manager at Hong Kong.

When bombardment occurs at Woosung a British naval vessel stationed outside that port communicates with British vessels and consular authorities notify steamships.

Air Mail Cost

Ottawa, Ont.—At an estimated total cost to the government of $472,-000, letters were from July 1, 1931, to January 31, 1932, 234,804 pounds of mail carried in the air mail services, over a total mileage estimated at 644,736 miles. These figures were shown to the House of Commons by Hon. Arthur Sauve, postmaster-general.

Wood Shipped Cuba

Ottawa, Ont. The House of Commons will be asked to approve a resolution advancing that Canadian currency should be in both English and French. C. L. Boulanger (Lib., Bellechasse), has placed this request on the order paper of the House.

To Amend Juvenile Act

Bill Designed To Meet Regrettable Cases Reported In Some Provinces

Ottawa, Ont. A bill to amend the Juvenile Delinquents Act, in line with representations received from the Province of Manitoba, endorsed by six other provinces, was given first reading in the House of Commons

Hon Hugh Guthrie, Minister of Justice, explained that the amendment arose from the fact that the act as it now stands provides that it is an offence for anyone to contribute, promote, or procure a child to become a delinquent. It had been held by magistrates in certain Courts, however, that while a man might do all in his power to procure a youth to become a delinquent if the youth did not actually become a delinquent, the man was not punishable

It was proposed to insert a clause providing that it shall not be a valid defence to a prosecution that, notwithstanding the conduct of the accused the child did not in fact become a delinquent.

The amendment, Mr Guthrie said, was endorsed by nearly all the Children's Aid Societies.

Students Against War

Demonstration At Tokyo Against Course Pursued At Shanghai

Tokyo, Japan. The first public demonstration of any moment against Japan's course in Shanghai and Manchuria took place recently at the Imperial University.

Twenty-five students were arrested for partic pating in a protest meeting at which handbills urging the people to "Stop this imperialistic war" were distributed.

Eight hundred students, assembled in front of the main lecture hall of the university, heard speeches by four of their colleagues and then attempted to parade through the streets in the vicinity carrying red banners. The police dispersed them and arrested the leaders.

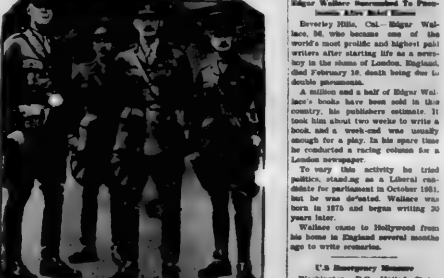
Seed Oats Shipped

Now On Way To Saskatchewan From Peace River Country

Peace River, Alberta. Shipments of oats from the Peace River country are already under way to the relief commission in Saskatchewan, states A. E. Wilson, of Regina.

Mr. Wilson, manager of the Saskatchewan relief commission, said his province would probably acquire up to 2,000,000 bushels of seed oats and 500,000 bushels seed barley. No seed wheat would be needed, he said, as there were 5,500,000 bushels in Saskatchewan country elevators.

British Chiefs in Shanghai



On the shoulders of these men rests the responsibility for the protection of British and American citizens in war-torn Shanghai. The unusual photograph, made during a conference of the military chiefs, shows, left to right, Colonel R. S. Hooker, commander of the United States Marines in the international settlement; Major Price Williams, of the British defense forces; Major General Barrett, also of the British, and Brigadier-General Richard Fleming, in command of Britain's troops in the storm centre. The forces of both nations are being heavily reinforced to cope with any emergencies that may arise.

TARIFF BILL IS INTRODUCED IN BRITISH COMMONS

London, England.—The "trade bill" to establish a general 10 per cent. tariff on imports to Great Britain was introduced in the House of Commons in "dummy" form and given its first reading, after the government had disposed of two Labor amendments which would have limited operation of duties to one year and placed all foodstuffs on the free list.

The bill was then introduced by Rt Hon Neville Chamberlain and given first reading. Exact contents were still unknown.

It was not known what products would be exempt from the effects of the bill, beyond that they would include meat in grain, meat including bacon, raw wool and cotton, tea and coffee.

In the House of Lords Viscount Snowden of Ickenshaw, made his first speech as a peer, telling why he thought a general 10 per cent tariff would be disastrous to the economic and industrial life and to the prosperity of the country."

Viscount Snowden told the lords why he remained a member of the cabinet as Lord Privy Seal, despite his disagreement with the protection measures put forward by the government

Referring scornfully to assertions that such an arrangement violated all precedent, he said that "precedent always had remained the slave of precedent we would still be living in caves eating shellfish."

Gold Strike in New Area

Large Mining Group Has Taken Option in Vicinity

The Pas, Man. While Manitoba's winter gold rush at Island Lake is proceeding with increasing vigor word of another gold strike reached here. The new strike is near mile 326 on the Hudson Bay Railway and a large mining group has secured a group of claims there. Drills and equipment will be taken in within a few days to begin exploration work.

No details of the location of the claims, other than that Mile 326 would be the basis of operations, were divulged Word of the development, however, confirmed rumors of a gold-silver strike somewhere along the Hudson Bay Railway which have been current in the prospecting fraternity here for weeks.

Island Lake, directly east of here on the Manitoba-Ontario border is now being put to the test of drilling and blasting operations by equipment and men taken in by aeroplane. Staking of additional claims continues.

Well Known Novelist Dead

Edgar Wallace Succumbed To Pneumonia After Brief Illness

Beverley Hills, Cal.—Edgar Wallace, 56, who became one of the world's most prolific and highest paid writers after starting life as a newsboy in the slums of London, England, died February 10 death being due to double pneumonia.

A stallion and a half of Edgar Wallace's books have been sold in this country, his publishers estimate. It took him about two weeks to write a book, and a week-end was usually enough for a play. In his spare time he conducted a racing column for a London newspaper.

To very this activity he tried politics, standing as a Liberal candidate for parliament in October 1931, but he was defeated. Wallace was born in 1875 and began writing 20 years later.

Wallace came to Hollywood from his home in England several months ago to write scenarios.

U.S Emergency Measure

Washington, D.C.—United States congressional leaders agreed with President Hoover on a new legislative drive for better times directed at freeing billions of sound securities for active credit use. The new emergency measure which will be pushed simultaneously and immediately in the Senate and House also proposes to make serviceable nearly one billion dollars of the treasury's gold supply not now needed for reserve.

Tribute To Canada

Canadians Resident in the United States, Present Marble Tablet To Rideau.

The Governor-General of Canada, the Earl of Bessborough, unveiled recently a marble group in the Hall of Fame in the Parliament Buildings, Ottawa, placed there through contributions of Canadians, resident in the United States. The memorial, commemorating the centenary year of federation, was the result of activities directed by a memorial committee headed by Mr. W. J. Taylor, former president of the Canadian Club in New York. It was to have been preserved in 1927 when Canada was celebrating the sixtieth birthday of the Dominion, but various circumstances caused the delay.

The presentation was made by Mr. Colgate and Mr. Hon. R. B. Bennett, Prime Minister of Canada, before the church of acceptance. The ceremony was brief, taking less than fifteen minutes.

Seated on the platform, erected near the portrait, were their Excellencies, the Prime Minister and Mrs. Caplain, representatives of foreign countries and several members of the cabinet. Following the Prime Minister's acknowledgment of the memorial, Hon. H. A. Stewart, Minister of Public Works, passed the memorial over to the Governor-General who drew aside the flags veiling the group, while the Temple choir, camped on the platform behind the main, surrender rendered "Land of Hope and Glory."

The government, on behalf of the people of Canada, thank you for this memorial and I would ask that you convey our thanks to the members of your committee," said Mr. Bennett. "We accept it as an evidence of the love and pride in the hearts and minds of Canadians who, although they live abroad, have not forgotten the claims of the home land. His excellency described the memorial as "a token of the pride Canadians abroad feel for their home land and a tribute to the achievements which result in great."

There are more than a million persons of Canadian birth living in the United States, scattered throughout the length and breadth of the land," said Mr. Colgate. "Nothing could speak more eloquently of the unity of purpose, the similarity of ideals and the friendly feeling that exists between the two peoples, than the fact that so many Canadians have found Canada's good happiness and contentment in the republic across the border. They exercise a power for great good in the maintenance of cordial relations between the peoples of the two countries."

The memorial, a mural in white marble, is placed on the wall of the Hall of Fame near the entrance to the library and opposite a similar work placed there in tribute to the nursing profession. On the panel are engraved the words—"To commemorate the sixtieth year of confederation, Canadians in the United States give this in token of their devotion to the country of their birth and as a proud tribute to the achievements of its founders."

The group of figures represent Canada's present and future, and are symbolic of the industries and progressions that entered into the building up of the country.

Jerry—But, anyway, Gladys, we must give him credit for getting Maud a nice engagement ring.

Gladys—Oh, no we needn't. The jeweller's given him credit for that.

"Buy a flower for your wife."
"I haven't one."
"Buy a flower for your sweetheart."
"I haven't one."
"Then buy a flower for luck." — Blanco Blanco, Madrid.

Privy Council Decision

Final Citizens Has the Right To Control Radio Communication in Canada

Parliament of Canada has the right to regulate and control radio communication in the Dominion, the judicial committee of the privy council has decided in dismissing the appeal of the attorney-general of Quebec against the Supreme Court of Canada's decision that Ontario was associated with Quebec in the appeal.

Once it is conceded that a transmitting instrument must be subject to control of the Dominion, it follows that a receiving instrument must assume its lots, their lordships continued.

No much are awarded, this matter being but for decision between the Dominion and the provinces.

"It is a matter for congratulation," the judgment adds, "that the result seems consistent with common sense. Divided control between the transmitter and receiver could only lead to confusion and inefficiency."

Their lordships noted the Canadian supreme court judges expressed regret they did not know, at the time of their hearing of the case, the result of the privy council in regard to the control of aviation. But the supreme court knows Quebec was a party to the Dominion parliament, it would certainly only have confirmed the opinion of the majority, the privy council added.

Useful Dying

Sweet Caporal Tin Will Make Little Comfort That Widow Life Matter

Finished Edison died with a personal estate valued at some $15,000,000. His widow's share of his investments is estimated at not less than $10,000,000.

Thus for penny dollar Edisons earned for himself, he earned a thousand millions for humanity.

This is useful living.

There are those, like Edison, almost born still to the wealth and progress of the world. There are many others who in their passage through this world succeed only in upping the strength and deteriorating the resources of humanity.

It is upon the lives of the Edisons and the thousands like him who have contributed more highly to the world's fortunes than they have to their own, to ensure that all the progress of humanity has been founded.

The world owes no man a living. But every man owes to the world some little contribution that will help humanity to richer and sweeter for his passing by.

Edison's contribution to this fund of human progress was notable. His attitude towards life has a spiritual value high above the commercial value of his inventions.—Winnipeg Tribune.

Italians are experimenting with the use of hemp stalks for the manufacture of cellulose for the rayon industry.

Norway's annual coffee consumption is destroy 1,500,000 bags of coffee a month for 12 months.

Much Blindness Could Be Avoided

Many People In Canada Who Should Not Be In This Condition

That of the 7,000 people suffering from blindness in the Dominion of Canada more than 50 per cent of the cases might have been avoided, was the statement of Dr Arthur Pickering, Toronto field representative of the Canadian National Institute for the Blind, who addressed the London, Ont., Lions Club recently "It is certain that 70 per cent. of blindness takes place after the person is 21 years of age," he continued, "and as it has been established that 50 per cent. of all suffering from this affliction could have been cured if treated in time, there are approximately 4,000 cases annually in Canada to-day who should not be in the condition.

Mr. Pickering continued with Dividend control between the transmitter and receiver could only lead to confusion and inefficiency.

Their lordships noted the Canadian supreme court judges expressed regret they did not know, at the time of their hearing of the case, the result of the privy council in regard to the control of aviation. But the supreme court knows Quebec was a party to the Dominion parliament, it would certainly only have confirmed the opinion of the majority, the privy council added.

"Through such lectures as that given by Rev. Mr. Pickering the Canadian National Institute for the Blind is trying to combat these evils.

Sometimes, owing to financial difficulties, treatment is left too late. In the prevention work any needy case is looked after and everything is done to prevent blindness. Clinics are arranged, glasses are provided, and through the C.N.I.E. arrangements are made with leading specialists to have patients treated. School surveys are arranged and in cities sight saving classes have been formed. These classes are for children whose sight is so impaired that they cannot attend the ordinary school but who are not blind.

Artistic Postage Stamps

Have Been Specialty Of Newfoundland For Many Years

The colony of Newfoundland has for years made a specialty of artistic postage stamps. It pays to have issues sought by philatelic collectors. Even in Washington a bureau is maintained to furnish stamp collectors with the stickers. Sold at face value, with no service likely to be demanded, there is profit in the business. Newfoundland probably has long benefited by frequent issues of appealing pictorial designs. She has the special distinction of having her portraits, particularly of the rising generation of princes and princesses, that is not averse to collection of young and appeal. Brandon Sun.

Surrounded By Mystery

The natural history of the ost has been surrounded by mystery since the days when Greek philosophers thought ede sprang from such things as horsehair, and even today science does not know the full life history of these fish.

Singing Has Wonderful Psychological Effect

Makes People Happy and Banishes Worry and Depression

There is nothing that children love so well as to hear their mothers sing-ing unless it is their fathers whistling. Mother may not know one note from another and father's idea of a tune may be just too bad but that doesn't make any difference. Try it, and do it right, urges Clive Richards Barton, who does not mean to get a book and copy down words from the new Yalies hit on the radio or to get out the old hymnal and memorize "Old Hundred," so long singing, or to try to master the tricky syncopation of the latest "blues" dance music. By right she means manner.

Neither do you need to go in for classics like "Spring Song," or the "Evening Song," or even the eternal "Barcarolle." These are "class" songs have established on too long thing those if you like, but "Three Blind Mice," will do just as well, or "Turkey in the Straw," or "Just Tum-te-tum-tum tum."

It doesn't matter what you sing or hum, or ruth. The important thing is to smile with your voice and your eyes and let the neighbors in the house and the children know that there is something in your heart besides spinach and rubbers and washing, something besides bill collectors, fatigue, baby's cold, Pop's job fadies, Aunt Marie's visit, the six pounds coal, the burned beans, the broken pipe, and all their drab brothers.

One time a Senator told about his mother. He said about his little house and the family of boys going to work before daylight with their pails. little chaps, too, and coming home after dark. His mother always sang like robin then up with her singing in the morning and when they came in at night there she was singing at the stove.

He said that through all his life he has heard her sing. Her voice has carried him through terrific phases when he felt that he just couldn't carry on "Because," he added, "she had it harder than I ever had and she did it. Now we know what she went through and endured. And I get ashamed of myself as I come back and think how she could sing."

Sometimes when Tommy is bad and won't mind, try singing Welsh him wrap out of it. If everybody is cross and in the dumps see if you can't remember "Tipton Through the Tulips," or "Bubbles" or "Carolina Moon" and notice how the family chirps up.

The first thing you know they'll be singing too, at least singing in their hearts.

A wise man once said that people lost their worries and obsessions in the open air.

We might dare anyone to be unhappy while he sings.

Canadian Cadets

Winners In Rifle Shooting Conducted By Rifle Association

Rosaire St. Cyr, of the Commercial Academy, Quebec, led all Canadian cadets in the 1928 competition for the Osler Haggarty Memorial prizes, it was announced at Ottawa. He scored a possible of 600 points in the small arms rifle matches conducted by the Dominion of Canada Rifle Association and open to cadets of each military district. Cadet L. Roberts, of the Queen's Own Cameron Highlanders of Winnipeg, Man., was second with 599 points.

The winners by military districts included: No. 11, E. Liddell, Vancouver, B.C.; 12, D. Metzger, Moosejaw, Sask.; 13, Rosaire Mason, Wagner, Alberta.

A Market For Canadian Cheese

New Zealand Is Only Competitor Says Farm Magazine

Farmers may find much for thought in a recent editorial of the Canadian Countryman, one of the largest and most influential of the farm magazines in Canada. The substance of the article is that Canada should concentrate on cheese production and leave the Empire butter market to New Zealand and other countries.

Reasons for its occupancy was calling out instructions tompering his wrath with an irritable kind of politeness as he perceived that the foul odours cruel blotched the way was of the feminine

"Full in a bit please. We can't pass here if you don't. . . Full in." he called out, and then, with a sudden access of anger drifting forcibly towards him.

His dang up her hand.

"I can't!" she shouted back "I've lost my scuits."

"Lost your scuits!" . . . [illegible] many excitedly implied what he thought of the proceeding

A couple of strokes, and, gripping the cutwale of her boat as he drew level, he steadied it to a standstill beside his own.

Joan's eyes travelled swiftly from the [illegible] that gripped the boat's side to the face of its owner He was decidedly not a pretty sight. His features were concerned, with a dogged-looking chin and a conquering beak of a nose that jutted arrogantly from his hatchet face. The sun glinted on a crop of reddish-brown hair, springing vigorously from scalp in a way that suggested immense vitality. Joan had an idea that it would give out they if ever attempt was made to brushed hard His eyebrows, frowning in defiance against the sun, were of the same hue. His head was long and very thick, in later life they would probably develop into the bristling, pent-house variety.

The eyes themselves, as Joan described them on a later occasion, were "too red to be brown"; an artist would have had to make extensive use of burnt sienna pigment in portraying them. Altogether, he was not a particularly attractive-looking individual—and just now the red-brown eyes were fixed on Jean in a rather unconvincing glare.

"How on earth did you lose your oars?" he demanded—as indignantly as though she had done it on purpose, and could help doing so perfectly well.

Her lips twitched in the endeavour to suppress a smile.

"I haven't the least idea," she confessed. "I let the rope under some trees further up and—and I suppose I must have fallen asleep. But still that doesn't explain how I came to be adrift like this."

"A woman's least, I expect," he muttered, but subsiding into a growl as woman never lies up properly. Probably you just looped the painter round the bank and went to sleep. Providence that it would stay looped.

He gave vent to a low laugh.

"I believe you've described the process quite accurately," she admitted. "But I've done the same thing before without any evil consequences. There's nearly always a current. You know, I don't believe"—with conviction—"that my loop could have unlooped itself. And anyway" triumphantly — "the scuits couldn't have jumped out of the [illegible]

The man smiled, revealing strong white teeth.

"No, I suppose not. I fancy" — the smile broadened—"your scuits may must have spotted your scoop in the boat and, finding the opportunity too good to be resisted, removed your tackle and set you adrift."

There was a sympathetic twinkle in his eyes, and Joan, suddenly seeing the "little boy" in him which lurks in every grown-up man, fleshed back.

"I believe that's exactly what you would have done yourself in your scuits days."

"I believe it is," he acknowledged, laughing outright. "Well, the only thing to do now is for me to tow you back. Where do you want to go—up or down the river?"

"Up, please. I want to get back to Staple."

He threw a quick glance at her.

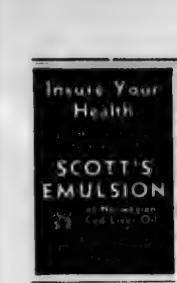
"Surely you must be Miss Peterson?"

She nodded.

"Yes. How did you guess?"

"My sister, Mrs. Craig, told me a Miss Peterson was staying at Staple. It wasn't difficult, after that, to put two and two together."

"Then you must be Geoffrey Burke!" returned Joan.



THE HOUSE OF DREAMS-COME-TRUE
— BY —
MARGARET PEDLER

"The Splendid Folly" — "The Secret Hedder & Stoughton, Ltd., London.

CHAPTER XIII Continued

With an effort of will Joan tried to banish the recollection of Sir Adrian from her thoughts. The picture of his thin, leaden-hued face, with its cruel mouth and furtive, suspicious eyes, was out of harmony with this soft day of spring. She wished she had not let the thought of him intrude upon her pleasant reverie at all. His sinister figure seemed to cast a shadow over the sunlit river, a shadow which grew bigger and bigger, blotting the green of the trees and the sky's faint blue, and even silencing the comfortable little chirrups of the birds, busy with their spring housekeeping. At least, Joan couldn't hear them any longer, and she took no notice even when one enterprising young cock-bird hopped near enough to rich a feather that was sticking out invitingly from the corner of Joan's coat-collar behind her head.

The next thing she was conscious of was of sitting up with great astonishment, under the impression that she had overslept and that the housemaid was calling to her very loudly to waken her.

Someone was calling — shouting hastily, in fact, and subduing her sleep-bemused faculties, she realized that instead of being securely moored against the bank her boat was rocking gently in mid-stream, and that the occupant of another boat, coming from the opposite direction, was doing his indignant best to attract her attention, since just at that point the river was too narrow for them to pass one another unless each pulled well in towards the bank.

Joan reached hastily for her sculls, only to find, to her intense astonishment, that they had vanished as completely as though they had never existed. She cast a rapid glance of dismay around her, scanning the surface of the water in her vicinity for any trace of them. But there was none. She was floating serenely down the middle of the stream, perfectly helpless to pull out of the way of the unyielding boat.

Meanwhile the occupant was calling out instructions tempering his wrath with an irritable kind of politeness as he perceived that the foul odours cruel blotched the way was of the feminine

"Full in a bit please. We can't pass here if you don't. . . Full in." he called out, and then, with a sudden access of anger drifting forcibly towards him.

His dang up her hand.

"I can't!" she shouted back "I've lost my scuits."

"Lost your scuits!" . . . [illegible] many excitedly implied what he thought of the proceeding

A couple of strokes, and, gripping the cutwale of her boat as he drew level, he steadied it to a standstill beside his own.

Joan's eyes travelled swiftly from the [illegible] that gripped the boat's side to the face of its owner He was decidedly not a pretty sight. His features were concerned, with a dogged-looking chin and a conquering beak of a nose that jutted arrogantly from his hatchet face. The sun glinted on a crop of reddish-brown hair, springing vigorously from scalp in a way that suggested immense vitality. Joan had an idea that it would give out they if ever attempt was made to brushed hard His eyebrows, frowning in defiance against the sun, were of the same hue. His head was long and very thick, in later life they would probably develop into the bristling, pent-house variety.

The eyes themselves, as Joan described them on a later occasion, were "too red to be brown"; an artist would have had to make extensive use of burnt sienna pigment in portraying them. Altogether, he was not a particularly attractive-looking individual—and just now the red-brown eyes were fixed on Jean in a rather unconvincing glare.

"How on earth did you lose your oars?" he demanded—as indignantly as though she had done it on purpose, and could help doing so perfectly well.

Her lips twitched in the endeavour to suppress a smile.

"I haven't the least idea," she confessed. "I let the rope under some trees further up and—and I suppose I must have fallen asleep. But still that doesn't explain how I came to be adrift like this."

"A woman's least, I expect," he muttered, but subsiding into a growl as woman never lies up properly. Probably you just looped the painter round the bank and went to sleep. Providence that it would stay looped.

He threw a quick glance at her.

"Surely you must be Miss Peterson?"

She nodded.

"Yes. How did you guess?"

"My sister, Mrs. Craig, told me a Miss Peterson was staying at Staple. It wasn't difficult, after that, to put two and two together."

"Then you must be Geoffrey Burke!" returned Joan.

Too Much ACID

MANY people, two hours after eating, suffer indigestion—or they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and gi ances. The symptoms disappear at once.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 30 years in correcting excess acids. 30c a bottle—any drug store.

The [illegible] Phillips for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

W. N. U. 1929

FAT—HEALTH'S GREATEST ENEMY!

Physicians declare excess fat is a condition which often threatens the [illegible] existence.

A needless strain is placed upon the heart, the function of body organs is interfered with, normal activity impaired shortness of breath, constipation, headaches, and depression are but a few of the ailments which are often in evidence from said excess.

The proper, safe and sensible way to banish fat is to do away with the cause

This a half teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast will do.

Kruschen is based on scientific principle at is an ideal blend of 6 separate salts which help glands, nerves, blood and body organs to function properly and maintain a splendid degree of health—it builds up energy and strength all the while you're losing yourself down to a point of normal weight. You feel years younger—you look it. You can banish the external action of Nature's helpers by putting out fatty tissues and pastes and giving light on better, cornea and sparkle.

FREE TRIAL OFFER

[illegible] Kruschen Salts, 1/3 and 2/6 per bottle, from all chemists throughout the world. If you have any difficulty in obtaining Kruschen locally, send 1/3 (or 2/6 for the larger size) to-day to the Sole Proprietors, E. Griffiths Hughes (Proprietary), Ltd., Tarrant, Manchester, England, and a bottle will be sent you by return.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation especially made for infant and children. Castoria acts as harsh drugs, no opiates—is absolutely harmless. When your baby is fretful, has nothing or a food upset, give a teaspoonful of Castoria. Be sure you get genuine Castoria with the name:

Chas. H. Fletcher
CASTORIA

Little Helps For This Week

"Look unto Me, and be ye saved; for I am God, and there is none else."—Isaiah xlv. 22.

Think then, O mariner, on the death-bed of thy soul,
Of voyaging toward a beacon that shall mock
Both thee and me, nor any death destroy. — Annie Fields.

The true home for us lies beyond those waters, and, old the ruddy sunsets a fire in the hand, and a voyage a stout heart. So, then, whatever our voyage may hitherto have been, when we have passed from the storm on the shores that fade behind us, and afterwards, as we turn away again to look on the misty unsearched sea of all that may assist us in our future course, let us pray that touching prayer of Breton mariners, "Save us, O God! Thine ocean is so large, and our little boat so small."—Frederic W. Farrar.

Children suffering from worms soon show the symptoms, and any mother can find traces of these parasites by the writhings and fretting of the child. Until expelled and the system cleared of them, the child cannot regain its health Miller's Worm Powders are prompt and efficient, not only for the eradication of worms, but also as a tonic up for children that are run down in consequence.

Graded Beef Consumption

Throughout Canada there is a gradual increase in the consumption of graded and branded beef, owing to its superior qualities. Professor R. S. Hamer, of Dominion Livestock Branch, Department of Agriculture, stated recently in an address at the annual meeting of the Ontario Cattle Breeders' Association. Seventeen million pounds of branded meat were sold last year, he said.

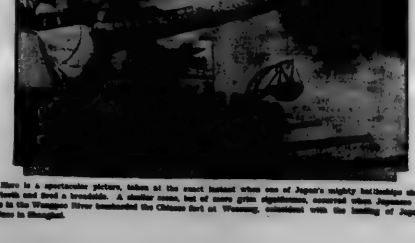
All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and safe.

China Has Big-Zag Bridge

Meandering across a lake in Shanghai, China, a zig-zag bridge stretching from a busy part of the city to a tea house on the opposite shore, has just been opened. It has made a great hit for it has a half-dozen angles, and the Chinese have found the corners great havens in which to pause for conversation.

The famous Hanging Gardens of Babylon were a series of terraces planted with trees and vines and flowers, so as to simulate a mountain side in luxuriant bloom.

Japanese War-Dog Shows Its Teeth



Here is a spectacular picture, taken at the exact instant when one of Japan's mighty battleships showed her teeth and fired a broadside. A similar scene, but of more grim significance, occurred when Japanese warships in the Whangpoo River bombarded the Chinese fort at Woosung, subsequent upon the landing of Japanese marines in Shanghai.

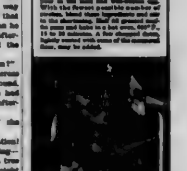
Judge: "I know you committed the theft cheerily as I have described it."

Accused: "Undertainly so, but I will follow your methods next time, sir."—Durchkritker, Berlin.

Miss Ann Adam's Recipe for Good Muffins

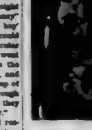
½ cup butter, ½ cup sugar
2 eggs, 1 cup milk
2 cups Magic Baking Powder, 2 cups flour
Nutmeg, vanilla, salt

Mix the lump with the sifted flour dry ingredients, and add to the mixture alternately with the milk. Bake in muffin tins in a hot oven (400° F.) about 20 minutes. Serve hot. Delicious with butter, honey, jam or stewed fruit. Nuts, raisins or currants may be added to the above mixture, if so desired.



Miss Ann Adam bakes her famous

Muffins with Magic Baking Powder



"When selecting ingredients for my recipes," says Miss Ann Adam, cookery authority of the Canadian Home Journal, "I consider three points — economy, purity, value, and successful performance.

"Magic Baking Powder meets them all. I use and approve Magic, because I know it is pure, and free from harmful ingredients, and because experience has taught me that I can count upon successful results with Magic every time."

Magic Baking Powder is used *exclusively* by the majority of cookery experts, dietitians, and housewives throughout Canada. In fact, Magic outsells all other baking powders combined!

FREE COOK BOOK—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

LOCAL NEWS

At the annual meeting of Alberta Seed Growers' Association held in Calgary last week-end, C. C. Clifton of Clover Bar was re-elected president.

The local curling rink with R. J. Graham (skip) W. R. Graham, J. S. Wright and F. W. Smith won the fourth prize in the Rosery Trophy of the Edmonton Bonspiel.

The boys will receive walnut-finish members' vests, presented by Rosery, Graham and Rosery, Ltd.

Mr. and Mrs. Stan. Whitson of Alexandria were visitors in the Fort last week-end.

We are sorry to hear that Miss Sharon of Andrassan, is a patient in an Edmonton Hospital.

Mrs. Lawson of Edmonton has been visiting old friends around town.

F. H. Baker left Tuesday Morning for Calgary where he will attend Grand Lodge.

Mr. Jim Smith and family moved to Edmonton this week.

Mr. Smith has secured a position as janitor of the Memorial Hall in that city.

We are sorry to hear that Miss M. Stevenson's father died suddenly in Edmonton on Tuesday.

Miss W. Bullock will be the substitute teacher in the meantime.

DON'T FORGET

Monday evening, Feb. 22th is the night of the big Leap Year Badminton Club Dance.

TWO BUSINESS CHANGES IN DISPUTE TURKEY FARM

Nine years ago, Mrs. W. A. Freeman, of Ardmede, Alberta, on the Calgary-Drumheller branch of the Canadian National Railways, won a pair of bronze turkeys in a raffle. She now has the largest turkey ranch in Canada and is acknowledged the queen of the Alberta turkey industry. In the Dominion. Her turkeys return a revenue close to $10,000 a year.

The raising of pet turkeys suggested to Mrs. Freeman the idea of raising turkeys as a sideline and today her ranch is famous, with a record that extends to all corners of the continent. Last year, Mrs. Freeman raised 2,500 birds, including 900 hens and 45 first class hens for breeding stock. Eggs and breeding stock netted about $4,500 while the hundreds of turkeys required to meet the Christmas and Thanksgiving trade brought the sales to about $70,000.

It was the first big snowstorm of the year and the teacher felt it her duty to warn her pupils before she dismissed them.

"Boys and girls should be very careful to avoid colds at this time of the year," she began solemnly. "I had a darling little pupil only seven years old. One day he went out in the snow with his new sled and caught cold. Pneumonia set in and in three days he was dead." The schoolroom was quiet. Then a youngster in the back row asked: "Where's his sled?"

Strange But True

Los Angeles, Calif. is about 30 miles further east than Reno, Nevada.

It seems that children are not the only ones to have Mumps. Doctor Calhoun has an attack of the mumps and will be unable to be at his office until Feb. 29th.

Born to Mr. and Mrs. J. F. Galloway, of Fort Saskatchewan on Monday, Feb. 8th, at the Lamont Hospital. A daughter.

Born to Mr. and Mrs. Frank R. Mohr of Josephburg on Wednesday, Feb. 17th., at Mrs. F. G. Stuchey's Nursing home. A daughter.

A man's credit is usually good when he doesn't need it.

CONVINCED

The editor of the local paper was unable to secure advertising from one of the business men of the town, who asserted his weekly that he himself never read ads, and didn't believe anyone else did.

"Will you advertise if I can convince you that folks read the ads?" the editor asked.

"If you can show me!" was the sarcastic answer. "But you can't."

In the next issue of the paper, the editor ran a line of small type in an obscure corner. It read:

"What is Murphy going to do about it?"

The business man, Murphy, hastened to seek out the editor next day. He admitted that he was being pestered out of his wits by the curious. He agreed to stand by the editor's responsibility in the Northcutting issue and this was:

"Murphy is going to advertise, of course."

Having once advertised, Murphy is still advertising.—Forbes Magazine.

EDMUND L. HENRIQ ACCEPTS PASTORATE

Edmund L. Henriq, son of Mr. and Mrs. Jacob Henriq of Josephburg, has accepted a call extended to him by the congregation of the First Reformed Church of Lowell, Wisconsin, U.S.A. Mr. Henriq is a graduate of the Mission House College at Plymouth, Wisconsin, and for the past three years has been pursuing his studies in the Theological Seminary of the same institution.

During the past two years he has been serving the above congregation as supply pastor, and upon completion of his studies in June he will assume his duties as regular pastor of the congregation. While he was home on his vacation last month he preached in several of the churches in this district.

Fort Saskatchewan Record

VOL. 30 No. 6 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, FEB. 24th, 1932 $1.50 PER YEAR IN ADVANCE

Ratepayers ... and Annual Meeting, Councillor Elected

The annual meeting of the ratepayers of the Municipal District of Clover Bar, No. 917, was held in the Memorial Hall, Fort Saskatchewan, on Saturday last, with about thirty ratepayers in attendance.

Mr. G. T. Montgomery was elected chairman.

The minutes of the last annual meeting were adopted as read.

The auditors' financial statement and annual returns were read and adopted.

At three o'clock the Returning Officer declared the meeting open for the reception of nominations papers for the office of councillors for Divisions 4 and 5.

After the adoption of a resolution submitted by Mr. Montgomery, re the planning of windbreaks, a committee of ten were appointed to meet a committee from the Town to interview Premier Brownlee, the Minister of Agriculture and the Minister of Public Works with a view of having the Provincial Government raise shrubs and trees on the Provincial Coal Farms for distribution among the farmers of the Southern and Central portions of the Province to an attempt to combat the menace of soil drifting.

A resolution suggestion to the council that municipal taxes be cut thirty per cent for the current year, and that the reduction be made possible by the reduction of road work to this extent, was passed.

At four o'clock the Returning Officer declared the meeting closed for the reception of nomination papers. He declared Mr. Reinhold Mantz elected by acclamation to the office of councillor for Division No. 5. As two nominations were received for Division 4, Messrs. A. E. Meyer and Wm. Thomas, he declared that a poll for same would be held at Good Hope School House and at the residence of Mr. Reinhold Mohr on Saturday, the 27th February, between the hours of nine o'clock a.m. and five o'clock p.m.

After extending a vote of thanks to the Chairman for the manner in which he had conducted the meeting, the meeting adjourned.

COMING EVENTS

A LEAP YEAR DANCE

will be held on Monday, February 29th, under the auspices of the Fort Badminton Club in the Badminton Hall.

The Rhythm Boys Orchestra will provide the music, and refreshments will be served.

Come and have a good time.

Admission $1.00 per couple; Extra lady 50c. Dancing 9 till 3.

The United Church Ladies Aid will meet on Thursday, March 3rd at 2:30 p.m. at the home of Mrs. Geo. Mohr.

St. George's-W. A. will hold their regular monthly meeting on Thursday afternoon, March 3rd at the home of Mrs. Pohlmeyenbagh.

Fort Hockey Team Defeats Stony Plain 6-2

Stony Plain hockey team, invaded the Fort Tuesday night and suffered a six to two defeat at the hands of the local seven.

The first period had just nicely started when Tex Henry and Stuckey rushed the visitors net to get the first goal and start the locals away to a win.

Earl Lane was successful in one of his lone rushes to net the second goal, and near the end of the first period Graf assisted by Earl shot the rubber into the net for the third.

In the second period play was slow and two men rushes by the locals were common. In this period Harvey Lamoureux sent the puck from behind the blue line to catch goalie Enders asleep, making the score 4-0. At this time Stony Plain got one of the necessary breaks and after a scrap in front of the Fort goal J. Miller lanky defence man for the visitors shot the puch into the net for their first goal.

The second period ended 4-1 for the locals.

The third and final period started off with more pep and in this period Graf assisted by Lane again scored after much play back and forth by both teams.

About four minutes to go in the final period, M. Lamon slight forward for the visitors, shot a neat one to beat Forest making Stony Plain two.

The visitors at this time played four men forward and the local goalie had some tricky shots to stop. In the mix up around the Fort goal Earl Lane broke away and rushed the visitor goal the puck being awarded to same by the goal judge, but "Shorty" coming up from along the side lines took the rebound and scored.

The game was interesting to watch and at times unpleasant ran high.

The Fort team was certainly on and we should mention the Stony Plain goalie who had a great many shots to stop.

The game was clean hockey and ably handled by Carroll.

Stony Plain: L. Enders; J. Miller; H. Wolfe; G. Miller; O. Miller; M. Larson; W. Resnow; P. Enders; O. Oppertshauser.

Fort Team R. Pocock; Tex Henry; H. Lamoureux; 'Shorty' Karren; E. Lane; Flatoff; R. Stuckey; I. Hutton;

LITERARY SOCIETY HOLDS ANNUAL MEETING

The Fort Saskatchewan High School held their annual meeting for the purpose of organizing a literary society on Friday last, February 19, for the election of officers.

The officers elected were as follows:-

President - Tex Henry
Vice-Presidents - Margaret Kelterborn.
Editor - Lawrence Hodgins.
Asst. Editor - Muriel O'Brien.

As an executive committee it was decided to elect two from grades IX and X and one from XI and XII as officers were from the higher grades. They were elected were:-

Grade IX Hilda Frey; Orvile Kelterborn. Grade X Fern Butler; Edward Roberts. Grade XI Donald McLellan.

Grade XII Olive Groves.

The meetings will take the form of Debates, Musical entertainments, Dramatics, etc. which will be held every two weeks.

LADIES' CURLING CLUB NEWS

The Vegreville Ladies Curling Club sent a rink down to play the local Ladies last Wednesday afternoon.

The visiting ladies arrived on the bus, had dinner at the Queens, after which they played against a rink of the local Ladies curling club.

The game was hotly contested, but the locals walked away with a 10-5 victory.

After the game tea was served at the home of Mrs. Frey's, and the Vegreville Ladies departed for home on the evening bus.

Vegreville rink: Mrs. Coulliard skip, Mrs. Sounis, Mrs. Kejos, Mrs. M. Shaw.

Fort rink: Mrs. M. Wright, skip; Miss Simmons; Mrs. E. Flatoff; Mrs. A. Anthy.

Fort Loses Curling Cup To Lamont

Last Saturday night a rink from Fort Saskatchewan defeated a lamont rink by 4 points and brought back the cup donated by A. M. Carscadden which is to be play for between Lamont and Fort Saskatchewan.

On Tuesday evening, Feb. 23rd., Lamont sent a strong rink to the Fort in an attempt to regain poo session of the curret trophy.

The Fort rink lost the cup by an overwhelming score of 19-4

After the game the visitors were the guests of the locals at the Queens Hotel.

Lamont rink: Skip, C. Mann, Ross, Dr. Mallett and Harkins.

Fort rink: Skip, R. M. Ray, L. Gagnier, A. Mann, and C. Hallam

SKATING CARNIVAL

A skating carnival was held last Wednesday evening under the auspices of the Ladies Aid of the United Church which was enjoyed by a large crowd.

The following won prizes for fancy and comic costumes: Miss Elizabeth Jones, Glover Taylor, Warren Ringsley and Harry Wenstob; Evelyn Cranston, George Armstrong, Raymond Berg, Wanda Kelterborn, Marjorie Smith, Jackie McLean and Freddy Dennis.

The judges were Mr. and Mrs. Looker and Miss Fleming.

LOCAL HOCKEY TEAM ASKS FOR SUPPORT

On Monday evening, Feb. 29th the Hudson Bay Hockey team and the Fort Senior team will play an exhibition game on the local rink.

On the "Bay" Bonup, "Doc" Allard, Joe and Val Berg will be seen in action, these young men are well known to the Fort citizens.

The Bonup says that that the fence around the rink will be electred away and the local hockey team and rink management are making an effort to make things as comfortable as possible to accommodate the crowd expected to attend.

The Hudson Bay team are bringing about 60 people to help them win, how local fans come out and cheer the boys along and at the same time show Edmonton fans that we can support our team.

After the hockey game which will start at 8 o'clock sharp, the Fort Badminton Club are holding a dance in the Badminton Club. Everybody welcome.

Are We Over-Governed?

Considering, in this considering article, some of the broader aspects of the above subject which we have been discussing in this series of articles, it is self-evident that any reduction to be made must be based upon its effect upon (a) efficiency; (b) economy; (c) the individual liberty. It might be possible to achieve a substantial reduction in Provincial expenditures by imposing upon the municipal ties the obligation of providing certain services, as, for example, the making of counties liable for the upkeep of municipal roads but this would simply mean increasing the burden to be borne by the individual taxpayer in it's municipality in exact ratio to the lessening of that burden upon the individual in his municipality as a Provincial taxpayer. Then, there would be no gain. Or a lessening of the weight of taxes imposed by the Province might be effected by transferring certain obligations to the Dominion, as, for example, Old Age Pensions. But, again, there would be no gain because what the individual did not pay to the Province in taxes he would have to pay in increased Federal taxes.

Any gain, therefore, must be the result, not of a shifting of the burden from one shoulder to another, but the entire elimination of the burden. This at once brings us face to face with the real problem. That is, are the people,—that is the taxpayers,—prepared to forego services and conveniences now provided by the State through taxation, and to without them altogether or provide them individually for themselves where possible, in order that taxes may be reduced? Are they ready and willing to do without services and conveniences they expect will be provided in days to come, and do without them until the country is more thickly settled, better developed, and producing a substantially larger volume of new wealth annually?

Reduction in governmental expenditures, whether it be accomplished through the merging of small school districts into larger districts, combining several small municipalities into one, or uniting the three prairie provinces into one large province, must result in some inconvenience to the people now receiving the services which will be rendered more economically by the larger unit. If the Dominion Treasury would be moved the payment of two of the three grants now made to the Provinces for "Government and Legislation." As Federal taxpayers we would save the amount of the "Provincial" grants. figure we would lose it, but if the cost of Provincial Government was reduced as a result, it would be money saved.

While it is open to serious question whether the union of the three Western Provinces is now a practical proposition, especially when a comparison is made between the size of our Canadian provinces (except the three Maritimes), with the small number states across the line, or with such countries as Belgium, Holland, Denmark, Sweden, Norway, Italy, or even the larger European countries, except Russia, and having in mind the ultimate large populations of these three Provinces, it is quite practical to effect substantial savings through joint Provincial action, or in conjunction with the Dominion.

Such action is already being taken. Some years ago redistributions abolished the two Provincial Police Forces and made a contract with the Dominion Government whereby the Mounted Police now perform police duties for the Province, thus effecting a large saving. Now Alberta and Manitoba are adopting the same policy. The need for a School for the Blind in the West is realized, but one such school will serve the needs of all three Provinces for many years to come; there is no necessity for erecting and maintaining three such schools, and, fortunately, this is recognized. Provincial Courts of Appeal for the three provinces could handle all appeal cases, and it should appear the part of wisdom for the three Governments and the Dominion to give consideration to effecting such an economy.

There are but examples where inconveniences to the public would be small while the savings would be large, and are cited as indicating the general policy which, in the interests of the taxpayers, should be followed.

But to achieve even these reforms, and to inaugurate such policies for future development and extension, will necessitate a larger patriotism on the part of all, and the elimination of those local jealousies and sectional ambitions, all those purely selfish considerations which now operate to prevent many economies in governmental administration. All such considerations must be ruthlessly set aside for the common good of all taxpayers. If they are not it will be well nigh hopeless to effect real savings, or to prevent an even more serious condition of being over-governed than at present exists.

Governments are not so much to blame as are the people themselves, because Governments have acted in the past, and will act in the future, as the people desire, and if the people are screened by petty, local, selfish considerations, rather than by a large and broad patriotic desire for the welfare of the whole, their views will be reflected in future governmental action. The people can and will get what they demand, and so, in the final analysis, they must do the paying through the medium of taxation, it is up to them to decide just what they want.

A rare old grandfather clock—the fourth of Daniel Quare, a famous London clockmaker in the time of William III.—whose services had not ceased in its fourth century, has been sold for $35, who sold for $425 in London.

Aerial photographs have shown up the plans of an old Irish town which figures in traditions but could not be located by ground exploration.

Nerves A Complete Wreck Set Up Half The Night

Mrs. John Rose, Bath Lake, Ont., writes:—"I was half-sick on made with my nerves I was a complete wreck.

I could not do my work, and could hardly be still all the night and would lie awake for hours.

One day a friend recommended Milburn's Heart and Nerve Pills. I got some and they did me so much good that by the time I had taken six boxes I was as well as ever.

Price 50c a box

Milburn's Heart and Nerve Pills

Industrial Branden

Manitoba City Serves a Rural Population of Some 100,000

Mr. W. Burton Hurd, Professor of Economics at Brandon College, points out in a general industrial report that Brandon serves a rural population of about 100,000 in Western Manitoba and Eastern Saskatchewan, aided by a network of good roads. three main railway lines and 11 branch lines. The value of Brandon's manufactured goods exceeds $4,250,000 annually. These include 16 different kinds of vegetable products and 19 from iron and steel. Brandon's population, as at April, 1923, was 17,770.

Grs in the Stomach Is Dangerous

Constipation Quay Use Of Discovered Ingredient To Overcome Trouble Said By a Local Druggist

Gas in the stomach is a condition caused by a lack of digestive juices. It is often mistaken for an acid condition of the stomach and treated with soda, which only aggravates the condition. Gas presses against the heart, causing palpitation, and against the lungs, causing shortness of breath, sometimes a sense of suffocation, and often a dizzy feeling. Gas in the stomach is dangerous. It is a serious condition or to treat with ordinary digestives aids which have no controlling effect on the stomach acids. Adlerika, a new discovery obtained from the Rhubarb plant, is the only carminative or gas expelling medicine to be had in the best form of magnesia to counteract stomach acids. It is said that thousands of people who enjoy their meals with no more fear of indigestion.

A Promising Industry

Hundred Acres Of Peas Now Marketed Former Blanks

One of Western Canada's youngest but most promising industries was closed this season on February 11, when a final shipment of two cars of dried field peas from St. George's, Man., were lifted to an eastern seed cleaning concern.

The Pioneer Growers at St. George's marketed a crop of 4,000 bushels this year with an aggregate yield of 4,000 bushels, selling at a cash price of one dollar a bushel F.O.B. cars.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and restoring it to a healthy condition. There is nothing in their composition that will injure the most delicate child when given according to direction, and they can be given to children in the full assurance that they will utterly destroy all worms.

Alberta Sheep

Sheep Population Of Southern Province Increase Of 10,000

According to Dr. F. W. Gershaw, Member of Parliament for Medicine Hat, there are about 830,000 sheep in Alberta, the increase in numbers showing on a smaller scale than the more southerly areas, where the sheep ranching operations are carried out. As one man can feed 1,500 to 1,500 sheep, that number, or some multiple of it, constitutes a ranching unit. The sheep population of the whole of Canada is about 4,000,000.

Wrestled From Anthrax, Strength of body and vigor of mind are inevitably impaired by the retardation of action. Who can live under the cloud of recurrent attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy disciplines the body by relieving the cause. It does relieve. It does remove the paralyzing hand of bodily trim and mental suppression.

Infidelity Better

A Baltimore gentleman who owned street, services included a number of boys in the neighborhood to a strawberry party. When they had all partaken of the luscious berries, he said to them: "Now young'uns, don't bother fleas stealing into my garden and helping yourselves!"

"Oh, yes sir," shouted the boys. "And why was it better?" he asked, desirous of pointing a moral.

"Because," said a chubby faced youngster, "you shouldn't have had any sugar and cream with 'em."

A Northern Romance

Eskimo Couple Elope From Native Village In Furious Blizzard

People who believe the thrill of romance runs more wildly through the veins of the people of warm southern climates should listen to the story of Shoolick, full-blooded young Eskimo hunter, who arrived at Churchill the other day with his bride from 400 miles north.

The young couple, who were united at Churchill by an Eskimo chief, fled from their native village far along the barren coast of Hudson Bay by dog team in the teeth of the worst blizzards that have swept the northern Arctic tundra for years. The disapproval of the father of the young bride and his power, as chief of the tribe, to forbid the marriage, did not daunt the two.

Waiting until they were positive no one was watching them, and that their trail could not be picked up in the snow, they set off on the long trip down the coast to Churchill, where another Eskimo chief would marry them.

They arrived after spending two weeks in travel. Food was running low and two of the huskies were being carried in the sleigh with the nice-looking bride. The story of the romantic elopement was told to whites through an interpreter. The pair do not plan to return to their former home, but it will have shortly for petrie further inland.

Prostan Balm is alluringly fragrant. Adds a charming refinement to the most fastidious toilet. Overcomes and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A positive relief requisite. Invaluable to all women who have for elegance and distinction.

Dent free air does not exist anywhere in nature.

Only one woman is affected by colic—Madame to each ten men.

Cuba expects its present sugar crop will be over 3,000,000 tons.

Seek Lost Girl

White Girl Living Among Aboriginal Tribes In Australia May Be Found

A white girl who for nine years has been living among a tribe of little known aborigines in the wilds of Northern Australia was sought recently on basis of rumors filtering back to civilization.

Reports that the beautiful young girl, about 18 years old, had been seen recently resulted in organization of an expedition to penetrate the wilds.

The reports were given substantiation by other reports which followed sighting of the Australian trader commission yacht "Douglas Mawson" in 1923. At that time it was said a woman and her 9-year-old daughter had survived and had made their way to the village of the native aborigines about 100 miles south of Port Darwin. Subsequently the mother was reported to have been killed by the natives and the girl kept captive.

A Queer Profession

London Man Had Wide Reputation As Professional Toastmaster

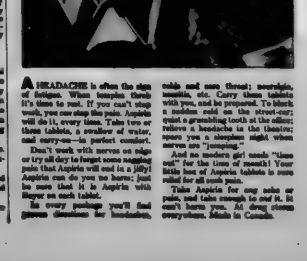
William Knightsmith, for 40 years the most prominent professional after-dinner speaker was told to "shut up" through an in.erpreter. The pair do not plan to return to their former home, but it will have shortly for petrie further inland.

Knightsmith started life as a dancing instructor and eventually acquired a wide reputation for his ability to conduct the formalities of after-dinner proceedings. Arrayed in a morning coat, black knee breeches and buckled shoes the uniform was his own creation—his voice powerful yet decorous, he would still the largest company chattering over coffee.

His Reformers

A Nigerian district officer, finding his steward unsatisfactory, discharged him. Tom asked for a reference as the district officer gave him the following:

"Tom has been my steward for 18 months. He says he wants a good berth. Anyone who is looking for a good steward should give Tom a wide one."



A HEADACHE is often the sign of fatigue. When tonsplan there it's time to rest. If you can't stop work, you can stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for relief from headache and sore throat; neuralgia, toothache, etc. Carry them tablets with you, and be prepared. To break a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for any ache or pain, and take enough to end it. It won't harm you. At drug stores everywhere. Made in Canada.

Bayer-Aspirin

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Found In Many Parts Of Canada, Limestone Regarded by Geologists As World's Most Useful Rock

Limestone, which is obtainable in more than 1,000 localities in Canada, much of it of fine quality, is regarded by geologists as the world's most useful rock. It is of immense value to man and to all living creatures in a variety of different ways. In fact, there is scarcely a phase of human life in which limestone does not play a part. Calcium carbonate, or carbonate of lime, the principal constituent of limestone, is absolutely necessary for the growth of human beings and animals. It is obtained from eggs, milk, fruit, vegetables and other food products.

To the industrial life of the country limestone is indispensable. The annual production of Canadian quarries, according the the latest available figures in 1918, was more than 1,000,000 tons.

Limestone made into its primary purposes, has a selling value of about $24,000,000. This value is increased fifty per cent. of coal, copper and gold.

Limestone is used in great quantities in the form of crushed stone for highways, railway ballast and concrete aggregate. It is the principal raw material in the manufacture of Portland cement, and also in the manufacture of calcium carbide and cyanamide, which latter are the basis of many chemical products. The iron and steel industry, as at present constituted, could not exist if limestone were not available to free the iron from its ores. In the production of gold, silver and other metals, lime and limestone play important parts. Quantities of limestone are used in tanning leather. Limestone is indispensable to the pulp and paper industry — every sheet of paper is made by its aid. So, too, does the glass industry require limestone for most of its products—approximately for window glass. Limestone is essential to the manufacture of washing soda, refining cane and many other products. Large tonnages are used in the refining of sugar. The uses of lime for building purposes, which alone are generally known. When limestone is pulverized and mixed with linseed oil it is known as whiting. Pulverized limestone is also used in the compounding of rubber for footwear and flooring. It is used in oil refining, and in the manufacture of cigarette papers contains as much as 80 per cent. pulverized limestone. Limestone is a source of carbon dioxide gas which, when compressed into the solid state, forms the refrigerant known as dry-ice, now coming into use. Also, a certain type of limestone when melted in a small blast furnace and blown by high-pressure steam into a shower of fibres, yields a fairly material known as rock wool —one of the most efficient insulating materials on the market.

Many other uses for limestone could be mentioned, for they number hundreds, but those of the most interesting are certainly the most spectacular use of limestone is its use as a building stone. Canadian limestone for building purposes is notably superior.

New Western Fur-Bearer

Fisher Exhibited At Winnipeg At Annual Fitch Show

The fitch (or pekan) is now definitely on the list of Canada's domesticated fur-bearers, and Winnipeg is the first city in North America to stage an annual show the recent exhibition of the Canadian Fitch Breeders' Association being the pioneer event of its kind on the continent. The animal is reported to be a native of Asia and Northern Russia, but it thrives well in Manitoba, where climatic and other conditions are to its liking. Prize-winning fitch from the Hillsburgh Exhibition and from the International Fur Show at the Crystal Palace were on view in Winnipeg.

THIS LITTLE MODEL IS VERY CHARMING

Smart and in the newest feeling in this simple little frock.

And you can't find anything easier or more comfortable.

It has the one-sided rever and the notch inserts to give contrast to the seams.

The skirt, you will note, has the bloused effect, which is so much needed during the figure ground height and youthful effect.

The original carried out the side line of black and white in a soft crepe de chine.

Brown and white is a smart combination.

Style No. 843 is designed in sizes 16, 18, 20 years, 34, 36, 38 and 40 inches bust. Size 16 requires 2¼ yards of 32-inch material with ¾ yard of 32-inch contrasting material.

Spring is the most important, the call to colorful raiment is heard. One of the many reasons why you should have an authentic guide, such as our new Spring Fashion Magazine, to show you the way in design, colors, etc. Of course, there are styles for afternoon, for the street, for home wear, for every occasion, for every age.

Price, 10c.

Price of book 15 cents.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Farmers Should Advertise

Sale Of Products Might Be Stimulated By Co Operative Action

Dr G. I Christie President of the Ontario Agricultural College who is a close student of agriculture in all its ramifications, and who is in close touch with the farmers all over the province, has provided some food for thought in his suggestion that the sale of farm products might be stimulated by some intelligent advertising and selling among the farmers. Fruit growers, etc., has been exceptionally satisfactory, a striking example being the California orange growers. The policy of co-operation in the marketing of their products, which included advertising on a very large scale brought results far beyond their expectations, and others have followed in their footsteps. What has been accomplished in California might be accomplished in other parts. The effort that utilized to the utmost degree advertising to sell orange juice and oranges can be accomplished by all the facilities afforded by newspaper farmers of this province in popularizing the products they have for sale. This question is large enough and important enough to arrest the attention of every farmer It must be admitted that one farmer or even any small group of farmers cannot hope to accomplish much in this direction, but Dr. Christie is right when he points out the possibilities of intelligent advertising and farmers' organization could be more than investigate the chances that co-operative effort offers as a means of creating greater demand for farm products. —Owen Sound Sun-Times.

Empire Cabinet

Railway Move Would Be a Valuable Institution At the Present Time

London newspapers have suggested an Empire cabinet, consisting of representative of each dominion and two or three British statesmen, would be a valuable institution at the present time.

The newspapers reached this conclusion in editorials following upon the appointment of Rt. Hon. Stanley Melbourne Bruce assistant treasurer of Australia, as minister representing the commonwealth" at London, England.

Sir John Marriott, noted constitutional authority, in an interview with he hoped Mr. Bruce would remain a member of the Australian cabinet during his stay in London. He suggested the addition of Hon. G. Howard Ferguson, Canadian High Commissioner; Rt Hon. J. G. Costain, Minister of Public Works for New Zealand, and General Jan Christian Smuts, leader of the opposition in the South African House of Assembly, to form the nucleus of a "real Imperial executive."

First Target of Japanese

British soldiers above defending at the railroad station of Woosung Fort, on the outskirts of Shanghai. This fort was the first target of Japanese forces in the advance for the occupation of Shanghai. Chinese that they were fired on from the fort. Any warships shelled the stronghold and silenced it. The British "Japanese" forces have been defending the international

Suggestion Now Advanced That Western Canada Will Soon Have Reached Wheat Growing Limit

That the prairie provinces are approaching much more closely than generally supposed their peak point in wheat production and exports was the view of Dr. Marchinton, Winnipeg member of the Board of Grain Commissioners. A possible maximum wheat crop in western Canada of between 12 and 700 million bushels was calculated.

Observing the rise of wheat production in Ontario and Quebec in pioneer days and the decline following this period, Dr MacGibbon suggested that western Canada will soon through the same process, production rising to a peak and which with the passing of the pioneer, will gradually decline to a fairly fixed level

He pointed out that the almost uniform progress in acreage devoted to wheat during the last 25 years, concerning that a study of the facts goes to show no reason to suppose that the limits of wheat cultivation have yet been reached. In this respect Alberta, Dr. MacGibbon stated, only began to show promise as a wheat producing province in 1910. Saskatchewan progressed more widely fluctuating volumes from year to year, but with a steady advance in the acreage, while Manitoba in contrast to the other provinces, the crop of wheat in 1915 and a decline in her acreage in wheat has been under way for six or seven years.

Between 1910 and 1914, the speaker continued, 87 per cent. of the acreage devoted to field crops in Manitoba was planted to wheat while for the five years, 1920 to 1924 inclusive, the percentage shrank to 37 per cent. with an average crop of about 40 million bushels. In contrast to Manitoba, a study of the proportion of land in field crops in the three prairie provinces shows that between 1910 and 1914 the percentage was 57 per cent. devoted to wheat and between 1920 and 1924 the percentage was 69 per cent.

These facts indicate, he continued, that any expansion in wheat acreage will take place in Alberta and Saskatchewan where pioneer settlement is still going forward and where price levels, in spite of wheat, to other field crops have been, at least until recently, out of their normal alignment.

The definite limits of acreage for wheat production in these two provinces and the potential yield were not outlined. Believing it quite incorrect to assume that there are still vast areas of virgin soil to be taken up, Dr. MacGibbon pointed out that the Saskatchewan Commission on Immigration of 1920 examined the question of available lands and estimated that the remaining area of arable soil in that province could not exceed 12 million acres, and that it would require many years to bring such land under cultivation, making this figure correct and comparing these 12 million acres to a crop of 231 million bushels of wheat in 1926 from 46 million acres of cropped farm land he showed a probable maximum yield of 700 million bushels or 54 million additional from the 12 million acres yet to be added.

Present cropped farm lands in Alberta amount to 30 million acres. Recent surveys show there is an outside possibility of seven million more capable of being used for wheat production in the Peace River country. Of this about 60 per cent. it is estimated, can be used for wheat production. Consequently the largest wheat crop in Alberta to date, namely 171 million bushels may, by the most optimistic methods applied to Saskatchewan, be raised by 40 million bushels making a total for all three provinces of between 670 and 700 million bushels.

Factors in support of a better figure than this were outlined by Dr. Marchinton among which were the use of fertilizers to increase yields, mechanical farming methods reducing man power needed for crops and rotation of land for wheat. Summer fallowing production of other cereals and cultivating wheat, and the work of the plant breeder who may produce wheat capable of withstanding greater drought and sub-marginal. On the contrary attention is on the downward trend, large areas in Saskatchewan having been sown year after year for wheat production do not produce wheat of the highest quality, and as these lose productivity the soil of the pioneer stage farmers will cease to devote these lands to wheat, but to coarse grains for which they are technically suitable.

After Alberta and Saskatchewan have reached their maximum production there will be a considerable decline just as there has been in Manitoba, Ontario, Quebec, Nova Scotia, Dr. MacGibbon concluded. Where the volume of production will be stabilized is the question that depends upon at least two factors, the very large areas in each province which were better suited to the production of wheat than any other product and the very high quality of wheat which is produced in these areas.

Canada's Part in Great War

No Official History Has Yet Been Published

"The Canadian Legion, of the British Empire Service Leagues, is in daily receipt of inquiries from all over the country as to when Canada's official history of the Great War is to be published," said Major John S. Roper, M.C., K.C., president of the Legion at Ottawa.

Major Roper, commenting upon the publication of battalion war histories, deplored that beyond one supplementary volume issued by the government several years ago, dealing with the Medical services, nothing had been written on the operations of the Canadian corps. Other countries had published voluminous accounts notably Great Britain and Australia but as Canadian achievements in the great struggle Canada continued to preserve absolute silence.

Nearly two tons of copper coins were collected by Cambridge, England, students in a one-day drive for funds for ex-soldiers.

SUNDAY SCHOOL LESSON

FEBRUARY 28

JESUS RAISES LAZARUS FROM THE DEAD

Golden Text: "I am the resurrection and the life: he that believeth on Me, though he die, yet shall he live." John 11:25.

Lesson: John 11:1 to 12:11.

Explanations and Comments

Jesus Talks With His Disciples About Going To Bethany, verses 7-11.

"Let us go into Judea again," said Jesus to His disciples, but they remonstrated with him because of the danger, for the Jews there had so recently sought to stone Him. Jesus answered them that His life was safe as long as God had work for Him to do, and added that he must go to awaken Lazarus. His disciples took His words literally. If Lazarus was sleeping, he would recover. Then Jesus told them plainly that Lazarus was dead, for the sake of their faith. He said He was glad he had not been there. Now they must go with Him. And desperately courageous Thomas said bravely to the others, "Let us also go, that we may die with Him."

The Blessing Of Jesus and Martha, verses 17-27. When Jesus came into the neighborhood of Bethany, Lazarus had been in the tomb four days, for burial took place on the day of death, as it still does in that land. Martha met Him on the way and expressed in her sorrow, "Lord, if Thou hadst been here, my brother had not died." And then she added, "Even now I know that whatsoever Thou wilt ask of God, God will give Thee." "Thy brother shall rise again," returned Jesus. "I am the resurrection and the last day," Martha answered, but Jesus replied, "He that believeth in Me hath everlasting life." Martha's hope of the far-distant future. I am the Resurrection and the Life." Jesus asked triumphantly: "Knowest thou this believing on Me shall live through My Mighty power; and over the eternal life within the living who believe, death shall have no dominion. Believest thou this?" "Thou art the Christ, the Son of God," answered Martha; His power she would see, Jesus.

The Meeting Of Jesus and Mary, verses 28-37. Martha hurried back to Jesus and spoke to Mary with the glad words, "The Teacher is here, and calleth thee." When Mary started up quickly to meet Jesus, her friends spoke of them even from Jerusalem), thought that she was going to the tomb of Lazarus to weep there, and they followed her. On reaching Jesus she fell at His feet, saying the same words that Martha had spoken, the thought that had been in their minds constantly since their brother's death, "Lord, if Thou hadst been here."

The Sorrow Of Jesus, verses 33-37. Jesus was troubled by Mary's weeping and that of the Jews who had come with her. "Where have ye laid him?" His question. "Come and see," they returned. Jesus wept. His sympathy for human sorrow. His divine sympathy wit ch draws all sorrowing hearts to Him.

Jesus Restores Lazarus To Life, verses 38-44—The tomb was a cave with a stone before the opening. Jesus ordered the stone to be removed, but Martha objected, reminding that Lazarus had been dead four days and by this time the body was decaying. Jesus was now face to face with the impossible. Faith, thought; death and corruption had met His living power of no avail.

"Said I not unto thee," answered Jesus, "that if thou believest, thou shalt see the glory of God?" The stone was taken away. And Jesus lifted His eyes and said "Father, I thank Thee that Thou heardest Me." Then He cried with a loud voice, "Lazarus, come forth." And Lazarus came forth.

An Interesting Discovery

Petrified Apples Have Been Found By Professor In Alberta.

While fossilized palm leaves, figs and fig leaves have been uncovered in southern Alberta, to prove that around 70,000,000 years ago this part of the west was a tropical land where the dinosaurs roamed, yet it was not until last month that petrified apples have been unearthed.

This discovery was made by a farmer digging a well in the Cole district, who submitted petrified apples on a petrified branch of the ancient tree. The Calgary museum has been notified of the discovery and the well has been refilled with earth to await further excavation work by experts in this branch of research.

Too Sick for School
Mrs. Elmer Tapp, R. 4, Williams' Pink Pills Restored Daughter to Health
"My daughter was confined to bed for a month with spells and could not get to school," writes Mrs. Elmer Tapp, Post Dan-ial West, Quebec. "Pale, weak and run-down, a friend told her about a little girl in condition who had been completely restored to health by Dr Williams' Pink Pills. My daughter has now been taking the Pills, and they have certainly made her stronger She has had that tired, sluggish feeling and has never missed one day's school since September. The Pills also gave her a good appetite, her nerves are better and she has more pep. I recommend Dr Williams' Pink Pills to mothers of daughters with similar troubles."
Don't let anyone talk you out of your need of health and vigor. Give her Dr Williams' Pink Pills. They are no substitute but the genuine. Sold by dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fine Laboratory Plant Has Been Completed

Building At Ottawa To Be Opened This Spring

Theoretical science will be linked with practical application in the commerce and industry by the new $3,-000,000 laboratory plant of the National Research Council, built and equipped by the Dominion Government, which will be put into service soon and will be formally opened with appropriate ceremonies in the spring during the annual meeting in Ottawa of the Royal Society of Canada.

The declaring purpose of the National Research Council is to provide the necessary link between "pure science" and the "art of industry" and the scientific requirements of industry; in other words, to find a practical value for scientific research. Although much has been accomplished in the past, the work of the council will be extended by lack of adequate facilities. That difficulty is now to be removed.

DRAPERIES MADE NEW
"When we resumed housekeeping a month ago I found my draperies had faded terribly in the sunlight. I took them out on the line, hoping to restore the original tint. The result was they looked ruder and more faded than ever.
"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and now I love them more than ever. They're gorgeous and new. I have never seen such fine results as with Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing. And they take the sun out of cloth as other dyes do not."
Mrs. F.V., Montreal.

The Ownership Of Trees

Ottawa Is Real Estate Of Town Or Village

Who owns the trees that flourish on the streets or on the roads of a municipality? They are the real estate of the town or village or township, and as such may not be disposed of by the ipse dixit of a councilman, nor by the whole council sometimes, in the strict sense, as are laid down for the disposition of other town property. Trees may improve the value of property along a street so that the owners would receive a distinct loss by their removal. The law of Ontario, of the United States of the Union, and of Canada give protection to the owners in such a case. Quebec seems long have reserved for an important public reason.

Extend Library Privileges

Public Library Commission For Saskatchewan May Be Established

Establishment of a public library commission for Saskatchewan with the co-operation of the Carnegie Institute, is a development which may be expected in the province within the next few months.

Recently, representatives of the Carnegie institute visited Regina and met members of the provincial government, and it was learned that consideration is now being given to a plan which would bring to the residents of all the rural sections a book-lending system not possible at present.

The plan, it is learned, provides for a substantial financial grant from the Carnegie institute to the province controlled by a commission in charge of the library extension work. This commission would work in co-operation with the open-shelf library and traveling library branches of the provincial public service, and the system would permit the distribution of books into every rural section of the province.

Canada's Wheat Exports

Summary Of Movement Of Grain To United Kingdom Given In Report

Wheat exported during the month of January totalled 9,473,346 bushels, valued at $5,817,082, compared with 8,038,262 in January, 1931, valued at $6,430,622, according to a report issued by the Dominion Bureau of Statistics. The Amount sent to the United Kingdom was 3,260,566 bushels compared with 2,618,982 bushels in the corresponding month of last year.

In the six months ending January, 1932 the total wheat export was 104,-650,422 bushels, compared with 128,-297,729 in the same month of 1931.

Wheat flour export in January totalled 251,986 barrels valued at $1,-171,870, compared with 202,256 barrels at $1,356,509 in January, 1931. The six months export was 1,600,-000 barrels at $9,970,107, compared with 1,961,694 at $17,714,234 in the same period a year ago.

Scientists Are Busy

Scientists of nearly a score of nations are completing arrangements for the widest investigation ever made into the scientific and meteorological mysteries of the polar regions. The second "polar year" begins August 1 next, and a group of "weather men" in Toronto are busy doing by to conclude details of the great part Canada is to take in the new invasion of the top of the world.

Captain Kidd, the pirate, was sent out from England to capture pirates and turned pirate himself.

Great Scenic Highway

Upwards of 2,000 men are now employed in the construction of a great scenic highway through the Canadian Rocky Mountains. Some ten camps have been established between Jasper, Alberta, and the Great Divide, and gangs of men are working out from them clearing the right-of-way. The road, which in a general way is part of the trans-Canada Highway scheme, will be the finest scenic highway in North America.

MAD TRAPPER IS KILLED BY POLICE POSSE

Aklavik, N.W.T.—Albert Johnson finally came to the end of his bitterly trod. The wild man of the Arctic went down fighting, but Canada's red-coated Royal Canadian Mounted Police won out.

Shifting cold, hunger, blizzards and overwhelming odds, the eccentric trapper defied the police for eight solid weeks, now rumored through the bleak hills of the Arctic, now standing at bay and shooting down a posse more if they came within range of his deadly rifle.

When his fate overtook him, Johnson was perpetrating one of the long, lonely-distance treks with which he has managed to keep out of range of the police and trapper pursuers His win should go down on his trail This time, however, his pursuers were too close.

He was seen by Staff Sergeant F. F. Harvey, cab a trapper named Noel Vervile, plugging along in advance of the main posse. Hunter and hunted at once prepared for a gun battle Harvey and Vervile perched their rifles from their toboggan.

The wild man drew first blood As Harvey knelt to take aim a bullet from Johnson's rifle struck him in the knee, glanced up through h s thigh and smashed into his chest. Vervile continued firing.

Only a few shots had been exchanged when the main police party hearing the firing, ran up. They opened fire at once and the desperado went down under a hail of lead from half a dozen rifles.

While the battle raged on the ground. Pilot W. R. "Wop" May circled overhead in his 'plane. He had bombs ready to drop on the trapper but could not use them as the posse was too close.

As soon as Johnson was killed, May headed, p cked up the wounded Harvey and flew back to Aklavik.

In all the long years of police work in Canada's Arctic no other man has proved as tough a customer as Johnson. The police casualty list over stands at one dead, two wounded. Every policeman in the district, members of the Royal Canadian Signals Corps who operated the radio station here, trappers and Indians were p osed into serv ce in the chase They grew weary of hearing daily to conclude details of the great part Canada is to take in the new invasion of the top of the world.

The most that he ever told anyone about himself was that he had walked into the country from the Yukon.

Thus he lived his solitary life. For in the Arctic men mind their own business and when they learned Johnson's desire to be alone they respected it.

Customs Low Focus

Montreal, Que.—Low week-end passed trip fares, which have been offered by the Canadian National, Canadian Pacific and other railway lines in the Dominion since last summer, will remain in force after February 29, the date originally set for their discontinuance, the Canadian Passenger Association announced.

Offer War Services

Canadian Aviators Ready To Face Dangers In Chinese Battle Front

Ottawa, Ont. Ready to face the dangers of aerial battle in far away China, 50 officers of the Royal Canadian Air Force, soon to be released from the service, have offered their services to Li Tehsin, Chinese consul-general in Canada.

The Canadian officers, who are offering their services to China in the battle age not Japan are being released by the Dominion Government due to general reductions in the estimates for the defence department The officers now are posted at the Ottawa, Trenton and Vancouver air stations.

The consul-general, however, has had no instructions from h s government to engage airmen in Canada, though the offer no doubt, will be transmitted to the Chinese authorities at Nanking present seat of government.

"I have no instructions or authority to engage any military instructors, air pilots or any other ranks," said Li Tchsin. "We have had many offers by Canadians to serve in the Chinese army, though today's is the largest by any one group."

Flying Officer F. N. Brooks, a member of the group, stated that the offer to the consul-general was made entirely on the officers' own responsibility and had the full acquiescence of the Canadian Government or the Department of National Defence.

Maximum Working Day

Conference Will Be Called To Discuss Question, Says Premier

Ottawa, Ont. The Dom. on Government will call a conference with the provinces "as soon as could dons after such a conference has been satisfactorily held" to discuss a maximum working day of eight hours and one day in the treaty of Versailles to which Canada is a signatory In a tistics debate, with all quarters of the Commons in general agreement, Hon. Hugh Guthr e, Minister of Justice, made his announcement in the House of Commons.

Debate was initiated by Hon. P. Heenan (Liberal, Kenora), who in a resolution advocated "appropriate action" for establishment of the eight-hour day. The Versailles Treaty, he recalled, had been signed in 1919 by Sir Robert Borden and subsequently the eight-hour day principle was adopted at a conference in Washington. They grew weary of hearing daily labored in the country from one end of the top of the world. Canada is to take in the new invasion

War Struggle Of Russia

Figures Given To League Of Nations By Soviet Government

Geneva, Switzerland.—The Soviet Government told the League of Nations and the Disarmament Conference that the Red army numbered 604,282 men. The Red air and naval forces, this report said, had 38,000 and 29,000 men respectively.

The total budgets of the two services placed at 1,950,000, including 71,000 tons of capital ships, and the air force had 750 'planes.

The Ogpu (Soviet secret police) had 42,000 men in its ranks.

Russia spent a total of 1,280,000,-000 rubles (roughly $648,000,000) on all its armed forces in 1931.

Probe Garden Charges

Special Committee For This Purpose Has Been Appointed

Ottawa, Ont.—The special committee which will investigate charges and allegations made by Hon. G. N. Gordon, former deputy speaker of the House of Commons, said to reflect on the Prime Minister, has been appointed.

On motion of Hon. Hugh Guthrie, Minister of Justice, the following were appointed: G. R. Geary (Conn. Toronto South); Cousins Gagnon (Cons., Dorchester; J. L. Bowman (Cons., Pictou); William Duff (Lib., Antigonish-Guysboro); C. B. Howard (L. s., Skeerbrooks), and Alfred Speakman (U.F.A., Red Deer).

Tidal Wave In Alaska

Catastrophe Overwhelms Native Fishing Villages With Great Loss Of Property

Fairbanks, Alaska. Great damage resulted from tidal waves which swept over the western Alaska coast from the Kuskokwim river delta northward and spread many miles inland, Clark M. Garber superintendent of the Indian Affairs Bureau said here He has been over the territory and reported no loss of life.

Word of the catastrophe seeped out of the inaccessible section a few days ago and Garber's account is the first authentic word picture drawn of the great mountains of ice that descended upon the native villages.

The blocks of ice, he said, crushed igloos, cabins, fish cache s and destroyed fish, the principal source of food for the natives. The water flooded the igloos to a depth of four or five feet, trapping the occupants who had to escape through the skylights. Adding to the terror are the Eskimos' views the feast the waves came at night, giving the natives little or no chance to save their possessions.

He said probably 2,500 persons were affected all of whom would be in dire straits for the remainder of the winter because their dried fish supply was destroyed and hunting equipment was lost.

Mr. Garber said he believed relief work could be carried on adequately by the Indian affairs officials with the assistance of reindeer supervisors.

Peace River Outlet

No Justification For Building Here In Opinion Of Railway Expert

Ottawa, Ont. "No western outlet is justified for the present, as the existing railways furnish the most economical route" is the opinion voiced of J. M. R. Fairbairn chief engineer of the Canadian Pacific Railway, and his conference on the committee appointed by Hon. R. J. Manion, Minister of Railways, to enquire into the Peace River outlet. "It will take many times the present traffic to justify another railway outlet," says the report, which was tabled in the House of Commons.

War History In School Books

Geneva, Sw tzerland. -At a session of the world disarmament conference, Baron Yo-Koshimes, Finland's Minister of Foreign Affairs, urged demilitarization of frontiers, and Foreign Minister Ch ks, of Rumania, warmly supported the French plan to arm the League of Nations. He also suggested revision of school books to eliminate incitement to war.

Tearing Pressures

Dr J A Haddick Dominion Dairy Commissioner, in authority for the statement that cow testing has shown much more progress in Saskatchewan and British Columbia than in any other Canadian provinces

Bandits Make Haul

Two Armed Messengers In Winnipeg and Escape With Large Sum Of Money

Winnipeg, Man. Police cars were cruising Winnipeg streets seeking a trio of bandits who ambushed George Ridd, provincial treasury messenger, slugged him into insensibility and escaped with a satchel containing $1,000 in cash and $15,000 in cheques and money orders. A stolen automobile, used to which the marauders away, is the only clue police have to aid them. Several thousand dollars, in small packets, which Ridd carried in his pockets, were overlooked by the hold up men.

Ridd, accompanied by Jack Cassidy, provincial chauffeur, was walking from a side door to a waiting Automobile with receipts from the post office, located in the government buildings. As they neared the car, two men stepped up to them and ordered Ridd to hand over the satchel.

Ridd refused and attempted to run back to the building. Anticipating this, one of the robbers thrust a gun into his side and pulled the trigger. When this failed, he promptly felled Ridd with blows to the head.

Wrenching the bag from Ridd's grasp, the bandit, joined his two confederates and quickly fled the scene The stolen car in which they made their escape was rapidly lost sight of in the sea of automobiles pouring into the Kuskokwim river delta northward and spread many miles inland, Clark M. Garber superintendent of the Indian Affairs Bureau said here He has been over the territory and reported no loss of life.

Word of the catastrophe seeped out of the inaccessible section a few days ago and Garber's account is the first authentic word picture drawn of the great mountains of ice that descended upon the native villages.

The blocks of ice, he said, crushed igloos, cabins, fish cache s and destroyed fish, the principal source of food for the natives. The water flooded the igloos to a depth of four or five feet, trapping the occupants who had to escape through the skylights. Adding to the terror are the Eskimos' views the feast the waves came at night, giving the natives little or no chance to save their possessions.

He said probably 2,500 persons were affected all of whom would be in dire straits for the remainder of the winter because their dried fish supply was destroyed and hunting equipment was lost.

Mr. Garber said he believed relief work could be carried on adequately by the Indian affairs officials with the assistance of reindeer supervisors.

A Peculiar Situation

U.S. Farmers Banking Funds Across the Line To Deposit In Canadian Banks

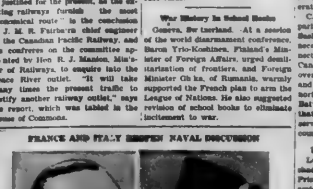
Malitax, N.S.—United States farmers along the border have not only been depositing their surplus cash in Canadian banks and withdrawing from their home-town institutions to make Canadian deposits, but are actually mortgaging property and rushing the proceeds across the line, according to the February 17 issue of "The Business Week," New York Commercial Journal.

"Yankees in the upper tiers of Maine, Vermont and New Hampshire," says the publication, "are taking their money from banks to deposit in Dominion institutions at a rate of $1.18 to $1.20 Here in the true Yankee ingenuity people see an opportunity for profitable trade — a thing always close to the Yankee heart. When the Canadian dollar recovers—as they feel sure it will—they can recall the money and cash their profits Meanwhile deposits in Canada are drawing interest in the larger face value."

War History In School Books

Geneva, Sw tzerland. -At a session of the world disarmament conference, Baron Yo-Koshimes, Finland's Minister of Foreign Affairs, urged demilitarization of frontiers, and Foreign Minister Ch ks, of Rumania, warmly supported the French plan to arm the League of Nations. He also suggested revision of school books to eliminate incitement to war.

France And Italy Discuss Naval Question



As a result of the efforts of the World Disarmament Conference direct negotiations have been begun between the French and Italian delegations to settle their naval differences. French Minister of War, Andre Tardieu (left) and Foreign Minister Dino Grandi of Italy (right), have already met to discuss the subject and their conversations are being followed up by the French and Italian naval experts, Rear Monnigit and Augusto Rosso.

BRISK DEBATE IN HOUSE OVER WHEAT BONUS

Ottawa, Ont.—A brisk clash between Robert Gardiner, Alberta United Farmers' leader in the House of Commons, and M. N. Hlesgrord (Prog., Mackenzie), one of his supporters, featured debate on a resolution urging a bonus of $1 per acre seeded this year to wheat. The motion was sponsored by Robert MacKenzie (Lib., Assiniboia). Western farmers appreciated quality the coming five cents a bushel bonus, Mr. Campbell claimed, and he deplored that a United Farmers' convention had denounced it. If the government discontinued the subvention, the farmers would have their leaders to blame, he asserted.

Mr. Gardiner took issue with his supporter. The farmers who had received the five-cent bonus undoubtedly appreciated it; but the distribution of the money did not reach those whose crops had been destroyed either by hail or drouth. They believed themselves entitled to some other consideration, and the proposal to do a subvention such as suggested in the resolution If Mr. Campbell visited these drought-areas he would be in a better position to appreciate the distress prevailing there. The U.F.A. convention's resolution was fully considered and would be presented to the government in due course.

Mr. MacKenzie's resolution read: "Whereas the policy of extending federal assistance to western farmers on a bushel basis rather than on an acreage basis has proved not most unfairly and unjustly to the residents of those districts suffering from failure or near failure of crops;

"And whereas a largely signed petition and memorandum has been presented to the government by the secretary of the Saskatchewan Association of Rural Municipalities, praying for additional legislation to partially remedy the situation then existing;

"Therefore be it resolved: That, in the opinion of this House the Government should give immediate consideration to a more equitable and less discriminatory solution of this problem."

Brief speeches, delivered for the most part by unofficial members, characterized the debate.

Organ Construction Of Bridge

C. R. McIntosh Asks Royal Commission To Consider Request

Ottawa, Ont.—Most ngs "in connection with the Royal Commission on Transportation have been held here, and so far no further public sessions have been scheduled At least two of these representations were heard from the Ontario Motor Coach Operators Association.

C. R. McIntosh, Liberal member of parliament for North Bathford, Sask., urged upon the commissioners the necessity for doing something in connection with the construction by the Canadian Pacific Railway of a bridge over the North Saskatchewan River and extension of an existing line northward from Saskatoon to North Battleford. He also advanced that the completion of this line would serve a rich and rapidly developing country.

Comments

British Premier Takes Holidays

London, England.—Nursing an eye shade and a bandage over his left eye, Prime Minister Ramsay MacDonald arrived at No. 10 Downing Street, to preside over an important cabinet session. He planned to go later to his country place, Chequers, for a rest before a three weeks' holiday presented by his physician.

Iceland In Air Mail Route

Reykjavik, Iceland.—Judge Guimumder Grimsson of Reykjav k, M.D., arrived here as a representative of the Trans-American Airlines Corporation for the announced purpose of negotiating for a proposed Iceland-Europe air mail service via Iceland.

Canada's Oldest Indian Dead

Nanaimo, B.C.—Nanoose Bah, after whom Nanoose Bay was named 90 years ago, who was reputed to be the oldest Indian in Canada —his estimated age being 105 years—is dead at his home on the shores of Nanoose Bay.

State Health Insurance

British Columbia Plan Outlined To Meeting Against Cost Of Illness

Commenting on the recommendation of the state health insurance commission that compulsory state health insurance be instituted in British Columbia, Mr. Speaker F. T. David, the chairman, said, in part:

"Our problem and nothing to do with unemployment insurance. It was confined strictly to the question of insuring against the cost of sickness. The framers of the British scheme have become embarrassed by reason of failure to keep these two subjects separate, and, by permitting the insurance fund to be converted into a financial relief measure. As financial structure has been jeopardized.

"In any insurance scheme, the fund can only provide what the contributors are paying for, and if unemployment could be grounded from a fund which is designed only for sickness and, then, of course, disaster will follow. And a hospital fund subjected to such unscientific treatment will, of necessity, collapse.

"Almost every important country in Europe has now embraced the principle of compulsory sickness insurance.

"If British Columbia adopts the system, this will be the first area of the North American continent to show the way toward a scientific health practice.

"We will be in a position to avoid the pitfalls and other disheartening features revealed in the systems of other countries and be enabled to establish a scheme which will function satisfactorily.

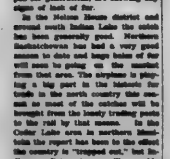
"The difficulty is going to be to make the people understand that, in reality, we are practically self-supporting, with no added expense either to the state or to the employers of labor. Those two bottlenecks have been so heavily loaded upon in the past, in connection with social service, that they have not failed to bring hearing the names of a social service is mentioned. In health insurance, however, the fund will be only of the state, the employer and the employee, but also that of the hospitals."

Good Season For Trappers

Government Catch Of Furs Reported Over Previous Season's Total

Trappers in most sections of northern Manitoba and Saskatchewan, along the rugged coast of Hudson Bay, are having an highly successful season, according to reports received in The Pas. Only the more settled portions of the northern part of the province, areas that have been trapped for generations, are showing any signs of fur.

In the Nelson House district and around south Indian Lake the catch has been generally good. Northern Saskatchewan has had a very good season to date and huge bales of furs will soon be going on the market from that area. The airplane is playing a big part in the historic fur industry of the north country this season as most of the catches will be brought from the lonely trading posts to the rail by that means. In the Lynn Lake area in northern Manitoba the report has been to the effect the country is "trapped out," but indications point now that there will be a big season there again.



"How is it that you are not running a car now?"

"Well, I ran over thirteen people, and then I felt I was sure to have an accident if I continued."—Durchauser, Berlin.

W. N. U. 1920

"Settlement" At Shanghai

International City In China Ruled Properly Of Twenty Powers

The distinction between the international Settlement and the Chinese or "Native" or "Walled" City at Shanghai needs to be remembered. Shanghai was one of the five ports in China opened to foreign residence and trade by the British Treaty of Nanking of 1842 Under this treaty a site was not specifically selected to be outside the Chinese City, where British subjects were allowed to reside without interference or restraint. Subsequently other powers obtained the same privilege for their nationals. That was the beginning of the International Settlement, which has grown to be the most important commercial city in China, completely overshadowing the ancient City under whose walls it was developed.

Although China has never abrogated the act upon which the Settlement stands, the proprietorship of everything above ground rests jointly in the treaty powers. Their Consuls are representatives powers the Settlement, with right of appeal to Diplomatic Corps, although the administration is in the hands of a Municipal Council elected by the ratepayers. The commercial strength of the British in the Settlement has conveyed the impression to many that it is a British colony. As a matter of fact British rights and obligations respecting the International Settlement are no different from those of the United States or any other of the powers. Consequently the invasion of the Settlement by any one power, whether a treaty power or not, would be an infraction of the territorial sovereignty of all the treaty powers represented at Shanghai and is regarded from the most serious consequences.

New Material For Windows

English Scientist Makes Hard Transparent Substance From Sawdust

An English scientist has developed a method which may prove one of the most important inventions for many years. Hard transparent sheets are produced from sawdust; more eager than it can now for heat. One of the great problems in house heat to do with the surplus. The invention consists of a process by means of which crude sugar in the form of molasses can be converted into a colorless, hard mass and as transparent as glass. It has, moreover, the valuable property of allowing the heat-giving ultra-violet rays which are stopped by ordinary window-glass. The material can be blown, moulded, or rolled, just like glass.

British bulbs has doubled its tariff on printers' ink.

In Praise Of England

Londoner's Reasons Glowing Eulogy Of Country and Englishmen

Londoners of thought in the United States and France are now receiving at the same conclusions as Lord Balfour, noted British statesman, reached ten years ago on the subject of war debts. Dr. J. W. Brandy, lecturer and author, of Toronto, told the Canadian Club at Saskatoon.

Taking as his subject "Where Now Stands England," Dr. Brandy discussed strength with thobs who would tell the hall for the passing of England and begin to write her epitaph but contented with his statements. Dr. Brandy pointed to innumerable facts to prove his point, referring to British unchallenged place in the world of commerce, workmanship, sport, politics, spend records.

Speaking of the British form of government, the speaker said, republicans might deride the antiquated form of monarchical government, but, his noted, in what country was it so easy for men from humble homes to rise to the highest positions. He quoted the cases of Lloyd George, Ramsay MacDonald, Arthur Henderson and Sir John Simon, all men of humble birth, all paying a big part in Britain a destiny today.

Turning then to England's contributions to Canada, Dr. Brandy, himself a son of old Ontario, referred to the boys from Dr Barnado's Home in London, England, and said that over two per cent. of the people of British stock in the country were descendants of those sent to this country.

Dr. Brandy said that 17,000,000 acres in Canada were tilled by Barnado boys and their families, while the home had given Canada cabinet ministers, doctors famous lawyers, and leaders in all walks of life.

Dr. Brandy concluded on a note of appreciation for an honor recently conferred. He spent ten years and received honorary doctor's degree from the University of London for his "Life of Shaftesbury."

Daily Protected

Man had been the despair of the girls of the village. But he was to be married at last.

"Ah, then," said Farmer Brown "So I hear ye've put up the banns at last."

"Aye, sir," responded Sam. "I were prayed for the third time in church last Sunday.

Helpfulness can not be standardized. Giving until it hurts is not a true test of charity. Some are easier hurt than others.

Good For the Pin Trade

Silent Manufactures English Why So Many Are Used

Why are there so many pins in new shirts

British manufacturers are trying to break away from a tradition which has cost 15,000,000 more millions of labors removing 1,200,000,000 pins from the 100,000,000 shirts used annually in Britain.

Every new shirt when it comes from the manufacturers is fastened into shape by 15 tiny pins.

These pins are fixed under the cuffs, between the sleeves and the body, and in other unlikely places, which, as a rule, are not discovered till the purchaser is in a hurry to change

They are small pins and often they are found only by a painful process of trial and error. They lay the patience of the purchaser, and add to the cost of the shirt without serving any useful purpose.

The chairman of a British shirt making firm said that the manufacturers would be glad to reduce the number of pins used in "dressing" shirts before they are sent to the retailers.

"But experience has taught us," he said, "that the lavish use of pins enables shirts to be packed in smaller space than when they are merely folded.

"We tried using clips, but they were not so effective."

The manager of a west-end store which sells thousands of shirts every week said that a large number of pins were necessary to keep the shirts in shape.

"They are constantly being taken out of boxes to be shown to customers, and have to be repacked hurriedly," he said. "If it were not for the pins they would be out of shape in a week."

A representative of a Birmingham firm of pin manufacturers said that the pin trade was largely dependent on man's vear

"Very few pins are used in women's garments," he said.

If they are used the woman always keeps them for use again. Men never do They throw them away. That is how the pin trade is kept going Our business has been built up on the wasteful tendencies of imperfect men."

Greece has inaugurated its first airplane passenger service, between Athens with Salonika and Janaina, and civilian aviation will be encouraged by establishment of landing fields.

An inventor has combined a telephone and gramophone so that a song may be sent sounding into a single instrument.

Tests Were Satisfactory

Scientist Makes Crows With Treated Grain In Winter

Nearly half the 263 crows released at Hackett on November 26 by Professor William Rowan of the Zoology Department of the University of Alberta, have been recovered and the details of their recovery support Professor Rowan's revolutionary doctrine of the transition of migrations.

This was learned in an interview with Professor Rowan The crows, released in course of an experiment to show that migration is an inborn instinct which can be modified by treatment of the endocrine glands, were treated in different ways

One group of birds, treated with long hours of artificial light and serums designed to reverse their natural instincts should according to the professor's theory, have been northward instead of following the southwest direction of normal routes. These birds, with tails painted bright yellow to distinguish them from their differently treated brothers showed the poorest percentage of capture.

Only 40 per cent of the birds in this group have been recovered," Professor Rowan said. "In some other groups returns have been as high as 94 per cent which is extraordinarily good, and none of the other groups were less than 55 per cent.

"This is the reverse to what was anticipated. We expected that the yellow tails would arouse curiosity and the products would be used as an unusually high death rate in this group.

"They are constantly being taken out of boxes to be shown to customers, and have to be repacked hurriedly," he said. "If it were not for the pins they would be out of shape in a week."

A representative of a Birmingham firm of pin manufacturers said that the pin trade was largely dependent on man's vear

"Very few pins are used in women's garments," he said.

If they are used the woman always keeps them for use again. Men never do They throw them away. That is how the pin trade is kept going Our business has been built up on the wasteful tendencies of imperfect men."

Some Spiders Are Vilhable

Only Certain Kind Spin Thread Which Is Usable

There are fairy tales about metaphysicians spinning webs, spiders being really de spin cobwebs that are valuable.

Only certain kinds of spiders make the right sort of thread, and one of the world's quercest businesses is to breed these to collect the silken strands.

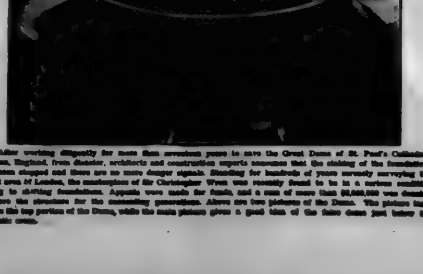
In astronomers' telescopes and in certain microscopes fine cross-lines are needed with which to make delicate measurements. Cobweb forms one of the best materials for making these. It is collected by placing the spider upon a small spool. He is then gently shaken off and, as fast as he tries to descend, the thread is wound on to the spool.

The other day a cobweb fetched quite a high price for a very different purpose. In the new version of a movie at Los Angeles an actor had to appear in one scene looking through a window-pane covered with cobwebs. As no spider could be induced to spin the right sort of web over a property window, a search had to be made for a window of the right kind with the right sort of cobwebs. When found it was bought at a high price and moved bodily from the house to which it belonged.

Opportunity For Farmer

The Farmer's Advocate says there may be 2,000,000 pounds of Canadian-grown alfalfa seed that will not be used this spring unless a market is increased. That situation presents a wonderful opportunity to those who know the value of alfalfa.

With: "To think that when I married you you were the lightweight champion."—El Tornado, Buenos.



FAMOUS BRITISH CATHEDRAL NOW REPORTED SAFE

After working diligently for more than seventeen years to save the Great Dome of St. Paul's Cathedral, London, England, from disaster, architects and construction experts announce that the sinking of the foundations has been arrested and there are no more danger signals. Shoring for hundreds of years unevenly carrying the great dome of London, the massive structure of the Church of Christ the Wren is slowly found itself in danger of collapse owing to sinking foundations. Appeals were made for funds, and a sum of more than $2,000,000 was donated to save the structure for the succeeding generations. Above are two pictures of the Dome. The picture front shows the big portion of the Dome, while the main picture gives a good idea of the fame dome just below the cupola.

It's good

This delicious table syrup is just full of nourishment, and more litvle. Try it.

BENSON'S GOLDEN SYRUP

The CANADA STARCH CO. Limited, MONTREAL

THE ECUSE OF DREAMS-COME-TRUE

BY —

MARGARET CULKIN BANNING

Author Of "The Reluctant Flapper," "The Season Of For Sale," Etc.

Holder a Compilion. Lst. London.

CHAPTER XIII.—Continued.

She laughed and retorted impertinently:

"I'm sure I'm grateful to the bigger boy who came to the rescue."

There was something quite unconsciously provocative about her as she stood there with one foot poised on the spanking, her head thrown back in a trifle to meet his glance, and a hint of gentle ra'lery lifting the corners of her mouth.

The man-woman woke suddenly in him. He was conscious of an almost irresistible impulse to take her in his arms and kiss her. But the current lines of the centuries held, and all Jean knew of that swift flare-up of desire in the man beside her was that from which we now have the long distance right record."

And because she was not given to regarding every unmarried man she met in the light of a potential lover —as some women are prone to do —and because, perhaps, her thoughts were subconsciously preoccupied by a less dark face, rather stern and weary-looked at though from some past discipline of pain, Jean never perceived that fierce pressure of the hand to its rightful origin, but merely rubbed her bruised fingers surreptitiously and wished ruefully that men were not quite so muscular.

"I'll go with you up to the house," remarked Burke, without any elaboration of "by your leave."

Mhe was privately of the opinion that her leave would have little or nothing to do with the matter. If the unexpectedly autocratic and masculine individual had decided to accompany her through the park, accompany he he would, and she might as well make the best of it.

He was extraordinarily unlike his sister, she thought. Where Judith Craig would probably seek to attain her ends in a somewhat stealthy, catlike fashion, Burke would employ the methods of the club and battering-ram Of the two, perhaps these last were preferable, since they at least left you knowing what you were up against.

"Will you come in?" asked Jean, pausing as they reached the house. "Though I'm afraid everyone is out."

"So much the better," he replied. Burke could much rather have her alone with you."

"That's not very polite to the others," replied a little. "I'll come in the Staple people were old friends of yours?"

"So they are. That's exactly it. I felt the mood of the explorer on me this afternoon."

"You're one of the people with a perpetual flow of new acquaintances, then?" she said indifferently, leading the way into the hall. where, in place of the great log fire of childer days, a bank of growing tulips made a glory of gold and orange and red in the wide hearth.

"No, I'm not," he returned bluntly. "But I've every intention of making your acquaintance right now."

Jean rang the bell and ordered tea.

"I think perhaps I might be consulted in the matter," she returned lightly when the servant had left the room. "The settling of questions of that kind is usually considered a woman's prerogative. Suppose I say—" smiling—"I don't ask you to tea, after all?"

"Why, naturally I'd rather it had been you," she allowed, twinkling.

"Do you mean that?"—swiftly.

"Of course I di—" lightly. She had failed to notice the eagerness of demand in his quick question. "I'm always glad to see a muscular.

Mr. Burke rather frightens me. He's a trifle—overwhelming. Still" shaking her head reprovingly—"I don't think that excuses you. You must have a shocking temper."

He laughed aloofly.

"Most of the Tormarins have ruined their lives by their temper. I'm no exception to the rule."

Jean's thoughts flew back to the description she had overheard when in London: "A Tormarin is a temper. He is a devil with the bit between his teeth."

WIFE WAS FAT—

No Longer Attractive

Lost Husband's Love

The above headlines appeared in a New York newspaper, in connection with a divorce trial that has attracted wide attention.

"She was a beautiful woman," one witness testified, "but she got too fat and is not attractive any more."

Thousands of women are getting fat and losing their beauty — just because they do not know what to do.

If you are fat, why not do what thousands of women have done to get rid of pounds of unwanted fat? Take one half a teaspoon of Kruschen Salts in a glass of hot water every morning before breakfast, and keep it up for 28 days. You can help the action of Kruschen by cutting out pastry and fatty meats, and going light on potatoes, butter, cream and sugar. Then weigh yourself and see how many pounds you have lost.

Now you can laugh at the scales as you pay hundreds of dollars to lose a few pounds of fat, and you will know that the 6 vitalizing salts of Kruschen have promoted you with glorious health.

PRIZE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many thousands of trial bottles in this way, and know by the proof we receive that Kruschen is the best medicine for the new "SLANT" Physique.

This consists of one regular 75c bottle (another trial bottle if required) and a book telling you how to obtain a perfect figure. Send no money, but just write your name and address plainly on a piece of paper and send it to us. You will receive the trial bottle and book by return. Take it for 28 days, then weigh yourself and see how much you have lost. If you are not delighted with the result, you will have your 75c. immediately paid you by return. Address: Kruschen Co., Dept. 1, 1 Hanover Square, New York. Canadian Address: Kruschen Co., Dept. 1, 10 Colborne Street, Toronto, Ont.

W. N. U. 1920

ACID STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and soreness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet its action is quick. You will never rely on crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal dentifrice for the youth and healthy gums is Phillips' Dental Magnesia, a superior tooth paste. Used by thousands of well-dressed people. (Adv.)

"Then it's true," snapped her lips. "What's true?"—with some surprise. "That the Tormarins are a vile-tempered lot. As if Mr. Burke would possibly be held responsible for the actions of a mischievous schoolboy! At least he did all he could to repair the damage. He brought me back, and recovered the missing pair of oars for me You hadn't the least reason to flare up like that."

Blake listened to her quietly. The anger had died out of his face and his eyes were somewhat sad.

"You're right," he said at last, "absolutely right. But there rarely is any reason for a Tormarin's temper. Do you know- it sounds ridiculous, but it's perfectly true—it was all I could do not to knock you down.

"My dear Blaise, you fill me with alarm! I'd no idea you were such a bloodthirsty individual! But seriously, what had the poor man done to incur your wrath? He's been most helpful."

There was an element of mockery in the brief smile which crossed his face.

"Perhaps that was just it. I've rather grown to look upon it as my own particular prerogative to help you out of difficulties."

"Well, naturally I'd rather it had been you," she allowed, twinkling.

"Do you mean that?"—swiftly.

"Of course I di—" lightly. She had failed to notice the eagerness of demand in his quick question. "I'm always glad to see a muscular.

Mr. Burke rather frightens me. He's a trifle—overwhelming. Still" shaking her head reprovingly—"I don't think that excuses you. You must have a shocking temper."

He laughed aloofly.

"Most of the Tormarins have ruined their lives by their temper. I'm no exception to the rule."

Jean's thoughts flew back to the description she had overheard when in London: "A Tormarin is a temper. He is a devil with the bit between his teeth."

Children's COLDS

Mothers testify that BABY'S OWN TABLETS are invaluable for children's head colds and bronchial colds.

"At the first sign of a cold," writes Mrs. Isaac Keller, 4 Shefferbury Place, Toronto, "or if the children have been out in damp weather, I give Baby's Own Tablets, and they are all right again the next day."

Mrs. Albert E. Knowles, R. R. 3, Gananoque, Ont., writes: "Baby's Own Tablets relieve colds so easily—I wouldn't be without them if they cost twice as much."

Mrs. James O'Connor, Godfrey, Ont., writes: "Baby's Own Tablets are wonderful for children's colds and fever."

Make and Keep Children Well — As Mothers Know

Little Helps For This Week

"I will fear no evil, for Thou art with me."—Psalm xxiii. 4.

In Heavenly love abiding,
No change my heart shall fear,
And safe in such a shelter,
I've nothing changes here.
The storm may roar without me,
My heart may low be still,
But God is round about me,
And can I be dismayed?
—Anna Lætitia Waring.

Just suppose that we could get rid of all unnecessary fear, worry, and terror; just suppose that we could be sure of final victory in every conflict, and found ourselves rid of every shadow into brightest day; how our hearts would be lightened, how much more bravely we should fight the fight, and march forward! This is the courage to which we are entitled, and which we may find in the thought that God is with us everywhere.

The course of our journey has been appointed by Him: He knows the way through the darkness.

—Henry Van Dyke.

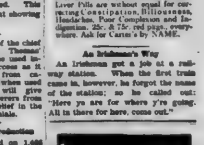
Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. Jones, 117 Lisgar, can say he is well and can eat anything since taking Carter's Little Liver Pills, he says. Mr. Jones also says: PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, for Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkgs., everywhere. Ask for Carter's by NAME.

An Irishman's Way

An Irishman got a job at a railway station. When the first train came in, however, he forgot the name of the station; so he called out: "Here ye are for where ye're going. All in there for here, come out."



RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries out in his sleep, it should be comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help —but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made especially for children's ailments. It contains, no narcotic, harmful drugs, no narcotics. Don't let your child's rest and your own be interrupted. A prompt dose of Castoria will sage stubborn little stomach to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

CASTORIA

Mrs. Fisch A. Tallon, Hammondville, Ont., writes: "It was sent to me from Montreal, after giving Baby's Own Tablets, and they are all right again the next day."

When you see your child with a cold coming on, don't bar any time in giving Baby's Own Tablets. They are obtainable from Baby's Own Tablets relieve colds so easily—I wouldn't be without them if they cost twice as much."

Mrs. James O'Connor, Godfrey, Ont., writes: "Baby's Own Tablets are wonderful for children's colds and fever."

Saskatchewan Honey Production

Returns for 1921, based on 1,466 bee-keepers, show that Saskatchewan had 7,316 colonies of bees which gathered an average of 83.2 pounds of honey per hive, or a total of 608,826 pounds of honey for the province. Many bee-keepers in the northern and eastern portions of the province report a crop of 100 pounds or more of honey per hive. all of which was secured during the month of August.

Protect the child from the ravages of worms by using Miedzin Oriental Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

British Columbia's Industries

British Columbia produced an estimated value of $148,025,054 in the four primary industries in 1921, according to provisional figures. Lumber productive, including pulp and paper, accounted for $81,360,000 of the total; minerals were produced to the value of $36,567,300; agricultural products amounted to $16,967,754, and fisheries to $13,000,000.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Dougles Egyptian Liniment

Stockpile Five Hundred

General Umberto Nobile, Italian commander of the ill-fated expedition to the North Pole, has signed a contract with the Soviet Government to design and construct a fleet of dirigibles over a period of more than three years.

LOCAL NEWS

Dr. Calhoun, Dentist will be unable to be at his office until Feb. 29th due to sickness.

We are glad to hear that Mr. D. Harper is progressing favorably after his recent operation.

Miss A. Atkinson is expected home from the hospital this week.

Lionel Oddfellows and Rebekahs spent an enjoyable evening on Monday, Feb. 22nd., at a bridge party.

A very good crowd attended considering the unfavorable weather.

The proceeds will go to the Woods Christable Home at Calgary.

Eleven tables of bridge were in play, the play winners, Ladies First Mrs. F. Baker, Gents First Mr. C. Thomas; Ladies Consolation Mrs. E. Hollens, Gents Consolation Mr. F. Baker.

A very nice lunch was appreciated by everyone after the game.

The local Rebekah is progressing out to the finals of the competition in good time. W. A. Graham and F. Smith's rinks will meet in the finals of the Primary event. J. S. Wright and H. Thorne' rinks will meet in the finals of the secondary event. The Tertiary event is just starting and all finals will be played the beginning of next week. These games are all well contested and sorely interesting to watch.

Around the Elevators

Mr. Rogers high official of the United Grain Growers was a visitor on the Elevator line last week and reported real progress of the Company including centres as Fort Saskatchewan, Orlando and Josephburg.

Mr. Hess official of the Alberta Pacific Grain has not been in the Fort for several days, we were just wondering if by any chance he got tangled upon Baths.

Topics of the Day

The Fort defeneing the curling cup from the Lamont locals, and what might have happened, if what happened didn't happen. Proof to the solid weather and mercen on this game has been delayed.

Things we noticed—

Joe and Annie strolling west along the tracks.

Fred Rowland counting grain doors after the elevator was shut down for the night.

The price of grain hit a new mark along the elevator row today.

DON'T FORGET

Monday evening, Feb. 29th is the night of the big Leap Year Badminton Club Dance.

What Was Done At The Town Council Meeting

The regular meeting of the Town Council was held last Thursday night in the council chambers.

Present Mayor Montgomery, Councillors Simmons, Genf, LeBlanc, Lelonde and Fillmore.

The minutes of the last regular meeting were read and adopted.

One application for relief was received and approved and recommended to the Department.

The following accounts were passed for payment:—Calgary Power Co., "Penalty" and his gang cleared it for $1.00; Sundry $188.19; W. A. Graham $6.65; Mr. J Favell attending to Mrs. McAlister $4.35; The Record, advertising Financial report $40.00. Relief to extent of $62.32 was issued during the month of January.

Owing to a recent burglary in Town the question of engaging a man as a night watchman for a certain period was discussed. The Council finally authorized the License and Police Committee to make the necessary arrangements and to report action taken at the next meeting.

His Worship the Mayor referred to the Resolution adopted at the annual meeting of the Municipal District of Clover Bar with regard to soil drifting. The Resolution asked that the Town Council select 3 citizens of the Town to accompany the Clover Bar delegation to present the case before the Provincial Government. After the matter had been fully discussed the Mayor was delegated to select 3 citizens to represent the Town.

The matter of unpaid general taxes and unpaid business taxes was seriously considered by the Council, with a view to recovering same, and safeguarding the interests of the Town.

The Town Constable was directed to carry out the provisions of the By-law regarding collection of Dog tax for 1932.

The meeting adjourned on the motion of Mr. Fillmore.

REDUCED RAILWAY FARES FOR GENERAL PUBLIC

COMING EVENTS

The Girl Guides will serve tea at the home of Mrs. Calhoun on Saturday afternoon, March 5th from 3 to 6 o'clock.

oooooo

CARD PARTY

Princess Rebekah Lodge Fort Sask., are holding a Card Party in the I.O.O.F. hall on Wednesday, March 9th at 8:30 p.m. Prizes, Lunch; Admission 25c. Everybody welcome.

oooooo

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held on Thursday, March 11th in the Memorial Hall. Mrs. J. R. Adamson will speak on St. Patrick.

Visitors welcome.

oooooo

Mr. H. Arthur Barton, popular lecturer and dramatic reader will hold a meeting on Friday evening at 8 p.m., in the Beaver Hills United Church. Admission 15 and 25c.

BY RADIO RADIO DUNDEE

The annual license fee on radio receiving sets will be increased as from April 1st, to $2 per year, it was announced Wednesday by Alfred Duranleau, minister of marine.

This fee has been $1 per year in the past and the increase is expected to bring the annual revenue to nearly [illegible]

HOCKEY

Despite the short notice and decided poor weather for hockey, a fair size group of enthusiastic and rooter-goose people saw the local boys in action Monday night.

Due to the sudden turn of the weather the boys saw a possibility of enlarging or at Least starting their local budget. However, the elements ruled otherwise when just before noon snow began to fall in great quantities.

Cecil Shaw with a number of helpers cleared ice from 1 to 5 p.m. At 7 the snow was thicker on the ice than before.

"Penalty" and his gang cleared ice for an 7 till 9 and how they worked! Never a snow plow did half so well. What a treat to see Bill Gauf behind a 12 foot door with 30 cubic feet snow in front of it clearing enough ice to play only a game of marbles. How he can push that door!

To cut a long story short and a long game the boys reduced the ice to 15 minutes and the rests to five. However, this, too, was too much as the Bay found time to fix the hemp a couple of times.

The first shot from the opposite end of the rink was lost in the blizzard on the flight and Pokey never saw it till it was held out by the goal judge.

What a game! What ice! What a night! What snow!

More than half the time the puck was lost in snow banks on the ice. The boys, to, found it hard going and the fans, who are to be congratulated for their courage in braving the elements, found the game volunteering as a result.

As we said before the coffers aren't enlarged, in fact after half the play you'll get the break. Keep up the good work. One redeeming feature was the crowd brought down by the Bay who helped largely in the success of the Leap Year Dance.

Red Cross Society News

The Junior Red Cross Society of Josephburg held their regular meeting on Friday, Feb. 19th, in the senior room of the school.

The president, Lorna Krebs called the meeting to order, which was followed with the singing of O'Canada and the repetition of the Red Cross Pledge.

The Secretary, Beth Gunn gave the minutes of the last meeting, which were adopted as read. Following this Harold Mohr gave the treasurer's report and the meeting was then open for business discussion.

The main topic of discourse was the Easter and April Fools party to be held on Thursday, March 24, at 7:30 p.m. A report of preparations already made, was given by the social committee and further suggestions for decorations, contest prizes etc. received.

A number of stamped Easter cards are still to be handed in to the collectors, Lorna Krebs and Elmore Mohr.

Following the adjournment of the business session "a baseball spelling match" was conducted by the programme leaders, Alma Pearce and Beth Gunn, the latter team coming out victorious, the score being 6-3.

At the finish of the game the meeting closed with the singing of "God save the King."

The debate of last week, "Resolved that the Ford car is superior to the Buick was won by the affirmative side, (believe it or not) consisting of Nora Ashton and Elmore Mohr, upholders for the negative were Harold Mohr and Lloyd Willy.

The Fort hockey team and Price Dayton hockey team will play on the local rink to-night at 8:15. Thursday.

Indifference to organization activity is equivalent to an indifference to assured success.

Badminton Club's Dance An Enjoyable Affair

On Monday evening, February the 29th the Fort Saskatchewan Badminton Club held a very successful Leap Year dance in the Badminton Hall.

A fine crowd attended the dance and until the "the witching hour" the fair sex had the choosing of their dance partners and maybe some weren't getting a kick out of it.

At midnight a tasty lunch was served by the younger members of the Club.

After lunch the men came into their own again and dancing was continued until 2 o'clock.

The dancers were fair to see and the music was perfect for dancing We must say that "The Rhythm Boys" certainly know their rhythm.

When the last waltz rolled around and it was time to go home, everyone was sorry that such an enjoyable dance was over.

YPRES VALLEY NEWS

The Leap year concert held at Ypres Valley was quite successful and the program was as follows: Readings by Miss Neithal, Philip Armstrong, Molly Pearce and Wm. Gillison

Duets by Mrs. D. Gunn and Mr. D. Gunn Jr.

Selections on the Harmonica by Mr. C. Simmons and D. Gunn Jr.

Two very fine sketches were presented, first "Women Talk" with a cast of Mrs. E. Lawrence, Miss Eva and Thelma Moyer, Carl Dittrich and Hollis Simon.

The next play was very humorous and caused quite a bit of fun.

"Leap Year Love Light" was the title and Mr. Bill Pearce played the part of the bachlor and the six ladies in the cast were:—

The Sports Woman, Mrs. D. Cameron. "Pollyne Loving Women, Mrs. Jos. Brady.

The Bad Hot Mama, Mrs. F. Davis.

The Business Woman, Mrs. Pearce.

The Superstitious Woman, Mrs. D. Gunn.

The Cave Woman, Mrs. Harold Armstrong.

It seems according to the play that the first five ladies mentioned had asked the bachlor, Mr. Pearce to marry them only to be refused, but the "Cave Woman" played by Mrs. H. Armstrong, grabbed Mr. Bachlor before he had a chance to refuse and walked away with him.

After the entertainment was over, a tasty lunch was served.

oooooo

Mr. and Mrs. Bill Pearce were in Edmonton Monday, attending the funeral of the late Mr. Pries. Mr. Price was an old friend of Mrs. W. Pearce's family.

oooooo

The snow storm of last Monday has blocked up the roads around here again.

oooooo

There is to be a whist drive and dance on Friday, March 4th at Ypres Valley School.

* * * * *

Mr. and Mrs. D. Gunn were among the old friends and relatives that met at the home of Mrs. Ella Ashton at Beaver Hills on Saturday to celebrate her 83rd birthday.

* * * * *

Runaways and upsets are very popular at Ypres Valley these days.

Robbie Gunn took a sleighride to Beaver Hills on Friday night and upset them a couple of times, and he wasn't driving with one hand either. But he had a lot of back seat drivers.

* * * * *

We wish to give Miss Neithal a bit of advice, and tell her to stay in the sleigh, for Davy Gunn is quite able to stop a runaway team even if the bits are not in their mouths.

* * * * *

Willie Dodds had a real smash up while hauling straw. He lost the rack of straw in E. Lawrence's back door yard.

The Imperial Economic Conference

The outstanding event listed on the Canadian national calendar for 1923 is the Imperial Economic Conference which will open at Ottawa on July 16. The deliberations of this conference, conducted if not worth for fail to reach, yes, even the spirit manifested within the conference, will have far-reaching effects not only upon Canada and the British nations of the world, but upon all nations.

Because this is true, the people of Canada will intensely [illegible] of the conference with an interest surpassing in its intensity that displayed by them in the session of their own parliament. If it, in a measure, a parliament of the Empire that will be in session, and while its conclusions will have to be confirmed and ratified later by each individual parliament in Great Britain and the Dominions, it is safe to say that none of them will dare flout or [illegible] unanimity, its decisions will be accepted by all.

On the other hand, should the conference fail in its avowed object, should it prove so abortive of results as the London conference of 1920, the outcome may possibly be very disastrous; in fact, in such an event, it would have been better if there had been no conference. British people everywhere entertained high hopes of the conference of 1920 in advance of its sittings, and their disappointment over the almost complete failure was correspondingly great, their only consolation being the decision reached to meet again and make another try for success.

All political parties in Canada are apparently [illegible] that the Ottawa conference should succeed where the London [illegible] failed. We believe the same can be said of all political parties in Great Britain and the other Dominions. If this united will is permitted to, if it cannot be intimidated at the opening [illegible] conference, if the determination of the masters of the people that the conference shall succeed is manifested everywhere, then success will be attained.

That such a feeling and desire now animates the people of Western Canada is indicated by the proposal made in the Saskatchewan Legislature that all parties in that Assembly should unite to [illegible] and insist upon adopting a resolution setting forth the views of their people as to the policies which Canada should present to the conference, then, so far as Saskatchewan is concerned, standing all parties behind the conference. The suggestion goes even further, namely, that all the other Western Provincial Legislatures should follow the same course. In a word, the suggestion is that so far as the Western Provinces of Canada are concerned they should, in advance of the conference, reach common ground in regard to matters of [illegible] of Empire trade, as the interests of the West may be affected thereby, and acquaint the Ottawa Government of its conclusions.

Great Britain is to be represented in the conference by a new National Government representative of Conservatives, Liberals, and a section of Labor; Australia will be represented by a new Government representative of a combination of political groups. It is well, therefore, that the national viewpoint of Canada, as represented by political groups, should thus be ascertained and presented to the Cabinet Government.

Admittedly the difficulties to be overcome, the problems to be solved, are many and great. The national interests of each country represented at the conference have to be recognized, while the combined interests of all are [illegible] worked out. There must, therefore, be a willingness to give and take, to compromise, to reach common grounds of understanding, rather than to adopt inflexible attitudes. Fortunately for the ultimate success of the conference this fact appears to be more generally recognized and accepted than heretofore.

It is fortunate, too, that in manufacturing circles in Western Canada there is everywhere in evidence a willingness to go some way at least in the direction of more encouragement for the sale of British-made goods in Canada in return for preferences in the Old Country markets for those products which constitute the great bulk of Canada's export trade. Taken all in all the omens appear to be favorable to a successful outcome of the conference's deliberations.

It is also well that the move for unanimity in the matter of Canadian policy in the conference should originate in these Western Provinces. No part of Canada stands to gain more, or to lose more, than does the West. For example, it is universally recognized that the success of the Hudson Bay route depends upon the development of a large import trade from Britain through the port of Churchill. An element of such import trade means that the export of grain and other Western products to Britain must become a one-way rail and steamship traffic can never succeed. It is economically impossible, too expensive, because without two-way traffic vessels put on the route, rates on both railway and such ships as do operate will, of necessity, be too high to insure success.

This is but one aspect of the subject, small, perhaps, in relation to the whole subject of Empire trade, but very vital nevertheless to Western Canada. It is because of just such aspects, however, that a unity of Canadian opinion is so essential before the conference begins its work. It is to be hoped that such unity will be established and that expression around the conference table.

Fifty Million Gas Masks

France Will Ensure Every Citizen Against Gas Attacks

Fifty million gas masks have been ordered by the French Government for civilian use, it was learned officially.

The masks, to be manufactured during the next two years, will be fitted against the deadliest gases developed since the World War. They will insure humanity for ten hours after which the chemical canisters can be changed.

The masks were ordered by the Ministry of the Interior for the protection of the civil population in case of a gas attack. It is intended by the French Government to have enough gas masks on hand to guarantee every citizen protection.

Canada's investment in highways is said to total $900,000,000, covering roads estimated at 300,000 miles in length.

Waterloo bridge is shaking and must be repaired by a new one which will cost $1,000,000. The present bridge was opened in 1817.

A total of 21,302 persons were naturalized during the fiscal year ending March 31, 1931. Twenty-seven nationalities were revoked. These naturalized were mainly central Europeans.

Furniture and other articles recently seized by the police in Mistassini Gaudin's seminary brought $130.32, when they were auctioned to help pay taxes on the property.

William Miller, 73, pioneer, is dead at Calgary. He attended the ceremony of driving the last spike into the Canadian Pacific Railway line at Craigellachie, B.C., in 1885.

The Citroen-Hearst-Asiatic-Expedition, traveling 8,000 miles across Asia, met temperatures ranging from 130 degrees above zero to 16 degrees below.

Premier Tolmie of British Columbia does not agree with the three reports tabled at Ottawa stating the Peace River outlet was not a practical project. He supports building of the outlet.

W. F. Powell and S. M. McLeod, reading of the department of an expedition to seek treasure on the Cocos Island, recall a similar unsuccessful expedition they took part in 44 years ago to seek the same treasure.

There will be no change in the French educational and religious regulatory under the government headed by Andre Taschereau, the new premier told the House of Deputies in his first ministerial declaration.

A bill to link Quebec National Park with Waterton Park across the Canadian border is on International Peace Park has been reported favorably by the United States House of Representatives public lands committee.

Her Majesty Queen Mary, accompanied by the Duke of York and Princess George, visited the Canadian Industrial section at the British Industrial fair at Olympia, London, England, according to a cable received by the Department of Trade and Commerce.

Close Judicial Districts

Four judicial districts of northwestern Ontario will operate this year, as no appropriations have been provided for them by the government for the fiscal year 1932-33. They are: Gravelbourg, Leader, Maple Creek, and Weyburn. In the fiscal year now closing 23 districts operated, and the cost of the four for which no appropriation is provided will mean a saving in expenditure of $20,270.

Saskatchewan Leads

In Rural Hygiene

National Committee Expresses Hope That Large Hospitals Will Follow Lead Given By

Hon. Dr. Munroe

The report of the activities of the Canadian National Committee for Mental Hygiene for the period 1930-31, just issued, makes special complimentary reference to the work being done by Saskatchewan's Minister of Public Health, the Hon. F. D. Munroe, in connection with the establishment of a division of Mental Health in Saskatchewan.

"The progressive Minister of Health," says the report, "is taking a statesmanlike interest in mental hygiene and has created a division of mental health. It will fall to this division to work out policies and programmes in regard to mental institutions, clinics and the application of mental hygiene principles in education, social work, administration of public institutions, etc. The Minister of Health has also made possible the organization of psychiatric wards in connection with the Regina General Hospital. It is to be hoped that all large general hospitals throughout the country will follow the lead furnished by Regina."

During the period 1930-31 the Canadian National Committee for Mental Hygiene has been active in all parts of Canada in the promotion of mental hygiene progress. The outstanding piece of work included a survey of the Province of Prince Edward Island; organization of a psychiatric clinic in psychiatry in Toronto; integration of mental hygiene into the school system of Montreal; activities of the Committee in connection with the Regina General Hospital; clinic and psychiatry; the organization of important research activities at four leading Canadian universities and the holding of mental hygiene activities through co-operative efforts between the National Committees of Canada and the United States.

C. N. R. Branch Line

$600,000 To Be Expended On Construction Work This Year

A total of $600,000 will be expended on branch line construction for the Canadian National Railways this year, final announcement being made in the 1930-1932 programme, according to a return tabled by R. J. Manion, Minister of Railways, in the House of Commons. A number of the branch lines are completed, but work this year will be confined to five, of which two are in Alberta, one in Saskatchewan, one each in British Columbia and Ontario. The programme follows: Hanna (Alberta) easterly, $15,000; Brantford (Ontario) cut-off, $212,000; Hemaruk-Scapa (Alberta), $115,000; St. Walburg (Saskatchewan) Bonnyville, $80,000; Lulu Island (B.C.), $172,000.

Expenditure in connection with the programme up to December 31, 1931, amounted to $17,610,709. During the year the sum of $4,372,050 was spent. The amount authorized in the schedule, plus the customary 15 per cent., totalled $23,051,356.

A number of the constructions have been discontinued for the time being.

In Shakespeare We Learn

The Shakespeare play, "Julius Caesar," has been substituted in the public schools of the province for "The Merchant of Venice," as the result of objections raised by Jewish people, Dr. J. T. M. Anderson, Premier and Minister of Education, told the Saskatchewan School Trustees' Association, when he declared the department's policy respecting text books and denied frequent changes.

French producers of dyes supplied about 96 per cent. of the domestic demand last year.

Company exports an early reminiscence of an unsolicited social service.

Winning Hamper Lines

By Annette

DELIGHTFULLY SMART DAY DRESS IN CHECKED GINGHAM OR ANTIQUE WHERE FIGURE NEEDS SLIMMING

You'll love this dress. It is black and white checked gingham.

It has the lines which have been proven by experience are becoming to the heavier figure. It also has the new slimming sleeve fromed in quite one-sided about its white crepe revers that provided so much smartness and comfort.

Some may like the rever to tone with the print, but it is also smart and a bit more practical.

It is especially fascinating in soft royal blue sheer crepe silk. Printed crepe silk is attractive in this model with the rever and sleeve frosted in crepe in blending tone.

No. 671 is designed for sizes 34, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3½ yards of 39-inch material with ½ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin securely.

SUNDAY SCHOOL LESSON

MARCH 6

JESUS WASHES HIS DISCIPLES' FEET

Golden Text: "The first of Man must be ministered unto, but to minister, and to give His life a ransom for many."—Matthew 20:28.

Lesson John 13:1-15.

Devotional Reading: Isaiah 52:13 to 53:6

Explanations and Comments

Supreme Love and Supreme Treachery, verses 1 and 2. Before partaking of the Feast of the Passover Jesus was fully aware of the death awaiting Him, and the washing of the disciples' feet was a last illustration of his attitude and love for His own.

His disciples with whom He had lived so long and so intimately spoke by rote with His Lord's great love for them. the Evangelist places the treachery of Judas Iscariot, who at the supper fully made up his mind to betray Jesus.

Supreme Power and Loveliest Service, verses 3-5. In later years Peter wrote this admonition: All of you gird yourselves with humility to serve one another. Was he not thinking of the girded towel about his Lord and the lowly service performed on that last night that Jesus companied with His disciples? The consciousness of supreme power, and destiny did not deter Jesus from this humblest of tasks which He set Himself to do. He did it urge Him to undertake it He arose from the table, poured water into a basin, and began to wash the disciples' feet.

"No impulse is too splendid for the simplest tasks; no task is too simple for the most splendid impulse."—Phillips Brooks.

Shocking Love, verses 6-9. "Dost Thou wash my feet?" Peter exclaimed when his Master came to him in the Greek the words "su mou" thou, of me are in emphatic contrast at the beginning of the sentence "Thou, of all I do thou knowest not now, but thou shalt understand hereafter." Peter's answer, is partly explained in verses 10-17.

"Thou shalt never wash my feet." Impetuous Peter cried out. Recall Matthew 16:22. "It is the old strange mixture of self-conceit and self-distrust, the self-conceit of old, which under the shadow of Hermon had ranged upon him so stern a rebuke when he had said, 'That be far from Thee, Lord, this shall never be unto Thee'; the self-disgust which of old, in the hour on the Sea of Galilee, had flung him on his knees with that great cry wringing from his yearning heart, 'Depart from me, for I am a sinful man, O Lord'"—F. W. Farrar.

"I love Simon, I have made pretty much the same blunders as he has, only the publicity has not been given to them."—C. W. Bull.

"If I wash thee not, thou has no part with Me," so part in my fellowship and kingdom, was Jesus' answer. Peter did not fully understand, but he was wholly loyal to his Lord. His keenness of feeling was compiled when he cried, "Lord, not my feet only, but also my hands and my head."

Gasoline Tax

Net Revenue Shows Few Hundreds Less Than For 1930

The Saskatchewan gasoline tax resulted in a net revenue of $1,384,-004.30 being received into the provincial treasury in 1931, figure made public in the legislature disclosed.

The total amount collected through the tax was $2,456,675.39, of which $1,140,838.90 was rebated in addition to $66,066.80 paid out by way of collections for collection.

In addition, it was stated by Hon. A. C. Stewart, Minister of Highways, that 91,276 automobile licenses were issued in 1931, 15,678 licenses for trucks, 41 for public vehicles, 110 for freight vehicles, 393 for motorcycles, 970 for livery vehicles, 1,000 for pedal bicycles with motor attachments and 1,307 for trailers.

A Good Investment

Big Business In Cotton Reaped From Few Cents

About a quarter of a century ago the Standard Oil Co. gave away without cost a large number of kerosene oil lamps and stoves in China and throughout the Orient. This was done in order to increase the demand for kerosene oil. It was a good investment. Today tankships operated by the Standard Oil and the Royal Dutch Companies carry many millions of gallons of kerosene to Oriental countries annually. While electric lighting is common in port towns throughout the Orient the interior cities and towns as well as the rural districts still employ kerosene oil as their principal means of lighting.

CARTER'S LITTLE PILLS

PLAN TO RAISE LARGE SUM FOR POLITICAL ACTION

Government and Municipal Co-Operation

Necessity Of Economy In Order To Safeguard Solvency Of Municipalities

Hon Howard McConnell, Provincial Minister of Municipal Affairs for Saskatchewan, has addressed a letter over his personal signature to the various municipalities pointing out the necessity of close co-operation between Saskatchewan Government and the municipalities. He points out the paramount importance of safeguarding the solvency of the municipalities by pursuing a course of the most rigid economy. He pays a tribute to the public spirit of certain municipalities, pointing out that there have been instances where tax collections in districts where crops have not been good, have exceeded tax collections in districts where crops have been reasonably good. In some districts which have been dried out the financial statements submitted have given the greatest encouragement. Regret is expressed that in some municipalities more favored in the way of better crops financial conditions are not what they should be.

The Minister expresses the desirability of the employment of capable secretaries and paying them reasonable returns for the important services rendered. He urges the utmost economy in preparing the budget for the coming year, and suggests that only the most necessary expenditures be undertaken. He asks for a copy of the forthcoming budget with an indication of the proposed savings, and offers the earnest co-operation of the Government, the Minister, and the Department.

Tuberculosis Affects Indians

Reclaimers Lose Vigorous Among Those Dwelling On Remote Reserves

Resistance to tuberculosis is less vigorous among the Indian population of Canada residing in the remote reserves than elsewhere, a report of the superintendent of Indian Affairs indicates. Near white settlements the ravages of this disease can be controlled; and Indians engaged in agricultural pursuits show increasing resistance. The Department of Indian Affairs declares in regard to the introduction of tuberculosis to the Indians that "it would be impossible to practically stamp out tuberculosis on several reserves, and the measures required to this end would not be unduly costly."

Of the Indians in the less accessible reserves, however, the report says that they are not showing "any satisfactory tendency towards increased resistance to tuberculosis, and their location and manner of life makes it difficult, if not impossible, for the department to give them effective aid in this respect."

Still Some Differences

There are still some differences between the sexes, despite the desperate efforts to eradicate them all and we never saw a man earnestly endeavoring to ascertain by a prolonged study of the outside of the envelope whom the letter came from, instead of opening it and finding out at once and for sure.

Farm Implements Exported

Canadian farm implements exported during January were valued at $139,234, an increase of $9,300 over December, 1931, the Dominion Bureau of Statistics reported recently. The best purchaser was the United States at $43,498. Great Britain's purchases totalled $15,066.

Comparison Favors Canada

Banking System Of Dominion Is Praised By American Official

Washington, D.C.—Comparisons between the banking systems of Canada and the United States to the disadvantage of the latter appears in the report of the treasury appropriation bill.

Comptroller of Currency John W. Pole told a congressional committee there had been 2,790 bank failures in the United States during the calendar year 1931 and none in Canada since 1923.

"It is a sad commentary on our system," he said, "when we realize that with an imaginary line running between Canada and the United States, where the same character of people live and where the same economic conditions prevail, there is this great difference in banking conditions.

"The people on both sides of the border have similar characteristics. They are only separated by an imaginary line, while on one side they have had bank failures whatever, on our side there have been hundreds of bank failures."

May Terminate Trade Agreement With Russia

British Government Is Urged To Take Immediate Action

London, England—The trade and industry committee of the Conservative party decided to urge upon the government immediate steps to terminate the Anglo-Soviet trade agreement.

The committee reached its decision, it said, in a desire to see Great Britain free to take appropriate steps to remedy present unsatisfactory industrial conditions and to give representatives of the United Kingdom greater freedom in their conversations with the Dominions at the Imperial Conference at Ottawa next July.

Corn From Africa

Shipment Received In Calgary To Be Used For Poultry Feed

Calgary, Alberta.—Believed a precedent, a shipment of corn from Africa arrived in Calgary for delivery to local feed dealers recently. The shipment came from Vancouver and will be used for poultry feed.

The dealers receiving the corn explained that it was cheaper to purchase African corn at present than the North or South Dakota product which had previously been used by them. The African corn, they declared, was better suited for the purpose, being harder and smaller than the United States variety.

Heavy Grain Shipments

Over Six Million Bushels For United Kingdom Pass Through Vancouver Port

Vancouver, B.C.—During the past two weeks approximately 6,300,000 bushels of grain have been booked for shipment through this port for the United Kingdom and the continent, according to local grain brokers.

During the past week, the weekly report of the Vancouver Merchants' Exchange shows, shipments totalled 3,631,056 bushels, bring by the season's total to 43,630,884 bushels. At this time last year the export was 58,511,979 bushels.

Chinese Purchase Tissue

Worcester, Mass.—Harry S. Jue, head of the Worcester Chinese Aid Committee, states Chinese in this country have bought and are shipping to the Chinese for use at Shanghai 75 military aeroplanes. "Chinese buildup" he added, "are now also negotiating with German interests for the purchase of another 100 fighting planes to send home."

Cunard Trans Movements

Tokyo, Japan.—Censorship was invoked again to cloak the movement of Japanese reinforcements to the Shanghai front. Only meagre accounts of military preparations appeared in a few newspapers.

BETS NEW RECORD

Sir Malcolm Campbell, British speed king, who hung up a new world's speed record of 253 miles an hour with his "Bluebird" racing machine on Daytona Beach

Boost Churchill Port

Expect That Twenty Ships Will Be Needed To Take Care Of Cargoes

Winnipeg, Man.—Churchill, Manitoba far north port on Hudson Bay, to be opened this summer, will be extensively used during its first open season, Hog-Geo. H. W. Paterson, president of the On-to-the-Bay Association, predicted. He said possibly 20 ships would be required to take care of cargo available.

Majority of the ships that will make the journey through Hudson Straits from British and European ports will have bulk cargoes, Geo. Paterson said, but he believed at least half a dozen would carry package freight.

Arrangements are being made by grain and cattle interests in western Canada to take full advantage of the new route, the On-to-the-Bay president said. Annual meeting of the On-to-the-Bay Association will be held at Moose Jaw, Sask., March 23 and 24.

Quebec Favors Sweepstakes

Montreal, Que.—Representatives of 68 municipalities from all over Ontario have condemned sweepstakes as a means of raising money to meet relief expenditure in the province. Provision has been made in the estimates whereby $2,000,000 will be raised by this means and legislation to complete their enactment would soon be a reality was made by Mayor Houde. If Ontario was not prepared to co-operate, Quebec would lead the way, he said, declaring, "I'm going to start it in Montreal."

Russian Wheat Shortage

Soviet To Use Thirty-Two Million Bushels For Seed

Ottawa, Ont.—The Dominion Bureau of Statistics has received a cable from London giving the official text of the Moscow-Stalin decree regarding Soviet grain It announces that 1,026,000,000 pounds of grain (32,100,000 bushels) will be sent to collective and state farms in the drought areas for seed and feed the principal areas affected being the lower and middle Volga, Kazakstan and western Siberia regions

It is also decreed that the collection of grain for spring sowing on collective farms shall be 1,760,000 metric tons, to be completed on the principal areas by March 15 Up to February 10, 39 per cent of this programme had been fulfilled.

This report gives further evidence of the suspected crop failure over the Russian area last season and explains in large measure why south Russian wheat shipments have fallen to such low levels in the past few months.

Victims Of War

Rt. Hon. Arthur Henderson Makes Appeal On Behalf Of Children Of the World

Geneva, Switzerland—Rt. Hon. Arthur Henderson, president of the world disarmament conference, addressed an eloquent appeal to the assembled delegates in behalf of the children of the world, who, he said, are always the victims of war.

President Henderson's address came at the closing of general discussions at the conference. It held a note of hopefulness.

Many nations of children were sacrificed behind the lines in the Great War, he said, to tuberculosis, rickets and other diseases which ultimately destroyed a rising generation.

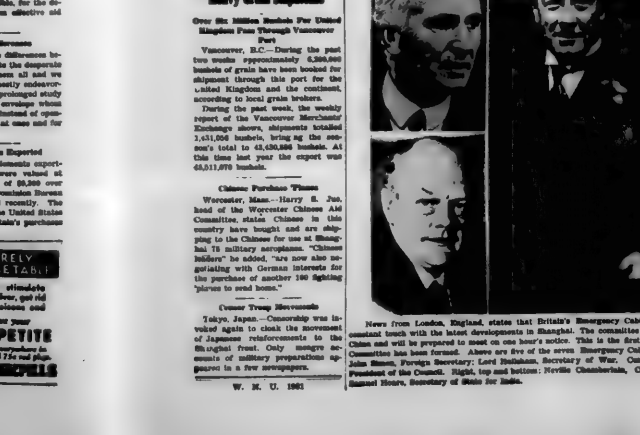
Fewest Flight Difficult

Aviators Take Six Weeks For Transcontinental Trip

Victoria, B.C.—Battling ice and fog for practically the entire six weeks consumed for the trip, and dogged by ill luck in the form of three minor crashes, W. H. Cross, Victoria, owner, and Hari Grubstrom, Montreal, pilot, landed here to complete their trans-Canada flight from Montreal to Victoria.

They did not have one clear day all the way across Canada," said Cross, describing the difficulties of long winter flying.

BRITAIN'S EMERGENCY CABINET SITS ALL NIGHT ON WAR SITUATION



News from London, England, states that Britain's Emergency Cabinet Committee sat all night keeping in constant touch with the latest developments in Shanghai. The committee will maintain contact with the situation in China and will be prepared to meet on one hour's notice. This is the first time since the World War that such a committee has been formed. Above are five of the seven Emergency Cabinet members: Left, top and bottom, Sir John Simon, Foreign Secretary; Lord Hailsham, Secretary of War. Centre: Right Hon. Stanley Baldwin, Lord President of the Council. Right, top and bottom: Neville Chamberlain, Chancellor of the Exchequer; and Sir Samuel Hoare, Secretary of State for India.

SIR MALCOLM SETS UP A NEW SPEED RECORD

Daytona Beach, Fla. Sir Malcolm Campbell, British speed king, wrote another thrilling chapter to his years of racing history by banging up a new world's automobile speed record of 253.96 miles an hour over a mile route.

The 46-year-old driver who has been blazing new speed marks down the "roaring road" for a quarter of a century, drove his 12-cylinder "Bluebird" car twice over the ocean course to surpass by 8.336 miles an hour his former record of 245.733 established in the same car here last year.

On his first run, made southward over the beach, Sir Malcolm attained the speed of 267.450 miles an hour. Upon reaching the south end of the course, he turned and roared back his bullet-based machine around and shot back northward over the beach at a speed of 241.77.

He covered the mile on his first run in 13.46 seconds and finished across that mile on the return in 14.93 seconds for an average time of 14.17 seconds for both runs.

In establishing a new record over the mile, Sir Malcolm clipped .47 of a second off his old record.

On his return Sir Malcolm also established new world speed records over one and five kilometre routes, but the announcement was not made public by officials until after they had checked their calculations.

Sir Malcolm's new record for the kilometre, which is approximately 2,000 feet less than a mile, was 253.-3-10 miles an hour, compared with his former record for that class, of 245.966. His new record for five kilometres was 241.589 miles an hour as compared with his old record of 236.845.

Improvement Is What Situation Is Predicted

Statistical Experts Believe Canada Will Again Feed The Empire

Ottawa, Ont.—Cables from Italy, Germany and Russia brought encouraging news of the crop prospects in those countries in regard to the wheat situation. Italy is allowing its millers to use a larger percentage of foreign wheat beginning March 1. Germany is soon to be a buyer of wheat again. Meanwhile, from Russia comes word that exports for the purpose in the Volga, Siberia and Kazakstan area.

The despatch from Berlin predicting Germany will soon be buying wheat, is corroborated in letters which Hon. H. H Stevens, Minister of Trade and Commerce, has received. Statistical experts of the department also expressed the opinion that very soon Spain would hit the barriers against foreign wheat as her domestic wheat supply becomes exhausted. France has been under import restrictions until now the millers can mix 20 per cent. of foreign wheat and this may be increased.

Statistical experts base this view that very soon Italy, France, Spain and Germany will all be buying big wheat. This, it is suggested, should help Canada materially. The Dominion has approximately 180,000,-000 bushels of wheat for export.

Murderous Attack

Blaine Lake, School Teacher In Seriously Wounded By Gunmen

Saskatoon, Sask.—The spotlight of notoriety was again turned on Blaine Lake, Doukhobor district in the northern Saskatchewan and the scene of several incendiary school fires during the past few months, as word was received of a murderous attempt on the life of Miss Olga Wasley, 22-year-old school teacher, of Moose Jaw, as she lay in her bed in a little schoolhouse about six miles from Blaine Lake. Miss Wasley was the target of two shots from an unknown gunman, who smashed the window and used a shotgun in his attempt to kill the young teacher.

Word of the shooting was almost immediately followed by the arrest of Pete Dovimoke, 18, son of a Doukhobor farmer, living one mile from the school.

Rings On Douglas Spruce Indicate That Ancient Tree Has Lived For 3,200 Years

Canadian Wheat Flour

May Accompany Canadian To Many Countries Next Year Per Bread Making

A campaign to demonstrate to the people of Europe the value of Canadian wheat flour for bread making, is under consideration of the department of Trade and Commerce, W. H. Shaw, Minister of that department, told the supply committee of the House of Commons.

The details of the scheme are being worked out and the announcement was perhaps premature as definite plans were lacking.

He had been greatly encouraged by similar campaigns carried out in the past and he was of the opinion that advertising might play a leading part in a return to prosperity.

Mr Stevens referred to the recent campaign to further the interests of Canadian grape growers. The government had contributed financially, and there had been remarkably successful results. A campaign in pamphlet form the Canadian apple abroad and to stimulate interest in Europe in Canadian goods, and in Canadian scientific, had met with marked success.

More than 130,000 radio receiving sets of three or more tubes each were manufactured in Austria last year, more than five times as many as were made four years ago.

Many Instruments Of War

Submarine Not Only Weapon To Menace Trade Says Lord Lloyd

On the eve of the World Disarmament Conference, the submarine again has made tragic appeal for some cessation in the arming of nation against nation. The sinking of the M-2 in the English Channel raises the total of men lost in peacetime operation of submarines during the last ten years to 613.

Of course, this is only a part of the price paid in human lives for the privilege of preparing for war. The submarine is only one instrument of warfare. In the United States alone fatalities with military airplanes have reached half that figure during the same period. The total for planes in all nations must exceed it. Experimenting with poison gases and other weapons have added their quota.

And the prolonged tragedy of submarine disasters has evolved a special outcry against underseas craft. It is also said that they are a stealthy weapon. But is an airplane dropping bombs or gasses at night upon a civilian population any less furtive? It is argued, too, that submarines have no peacetime usefulness. Have ten-inch guns any greater utility?

The fact is that of the submarine. But just at this time when the nations are thinking about putting away some of their weapons, it would be well to recognize that other instruments of human slaughter may be no less baleful in war and useless in peace.—Christian Science Monitor.

France buys more than she sells to China.

Clever Speaker Turns Back Pages Of Canadian Political History To The Days Of Macdonald

Farmers Will Benefit

Trading In Hogs On the Basis Of Official Grades

The new hog grading regulations put into effect by promulgation in the Canada Gazette of January 30 extend the provisions for trading in hogs on the basis of official grades in such a way as entirely to stimulate fair-price trading. Hogs sold from farmer or other producer right down the line to the final packer or processor must be traded in on the basis of official grades. This ensures to the farmer full benefits of the agreement with the packing industry whereby a premium of one dollar is paid for all hogs grading "Select Bacon." The regulations also provide for that premium for quality, which is rightly his, passing back in larger measure to the original producer. Complete information as to grades and the procedure to be followed can be secured on application to the Department at Ottawa.

Vimy Ridge Monument

The Vimy Ridge monument, largest memorial ever erected, will be completed in 1933, Hugh L. Alward, Toronto, son of Walter S. Alward, the sculptor, stated, upon his arrival from England. The monument, commemorating the capture of Vimy Ridge in 1917, will be 145 feet high.

Turning back the pages of Canadian political history to the days of Macdonald Tilley, Tupper and Blake, R. B. White veteran Conservative member of the House of Commons, recently spoke before the Canadian Club of Ottawa. Mr. White was not in the parliamentary press gallery a half century ago and looked down from that vantage point on the political giants of the period gave it as his considered opinion that the average ability of the House of Commons today is as high as it has ever been.

Fifty years from now, he said, people will be talking of the political giants of today just as we now do of those who trod the political stage in 1932.

Mr. White, who knew politics and statesman not only as a journalist, but also as a member of the House of Commons, told the Canadian Club that he was "degraded" from the press gallery to a seat on the floor of the House in the year 1908. He represented the Ontario constituency of Cardwell.

At present he represents Mount Royal. Mr. White delighted his listeners with many anecdotes of political figures who have passed into history, but in passing, he expressed the view that "one of the views of our House of Commerce" is the long speech.

People might agree or disagree with the politics of Sir John A. Macdonald, but all must admire his talents, Mr. White said. Sir John, in his opinion, was "the daddy of them all." The old Conservative leader was not what would be called a good speaker. It was his personal popularity which won his great asset. Mr. White told how Sir John would come back and grasp with the "back benchers" when quiet reigned in the House of Commons.

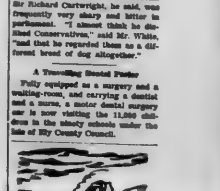
It had been his pleasure and privilege to know Sir Wilfrid Laurier well. "A charming man and a great orator," he called the Liberal leader. He spoke of Sir Charles Tupper who had "seriously foamed at the mouth" in the course of one of his fiery exhortations to the House of Commons. He referred to Sir Leonard Tilley, Hon. T. A. Hinchinbrooke, John Thompson, Hon. William Patterson, Sir Richard Cartwright and others who stand out from the pages of political history. He quoted Hon. William Patterson as saying once, when dealing with the question of patronage, that "all other things be equal, a Liberal should have the job."

"And," added Mr. White to the amusement of his audience, "all other things were equal, and the Liberal got the job."

Speaking of Hon. Edward Blake, Mr. White said that in power and in respect to pure intellect no abler man ever sat in the House of Commons. Sir Richard Cartwright, he said, was frequently very sharp and bitter in parliament. "I almost think he disliked Conservatives," said Mr. White, "and that he regarded them as a different breed of dog altogether."

A Two-Thing Dental Parlor

Fully equipped as a surgery and a waiting-room, and carrying a dentist and a nurse, a motor dental surgery car is now visiting the 11,000 children in the county schools under the jule of Ely County Council.



"Have you been looking for, miss?"

"They told me that an old sea dog was to be found on this pier, but I can't find a sea-dog."—Sketch (London).

Macdonald College Celebrates

(1) Macdonald College, Montreal Campus.
(2) Macdonald College, Ste. Anne de Bellevue Campus.
(3) Chancellor Sullivan, Dental Surgeon.
(4) Physics Building, Macdonald College.

The Twenty Fifth Anniversary of the Macdonald College which will be celebrated next week-end, on Founder's Day, February 16th, has been marked by the institution and its founder, the late Sir William Macdonald, by the erection of fine buildings, equipped and endowed for the purpose of training young men and women of the Province of Quebec in the science of agriculture and the allied arts of Home Economics and Rural Science.

The Macdonald Engineering Building, at a cost of $167,000, while the Macdonald Trust Fund has now reached the sum of $2,000,000, and the Macdonald Consolidated Trust Fund, which was created in 1927, has a capital of $12,000,000. The Macdonald Trust Fund has been created for the benefit of the Province of Quebec, while the Macdonald Consolidated Trust Fund is for the benefit of the Province of Quebec, the Province of Ontario and the Province of Manitoba, and the Dominion of Canada generally.

The Macdonald College was founded by the late Sir William in 1907. It was designed to educate young men and women for agriculture, and for household and other duties. It has served their purpose well. Thousands of young men and women have received their education there, and are now filling positions of responsibility and honor in all parts of the Dominion of Canada. Around the Elevators

What we'd like to know—Whose birthday party was celebrated on Tuesday evening at Josephburg, in the elevator row. Also what language was used when our local elevator boys were called from their warm beds at 1 a.m. to answer phone calls from this party at Josephburg.

How did our friend Patterson make out with the wooden horse he was making?

Owing to our shortage on the C.N.R., elevator men are having a long earned rest, the latter of course including the C.N.R. staff too.

Aunt Sidonia, an Alsbonian negress was a great advocate of the red as a help in child rearing. As a result of an unmerciful beating which she gave to her youngest and "smartest," she was brought into court one day by outraged neighbours. The judge, after giving her a severe lecture, asked if she had anything to say.

"Just one thing, Judge," she replied. "I wants to ax you a question. Was you ever the mother of a pathetically worthless chilled chile?"

LOCAL NEWS

A large number of Edmonton young people attended the Badminton Club dance here on Monday evening.

No doubt the hockey game between the "Hudson's Bay" and the local junior hockey team attracted the crowd.

Mr. L. Dubue and Mr. J. Harkness were amongst the dancers noticed from Edmonton.

Starting early Monday morning and continuing to early Tuesday morning, between 8 to 6 inches of snow fell. Driven by a steady northwesterly wind on Monday, the snow drifted, blocking up the side roads and many parts on the main highways were difficult to get through.

On Tuesday afternoon the powers motor plow came through the Fort. This plow seems to be the most successful machine at clearing the roads of snow that the government has had yet.

"Song O' My Heart" has attracted widest attention and roused the critics to enthusiasm. Many of the outdoor scenes were actually filmed in Ireland where the story is laid.

This is the first talkie the Fort has ever heard. Be sure and don't miss it. Thursday, March 17th.

Another step has been made in the progress of our fair town during the past week. That is—The War" in paper published by the Fort Saskatchewan High school Literary Socict;

This is to our knowledge the first paper published by the high school here, and the editorial staff are to be congratulated on the newsy items contained in the initial issue.

Mr. W. G. Shera, who has been in the employ of Messrs Jones, Graham & O'Brien for the last 19 years resigned his position yesterday. In 1913 Jones, Graham & O'Brien absorbed the business of Shera & Kidney, and it was at that time that Mr. Shera became associated with the well known local firm, which he has served so faithfully and will be greatly missed in the store, especially by the old-timers. It might be added, just to bear out how methodical and punctual Mr. Shera was, that one could set their watch at eight o'clock in the morning when he arrived to open the store, no matter what the weather was like. We hope he will be long spared to enjoy his well earned rest.

Mr. Shera has been a resident and business man of the Fort for over 20 years.

What Happened At The Town Council Meeting

A regular meeting of the Town Council was held in the Council Chambers last Thursday. Present Mayor Montgomery, Councillors Smith, Simmons, Lalonde and Fillmore.

The minutes of the last regular meeting were read and adopted.

An application from the Fort Hardware Co., accompanied by the required fee, to take down and remove building on lot 31, block 11, and erect on same lot a frame building on a cement foundation, with cement floor, was approved by the Council.

A Bylaw was passed repealing certain old bylaws of the Town. A Bylaw was passed appointing the Secretary-Treasurer, Assessor for the current year. A Bylaw was also passed providing for the Business Tax for the year 1932.

The following resolution was adopted:—That the Secretary-Treasurer be instructed to insert a notice in the local paper that all arrears of Business taxes must be paid by the 15th April next, otherwise proceedings will be taken at once to recover same according to law.

The report of the Medical Health Officer, Dr. T. W. E. Henry, for February was submitted, in which it was stated that there were 27 cases of infectious and contagious diseases during the month ending Feb. 29th., viz; Mumps., that 11 cases of mumps were released from isolation, leaving 16 cases still in isolation.

Accounts for relief to the extent of $74.20; and $602.00 paid to School District on 1st. Instant. were passed by the Council.

Red Cross Society News

Josephburg Junior Red Cross Society held their regular meeting on Friday, March 4th, in the senior room of the school.

The President Lorna Krohn called the meeting to order, and it was opened with the singing of O'Canada and the repetition of the pledge.

Due to the absence of the Secretary Ruth Gunn, her place was taken by Margaret Mann. The Treasurer's and the circulating manager's reports were given by Harold Mohr and Margaret Mann. Following these a report of the arrangements made for the Easter party was given by the convenor of the social committee, Thora Pinder.

Some thirty Easter cards were collected by Lorna Krohn and Ellenore Mohr. These will be forwarded to disabled soldiers in the Red Cross hospital some time this coming week.

The business session being very short, the meeting was soon adjourned. There was no program for the afternoon so Mr. Griffin read a couple of humorous selections which were greatly enjoyed by all.

The meeting closed with the singing of "God save the King".

COMING EVENTS

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held on Thursday, March 11th in the Memorial Hall.

Mrs. J. B. Adamson will speak on St. Patrick.

Visitors welcome.

W. M. S. MEETING

The United Church W.M.S. will meet at the home of Mrs. A. Watt, on Tuesday afternoon, March 15th, at 3:30 o'clock.

School Board Welcomes New Officers

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Friday, 4th March, 1932.

Present Mr F Atkinson, chairman, Trustees R. Todd, R. A. Brown, Dr Grumert and Dr. Calhoun.

The Chairman extended a welcome to the new member, Dr. Calhoun, and to the new Secretary-Treasurer

Dr Henry appeared before the Board and made a complaint regarding school boys and other boys of doubtful age frequenting the Pool Room to their detriment. The Board promised to give the latter its consideration.

The minutes of last meeting were read and, on motion of Dr. Calhoun adopted as read.

The members delegated at the last meeting to interview the Town-Secretary-Treas. reported that Mr. Fitchie had accepted the position of Sec.-Treas to the School Board at $75.00 per annum. This was approved by the Board on the motion of Mr. Brown.

The following letter to the Board from Mrs. Stevenson was read "I wish to thank you all sincerely for the lovely flowers you sent to my husband's funeral and for the kind thought that prompted the forwarding of them. We all deeply appreciated your goodness".

It was moved by Dr. Calhoun and adopted that we endorse the action of the members of the Board who purchased the flowers on the occasion of the death of Miss Stevenson's father.

The caretaker reported regarding the 2 cars of coal delivered this winter at the School that—he considered them of equal value. He thought it advisable on account of the prevailing cold weather that a further car of coal should be purchased. It was moved by Mr. Brown and adopted that the Chairman and Secretary be authorized to arrange for the purchase of another car-load of coal at best advantage.

It was moved by Dr. Grumert and adopted, that—the Secretary arrange to purchase locally if possible 1 case of paper towels at best advantage.

It was moved by Dr. Grumert and adopted that—the Prov. Police be advised of the complaint made to the Board regarding boys frequenting the pool room, and requesting the cooperation of the Police in seeing that the law in this regard is observed.

Mr. Anderson the Principal was present and submitted attendance report for February. He also submitted a list with names of students in the High School whose standing in any subject is less than 45 per cent in the February report, names of such subject in which student received less than 45 per cent and giving the percentage mark in each.

Mr. Todd gave notice of the following motion to be considered at the next regular meeting:—The resolution reads:—Whereas the increase in High School pupil load this coming school term will have to be met;

Be it Resolved that in order to save the ratepayers of the School District an increase in the mill rate which the opening of another room will entail, this School Board approves of (1) following:—

(1) That pupils in grade 12 shall not be allowed more than one school term to finish this grade.

(2) That pupils in grade 11 failing to pass examinations at end of the school term, and still wishing to continue in High School, shall be charged a fee, this fee to be same as non-resident fee, and shall be paid monthly. Any pupil in arrears with fee shall be suspended from High School until amount owing is paid in full.

The following accounts were passed on motion of Mr. Brown:—A. M. Carscadden $8.50; Canadian Surety Co., Sec.-Treas Bond $8.00; R. Buchanan, land trend $4.00; Jones, Graham & O'Brien 50c; Fort Confectionary $8.20 spray; J. Cougo $2.00; F. W. Smith $8.70.

The meeting was adjourned on the motion of Mr. Todd.

Municipal And Town Councils Awaits on Premier

The delegation appointed at the annual meeting of the Municipal District of Clover Bar and by the Council of the Town of Fort Saskatchewan to present to the Provincial Cabinet the resolution concerning the plant ing of wind breaks met the Premier, the Minister of Public Works and the Minister of Agriculture on Tuesday last. The delegation was introduced by the local member, Mr R Hennig, who gave a brief outline to the Premier and his Ministers, of the purpose of the resolution. The speech of the resolution by Mr G. Montgomery, expressed his views on the matter and the need for immediate action. The Ministry of Agriculture advised that some acres at the Oliver Farm was to be seeded to saragana this year, with this object in view.

The Premier intimated that the matter would receive every consideration.

N.S.F. WRITERS OF CHEQUES MAY BE LIABLE TO LAW

Ottawa, March 2. The third reading was given in the House of Commons Tuesday to a measure amending the criminal code.

One amendment changes the "false pretense" clause and provides that a person who gives a cheque, given for goods, is returned by the bank dishonored, the presumption will be that the issuer was guilty of false pretense unless he can show he has reason to believe there were sufficient funds in the bank.

A second amendment provides for the abolition of grand juries in British Columbia.

TOMATOES AND MILK FORM SUNRISE TEAM

Since the British West Indies were brought "Close" to Canada by the Canadian National Steamship Line and freight services, the Bahamas started growing tomatoes on a big scale. Preferential tariffs caused the Bahamian product to sell cheaper than others in Canada. This gave rise not only to a greater consumption of tomatoes in Canada, but to the idea of tomato juice drunk as a beverage daily. Tomato juice consumption in the United States has risen rapidly, due to the healthful qualities of the Tomato, only recently appreciated in full. One American firm reports success with the idea of having a bottle of tomato juice delivered to customers along with the morning supply of milk and cream. This method of distribution is being considered in Canada.

TOWN OF FORT SASKATCHEWAN
Office of Secretary-Treasurer

NOTICE

In accordance with a Resolution passed at a Regular meeting of the Town Council held on the 3rd Instant, notice is hereby given that failing payment of all arrears of Business Taxes on or before the 15th. of April next, proceedings will be taken at once to recover same, according to law.

Jas. Ritchie,
Secretary-Treasurer.

Limit to Wheat Production in Western Canada

Dr. D. A. MacGibbon, member of the Board of Grain Commissioners and formerly head of the Department of Political Economy of the University of Alberta, recently stated in Toronto that he does not expect to see much increase in wheat production in Western Canada. At the same time he does not believe the average exportable surplus will fall below 300,000,000 bushels for many years to come.

Dr. MacGibbon said it was folly to believe the West still contains vast tracts of virgin land which need only be scratched to become rich producing areas.

Make a New Start

The winter of 1931-32 is coming to a close. Admittedly, it has been a winter of trial, of hardship, of great difficulty, even of actual suffering for many. It has been a period to try men's souls, to test their faith and their courage. And tens of thousands have stood the test. The experience may have left some marks and scars, it has undoubtedly taught some lessons, and there, in the long run, may not be without their value. At all events, it is to be hoped so. But the present, and pleasant, fact is that this winter of our discontent, disappointment and trial is almost over. For so much we can offer thanks.

With the ending of this winter, there is also a growing belief, becoming more and more general, that the worst of the so-called business depression from subsidiary business conditions. He says that the present year will be a steady improvement, albeit slow and gradual. It is not to be expected, nor indeed would it be desirable that there will be anything spectacular in this better-ment. As there was at the beginning of the depression in the great stock market crash. The upward movement should be of a permanent character, and to be permanent it must be slow and gradual, with nothing of the mushroom variety about it.

However, during this winter people have been thinking as they perhaps never thought before, thinking seriously, thinking constructively. So many of the false props erected in the days when everything was booming have collapsed, so many false gods were overthrown, so many unsound theories were exploded, so many bubbles burst, that people generally, including statesmen and politicians, great financiers and business executives, as well as the humble laborer and wage earner, have been forced back to simple principles of real values and true ones, and to economics and the basic laws of real reliance upon the tried and true in economics and the basic foundations of life. This, in itself, is a great gain and full of promise for the years that lie ahead.

One writer in a magazine devoted to business raises the interesting question as to the extent to which the ill-considered choice of a word has played a major part in producing the psychological atmosphere of our time from subsidiary business conditions. He says that the word "business depression" had made the hopper and move economic choice of "business recession." It is conceivable that the present attitude toward our present and future would be greatly improved, and our present-day future for some time, might have been distinctly different. While the two phrases might have the same literal meaning, each indicating that business had gone more or less away from it, the word "depression" is more powerful, more hopefully, had we thought of it as having merely "moved" than as having actually "dropped"? It is clear that "recession" to a mind has fearsome word than "depression." Cautiously we picture things as coming back much more easily than as coming up, although the same forces may affect and govern either movement. From now on it would do us harm, and might do some good, in the effect upon ourselves, to think and measure business as having merely receded for the time being rather than as being in a hopelessly depressed state.

Apart from this, however, with the coming of Spring in each and every year all nature rejoices and takes on new life. The grass, the trees respond; all animal life feels invigorated; human beings are inspired with new hopes and animated with renewed energy. The days grow longer and longer, and winter gives place to the longer days of bright sunshine and shorter hours of night. Everybody feels a desire to busy themselves about something useful and productive. Nature itself on every hand is aroused from its long sleep, and seems once again to produce and be fruitful.

We are now entering upon that time of activity and productiveness. It is ours to make the most of it, not in any foolish spirit of undue optimism, but expecting to work ourselves, but with a cheerful hope and expectation that, with the winter of our previous discontent and hardship past, we are again placing our feet in the highroad to better times and in the direction of finer and more permanent and beautiful accomplishment.

It is now up to us as individuals to throw off the depression which has upset and unnerved us, which actually made cowards of some of us, and, realizing that it was rather a recession of former great times which took place, set ourselves energetically and hopefully to the task, not only of checking that recession, but of bringing ourselves, our businesses, our country, back to the more satisfactory plane upon which it has been our happy lot in former years to move and live.

Hon. Faith in Canada

Governor-General Has Unwritten Word Threatens Roots Go Round Foundation

Profound conviction that Canada rests on the soundest foundation any country can have, "a people whose character," whose heart, and whose outlook are fundamentally sound," was expressed by the Earl of Bessborough, Governor-General, at a luncheon in his honor by the Canadian Club at Halifax.

"With the first anniversary of my arrival only a few weeks distant, I am naturally tempted to look back on the events of the past 12 months," said his excellency in his address.

"I have met a good many thousand people, and they leaden impressing on me indefinably that their own rock is really the centre of gravity of the whole Dominion, have collectively impressed on me a profound conviction that the Dominion rests on the soundest foundation any country can have, namely, a people whose character, and the broad, whose outlook are fundamentally sound."

A Woman Geologist

Talmadge Southwestern Awarded Medal in Recognition of Research Work

One of the four medals awarded for the current year by the geologists of Imperial by the Council of the Geological Society of London goes to a Southwoman—Dr. Marie L. Ogilvie Gordon. This talented lady, who is a daughter of the late Rev Dr. Alexander Ogilvie, Aberdeen, receives the high honor for the Lyell Gold Medal, together with £30 from the Lyell Geological Fund, in recognition of her researches in the structure of the Western Dolomites (Tyrol). Dr. Ogilvie Gordon studied at Munich University, and was awarded the Ph.D. degree with highest honors in 1900, which the degree was for the first time conferred by that University on women, says the Glasgow Herald.

Acids In Stomach Cause Indigestion

Create Heartburn, Gas and Pain. Use This Test.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, gas, belching, nausea, etc., are due to excess acidity. Instead of using the usual alkalizing stomach powders in bottle d. direction is advised and many users receive the dangerous symptoms which every stomach sufferer should know.

Artifects, Guratabs are not recommended for the relief of sour stomach, but they help to take off digestive acids instead of from any drugged soda. Simply take one or two Guratabs in a spoonful of powder or four tablets in water after meals. This puts them on the stomach, prevents the sour, acid stomach, and relieves the symptoms. Guratabs are not laxatives. Regular 50c powder or tablet form—never more than a halfpenny in the shilling. Inexpensive to take and by the most delicate form of magnesium for these purposes. It is used by thousands of people who have found stomach trouble no more fear of indigestion.

Chemical research hopes to cut down fishing costs by perfecting a brick which will enable a workman to lay two bricks with the effort now required to lay one.

Internal parasites in the shape of worms in the stomach and bowels of children rob their vitality and retard physical development. They bring pale faces, a constant state of misery and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using Mother Graves' Worm Powders, which are sure death to worms.

The Norwegian whaling companies have not gone out on whaling expeditions for the past few years in great large numbers of people have been left unemployed.

Always keep Dongles Egyptian Liniment at hand, ready to bring immediate relief to cuts, burns, sores and bruises. Stops bleeding at once. Prevents blood poisoning. Essential for sore throat and quinsy.

A sandower with a combined load area of 11 square yards will evaporate some 75 quarts of water from his leaves during growth.

Her mother—Yes, dear, and your father is the closest.

International conference is the still small voice that hails a country when another country is in danger.

Argentine May Exhibit

Plans To Send Wheat To World's Grain Exhibition

The ministry of agriculture has recommended that Argentine farmers send exhibits of wheat and other products to the World's Grain Exhibition to be held in Regina, Saskatchewan, in 1933.

This decision was made at a conference of government agricultural officials seeking to increase the efficiency of Argentine farming methods and to open new export markets for the Argentine farmer.

Daddy—"Yes, certain of it."

RHEUMATISM

DON'T suffer with rheumatism. You get amazing relief from Aspirin. Simple, but quick and effective! Those worst days, when suffering is acute. If you take Aspirin, the pain subsides. Take it right away. Take enough to drive away every twinge. Aspirin can't hurt you. It does not depress the heart, or upset the stomach.

If you ever have those painful attacks of neuralgia, sciatica, lumbago—get some Aspirin and just follow the proven directions. These tablets are just as effective in such suffering as in the case of simple headaches, colds, etc. The relief is felt immediately.

Carry the pocket tin. Aspirin will insure your comfort through the cold season. Get the genuine tablets of absolute uniformity, each bearing the Bayer cross. Buy them in bottles of 100 tablets, or this familiar little box:

(Made in Canada)

Indications Point To End Of Drought Conditions And Prospects Are Brighter

More hopeful than he had dared to be in three years, the wheat farmer of Western Canada today looks forward to another encounter with his greatest enemy—drought—and ponders over the signs, still indistinct, that seem to point to the downfall of his enemies.

His chances of harvesting a normal crop this fall are good, in the opinion of many agriculturists. They are not as bright as in several years previous to the three-year dry period that started in 1929 and ruined or partially-ruined consecutive crops, but they are better than in 1930 and 1931 for a variety of reasons.

Drained of its moisture reserve by three summers of scorching sun, the great wheat country of Alberta, Saskatchewan and Manitoba will be put to seed this spring by thousands of grim wheatmen who know the land must produce this year if they are to keep from sinking further into the slough of debt into which they have been dragged by low prices and crop failures.

Here are some of the reasons they prepare for seeding with hope

(1) More work than usual was done on the land last fall. The late season allowed farmers, particularly in Manitoba, southern and central Saskatchewan and southern Alberta, to prepare far more acreage for seeding and summerfallow than in the last several years.

(2) Sufficient seed will be available to plant as much, if not more, land than last year when 20,353,782 acres were seeded to wheat.

(3) Fall rains and exceptionally heavy snowfall this winter are likely to have the top-soil in a fairly moist condition. The lack of reserve moisture however, makes early spring rains imperative if the crop is to develop properly.

(4) The damp autumn caused growth of weeds, permitting farmers to do considerable cutting and cultivating. In some districts weeds came to seed before cold weather set in. The weed situation generally is expected to be improved in the spring.

(5) Consistent leniency of farmer creditors is not prevailing conditions on debt interest and principle.

Despite the promising signs that point to a change in the times, agriculturalists know that only one thing will bring production back to normal. There must be early-spring rains that will provide moisture for seed germination and insure possibility of self-drifting.

The unexceptionally small amount of moisture that will be absorbed by the land when snow starts to melt is far from sufficient to get the west's 1932 crop away to a good start. This is especially the case in areas dried out by three successive years of crop failure, including southern Saskatchewan, Manitoba, parts of south Alberta and sections of central Saskatchewan.

An outstanding exception to the Peace River country of Alberta, virtually immune to drought and to receive last summer. Prospects there are for another bumper crop. The soil holds almost a normal moisture supply.

It may be that the farmer is a good gambler, or just a plain optimist, but he feels confident this season will provide his crops with a good moisture supply. "The law of averages, if nothing else," said one expert grower, "should give us rain the spring and summer. In other words it's been tails so often these last few flips that heads is due."

In the wheat belt where a scorching sun burned out thousands of acres of crops last summer, smashing the hopes of farmers early in August, more land than usual is prepared for seeding. Late summer and early autumn could not be wrested and hundreds of far-seeing farmers are started cultivating the dry, hard land at a time when normally they would be reaping from it a rich harvest of grain.

Though seed will not be scarce, a good percentage of growers plan to summerfallow from one-quarter to one-third of their land, perhaps planting on the balance more oats than usual to build up depleted feed supplies.

It promises to be a season of hard work for the prairie farmer. He will do a great deal more labor himself than in the days when "two dollar wheat" was his objective, depend on fewer helpers and produce wheat at the same time he bends the drought more economically than at any time since machines revolutionized farming a few years back.

Gardening Notes

A GOOD LAWN

The lawn is absolutely essential from the standpoint of beauty in connection with any garden. an even, velvety sward of rich, green grass setting off brilliant flowers and making an ideal spot for the children to play in. We can use grass for our paths between the beds though if there is much traffic it may not stand up as well as more permanent material like brick. Flagstones, gravel, concrete or cement. Our lawn must be even, the grass should be a deep green, there must be no weeds and no bare spots. In planting a permanent affair of this kind much of the lawn's beauty will be determined. It is essential that the ground be thoroughly dug and levelled before the grass is sown. If at all possible give any weed seeds a chance to sprout and then cultivate to kill them before we sow down. Late fruits and heavy spring rains will settle the soil after which we should rake level again. Grass like any other plant responds to fertilizer and while well rotted manure is one of the best agencies in this connection in the case of lawns it is not so advisable as commercial fertilizer on account of the danger of weed seeds. A good mixture high in Nitrogen, which element furnishes the green growth, is the best to use. A vital factor in this as well as all other forms of gardening is the seed. There are dozens of mixtures on the market and prices vary. But good grass seed means good grass that will stand up year after year is expensive but economical. It makes a fine appearance the first year, but will not badly with frost and are inclined to develop weeds into our lawn. Rank-growing grass as time goes on. Reputable seed houses who depend on repeat year after year for their trade protection and will give the best results under Canadian conditions and their mixtures, tested and approved by Government officials, are safe. One pound of seed is required for every two hundred square feet, and where the ground is shaded special seed should be used. Roll or pound the seeded ground thoroughly. This same process is recommended for treating bare spots upon which the seed should be raked in thoroughly and some protection against birds, dogs or the children, should be placed over the newly seeded spot.

Damage From Insects

Field Pests Do Damage In Canada Totalling An Enormous Amount

The annual damage wrought in Canada by insects amounts to over $100,000,000, Prof. A. T. Mitchener, of the Manitoba Agricultural College, told members of the Canadian Society of Technical Agriculturists at Winnipeg.

Professor Mitchener added that in 1932 a more extended area of Manitoba will be infested with the grasshopper plague than was the case in 1931.

A full-size 40-quart milk can may now be made in one piece.

Lorne, France, is to have its first swimming pool.

Canada Fails To Keep Pace With Other Countries In The Improvement Of Dairy Herds

Protect Fruit Growers

Hon. Robt. Weir Addresses Meeting Of Canadian Horticultural Council

Reference to the forthcoming Imperial Conference, which will have a bearing on the trade of commercial horticulturists, was made by Hon. Robert Weir Minister of Agriculture, in a welcome address at the 10th annual meeting of the Canadian Horticultural Council at Ottawa.

"The government calls for and relies upon the advice of the horticultural council, knowing that it represents all branches of the industry," said Mr Weir. "During the past few years the government has been trying to give the growers something in the way of a much needed protection in the form of a reasonable tariff. In view of the coming Imperial Conference the government is particularly zealous to get the figures on the cost of production of various fruit crops, and the prospects of supplies in one, five and ten years, with the estimated cost. The care with which this information is prepared will determine the results the commercial horticulturist may expect from the conference."

Lindbergh Does Not Change

Just As Quiet At Thirty, But Trifle More Mature

Charles A Lindbergh was 30 years old the other day. The day found the prince of the sky-ways even more skilled in the science he loves—and just as averse to talking about him, self. The aged phrase "Business as usual," still applies to him—so far as any one can discover. Charles Augustus Jr. is now a toddling youngster. A trifle more mature, the flying colossi is in most respects just the same tall, slim youngster who speeded the heart beats of a world with his Paris flight. His light hair is as tousled and his voice as boyish. The last twelve months have been eventful in the Lindbergh career. Twenty thousand miles more or less, would be a rough estimate of his year's air travels.

Value Of Cow Testing

Testing Milk Cows For Production Necessary To Success

The value of testing milk cows for production was emphasized at Saskatoon by C. Lamar, dairyman of this district, on the occasion of a banquet tendered him by the Saskatchewan Herd Improvement Association, upon his winning the association cup for highest average production, and the Star-Phoenix trophy for the greatest increase in production per cow.

Mr. Lamar said he tested every cow and unless they measured up to expectations he got rid of them. He said he bought all his feed and yet made a profit from his operations.

It was reported that the average cow owned by members produced 39 pounds more butterfat in 1931 than in the previous year despite unfavorable weather conditions.

Canada is not keeping pace with other dairy countries in improvement of dairy herds, in opinion of Dr J. A. Ruddick, dairy commissioner, who addressed the Dairymen's Association of Eastern Ontario at Kingston. He declared the movement to "register" cows in this country, for though there has been a gradual growth in cow-testing the proportion of animals involved is still insignificant in comparison with the total.

"It is somewhat significant," says Dr. Ruddick, "that in New Zealand, Denmark and other countries where cow-testing has made most progress, the herd owners have taken the initiative and have borne most of the cost. In Canada, the movement is showing best results in Saskatchewan and British Columbia, where most of the cost is borne by the farmers themselves. This seems to suggest that when the people pay for a service they get more out of it. I sometimes think that governments do too many things for the people in this country."

It is interesting, therefore, to find in the report of the dairy commissioner for Alberta a statement that "organized cow-testing work has been carried on by the Dominion Department for a number of years, but until quite recently has not received the attention and support that it deserves at the hands of the people. Our neighboring provinces of British Columbia and Saskatchewan are developing this part of our dairy industry at a very rapid rate, and there is every reason to expect that the lower price level for dairy products will give a strong impetus to the extension of any line of work that will promote a lowering of the cost of milk production."

How The Air-Cooled

Eliminates Oil Shaking In Tread Let Heat Is Kept Down

It is an established fact that heat is a great enemy of rubber. Tests show that tires sometimes get as hot as 200 degrees, and that this temperature shortens their life.

A Minneapolis inventor, announces, states World's Work, that a successful air-cooled tire has been devised. Hundreds of improvements are employed in the tire tread; the hot air is constantly being squeezed out by contact with the road and replaced by cooler air. The result, it is claimed, is a reduction of as much as 50 degrees in heat.

The inventor believes that it will be possible to make such a tire containing much more rubber than the present types, and that eventually tires will be built which will last as long as the car.

Large Order For Shingles

British Columbia Ships Seven Million To Western Ontario

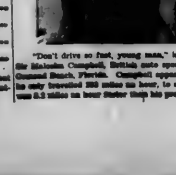
A train load of 32 cars of British Columbia shingles left Vancouver for 34 cars, representing 7,000,000 shingles, or enough to roof over 400 average dwellings, has been shipped from Vancouver to eastern Ontario.

Even in normal times such a shipment would be exceptional. In existing conditions it is hoped that it is a token of renewal of demand for shingles and lumber generally in eastern Canada.

The order is from Weston, Ont.

"I take more notice of actions than words."

"You are evidently not used to modern bakgroun."—Blues Blower, Madrid.



"Did you run against a car?"

"No. Against my will."—Pele Mele, Paris.

John D. Hands Out Advice

"Don't drive so fast, young man," is what John D. Rockefeller advised Sir Malcolm Campbell, British auto speed king, at their recent meeting at Ormond Beach, Florida. Campbell apparently took John D's advice, because he only traveled 253 miles an hour, to establish the new land record. This was 8.5 miles an hour faster than his previous record of 245 miles an hour.

Boy Of Hope

Colleges Of Wheat Student Not Due To Work Hereafter

There never has been a world surplus of wheat, according to Dr W W Swanson, professor of economics at the University of Saskatchewan, in an interview at Regina, Sask. He expressed the opinion that the colleges of the international wheat market was from other factors, as the alleged surplus had never existed.

For this reason the economist expressed the view that those who wailed that dollar wheat would never return here were not taking into consideration that the price of wheat had been linked with the prices of other commodities, some of which had dropped to a greater degree than wheat.

As a ray of hope to the grain growers and others involved, he expressed the opinion that normal prices are due to make a steady recovery from a standpoint of its strong statistical position.

Dr Swanson qualified the statement when he said The course of these prices, however, will be governed by an industry complex combination of factors, not the least of which will be the purchasing power of the pound sterling, the outcome of which no one can definitely forecast."

Coupons For Money

Farmers Solve Difficulty When Banks Refuse To Make Loans

"If the banks won't lend any money make your own money," farmer cooperators at Le Roy, Sask. now declare, and last summer they built a token factory which had run several years ago but closed down when the price of wheat was high and farmers stopped milking cows. They also knew how to make good cheese

Now they have coupons and will milk to make cheese but cheese is a commodity that is not immediately sold. Because it must mature for several weeks.

They tried to borrow money from the banks on the security of cheese coupons but banks are not interested in agricultural produce at present.

So they printed coupons paying six cents per lb. and signed a note with promise of redemption when the cheese was sold. As the cheese was sold them coupons were redeemed and these farmer-financiers were able to pay themselves an interim dividend of 30 cents on every hundred that the farmers got for their milk. All of the coupons were redeemed within two weeks of the time the last cheese was sold.

NEIGHBORS TALK

"I am employed in a theatre and it is a problem to make ends meet, as I help support your mother and sisters. I like to dress well but haven't very much to spend on clothes. To give the appearance of variety in my wardrobe wardrobe I change the colour of a dress or else hangs as soon as the linings become faded. I always use Diamond Dyes for the work — using them as they do give a great number of new things I have.

"I also know Diamond Dyes from our wardrobe mistress. She says she has tried all the dyes on the market but none do such splendid work and are so easy to use as Diamond Dyes. I understand they have a person's most popular dyes — and they seem to be."

New Type Of Optical Glass

For Use In High Grade Telescopes and Field Glasses

Discovery of a new type of optical glass was claimed by Dr. R. Rayment Slaged of the University of Buffalo. The new glass was described as possessing "great resistance to weather and a high index of refraction." It was the first glass ever produced which contained bismuth, Dr. Riegel said. Development of the glass was completed in the Bailey and Sharp laboratories at Hamburg, N.Y. The glass was expected to be used in high grade telescopes and field glasses, as well as laboratory microscopes.

SUNDAY SCHOOL LESSON

MARCH 13

JESUS COMFORTS HIS DISCIPLES

Golden Text "Peace I leave with you. My peace I give unto you: not as the world giveth, give I unto you. Let not your heart be troubled, neither let it be fearful John 14:27

Lesson John 14 to 17

Devotional Reading Isaiah 40:1-8

Explanations and Comments

Christ the Comforter, verse 1. The disciples were perplexed and troubled; their hearts were failing them as they approached the last crisis in their Master's life. It was faith in the Father that kept Christ serene and powerful to near His end, and faith in the Father and the Son would uphold the disciples in that terrible hour. "Let not your heart be troubled." He said to them in their last talk together before the battle is empty "well feel yours younger eyes will brighten — step your shoulders' curves straighten — you'll sleep sound, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation — you will probably marry and have children. Your health, fitness, happiness. Send for free booklet. Tells how.

Advance In Photography

New Synthetic Dye Records Hitherto Invisible Objects

A new synthetic dye which photographs infra-red heliotropic rays has been reported to the Optical Society of America by Dr. C. E. K. Mees, director of research of the Eastman Kodak Company.

This dye, xenocyanine, when used in emulsion on a photographic plate records rays which are longer than anything hitherto rendered visible

The new dye "sees" these waves out beyond 11,000 angstrom units. An angstrom unit is about one-two-hundred-fifty-millionth part of an inch So this latest step into the invisible picks up waves a little less than a twenty-thousandth of an inch long

Objects photographed with infra-red have the same appearance as those seen with visible light.

FINANCES OF GREAT BRITAIN ARE IMPROVED

London Eng Britain's improved financial condition was reflected in the announcement of Neville Chamberlain, Chancellor of the Exchequer that British citizens again may buy foreign exchange

Restrictions against the purchase of foreign exchange were imposed to protect the pound when Britain suspended the gold standard last year

Asked whether restrictions against foreign loans would be lifted the Chancellor indicated it would be unwise for us to lend promiscuously overseas

A cheer arose in Commons when Mr Chamberlain announced that $150,000,000 of $300,000,000 borrowed in the United States last summer to bolster the pound, would be repaid

The Commons also passed bills to repeal duties on French bonkers of £20,000,000 ($99,600,000) and Italian bonds for purchase had been reduced to £7,000,000 ($24,360,000)

Mr Chamberlain recalled that an additional £70,000,000 of French advances last August were represented by treasury bonds in that amount in the hands of the French holders

"We have no power to require them to accept payment before August," he said, adding that the original £80,000,000 (£270,000,000) obtained from Britain remains intact and is available for making the repayment

The Chancellor said he desired to remove apprehension that repayment will be obtained from business men to the British taxpayers.

"The necessity of acquiring foreign currencies with sterling at its present level involves an apparent loss which will be borne by the exchequer on capital account," he asserted. "This loss is a present offset by the enhanced value of our stocks of gold. Accordingly no burden is being placed on the current revenue of the budget."

The $180,000,000 repayment to the United States was final, the Chancellor said.

"The lenders have consented to return a proportionate part of the one per cent commission as from date of maturity of existing bills," he said.

Loss Pay For Operators

Commercial Telegraphers Asked To Take Ten Per Cent. Cut

Montreal, Que — The Canadian Pacific and Canadian National Railways Companies have notified the Commercial Telegraphers' Union that for one year commencing April 1, a straight many reduction of 10 per cent will be introduced in the pay of commercial telegraphers. The companies' decision has been communicated to the various locals. Seventeen hundred employees of the Canadian National and 1,000 C.P.R. employees are affected.

The Canadian Pacific Railway Company, Wednesday, March 2, announced that effective March 1, the reduction in working time of three days per month, or ten per cent, in general office staff has been changed to two days per month. This brings this class of employees into line with the same rate of wage reduction as has been applied to the running trades and clerks.

Asks For Definition

Ottawa, Ont. What is a billion? This is the question which the people of Canada is asked to answer. Senator Forest informed the senate that an English dictionary defined a billion as a million million, but added that this definition did not apply to the United States where a billion was a thousand million. Senator Forest wished to know which rule applied in Canada. The answer will probably be forthcoming in due course.

Oldest Albertan Dead

Lethbridge, Alberta. Believed to be the oldest man in Alberta, Adams Jemmet, of Aetna, a community near Carmton, is dead. He was 104 years old. He was born in Norway, emigrated to United States in 1867, and came to Alberta in 1897. Descendants of the fifth generation survive him.

Bankers For South America

Plan For Large Scale Settlement From Europe

Winnipeg, Man Plans for large scale settlement of Doukhobors from Europe in various countries of South America are under discussion at a conference of Doukhobor leaders and their agents here Peter Veregin patriarchal head of the Christian Community of Universal Brotherhood the official name for the Doukhobor sect, disclosed the nature of the conference to the Canadian Press.

He confirmed reports that negotiations are going on to acquire 200,000 acres of land in Columbia on which to settle 50,000 Doukhobors. The project however, had nothing to do with the Doukhobor community in Canada he declared There was no thought of moving any members of the community in Canada to South America

Far from any [illegible] of the sect Canada Mr Veregin said he organization was particularly pleased have building grain elevators for the use of their people and developing their valuable powers to serve their fellowmen

J M Hackney, St Paul, Minn president of the International Cokas Alloys Corporation which is negotiating the land deal in Columbia, is taking part in the conference An official statement issued by a member from Berlin Germany, Mr Veregin declined to name others but said he had arrived from London, Eng and from Canada

An interesting feature of the conference was the absence of Peter Veregin, Jr. All afternoon and night he battled vainly to fight his way out of his icy prison Occasional air pockets caused him to lose his altitude.

When Peebles failed to return for hour workers suspected his fate and finally succeeded in digging him out alive but unconscious.

Higher License On Radio Receiving Sets

Amount For Him Been Increased To $2.50

Ottawa, Ont. The annual license fee on radio receiving sets will be increased as from April 1, next, to $2 per year, it was announced by Alfred Duranleau, Minister of Marine. This rate has been $1 per year in the past and the increase is expected to bring the annual revenue to nearly $1,500,000.

The minister also stated that an increase in the license fees for commercial broadcasting stations on a graded basis, was under consideration.

Anxious To Settle Reparations Problem

Premier Thinks It Has Been Political Issue

Paris, France A growing desire to settle the reparations problem on the basis that it has ceased to be a financial question and has become primarily a political one, was reported in diplomatic circles.

Premier Andre Tardieu, who returned from the world disarmament conference at Geneva, had a conference with Leopold Van Hemek, the German ambassador, and Andre Francois-Poncet, French ambassador, to Berlin.

Decide On Valuation Of Empire Goods

Provisions In Preference Regulations Under New Import Duties Act

London, England. The Board of Trade announced that the preference regulations under the new Import Duties Act provided goods shall not be deemed to have been manufactured in the British Empire unless at least 25 per cent. of their value is derived from Empire materials or labour, or from both combined.

Where a number of separate articles are included in one parcel or consignment, each article will be treated separately.

The value of manufactures will be taken to be the cost to the manufacturer at his factory or works, including the value of containers, but not including manufacturers' or exporters' profit.

Rescued From Snowslide

Gentleman Buried In Drift For Twenty-Six Hours

New Westminster, B.C. Buried in an immense snow drift for twenty-six hours, John Peebles, 19 Kittle Valley railway section man, was rescued alive and is now recovering in hospital here He is suffering from frozen hands and feet and from exposure

Peebles was inspecting the track when the snowslide caught him and buried him under about eighteen feet of snow All afternoon and night he battled vainly to fight his way out of his icy prison Occasional air pockets caused him to lose his altitude.

When Peebles failed to return for hour workers suspected his fate and finally succeeded in digging him out alive but unconscious.

Aid For Farmers

Bill To Provide Seed Grain Introduced In Manitoba Legislature

Winnipeg Man Manitoba farmers in need of feed for their livestock and of seed grain, will be aided under a measure introduced in the provincial legislature by Hon. Albert Prefontaine, Minister of Agriculture. It is intended to assist parts of the province stricken with total crop failure and will be repeated through the stages to become law at an early date.

The province will guarantee loans by banks to municipalities for the purchase of seed grain and fodder Any possible loss on the loans will be shared on a three-way basis by the Provincial, Dominion and Municipal Governments. The bill, however contemplates repayment of advances by farmers receiving relief.

So far, it was stated, the Dominion Government has not agreed to join in the aid asked but it has offered to lend the province funds necessary for seed grain and fodder relief

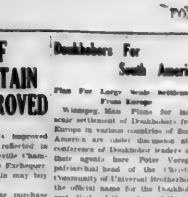
Dominion Note Advance Totals Twenty Millions

Figures Given In House By Minister Of Finance

Ottawa, Ont. The present total [illegible] under the authority of the Finance Act to the banks in Canada by the Minister of Finance was $20,000,000, Hon E. N. Rhodes stated in the House of Commons. The rate of interest being charged the borrowing banks was three per cent and the lowest rate of interest charged the banks under the Finance Act since 1921 was also three per cent., the Minister of Finance declared.

Dougias, Isle of Man. The Isle of Man joined Great Britain as a protectionist country when the Manx Tynwald court imposed a ten per cent. tariff on all goods except those from the free list of the United Kings. dom's tariff act and with the addition of sugar, table waters and dried fruits.

Would Accept Leadership



Eamonn De Valera leader of the Republican forces of the Irish Free State who is prepared to attempt to form a ministry

No Foundation For Rail Merger Rumor

Royal Commission Report Will Not Be Given For Some Weeks

Ottawa, Ont. Rumors to the effect that the Royal Commission on railways will recommend the amalgamation of the Canadian Pacific and Canadian National with corporation management are not justified in the opinion made by the commission studying the railway problem There will be no report from the commission for some weeks and unanimity in recommendation is highly improbable

Lord Ashfield, one of the commissioners is in London, England, and the date of his return to Canada is indefinite. It is doubtful if parliament prorogues by May 15th, if the Royal Commission's recommendations or recommendations will be forwarded to the government in time for action this session. It is also quite apparent there are irreconcilable differences of opinion in the commission which will not make for speedy action

Unemployment National Crisis Maintains King

Ottawa Ont. The Bennett Government allowed its unemployment relief legislation to become "no dead as Julius Caesar" and "far extinct as the dodo without offering an alternative scheme, Right Hon. Mackenzie King, Liberal Leader, charged in the House of Commons.

Despite the Liberal Leader's many-sided attack on the Government's unemployment relief record, it gathered few supporters from the third party group. William Irvine, U.F.A. Wetaskin-n, announced the group there would refrain from voting on the [illegible] Hepburn, Liberal Premier of Ontario, and Heenan former Minister of Labor Although not agreeing with the government s policies, the group, he said viewed the motion in the party political. A. W. Neill, Comox-Alberni and Henri Bourassa, Labelle, the two independents, declared they would not support the Heenan motion.

Unemployment, said Mr King, had become a national crisis. The government's remedial policy had failed, yet it offered no alternative. The only move it had taken was to prepare a resolution to prolong for six months the life of the "blank check" legislation. Not even this had failed because the act automatically expired at midnight.

"I believe this problem of unemployment," pronounced Mr King, "is going to be with us, not only for several months yet, but I fear for years." Only another year of the present [illegible] of national [illegible] mission to advise the government was advocated by the Liberal Leader. It would represent labor, farmers, economists, municipalities, provinces, rail crews and other organizations with special knowledge of conditions.

Parliament took official notice of the "bad cheque artist," when it condemned Government has not agreed to the aid asked but it has offered to lend the province funds necessary for seed grain and fodder relief

Use Peace Rods

C.N.R. Steamships May Inaugurate Fortnightly Freight Service Between Montreal and Vancouver

Montreal, Que. — The Canadian National Steamships announced the possibility of a fortnightly freight service between Montreal and Vancouver via the Panama Canal this summer, and stated as a certainty that the "Canadian Britisher," the "Canadian Ranger," and the "Canadian Winner," would, next summer, operate a monthly service over this route.

This intercoastal service, maintained between Vancouver and St John, N.B., and Halifax in the winter months, "has opened fertile coast markets which formerly were beyond the reach of eastern Canada manufacturers economically," the statement says. Lumber from British Columbia and general merchandise from eastern Canada are the commodities carried.

Welsh Students Destroy Flag

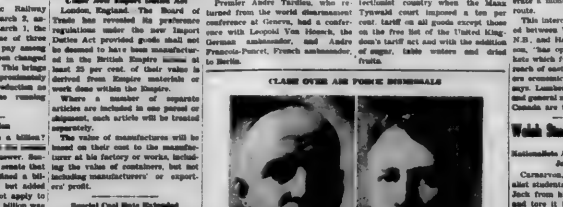
Nationalists At Carnarvon Tear Union Jack To Shreds

Carnarvon, Wales. Welsh Nationalist students hauled down the Union Jack from historic Carnarvon Castle and tore it to shreds in the market place.

Their action was a reprisal for the government's refusal to accede to the Welsh Nationalists' demand that the red dragon flag of Wales should fly over the castle March 1, St David's Day.

Sings To Royalty

London, Eng Ivan Davis, 16-year-old Welsh singer who recently toured Canada, is the proudest boy in London. He spent an hour at Buckingham Palace singing numbers in Welsh and English before the King, the Queen and members of the royal household.



Hon. J. L. Ralston (left) former Minister of National Defence in the King Administration, and Hon. D. M. Sutherland (right) Minister of National Defence, who clashed in the House of Commons debate on civil service salary reduction, when the matter of the dismissal of 160 officers and men of the Royal Canadian Air Force was discussed. Col. Ralston described the dismissal of the men as a breach of contract. Col. Sutherland defended the Government's action.

CLASH OVER AIR FORCE DISMISSALS

Bus Competition

By Henry Thornton Before Tu Problem Confronting Railways

Rankings of the American commercial are in no danger of lapsing into complete solvents to the opinion of Sir Henry Thornton according to an interview recently by him in Courtney Ryley Cooper and related in a recent issue of the Saturday Evening Post. Admittedly, Sir Henry states, they are in difficulties now, but that is partly due to the depression which has affected all industries, and partly due to irresponsible interfering of truck and highway competition.

A third factor, now being overcome is the apathy of a public not sufficiently aware that a railroad's trustees are a nation's treasure. Still another factor is the railroads themselves, which must now undertake a diagnosis of their own ills.

Buses and trucks have smashed tradition, and the railroads must do the same. The shipper-to-consignee delivery offered by trucks will have to be met by the railroads. Sir Henry points out. A passenger rail has returning with the frequency of the highway bus will also be necessary. Finance in considering the establishment of such a bus on all its branch railway lines, and American and Canadian railroads are experimenting in this direction. Improvements in overnight service are also being considered.

Sir Henry summed up the railroad's problems in the following words:

"... there are three forms of transportation, land, air and water. Each has its respective sphere and respective use Our job is twofold. To keep each one in its proper channel and confined to its proper use, and then to develop the proper degree of business, economical and friendly efficiency, each complement not complementary and necessary, one to the other"

—Winnipeg Free Press.

Bus Is Fired On

Newly Fighting Intel

Canada's Position In Wheat Growing Industry Is Improving

Official figures showing the volume of Canadian wheat in at interior elevators 15 last indicate that the country's position in the wheat-growing industry is slowly righting itself.

At that date there were in store in Canada 199,471,000 bushels of wheat as against 216,700,000 last year, 227,-000,000 in 1930, and 253,000,000 in 1929 bushels in 1928.

In view of Canada's small crop in 1931 it might have been expected that there would be a greater reduction to the amount of Canadian storage that left with the world's wheat purchasing power as low probably we have sold off as much as we could export. The main point is that we are slowly reducing the heavy carryover which, for a couple of years has kept down a good market on the market.—Lethbridge Herald.

Many astronomers will journey to Fraybuss, Maine, in August to obtain a vantage point to view the total eclipse of the sun.

Rose—Johnny told me a wonderful story last night."

Violet—"Did he tell it well?"

Rose—"Well, he had his audience."

W. N. U. 1932

Expense Of Counsel

English Judge Tells Accused Murderer He May Smile

Clarifying his statement under his own title a dearby hat, an English judge wrinkled into a Bond Street jewelry shop in London, England, recently, and said the memorial headpiece for £15,000 so that it could be stripped of its jewels and modified to increase the soldier's gold supply.

The identity of the duke was not disclosed but it was said that his family has held baronial rank for nearly five centuries. His action was cited as an example to other fortune to disgorge their gold.

The transaction was the latest consequence in Britain's "gold rush" in which thousands of golden trinkets ornaments and coins have been sold as that their owners can benefit from the present high price of gold and the nation benefit by its export.

The situation has developed "stirring patriotic appeals" which refuse to make a profit on their coins, taking them to their banks and exchanging them for pound sterling notes, thus sacrificing eight shillings on each coin. The banks have to send the coins to the Bank of England and then the government nets an eight shilling profit besides recovering the gold reserve.

Train Is Safe Place

Passenger On Canadian Railroads Not Victim Of Hold-Ups

Taking Many Chances

The individual who guts on a passenger train and does not stick his head out of the window, is in a very safe place.

In the year of 1930, only one out of each group of 101,267,000 passengers carried by Canadian railroads was killed, and only one in 9,000,000 was injured.

In these days when so many strange things seem to be happening, that is a rather comforting statistic. The passenger can enter a coach, have a meal or go to bed at night, it's feeling of security backed by the knowledge that the chances of emerging alive are 101,267,000 to one in his favor.

We take it, then, that his chances for safety are great on a Canadian passenger train than any other place.

Gold Rush In Sweden

Is Prospected and Conducted By Big Business Interests

Although the gold fever world has heard almost nothing about it, there is a gold rush in northern Sweden, which promises to be the biggest in Europe since the days of the Klondike. Companies in the expected records. But up in the Arctic circle, beyond the confines of civilization, where rich deposits of gold, as well as silver, copper and zinc are known to exist, the rush is on in full force, in terms of committing gravel as long associated with such discoveries. But it is strictly gold fever, organized, prospected, and now being developed by big business interests.

"Is the upset about her broken engagement?"

"Completely unsmet of."

Universe May Be Infinite

If and When Observers (The Possible Existence Of Other System

Belief that a new stellar system, millions of light-years away from the earth, may be discovered with the new 200-inch telescope to be erected at Mount Wilson, was advanced recently by Dr. W. Wilson de Sitter, astronomer at the University of Leyden, Holland.

"Beyond Analogy," he said, "and in a conception of the universe free from the finite limits hitherto imposed upon it by astronomers. The universe is greater than I've ever imagined. It may be infinite.

"I doubt if anything resembling human life will be found on any other planet, but I think it probable that soon, in the future, may be able to travel from the earth to other planets."

The proposed Mt. Wilson telescope, when in operation by the largest telescope in use at present, will be eventually superseded by instruments twice as large again, Dr. de Sitter predicted.

The Smallest Pretzels

Discovery Of the Neutron Is Hailed As Great Scientific Find

The discovery by the Cavendish laboratory, Cambridge University, England, by Jas. Chadwick, of the "neutron," a particle so minute it carries no electrical charge, and hailed as the greatest find in the scientific world since the electron, the proton and the X-ray, was announced in a despatch from the Manchester Guardian.

The "neutron" was described as one of the ultimate particles in nature, so tiny it would take 200,000,000,000,000,000,000 to make a mass weighing an ounce. Neutrons are not waves, the despatch said, but particles, but they have no particles, hitherto unknown powers of penetration.

In the realm of astronomy and the study of fundamental importance, representing the first step in the evolution of matter out of primeval electrons and protons, the paper said.

Couldn't Feel Him

An Irishman was posting a letter, but was told at the counter it was over weight.

"Over what weight?" asked he.

"Over three ounces," said the clerk. "You'll have to put another stamp on it."

"Get away!" said the Irishman with a grin. "Sure, if I put another stamp on, won't it be heavier still?"

Baby Shooting Cancelled

With a view to conserving its fur-bearing seals, the National Game Council of Canada has decided to cancel its 1932 annual meeting which usually is held in March. It was announced at the headquarters in Ottawa. Officers of the committee will be elected by mail ballot.

Palestine's New Growth

Four Pounds Has Been Surprising Increase In Population

The dream of a return to the Holy Land which the Jewish race has cherished for seventeen centuries is at last finding its fulfillment, and Palestine, partly as a result of this, has grown in population during the past decade 1.1 a surprising degree.

Provisional figures for the census taken last year show 1,035,154 inhabitants compared with 757,182 in 1922. Jerusalem has grown from 62,578 to 90,536, the increase being particularly marked in the Jewish quarter. Its port, Jaffa (Joppa), has 34,617 inhabitants in 1922 and now 51,876. The Jewish town of Tel Aviv, nearby, has increased from 12,582 to 36,169. In the north, at the foot of Mt. Carmel, Haifa, which had 24,024 ten years ago, has more than doubled in size and reports 50,000

Since last census more than 80,000 Jews have arrived as Palestinian immigrants But owing to the small area of cultivable land, there are limits to the number which the country can quickly absorb. The requirements as regards settlers are for agriculturists rather than town-dwellers. An agricultural colonization has recently been hampered by lack of funds. Palestine, like other parts of the world, has been exper-encing financial stress.

While its Jewish population has been greatly increased by immigration, there has been an even larger natural increase among the Moslem inhabitants from 590,890 in 1922 to 753,700 in 1931. During the same period the Jews have increased from 83,790 to 159,485 and the Christians from 73,324 to 82,169 Toronto Daily Star

Protection From Frost

Issuing a Cheque Without Funds Is the Bank May Be Made Criminal Offence

The issuing of a cheque, dishonored by the bank for lack of funds and given for goods obtained, will be an offence under the "false pretence" section of the Criminal Code unless the issuer call show he had reason to believe that he had the money in the bank to meet the cheque. This is the purport of a measure which Hugh Guthrie, Minister of Justice, will introduce in the House of Commons. Similar legislation, it is understood, have been received by the minister from people who have been defrauded in this manner.

Another proposed to the same bill is to abandon grand juries in British Columbia. This step has been taken some ago in the case of Manitoba, Saskatchewan and Alberta; and the Supreme Court Province is desirous of a similar action being taken in its case.

The day begins at the International Date Line, which corresponds practically to the 180th meridian from Greenwich.

Real is only good when worse happens.

Potatoes Used As Silage In England

Farmers Have Found Profitable Outlet For Surplus Crop

In seasons like the past when the potato crop is too abundant to be marketed profitably, it is important that some means be found of using the surplus. Almost every year there are considerable quantities of surplus potatoes left over after the marketable crop has been graded in England it has been found practicable to turn the surplus into silage for the feeding of stock.

According to an article describing the system employed at the agricultural institute at Cirencester, in the Journal of the Ministry of Agriculture, a green crop was carried directly as it was cut to the site of the silage stack A layer of the green crop one foot thick was placed evenly over the ground. A layer of one ton potatoes was then spread evenly over the green crop Another layer of green crop was then laid and alternate layers of potatoes and green crop were continued until all the potatoes had been used. To consolidate the mass the carts hauling the crops were driven over the accumulation. When complete the sloping ends were cut away and the material thrown on the top. The following day a layer of about six inches of soil was placed evenly over the top, and a few days later the sides were also covered with soil. A few weeks later, when the soil was opened very little wastage was found, and the green silage was sweet and pleasing to the smell. Where the heating had been greatest the tubers were partly cooked, but in no way damaged for feeding. Near the outside of the pile where the heat had been less the potatoes were white in the flesh and slightly roughened. The silage remained in fine feeding condition for

For the purpose of testing the value of the silage for feeding purposes six bullocks of about equal age and weight were divided into two lots. The lots were fed alike, except that one received silage, while the other received dry sugar beet pulp in addition to the usual rations of concentrates and straw. The silage was much relished by the cattle. The bullocks fed on the two lots were practically equal, amounting to 1.65 pounds per day. The condition of the cattle was therefore, was practically the same, but the silage-fed bullocks are stated to have been of better appearance. They handled better, and the skin was softer and more pliable. This better appearance resulted in a slightly better price when the animals were sold at auction. The difference amounted to about one shilling per hundredweight.

War Veterans' Settlement

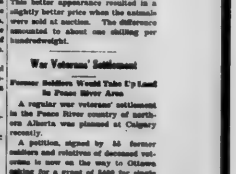
Former Soldiers Would Take Up Land In Peace River Area

A regular war veterans' settlement in the Peace River country of northern Alberta was planned at Calgary recently.

A petition, signed by 55 former soldiers and relatives of deceased veterans, is on the way to Ottawa asking for a grant of $400 for single men and $500 for married men who take up farms or homesteads in the Peace River area. Sufficient money, to be given the association as a whole, is asked for purchase of farm equipment.

A rubber sponge for washing automobiles that can be fastened to garden hose is the idea of a New Jersey inventor.

The soy bean was known in China more than 5,000 years ago.



"Does it rain continuously in the westland?"

"It seems to winder?"—Virginian, Calif.

A Very Nervous Child

Allum Lee Credits Dr. Williams' Pink Pills

Make No Longer Bottles Use.

"I am not quite 14 years old," writes Allum Lee, Dungeia, Ont. "This summer I was thin and nervous. I would cry at night; even get up and walk all through the house in my sleep. Mother sent me away for a long holiday, but when I came back my nerves were just as bad. One day another brought me three boxes of Dr Williams' Pink Pills. They worked like magic. I have gained 8 pounds since September, and it takes a lot of sense now to bother my nerves. And have the most blooms in my cheeks again! It's a delight to tell other girls what Dr. Williams' Pink Pills did for me."

Dr Williams' Pink Pills effect such transformation as the become their remedial action is to enrich the blood, which restores the exhausted nerve tonics and revitalizes the whole system. At your druggist's in the new glass container. 50c a package. 28

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Outcast," "The Shrewd Bidder & Daughter, Ltd., London.

CHAPTER XIV. Continued

She felt that if only Judith could better comprehend Glyn's nature, she would not, after all, consider him a him less hardly, but, to a certain extent, would find healing for her own bitterness of resentment and hurt pride.

Judith was an unhappy woman, entitled to any of those blows in life's lottery, but Ann Jesse hated people to be unhappy.

So that it was with considerable satisfaction that she set out across the park towards Willow Ferry, crossing the river by the footbridge which spanned it at a point about a quarter of a mile below the scene of her bathing mishap.

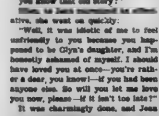
Judith welcomed her with unaccustomed warmth, and after lunch completely won her heart by a candour seemingly akin to Jess's own.

"I've been quite hateful to you since you came to Staple," she said frankly. "Just because you were — who you were, I suppose—" turning her head a little aside —"you've heard my humour (and old story)."

Ellen, at Jess expressed her affirmative, she went on quickly:

"Well, it was idiotic of me to feel unfriendly to you because you happened to be Glyn's daughter, and I'm honestly ashamed of myself. I should have loved you at once—you're really a dear, you know!—if you had been anyone else. So will you let me love you now, please—if it isn't too late?"

It was charmingly done, and Jess



CHILD need REGULATING?

CASTORIA WILL DO IT!

When your child needs regulating, remember this: the organs of babies and children are delicate. Little bowels react to gently urged—never forced. That's why Castoria is used by so many doctors and mothers. It is specially safe for children's delicate systems—no harsh, harmful drugs, no narcotics. You can safely give it to young infants for colic pains. Yet it is an equally effective regulator for older children. The next time your child has a little cold or fever or a digestive upset, give him the help of Castoria, the children's own remedy. Genuine Castoria always has Chas. Fletcher's signature.

Chas. Fletcher

CASTORIA

W. N. U. 1932

received the friendly overtures with all the enthusiasm dictated by a generous and spontaneous nature

"Why, of course," she agreed gladly. "Let's begin over again"—smiling. Judith smiled back.

"Yes, we'll make a fresh start.'

After that, things progressed swimmingly. The slight "game" which had attended the earlier stages of the visit vanished, and very soon, prompted by Judith's eager, interested questions, Jess found herself chatting away quite naturally and happily about her life before she came to Staple and confessing how much she was enjoying her first experience of England.

"It's all so soft, and pretty, and old," she said. "I feel as if Staple must always have been here—just where it is, looking across to the Moor, and nestling sometimes, so much as to say, 'I've been here so long that I know some of your secrets'," she added dreamily. "Those great trees watch on all the time, just as they've watched for centuries They remind me of the Egyptian Sphinx, only they're more still, and silent, and — and eternal-looking."

"You've not been to to Dartmoor yet have you" asked Judith. We have a thousand sights to show—There Fly Bungalow, it's called You must come and spend a few days there with us when the weather get warmer."

I should love it." Jess said, her eyes sparkling. "I'm aching to go to the Moor and see it in all sorts of moods when it's raining, and when the sun's shinging, and when the wind blows. I'm sure it will be different each time rather like a woman.

"I think it's loveliest of all by moonlight," said Judith, her eyes soft and shining with recollection. She loved all the beauty of the world as intensely as Jess loved hers in life's humour a woman can have. And Jess hated people to be unhappy.

So that it was with considerable satisfaction that she set out across the park towards Willow Ferry, crossing the river by the footbridge which spanned it at a point about a quarter of a mile below the scene of her bathing mishap.

Judith welcomed her with unaccustomed warmth, and after lunch completely won her heart by a candour seemingly akin to Jess's own.

"I've been quite hateful to you since you came to Staple," she said frankly. "Just because you were — who you were, I suppose—" turning her head a little aside —"you've heard my humour (and old story)."

Ellen, at Jess expressed her affirmative, she went on quickly:

"Well, it was idiotic of me to feel unfriendly to you because you happened to be Glyn's daughter, and I'm honestly ashamed of myself. I should have loved you at once—you're really a dear, you know!—if you had been any one else. So will you let me love you now, please—if it isn't too late?"

It was charmingly done, and Jess

The publisher of a small town newspaper was trying to get the general store owner to advertise.
Storekeeper: "You know in this town 30 years and every man, woman and child knows where I am and what I sell. I don't need to advertise."
Publisher: "Is that so? Tell me how long the Methodist Church has been here?"
Storekeeper: "Fifty years, I believe. Why?"
Publisher: "Well, don't they still ring the bell every Sunday morning?"

SMALLEE ROSS BAY RUNS

The depression is having its effect on boys in the Dominion district. While this prices bowed them at easy period in the past decade, are low belonging to R. C. Cockler, a farmer in the Verdant Valley district, decided to reduce the size to comfortably with prevailing prices. This lad had three eggs which together weighed one and three quarter ounces, the small est on record and two smaller than a pigeon's egg.
Two of the three eggs were almost round—Dromedary Egg.
When you think of Coal, call Hemmons Lumber.

LOCAL NEWS

Mrs. Gibbs Russell of Lacombe is spending a few days with her parents Mr. and Mrs. J. Cheeseddon here.

The Girl Guides held a very successful tea at the home of Mrs. Calhoun on Saturday last. The girls did the serving.

What is thought to be done by young men dashing on the main street. One of the big front plate glass windows in the empty store of the Williamson Block was smashed in shortly after 3 o'clock on Monday evening.

The damage is covered by insurance, but it is high time this kind of rough house play was put a stop to.

Why not take home some Buns or Cookies from Lafleur's Bakery

Mr. A. E. Hogue was elected by a majority of two of Mr. W. Thomson in the Dominion for the election for Division No. 4. The result being Hogue 81, Thomson 79.

"Song O' My Heart" is one of the best stories unfolded upon the screen in many a season. Surely if you have a grain of sentiment in you, you are going to fall very hard for this one. This picture will bring happiness to millions. (N.Y. Evening World") See and hear this great picture at the Empress Theatre on Thursday, March 17th.

Mr. E. Stuart Taylor received a wire on Sunday saying that his father Rev. Edgar Taylor of Brantford, Ont. had passed away at the age of 85.

He had served in the Methodist ministry for over forty years in Newfoundland and moved to Ontario on his retirement.

"Mr. McCormack's voice records marvellously well on the screen and he brings a charm and ease of manner to the picture, a pleasantly sentimental romance.

Don't forget this date, March 17th. Come and bring your friends.

POLICE COURT ITEMS

Joseph Medrychi was by Magistrate J. Ritchie yesterday committed for trial on a serious charge committed at Egremont last July. The accused had left the District at the time and was not located until the 27th. Feb. when he was arrested at Egremont. Constable Warrier of the A. P. Police conducted the prosecution. Geo. Becker acted as interpreter.

BORN

Born to—Mr. and Mrs. Leon Frey of Good Hope on Monday, March 7th. a son.

TYPO'S VALLEY NEWS

Carl Dietrich has purchased a team of horses. Looks as if he might be starting up a hope chest.

We are sorry to hear that Pete Gunn hurt his leg and is laid up with it.

The Young People's Club are presenting a play "The Rebellion of Mrs. Sunderby", on Friday, March 18th. at Typo's Valley School.

The Ladies Aid will meet at the home of Mrs. C. Dietrich on Wednesday, March 16th.

Little Jean Lawrence has frozen her toe. Too bad Jean.

The School Social Committees are arranging a dance for March 16th. before the play.

Mr. Art. Pearce and Mr. Bill Pearce were in Edmonton on Tuesday attending the funeral of their cousin the late John M. Brown.

Mr. Brown was an ex. Mounted Policeman and farmed in Ardrossan district some years ago.

A new line of Women's House Dresses are being shown at Jones, Graham & O'Brien's. These are the very latest in style and colors.

With the Curlers

On the invitation of the local Curling Club, two rinks from the Royal Curling Club of the City paid a friendly visit here Tuesday evening, and engaged in games both of which were very interesting right up to the last end as the final result will indicate.

Royal Rinks represented by W. Freeman skip, T. Dark third, Bill Winter leghan second, and H. Bruce lead Billy Marshall skip, Harold Doctor third, Bobbie Hear second and Bill Orr lead.

Opposed by W. A. Graham skip, Earl Graham third, J. Graham second, W. Anderson lead.

F. Smith skip, Jack Wright third, N. Dennis second and H. Ardley lead.

Scores:	
Freeman	9
W. Graham	12
Marshall	10
F. Smith	5

On Thursday night a rink motored to Lamont and lifted the Carscadden Cup. The personal were. S. Thorne, W. Anderson, J. Graham. E. Graham skip.

Friday night two rinks motored to Edmonton to play the Royal Club. After the game lunch was served to the Royal Club room. The result of the games were Meintyre (Royal) 11; E. Graham 14. Baldford (Royal) 18; Smith 11.

Two rinks played a return game at North Edmonton on Saturday March 12th. The locals lost out by one point on each game.

On Monday night two rinks defended the old original Canscadden cup against Lamont. The locals won by a comfortable margin.

The personal of the rinks were:- F. Hallam, G. Hutchison, W. Graham, A. M. Carscadden, skip. T. Todd, J. Graham, J. Wright, E. Graham skip.

On Tuesday evening two rinks played the strong Royal rink of Edmonton a return game before a large crowd of spectators. The locals won out by four points on the total score. Supper was served after the game at the hotel. The local rinks were:— H. Ardley, H. Dennis, J. Wright, F. Smith, skip. W. Anderson, J. Graham, E. Graham, W. Graham skip.

COMING EVENTS

EASTER MONDAY DANCE

An Easter Dance will be held on Monday, March 28th, in the Masonic Hall under the auspices of the St. George's W. A. Rhythm Boys Orchestra. Admission $1.50 couple; Extra lady 50c.

MEETING

A meeting, will be held in the buffet-room of the Memorial Hall on Monday, March 21st, at 2 p.m. to demonstrate the "Tiller Combine".

Every farmer cordially invited to attend. This machine will greatly reduce your tillage costs.

E. T. Pilsdoff.

FISH & CHIP SUPPER

Fish and Chip Supper in the United Church Basement on Saturday, March 19th, from 5:30 till 7:30. Under the auspices of the W. M. S. Adults 35c. School Children 20c

The notice of the local guide news in last weeks "Record" should have read, "A series of bridge parties will be given from now till the end of April.

Two little urchins stood with their noses pressed against a barber shop window.
"Gee, Mickey, look at that one!" said one, pointing to a barber wielding a sinuing razor: "He's lookin' for 'em with a light!"

WHEAT and INCREASED WORLD POPULATION

A very important factor in the world's wheat situation which is frequently overlooked by the general public is the yearly increase in the world's population. While undoubtedly there has been slowing down of the ratio of increase of population as compared with previous figures, the record for the ten-year period from 1920-30 shows that the yearly increase is 1,625,000. That means that in the year 1920 there were 16,356,000 more people to be fed than in the year 1920 Based on the estimate of Mr Sanford Evans, a Winnipeg statistician, of 7 and half bushels of wheat annual per capita consumption, in 1930 the world required 50,625,000 bushels of wheat more than it did in 1920.

The steady increase in the world population has been outdone by the increase in wheat acreage For the 10 years up until 1930 the world's wheat acreage in the major wheat export ing countries last year alone having been 12,000,000 acres. If further reductions in acreage occur it will not take very long for the demand for wheat to overtake the supply

Municipal District Holds Statutory Meeting

The statutory meeting of the Council of the Municipal District of Clover Bar, No. 917, was held on Monday last. The two new councillors Messrs. Meyer and Mann were introduced and took the oath of office on assuming their duties.

Mr. Gillies was elected reeve and Mr. H. S. Peters, deputy reeve for the ensuing year. Mr. Fullerton was re-appointed as auditors for the district for the current year.

The monthly meetings of the Council will be held in the Municipal Office on the second Saturday of each month.

The Secretary was instructed to register the survey of the Casey Road as surveyed by Mr. Dane.

The action of Mr. Keith in making a settlement of the drainage of the water from the Marcus Mine at Clover Bar was approved and confirmed.

Representatives from the Salvation Army were in attendance to request a grant from the district. They were advised that they could request would receive consideration when the estimates for the year were being discussed.

The Councillors were appointed members of the local board of health, also as a committee to investigate applications for relief.

With the reading of correspondence and the passing of accounts the meeting adjourned at six fifteen.

ANNUAL FEEDERS' DAY AT THE UNIVERSITY, APRIL 9

Livestock men generally in the Province will be interested to know that the Annual Feeders' Day conducted by the Department of Animal Husbandry at the University of Alberta will be held this year on second the last day of the Edmonton Spring Show Week, Saturday April 9, commencing at 10 a.m. and continuing throughout the day.

The day's program will be based on the results of experimental work conducted during the past year in the Department of Animal Husbandry, including feeding trials with cattle, sheep and swine. Further details will be given during the following week. In the meantime, keep the date in mind and make your plans so as to be in attendance at the University on April 9th.

Although white is very visible it is too dazzling to combine. For that reason authorities in the south of France are discouraging having all main roads colored red with secondary roads green or yellow.

Partridge Hill

Messrs Hugh, Phillips and Will Southern of Lamont were visitors here Monday.

The tempo of life in the district is beginning to quicken at the approach of spring, which by the calender will be just around the corner, but you can't prove it by our weather and roads.

Wood cutting, ice cutting, feed cutting and a last rush to get the grain hauled before the break-up, with the odd bridge game seems to make busy days and nights

Mr Howard Albert of Pavana, B. C., is visiting relatives on this district While here he is the guest of his cousin Mrs. C. H Flintoff

Mrs Gillison was an Edmonton visitor on Tuesday.

The second session of mock Parliament with J. B. Webb as Mr. Speaker, and Arnold Whitnon as Governor-General was held on Saturday night, March 12th with about sixty members in attendance.

The government under the leadership of W. Gillison, Deputy Premier the opposition under C. H Flintoff, Independent and the C. C. F. party under J. N. Lambly provided a good debate and heaps of fun.

Main bill of speech from the throne, Resolved that the manufacture of motor cars should be prohibited was defeated and the government over-throwed

Next session with the Independents forming the government will be held April 2nd. A debate, Resolved that "Kidnapping should be punishable by death.

The U. F. A. were hosts to the U. F. W. A. on Tuesday evening at the home of Art Evans. When following after sixteen hands of bridge the U. F. A. served a grand and glorious supper of baked spuds, bacon and eggs, pie and coffee.

Mrs. Amos Cobaldenston and Mrs Cliff Alton on behalf of the U. F. W thanked the hosts for the fine evening provided.

Around the Elevators

All elevators in the Fort will be closing Saturday half day commencing March 19th.

The grain business is booming all elevator men being kept busy more or less.

Things to notice:—Bill Anderson shovelling snow on the drive way.

Bob McDonald taking in grain at the unearthly hour of 8:30 a.m.

The C.N.R. station officials of the Fort taking in the bantey games in Edmonton last week.

Louis Simmons loading for the elevators with a load of wood.

More than $1,000 gill nets and seines were used in the fisheries of the Prairie Provinces in 1930—literally miles of nets. They had a value of over $316,000.

N.W.A. TO PRESS FOR LAW TO COMPEL LIGHTS ON VEHICLES

With general discussion pointing to the necessity of horse-drawn vehicles carrying lights or reflectors at night, the Alberta Motor Association, meeting here on Tuesday appointed a committee to interview government officials.

The committee, which is headed by Austin L. McKay, president of the northern Alberta branch of the association, will press for legislation to have lights or reflectors on the horse drawn vehicles.

At the association meeting Tuesday plans were laid for enlargement of the facilities at the South Edmonton motor camp. Additional cabins are to be constructed and the electric light and water connections are to be extended over the whole camp site. Roads within the park will be graveled and put in first-class shape.

FORMER FORT MAN ASKS $1,000 DAMAGES

Claiming that Joseph McLean, of Gibbons, drove negligently into the back of his car on the Fort trail near Horse Hills subdivision, on Feb. 5, 1931, Fritz Fischer, of Fort Saskatchewan, opened suit against McLean for $1,000 in the supreme civil court before Mr. Justice Ewing, on Wednesday afternoon.

McLean, claiming that the tail light on Fischer's car was not burning at the time of the accident, [illegible] ing, is defending the claim, and submitted a counter claim for $1,000, charging that Fischer was negligent in parking on the road without a light.

Mr. Fischer was employed as engineer at the Provincial Coal base at the time of the accident.

A. H. Gibson, K.C. represents the plaintiff, W. R. Howson the defendant.

Messrs George Stanley and Dick Hagar were called to give evidence in the case.

A Wise Investment
A good home is wise economy, no matter what kind of "times" we are having, but in these days of low prices it is a better investment than usual. No investment that you can make today will pay such dividends of pleasure, pride and satisfaction as a home.

The Problem Of Debt

The one question, above all others in importance, that is engaging the attention of the people of Western Canada, and of the farming class in particular, is as to how they are going to pay their accumulated burden of debt. As a result of drouth conditions extending over two and three years with partial or complete crop failures, and with prevailing world prices for such crops, live stock, dairy and poultry products as they did produce below the actual cost of production, tens of thousands of farmers have been forced to use all the resources they may have had, and have gone deeply into debt.

They find themselves in the position, where, having purchased land and equipment during the war years, and in the post-war period when high prices prevailed, and when wheat sold around $1.50 to $2.00 a bushel, they are now being required to pay these inflated obligations with wheat at 50 cents a bushel and in thousands of instances with no wheat at all to sell. Instead, therefore, of being able to gradually get out of debt, they find themselves getting deeper and deeper into debt, with little or no prospect of ever being able in their lifetime to get free of it.

Consequently, the relationship of themselves to their various creditors, the appalling interest payments confronting them, the practical impossibility of meeting their obligations, and the alternative possibility of losing their homes, constitutes a veritable nightmare of worry. They feel themselves confronted with the probability that, in the event of harvesting a good, or even fair crop, this fall, their creditors will swoop down on them and gobble everything up, thus leaving them in their present predicament of having nothing wherewith to maintain their families in decency and comfort and carry on."

So, inevitably and naturally, everybody is seeking for a solution, and suggestions without number are being advanced. Many, of course, are utterly impracticable; others are commendable; others are of such character as result in intensifying the difficulty rather than solving it; others, again, attempt some hope.

It will be recalled that, following the war, Germany adopted policies which resulted in converting hundreds of millions of marks issued during the war to its own people into no more worthless pieces of paper. Great Britain deliberately depreciated its own currency, the franc, to such a low figure as to measure the same result. In its present financial emergency, Great Britain went off the gold standard, and its money took a tremendous drop in value almost over night. Now the United States, also faced with a financial emergency, has gone in for "reflation" of its currency, or "inflation," as they are now pleased to term it, with a view to throwing out its huge amounts of frozen credits, and to put a larger supply of currency in circulation. All these expedients have a temporary effect, but the fact remains,—it is an economic truth,—that if anything is inflated it must sooner or later be deflated again. In the end there must be a "writing down" or a "writing off" of liabilities beyond the ability of the debtor to pay.

Sooner or later some portion of the indebtedness of thousands of Western farmers must be written off, and the sooner the better for all concerned. A merchant is forced into bankruptcy, and pays fifty cents on the dollar to them free to make a new start, and he usually ends up to be as good as before. If a mortgage or loan company forecloses on a farm property and takes it over, it must ultimately re-sell that farm to some one else. It is almost certain that it will have to take a loss, selling the farm for less than the original liability against it. Would it not, then, be good business on the part of such loan or mortgage company to take the same loss, or even a somewhat larger one, right now, by consenting to a writing down the present farmer's liability to a figure which is a chance to "carry on" and pay? The property would then once again become revenue producing for the company, although not perhaps to the extent originally expected. Nevertheless the company concerned would otherwise have the load on its hands for some time, a bill of expense for taxes, etc. Surely, it would be better business to keep the present owner on the land in a position where he can add his mite to the general productivity and prosperity of the country.

One suggestion that is receiving increasing attention and support is that enduring farm debts should be consolidated and amortized, that is, that payments of equal annual instalments covering both principal and interest be spread over a term of years, 15, 20, 25 or 30 years, should be agreed upon. Surely, such a plan can be worked out without undue loss to anybody, and is such a measure as to ensure the honour of the farmer in the present emergency and an opportunity to ultimately free themselves of debt.

Unless something of the kind is done, it is almost a certainty that many Western lands will either be abandoned, or will pass through foreclosure proceedings, from their present owners and mortgagees into title in the hands of loan and mortgage companies, or as tax sale properties held by municipalities, for a goodly number of years to come, thus seriously retarding the production and development of the country, and imposing a check upon the prosperity of all, individuals, corporations and governments alike.

If it were possible to reach the moon, an adult weighing 170 pounds on earth would weigh only 29 pounds on the moon.

Never make fun of simpletons, for Plutarch tells us that wise men learn more from fools than fools from the wise.

Tells Dyspeptics What To Eat

Acid State Often Unnecessary

It is a well known fact that some foods form a strong acid when digested, consequently stomach acidity and consequent indigestion. By omitting from daily menus those foods that cause acidity, and eating foods that are alkaline forming, many persons relieve certain forms of indigestion and dyspepsia. Bisodol tablets may be purchased from any druggist. Many druggists recommend Bisodol to ten, however indigestion, sour stomach or gaseous acidity after meals and the promiscuous snorting of food is due to acidity. Bisodol is guaranteed to relieve you of this acidity or your money back. Bisodol is very good for children who suffer from sour stomach after eating too much candy. Adv.

From $500 To Fortune

President Of Biscuit Company Tells Success Story and What Combination Advertising Will Do

A romance of modern business that should be an inspiration to every small store keeper was told to newspaper men today (Friday February 26th) by Mr. C. W. Ellsworth, President of Ellsworth, Ellsmore and Company, Limited, who is completing his fifty-sixth year of service with the company.

Mr Ellsworth, who can recall personally much of the rise of the Christie Brown organization, told how the giant biscuit company was started in a small store on Yonge Street, Toronto, by two men with a working capital of probably not more than $500. Today the business they founded is capitalized at millions of dollars and is the largest industry of its type in Canada. It has two manufacturing plants in the East another the million dollar Winnipeg plant opened last week in the West and thirteen distributing branches from Halifax to Vancouver.

The simple history of Christie, Brown and Company as told by the active veteran president is this: The business began in 1868 when two young men James Mathers and Alexander Brown formed a partnership in a small store in Toronto and sold biscuits. They had with them no assistant, no capital. William Christie was destined to become a partner and eventually play a very important part in Canada's biscuit making industry.

The biscuits sold from this small bakery became popular with a family of clientele and the business began to progress. Four years later Brown and Mathers retired and the business was handled by young William Christie. Mr. Brown, however, re-entered the company in 1911 and the name, Christie, Brown and Company, Limited was adopted.

Confederation of Canada in 1867 found the business firmly established as one of Canada's coming concerns. In 1871 and again in 1876 larger premises were necessary and it was symptomatic of the sales energy behind the organization that the first Trans-Canada train had a Christie representative on board.

From that point the business has never looked back until today Christie Biscuits are known round the world. The original store in Toronto has been replaced by three factories, one occupying nearly a whole down town block in Toronto, the second Toronto factory occupying many thousands of square feet of floor space and the third, the new Winnipeg plant, is acknowledged the finest biscuit factory on the continent.

The original plant turned out a very small variety of biscuits. Today over 500 lines are marketed.

And here, according to Mr. Ellsworth, is the real key to success in the Christie, Brown organization. It has consistently maintained a high standard of quality in its products and has advertised steadily in good times and bad, using the same copy from coast to coast, year in and year out.

Miller's Worm Powders act on thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and all fears will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

Engineer Was Humane

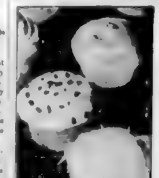
Travelled Sixty Miles To Free a Trapped Dog

Engineer A. W. Fenson sat idly at the cabin window as the train roared past Bunker Hill in Indiana, thinking of little but the running of his huge locomotive.

Then he noticed in a barb wire fence that paralleled the railroad track, a hound dog struggling and unable to entwine its feet from the wire.

When the train arrived at Logansport, Fenson turned it over to another engineer, took an automobile and drove 20 miles to Bunker Hill to free the dog.

Worms sap the strength and undermine the vitality of children, causing pale faces, dark rings under eyes, variable appetite, etc. Mother Graves' Worm Exterminator is safe to drive out the worms. Adv.



Miss Campbell's Recipe for Cup Cakes

½ cup butter
2 cups sugar
3 eggs
1 teaspoonful vanilla
½ cup milk
2 cups pastry flour
½ cup cornstarch
level tsps.
Magic Baking Powder

Cream butter thoroughly, add sugar a little at a time beating well. Add yolks of eggs and vanilla beat well, sift flour with the baking powder and add, alternately with the milk, to first mixture. Fold in stiffly beaten egg whites. Bake in greased cup cake pans, or in paper baking cups, in moderate oven at 375° F. about 25 minutes. Save some from the oven, sprinkled with powdered sugar. Or frost, when cool, with the icing. You will find many delicious frosting recipes in the Magic Cook Book.

"Cup Cakes are delicious when made with Magic Baking Powder,"

says Miss Helen Campbell, Director of The Chatelaine Institute

"Cup cake baking goes hand in hand with good materials," Miss Campbell will tell you.

That's why Magic Baking Powder is used and recommended by The Chatelaine Institute. Magic meets all the Institute's rigid requirements of fine quality —repeated tests have proved it absolutely pure, uniform and dependable.

The majority of directions and teachers of cookery throughout Canada plan their recipes for Magic. They use it *exclusively* because they know it gives consistently better results.

And 3 out of 4 Canadian housewives say Magic is their favorite, 4 to 1 over all other baking powders combined.

Remember—substitutes are never as good. Do as the experts do. Use Magic Baking Powder.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Limited, Fraser Avenue and Liberty Street, Toronto, Ontario.

Contains no alum. This recipe and many others equally delicious are given in the new Magic Cook Book. Send for your free copy today.

A Huge Drydock

The drydock at Esquimalt, B.C., has an overall length of 1,16 feet, and is one of three in the world large enough to accommodate the giant Canadian now under construction on the Clyde in Scotland.

Canadian Trade Ship

Returns To Canada After a Two Months' Cruise Through Caribbean Sea

After a successful two months cruise through the Caribbean sea, the S.S. New Northland, Canadian trade exhibition ship, returned to Halifax recently.

The vessel, referred to as "the floating show window" of Canada, left Halifax on January 8. Since that date she has called at Bermuda, the Leeward Islands of St. Kitts Nevis, Antigua, Montserrat and Dominica, Barbadoes, the Windward Islands of St. Lucia, St. Vincent and Grenada, Trinidad, British Guiana Jamaica, Cuba and the Bahamas.

Canadians on board representatives of governments and businesses, were in an advantageous position to see and learn about business conditions in the West Indies. The party reported that it was successful in its mission of establishing business connection and promoting goodwill.

A desire was evident to use Canadian goods in preference to United States articles. It was stated this spring from the Canada West Indies treaty of 1925, partly from the service offered by the Canadian National "Lady" Boats and partly because of the strong pro-Empire feeling which exists.

While no figures were available, representatives of firms which had exhibits on the land secured many valuable orders while in the south and established connections which may be expected to produce much business in the future.

Disarmament Question

The mere reduction or abolition of the modern defensive armaments of peace-loving nations, of which Great Britain is second to none, cannot prevent war. Scythes and bill-hooks served Canadian militia lines, formidable weapons of offence, and so they would again if the manhood of other nations found offensive weapons necessary to procure the necessities of life for themselves and their wives and families.—E. T. Meiner in the National Review (London, England.

Europe's oat production last year was greater than in 1880.

The Silver Lining

People Live Longer During Depression Says B.C. Professor

Depressions have their silver lining, according to Prof M. F. Angus, head of the Department of Economics and Sociology at the University of British Columbia.

"You live longer when there's a slump in business, unless you are one of those unfortunates who feel the situation so keenly that you jump from the tenth storey or borrow a gun," said Prof Angus.

The death rate records of 52 cities in Canada for 1921 were 66,839, compared with 67,326 in 1920, a drop of three per cent.

"You see, economic conditions in years of depression force the majority of us to adopt a simpler form of living," explained Prof Angus. "There is less over-eating, less night life and luxurious habits."

Enforced diets in many cases have led to abandonment of rich foods, he added. Industrial accidents had also been lessened by the curtailment of factory operations

COMFORT
for COLICKY BABIES
... THROUGH CASTORIA'S
GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open. Free from waste that remains! This a tiny baby's tender little organs cannot stand when treatment! They must be gently urged. This is just the time Castoria can help most! Castoria, you know is made specially for babies and children. It is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets. Gentle Castoria on hand, you the same

CASTORIA

British Art Exhibit

Exhibition Is Sponsored By the National Gallery Of Canada

A comprehensive and representative exhibition comprising some of the best examples of contemporary British art, sponsored by the National Gallery of Canada, was officially opened by His Excellency the Earl of Bessborough, Governor-General of Canada Arranged by the National Gallery, in co-operation with the director of the National Gallery of British Art in London England, the exhibition has been collected for the purpose of acquainting the Canadian public with the work of present day English artists. After a month s showing here it will be sent to other Canadian cities

Announcement was made that the Governor-General had consented to become honorary president of the National Gallery

Perhaps the most marked feature of the exhibition is the wide diversity of style revealed by the individual paintings. Numbered among the 125 paintings which comprise the exhibition are examples of nearly all the practically every artist of importance now living in England.

There are outstanding pictures by Sir William Orpen, R.A.; Augustus John, R.A.; a self-portrait of Sir William Rothenstein, a fine example of the work of Sir Charles Wheeler, Professor Henry Tonks, and many other artists of note.

Bad Attacks of Flu

L.M.M. Pink Pills Recommended Also by Dr. Hillmer, Pink Pills

"I have had attacks of the 'flu' frequently since 1900, in bouts of very bad attacks, but always when on the road in summer I take Dr. Williams' Pink Pills and find them a wonderful pick me up."

So writes F. M Wood, Saskatoon, Sask., who further states "I would recommend Dr Williams' Pink Pills to all sufferers from that rundown, feeling. I have taken the Pills on many occasions, and they seem to build up the blood wonderfully. I have been around for years, and find that, when I get rundown, after taking several boxes of Dr. Williams' Pink Pills the color comes back to my cheeks and I have wonderful vitality."

Dr Williams' Pink Pills should build up existing poor blood and increasing the red blood cells which contain the vitamin fitness and revitalize the exhausted system. They remove the cause of headaches or nerves conditions. Try them. At your druggist's. Six a package.

Recipes For This Week

(By Betty Barclay)

STEAM TIN CORNBEEF

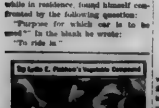
3 pounds round or rump steak.
½ cup flour.
Salt and pepper.
2 tablespoons fat.
1 teaspoon sugar.
2 onions.
1 green pepper.
1 carrots.
2 cups canned tomatoes

Season the flour with salt and pepper and pound it into the steak with the edge of a heavy plate. Brown the meat in a hot frying pan. Transfer to a casserole and add the sliced onion, chopped green pepper, sliced carrots, tomatoes and sugar. Cover and allow to cook slowly for two hours, or until meat is tender. This may be served right from the casserole.

COFFEE COOKIES

½ cup butter.
1½ cups coffee.
2 eggs.
1 cup sugar
3 cups flour.
2 teaspoons baking powder.

Cream butter. Add sugar, eggs well beaten, and cold coffee. Then add flour, with smooth. Roll thin and bake in moderate oven. Cream put with butter and iced almond.



By Lydia E. Pinkham's Vegetable Compound

Nursing Mothers—take heed—Pink Pills would help! By Lydia E. Pinkham's Vegetable Compound—in tablet form, she could be strong and happy again.

Wrecked Motorist (opening his eyes): "I had the right-of-way, didn't I?"

Bystander: "Yah, but the other fellow had a truck."

After all, my dear, she's only a flat-chile Blonde."

"Mr. Dyed by her own hand"

HER HUSBAND TEASED HER

But not for long!

"I started taking Bracken Salts for biliousness, and for the last two years I have been perfectly free from an attack. Now I continue to take them, as I find they help me to perfect health. My husband used to joke about me taking Bracken Salts, now he takes them himself so do my children. My answer them."

Mrs. E. P. Nelson is a well known resident of Lower Sydney, Cape Breton. Instead of becoming absorbed into the system, simply collects and is waste, nasty poison, producing harmful acids and gases which give rise to headaches, heartburn and backache.

Bracken Salts is a combination of six mineral salts, which gets right to the root of the trouble. It neutralizes the flow of gastric and other juices to aid digestion, and their mixture complete, regular and unfailing cleansing of the entire system. Try Bracken Salts and that means a blessed end to biliousness, and a permanent and wholesome relief from the unpleasant symptoms of poor food without the slightest fear of having to pay the old fashioned price.

FREE TRIAL OFFER

If you have never used Bracken Salts try it now at our expense. Send us your name and address and we will send you a free sample bottle of Bracken Salts. Write to-day. Bracken Salts Co., Dept. 1, 1 Wellington St. West, Toronto, Ont.

Bracken Salts is sold by druggists everywhere in the Dominion of Canada. Large bottle 60 cents. Don't be satisfied with substitutes. Insist on Bracken Salts.

World Produce Large Farm

Inquiry For Land Is Received By Prince Albert Board Of Trade

Two young married men with the highest recommendations interested in agriculture obtainable in Europe, may be established on a 2,000 or 3,000 acre farm where the latest labor-saving methods of cultivation are used, is available.

They are desirous of immigrating to Canada, and in a letter forwarding their brother, Dr Abel C Rab, of Dayton, Ohio, stated in a letter received by Prince Albert Board of Trade.

Dr. Rab asks the Board of Trade for agricultural possibilities in this district, and the number and acreage of undeveloped farm land, the condition of soil as to productivity of crops and the suitability of this climate with reference to animals and crops, as well as general facts.

He is willing to help his brothers financially as much as he is able, and wants to obtain a site of about two or three hundred acres, very far from a city. Dr. Rab thinks this land ought to bring returns to these developers it in about fifteen or sixteen years.

Economy (saving sensibly very tasty product): "Mummie, can I have the macaroon when Willie has done with them."

Reduce the Acid

SICK stomachs, sour stomach and headaches are usually caused by too much acid. The stomach nerves are irritated by acid.

Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips Milk of Magnesia, because one heaping tea spoonful neutralizes more acid than a dozen tablets in acid. For 50 years thousands upon thousands have used it with perfect safety.

Take a spoonful in water and your stomach distress will probably end in five minutes. Then you will always know what to do. Costs and bothers by methods will never appeal to you. Get from the first your genuine "Phillips." Have a great many times more than 25 cents. Be sure to get the genuine Phillips.

Phillips Milk of Magnesia

SUNDAY SCHOOL LESSON

MARCH 30th 29

JESUS A GUEST ON THE CROSS

Golden Text: Christ died for our sins according to the Scriptures—1 Corinthians 15:3

Lesson: John 18:1 to 19:42.

Devotional Reading: Romans 7:1-8

Explanations and Comments

The Trial Of Jesus, verses 1-16. We see the various actors in the drama. Caiaphas, Herod, Pilate all failing into place as at some mystic signal each doing something that had to be done, each doing something dictated by the greatness of his character and thus something for which he is answerable but also doing something that was an unknowing fulfillment of a program and Jesus Himself passing through all these scenes with the sublime steadiness none of one who knows that thus it must be. This is the joy of the cross. Jesus has not lost His way. His moves steadily to His goal. He is no victim of accident at every step something was done that will of God made necessary and inevitable

W. J. Dawson

In the Way To Calvary and Crucifixion, verses. 17-18 Roman soldiers threw a red cloak around Jesus placed a crown of thorns upon His head in imitation of the laurel wreath worn by Roman emperors on festive occasions and put a reed in His hand as a mock sceptre. Then they spat upon Him struck Him and covered Him. When worked on this sport they led Him away to be crucified The procession started with a herald at the head bearing a board on which was written the prisoner's "crime" Jesus of Nazareth the King of the Jews. After Him came a centurion with four soldiers carrying nails and hammers Pilate's sign bearer bearing Him to the two thieves with their crosses all closely guarded by Roman soldiers all followed by a motley crowd of men and women, enemies and sympathizers with Jesus, priests and Pharisees

Through the city gate they went from Jesus' strength failed. He was unable to stagger along under His cross. The soldiers themselves would not carry it, and meeting Simon of Cyrene, they compelled him to carry it on to the hill called Golgotha, or Calvary. There Jesus was nailed to the cross and the cross erected with the thieves on either side of Him.

Jesus' Soliloquy For His Mother verses 25-27 With the royal women friends that stood by the cross Salome, Mary the wife of Cleopas and Mary Magdalene was Mary His mother.

"If I were hanged on the highest hill I know whom they were follow me still.

Mother o' mine" Kipling

Jesus looked upon His mother and upon John, and said to Mary "Woman, behold thy son," and to John "Behold, they mother"

The Death Of Jesus, verses 28-30 Read here Matthew 27 45, 46 Mark 15 33, 34. John records Jesus' cry, "I thirst," and at the moment He utters "that the scripture might be accomplished." This does not mean that Jesus uttered the cry so as to fulfill the words but that, as John looked back upon the scene in later years he saw, as he wrote, that it did fulfill scripture.

Near at hand was a vessel full of vinegar, that "posca," or wine, which was the usual drink of Roman soldiers. A sponge was fastened to the end of a branch of hyssop, filled with the vinegar, and held up for Him to drink. Jesus received it, and then exclaimed "It is finished," as His head fell and His spirit left Him. Finished, in the sense of ended, were His sufferings, and finished, in the sense of completed, was the sacrificial offering. "It is a triumphant exclamation, meaning: God's will is obeyed; man's redemption is secured; humanity's victory is won; Heaven is open to men; the gloom of the grave is changed into the glory of resurrection and ascension with Christ!"

Pardon Balm is the one true family aid for skin health and beauty. Like the mother in additional loveliness. Protects the tender skin of the child. Delights the father as a healthful and cooling shaving lotion. No better to what use it is put, it is always beneficial to the skin. Every woman should use it. Pardon Balm heals and expresses the cause of surpassing loveliness.

Could Have Something

"What profession is your boy going to select?"

"I'm going to educate him to be a lawyer," replied the farmer. "He's naturally argumentative an' hard on passing mixed up with other people's business, an' he might jes' as well get paid for his time."

Dandruff Egyptian Lieutenant is an excellent hair tonic for check. Also removes excess in herpes and quickly relieves irritation, sprains, swellings and joint stiffness.

VALERA ELECTED PRESIDENT OF IRISH FREE STATE

Dublin, Ireland Eamon de Valera was elected president of the Irish Free State Wednesday March 9 by a vote in the Dail Eireann of 83 to 44.

The ministry is wholly Fianc Fail—the De Valera party which, translated, means soldiers of destiny and Labor whose handful of votes will be needed to keep the De Valera government alive was not represented.

The ministerial announcement was greeted with cheers from the gallery and from the Fianna Fail benches The old government party headed by former President William T Cosgrave had gone over to the benches allotted to the opposition with Mr Cosgrave occupying the seat so long filled by Mr De Valera

Voting his opposition to the De Valera regime, retiring President Cosgrave declared "I propose to give every opportunity to Mr De Valera to form his ministry We do not want an explanation policy, we want to see what he is going to do."

The De Valera victory never was in doubt When the dail assembled after Catholic and Protestant religious services Mr. De Valera and Mr Cosgrave hadt near one another during solemn mass the Fianna Fail put Frank Fahy forward as nomination for speaker. Mr. Fahy, one of the founders of the Irish volunteers in South Cabvay, was elected by 78 votes.

Then the youthful Deputy Milroy proposed Mr. De Valera for the presidency. The motion was seconded by Deputy Traynor and was given support by two Independents whose votes had been doubtful. Deputie J Dillon and O'Hanlon.

There was silence as the count was taken and then a burst of cheering when it was certain that Mr De Valera had been selected

The dail then adjourned while Mr De Valera called on Governor-General James McNeill for an interview, the nature of which was not divulged, and for the purpose of receiving his formal appointment.

Dr. Grisdale To Retire

Deputy Minister Of Agriculture Will Be Superannuated

Ottawa, Ont The superannuation of Dr. J. H. Grisdale as Deputy Minister of Agriculture was announced by Robert Weir, Minister of that Department. Dr. Grisdale suffered a brain-storm in his office a week ago and as a result asked for his superannuation, which has been granted. He had been Deputy Minister since 1918.

In making the announcement the minister expressed regret that one who had been so long in the service should find it necessary to ask for his superannuation on account of illness, which, no doubt, had been due to his arduous duties in the department. Dr. Grisdale will receive a's months' leave with pay as from April 1, after which the superannuation takes effect. No successor to Dr. Grisdale has yet been chosen.

Preparing For Conference

Manufacturers In Canada Have Been Discussing Empire Trade

Toronto, Ont. Preparatory work for the forthcoming Imperial Conference being held next July at Ottawa is proceeding in a promising manner, it was reported to the council of the Canadian Manufacturers' Association in executive session here. Numerous meetings of groups of manufacturers have been held to discuss British Empire trade, particularly trade between Canada and Great Britain, and considerable information has been collected.

Millionaires In Britain

London, England. Great Britain has 840 "millionaires," according to the annual report of the inland revenue commissioners compiled on the basis of incomes exceeding £50,000 assessed for sortax last year. The report also stated there were 197 incomes exceeding £100,000 for the same period.

W. N. U. 1928

France Must Import Wheat

Finding Of a Fresh Duty On Canadian Grain Is Unlikely

Paris, France Reports that the French Government is about to frame a duty on Canadian wheat as the result of the French-Canadian trade treaty, but June have already diminished. It was learned that the government has not reached any decision and such action is considered as very improbable

It is pointed out France is bound to import wheat as her own supplies is short and there would merely increase the cost of bread to the consumer without benefiting the domestic wheat producer. If any such action were taken it would have to be done under the so-called product act which authorizes the government to increase duties on certain products against foodstuffs including a head tax in excess without previous notice.

The ministry of agriculture put in force decrees regulating the importation of fresh fruits and the plants which affect Canada among other countries. The decrees are a routine step to guard against the introduction of the parasite known as the Hessian fly, hence which is Californian origin

Alberta Income Tax

Said To Be Level Drastic Of Any Of the Western Provinces

Edmonton Alberta Adoption of a provincial income tax is inevitable if Alberta is to balance its budget declared Premier J E Brownlee in the legislature, in moving second reading of the new tax bill which the government expects to raise $1,874,000.

Alberta would have the least drastic income tax of any of the four western provinces, the premier declared. He also remarked that even with the new levies Alberta would compare favorably with Manitoba as the lowest taxed of any of the western provinces.

Provisions of the new taxation bill was made by F. H. White, Labor, Calgary, who said the tax encroached too much on the wages and salaries of married workers, and should be redrafted.

Premier Outlines Seed Plan

Federal Government Proposes Loan To Three Prairie Provinces

Ottawa, Ont The point on which the Dominion Government has taken up in respect to supplying seed and feed for farmers in the prairie provinces was explained in the House of Commons by Premier R. B. Bennett.

In brief, the government proposed to advance the necessary monies by way of loans to the three prairie provinces. The provinces would give to the Dominion their own treasury bills in return for the cash to the Province of Manitoba, Mr. Bennett stated that "something less than $700,000 would take care of requirements."

Back To the Garden

Gardening the Solution Of Present Day Ills Says University Professor

Vancouver, B.C. "Back to the garden" rather than "back to the land," is the solution of many of present day ills, said Dr. A. F. Barss, Professor of Horticulture, University of British Columbia, in an address before the Local Council of Women.

"Everyone hears the slogan, 'back to the land,' as being the cure of all economic ills," Dr. Barss said. "This is not the solution for everyone. Rather let them say 'back to the garden,' for there a large majority may find employment for the body and at the same time a cure for the soul."

Completes Long Journey

Winnipeg Man Hiked To Vancouver and Back

Winnipeg, Man. Harry E. Sherman, the handy hiker who set out for Vancouver from Winnipeg on June 13, 1981, has returned here after covering more than 3,800 miles on foot. Sherman walked the 1,870 miles to Vancouver in 69½ days but severe weather conditions and tired muscles slowed him considerably on the return journey and five months have elapsed since he left the Pacific Coast city on October 5. En route, he gave addresses at 300 schools.

VISITS CANADA

Lord Lieut Clone who arrived in Canada on a visit to Canada in April to give the inaugural address at the opening session of the provincial legislature and further to inspect the institutions established by the Massey Foundation. The object of the Massey Lectures will be to bring to Canada from the Motherland annually someone of outstanding eminence in some sphere of activity.

Thousands Homes Evicted

People Of All Classes Affected After Fire Dead Statesman

Prague France More than 10,000 persons, including lawyers, statesmen, and all intermediate ranks filed through Artistide Briand's bedroom to homage to the dead Apostle of Peace.

By nightfall M. Briand's apartment was filled with flowers. These tributes ran all the way from an imposing piece sent by the German ambassador with the words "Reconciliation" to simpler and wounded war veterans.

The family of the French statesman who succumbed to a heart attack, was an luncheon by the gentlemen of the affection shown him that the room was kept open two hours and forty minutes longer than had been planned

School Children Insured

Protection Against Accident For Students At Moose Jaw

Moose Jaw Sas. Moose Jaw enjoys the unique position at the present time of being the first city in Canada and possibly on the North American continent to have an accident insurance policy covering school children.

A plan to cover students up to $100 expenses in case of accident was presented to the members of the school boards and adopted.

The school boards, approximately one year ago, considered insurance plans for school children and at a recent meeting the members re-affirmed the stand they had taken at that time.

Crop Failure In Russia

Forty Million Peasants Will Require Food Relief

Riga Latvia Official reports from Moscow confirm that no fewer than forty-one Russian peasants, affected by the failure of the harvest in vast parts of Russia last fall, will require food relief

The districts affected are the Ural River districts, the middle and lower Volga basins Bashkyria and the northern parts of the Caucasus The concentration of the shortage and the necessity of supplying these peasants with grain has radically interfered with the Soviet Government's spring sowing program.

In the Ukraine in particular the backwardness of preparations for the spring sowing is causing Moscow great anxiety According to official reports not more than half of the land required for sowing is ready

The despatch of 1,000,000 tons of grain to the distressed regions was decided by Joseph Stalin, Soviet dictator last month, but the movement is proceeding slowly because the Soviet railways are unable to cope with the additional traffic Another hampering factor is the reluctance of affected districts to relinquish grain which officials collated in stored up

Manitoba Farm Loans Board

Increased Deficit In Share For Period Year Ended April 30, 1931

Winnipeg, Man Deficit of the Manitoba Farm Loans Association increased from $166 874.19 to $1 022,202 during the fiscal year ended April 30 1931, according to a report submitted to the legislature by the Manitoba Farm Loans Board along with an audit report of the association.

The report was the first made by the new board, which took over direction of the association's activities in 1930

Operating expenses of $86,197.21 and writing off of $768,153 44 under the board's new policy, accounted for the deficit's increase.

In an explanation of the association's position, the report found fault with previous operation of the association "The scheme could not have been a complete success from the commencement," it remarks setting out that the margin between the cost of the money borrowed for the purpose of making loans and the rate of interest charged the farmer-borrower was insufficient.

Russian Force Doubled

Soviet Garrison In Siberia Has Been Greatly Increased

Tokyo, Japan The Japanese Consul at Kharbarovsk, Siberia, reported to the foreign office that the Soviet garrison there approximately had doubled in the last month.

Japanese authorities professed not to be alarmed, however, in spite of repeated reports of the sending of Soviet reinforcement troops in western Siberia. The war office estimated that the total Russian forces along the Ussuri frontier now is 50,000.

EXPORT MARKET FOR GRAIN IS MUCH STRONGER

Fort William, Ont.—There is a more optimistic ring to the report issued by the statistical branch of the board of grain commissioners dealing with the movement of western Canadian grain during February The international export market is readier to absorb more export grain southern hemisphere wheat is being used up and the Canadian carryover is likely to be much smaller than last year. The report says in part

"During the past month a decided improvement has taken place in the international wheat market and prospects for an increased export movement of Canadian wheat appears to be very good indeed. Both France and Italy have made substantial concessions h, increasing the percentage of foreign wheat millerss are permitted to grind. France to 20 per cent and Italy to 60 per cent. Germany and 60 per cent in northern regions respectively Germany is reported to be in urgent need of home wheat besides the substantial quantities of rye which it has been obtaining from Russia.

"The exportable surplus of Dominion countries is reported as almost completely exhausted and there is little likelihood of much wheat being exported by Russia for some time. Argentine shipments are also supposed to be entirely inadequate for home requirements in certain regions and Russia is urgent need of considerable quantities for food and seed."

To Prevent Unemployment

Alberta Asks Federal Government To Adopt Insurance Measure

Edmonton, Alberta Adoption of a national scheme of unemployment insurance was urged upon the Dominion Government in a resolution which was passed unanimously by the Provincial legislature

Moved by A. Bossetton, Labor, Lethbridge, the resolution read: "Resolved that this assembly, being of the opinion that the results of unemployment can only be properly and adequately prevented by a federal or national scheme of unemployment insurance, acceptable to the provinces, urged the federal government the immediate necessity of such legislation."

Ottawa, Ont.—The Canadian government intends to carry out its promise to conduct an investigation into a compulsory scheme of unemployment insurance with employers and workers participating, it was officially stated today in connection with a resolution passed in the Alberta legislature for a federal or national scheme of unemployment insurance.

U.S. Relief Measures

Forty Million Bushels Of Wheat Available For Humanitarian Purposes

Washington, D.C Within less than 24 hours after President Hoover had signed a bill making available 40,000,000 bushels of the farm board's holdings available for humanitarian purposes, the Red Cross had ordered and received an allotment of 5,000,000 bushels.

From the board's elevators at Omaha, Nebraska, 14,000 bushels were immediately loaded into freight cars and started for destinations in South Dakota where feed for livestock is needed.

Easter Recess For Commons

Ottawa, Ont. The House of Commons will adjourn from Wednesday evening, March 23, until the following Tuesday. Premier Bennett indicated that this was the Easter recess proposed by the government W L Mackenzie King, opposition leader, said he thought this would be satisfactory to his followers.

National Relief Fund

Toronto, Ont.—Slightly more than $250,000 has been subscribed to date to the National Emergency Relief Fund, announced by Prime Minister R. B. Bennett, last December, Norman Sommerville, K.C., has stated. The total includes the amount raised under the Saskatchewan Emergency Distress Fund.

Time Out for a Smoke

A lull in the street fighting at Chapei gives two Chinese machine gunners above above an opportunity for a smoke, and gives their deadly weapon time to cool off after working overtime in defence of the city. These men are typical of the 19th Chinese Route Army.

For Game Preservation

United States Game Laws Blind With Disapproval At Saskatoon Meeting

Executives of the Saskatchewan Fish and Game Protective Association strongly disapprove of hunting methods employed in certain parts of the United States and a resolution to that effect will be presented the meeting of game commissioners at Ottawa, April 14, 15 and 16, Baiting, live decoys, sunken punts and night lights, used in hunting water fowl were the chief methods denounced at the executive of the association at a conference held at Saskatoon. The resolution also hints that the Saskatchewan organization feels that failure of United States authorities to remove the devastating and unsportsmanlike methods of hunting may eventually lead to a break in negotiations toward an international movement for the conservation of migratory game birds.

The meeting concentrated mostly on various methods of conservation, much of the discussion taking on an international aspect so far as the migratory bird act was concerned. The general feeling of the meeting was that unless some co-operation of Canadian and United States organizations is arranged, the time is not far distant when wild ducks and geese will be totally extinct. Open seasons of similar duration on both sides of the line was suggested as another important and representative plan will be made to Ottawa that any changes in length of season or bag limit made in Canada, be subject to the approval of the provinces affected.

Swivel and automatic shotguns, already banned in Canada but permissible in certain states, are strongly opposed by the Saskatchewan body and that point will be brought to the attention of the Ottawa conference. Other types of "machine" guns in the form of semi or fire arms are also to be known was made regarding the use of "punt" pump guns.

Along with many other items, it was decided that the 1923 general meeting of the Saskatchewan Fish and Game Protective Association will be held at North Battleford, June 26-28. During the interim every effort is being made to augment local protective associations and along with interesting sportsmen throughout the province in the protective plan, to start a similar movement among the younger people.

Unemployment Insurance

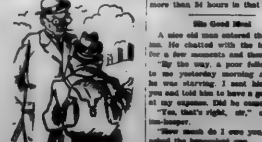
Federal Or National Plan Is Urged By Alberta Legislature

Adoption of a national scheme of unemployment insurance was urged upon the Dominion Government in a resolution which was passed unanimously by the Alberta Legislature.

Moved by A. Smeaton, Labor, Lethbridge, the resolution read:

"Resolved that this assembly, being of the opinion that the results of unemployment can only be properly and adequately safe-guarded by a federal or national scheme of unemployment insurance, acceptable to the provinces, it is urged upon the Federal Government the immediate necessity of such legislation."

Carrier pigeons in Germany now act as air photographers, carrying attached to them small automatic cameras which operate as the birds fly.



"You have spent twelve years in the solitude? Is the climate unhealthful?"

"Yes. Very. To be ill down there you have to be in very good health!"—Pigeon Gates, Toronto.

Frenchmen Was the Inventor Of Cellophane

Wrapping Is Another Amazing But Historical Fact Many Time

You may get some satisfaction out of knowing talk is to blame for the hundreds of thousands of man-hours this nation has spent taking things out of cellophane wrappings. It wasn't an American who invented it. Mad Columbia." It was a Frenchman, a Frenchman of the good old French name of Brandenburger. Monsieur J. E. Brandenburger. He came upon it while experimenting with rayon back in 1908. He had developed it to pretty much its present state by 1912. He named it too in cellophane. The French government used it during the war, taking the entire production to make eye-pieces for gas masks. In 1923 the du Pont interest bought the American rights. They made it waterproof and now everything wears it. It is made of wood pulp, as you may know, and it keeps everything out, from germs up, and to really, very curious, if annoying.

It has all sorts of uses besides the familiar ones. They are making hats out of it, artificial grass and outer coverings for the stage, parasols for emergency use, containers for hardware-store chorused, and coverings to protect table tops from glass marks. Modern Canada, United States and other nations is arranged, the time is not far distant when old dachs and goser will be vastly different. Open seasons of similar duration on both sides of the line was suggested as another important and representative plan will be made to Ottawa that any changes in length of season or bag limit made in Canada, be subject to the approval of the provinces affected.

UNCLE SAM: "Now what's a guy to do in a fix like this." should I be satisfied with what I've already collected, or grab at some more eggs and risk the old rope bustin under the extra strain"—The Western Mail, Cardiff, Wales.

Coin Edge On Competitors

Wisdom Theory By Firms Which Advertise During Depression

It is in times of depression that competition diminishes with obvious advantages to those who can and do maintain their sales efforts. A bold advertiser in a depression period gets the "edge" on his competitors, at a cost much less than is required to get the same results in times when business enterprise hums.

Wrigley found depression years to be good years. Ruth became other eaters established their caravan of the buying public. When other voices grew faint or silent, the public turns in larger numbers to that advertiser who seeks their attention and favor with undiminished perhaps increased—zealotry.

The public really wants — even in times of depression — to be advertised. It finds bad and business spirit-less when advertisers grow dumb.

Wheat Quota

Limited Number Will Not Be Brought Up At Imperial Conference

The London News Chronicle said it understood the government had dropped a proposal to work out a wheat quota for the Dominions at the Colonial Imperial Conference next July.

The newspaper said it now understood British authors had accepted the home quota scheme now before the House of Commons on condition there should be no duration quota.

The Chronicle also said there were reports the government intended to offer a 10 per cent. quota on meat from the Dominions in return for reciprocal arrangements admitting British goods to the Dominions.

Ban On Narcotics

The House of Commons on resolution moved by the Prime Minister, approved the international convention for limiting the manufacture, and regulating and distribution of narcotic drugs. The convention was drawn up at Geneva on July 13, 1921, and was signed for Canada by Dr. W. H. Riddell.

Switzerland has a "Buy Swiss Goods" campaign.

Necessity Evolved Popular Cigarette

Italian Artillerymen Forced To Find Substitute For Pipe

The cigarette is having its 100th anniversary in 1922. Its origin is due to the necessity which has mothered other inventions, for the cigarette stands revealed as a child of war. When the forces of Ibrahim Pasha lay before Acre in 1832 a supply of tobacco came up for the artillerymen. The bearer of supplies was also in smoke it had been destroyed by the cannon of the defiance. However, an ingenious gunner hit upon the idea of filling with tobacco instead of gunpowder one of the little tubes of India paper provided for the cannon field pieces — and voila! the "little cigar."

By 1856, a year in which the British troops took part in another siege of Acre, the cigarette was known in London, England. Five years later cigarettes had been introduced into France, and by 1865 they were being smoked in Italy.

Four Grasshopper Plagues

North Dakota Farmers Hoping For a Cold, Wet Spring

Reversing their usual attitude the farmers of North Dakota, and especially of the north eastern section of the state, are hoping for a cold, wet, backward spring. In this they see the best assurance of freedom from the worst grasshopper plagues that territory has ever experienced.

Arrangements are being made for financial assistance in conducting a systematic campaign on grasshoppers in this and other north-western states, but the task is by immeasurably that in the absence of assistance from nature it is likely to prove impossible to deal with it effectively.

Did Not Know the Word

The old lady was looking for something to grumble about. She entered the butcher shop with the light of battle in her eyes.

Old Lady—"I believe you sell diseased meat here!"

Butcher "Worse."

Old Lady (astonished) "What do you mean, worse?"

Butcher "The most we serve is dead."

Open Shelf Library

Denial Made To Report That Service to Backbreakers Will Be Withdrawn

While in many quarters a belief exists that it is intended to discontinue the open shelf library service of Saskatchewan, there is no intention of taking this step, according to T. A. McIsaac, commissioner in charge.

Speaking with reference to a proposal that the Canadian Foundation may associate itself with the open shelf library system by giving some financial assistance to its extension, Mr. McIsaac said nothing definite had yet been decided in the matter although it is hoped that the foundation may give assistance.

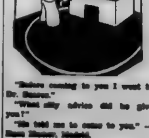
Planes Take Homer Hunt

Prospectors Have Started Rush For Gold Lake Region

Six aeroplanes roared away from the airport headed for the mineral area of Great Bear Lake, 1,500 miles to the north. They formed the first of the anticipated spring rush to take from the wilderness its wealth of radium-bearing pitchblende and other minerals.

Five of the aeroplanes were chartered by the Canadian Airways, Limited, and one was owned by Spence McDonough Aviation Company.

The sockeye salmon spends most of its life in the sea, but spawns only in fresh water.



"Before coming to you I went to Dr. Dunce."

"What silly advice did he give you?"

"He told me to come to you."—Show Shower, Montreal.

Returning To Mother Country

Tide Of Immigration Turning Back To Shores Of Britain

It has come as a shock to the British public to learn that Dominions are seeking more migrants back to Britain than they are receiving despite large sums they are spent by government and private agencies for promotion of settlement in the empire colonies.

Last year there were 11,000 more persons leaving Canada for England from Canada in excess of the number making the westward journey. There were another 11,000 that came from other parts of the empire over and above the number leaving Britain. Australia had the next largest exodus after Canada making a net loss of 3,500 migrants.

Taking the last five years together Canada has a corresponding loss, but Australia lost over 14,000 by emigration. The secretary of the migration movement to Britain is told of the United States. A net balance of 12,000 people abandoned that country expecting to find better conditions in Britain last year. It has often happened in the past that the pure of Britain's human exports has come back.

It is the first time that the tide has turned right back to the mother land from all distant shores and it is by no means certain that the outward flow can be resumed when the present exigencies are again demanding labor. There is already shortage of juveniles in Britain owing to the fall of the birth rate, which began about 20 years. The Morning Post sorrowfully comments, "If our industries were prosperous we could afford to welcome these recruits, but as things are we can only suppose they return to us by reason of the poor law system and unemployment insurance, they have been beaten by hardier conditions of the new world, or are attracted by softer conditions of life at home."

MARGARET PEDLER

Author Of

"The Splendid Folly" "The Hound Of Her Love."

Hodder & Stoughton, Ltd., London.

CHAPTER XIV. Continued

"Don't look so blue!" Claire's voice broke in upon her gloomy trend of thought. She was laughing, and Jean was conscious of a sudden upsurge of admiration for the young girl's courage which could laugh even while it could not look forward. After all, there are compensations in life. You're one of them, my Jean, as I've told you before! Now let's talk about something else."

Jean responded gladly enough, and presently Sir Adrian was temporarily forgotten in the little intimate half hour of woman-talk which followed.

CHAPTER XV

Lady Anne's Disclosure

"Well, have you enjoyed yourself?" enquired Lady Anne when Jean returned. "I suppose so, as you stayed to tea," smiling.

"Oh, I had tea with Claire Sir Adrian was away"—with a small grimace—"so we had quite a nice little time together. But, yes, madame"—Jean had fallen into the use of the gracious little name which Blaise and Nick kept for their mother—"I really enjoyed myself very much. Judith was ever so much nicer than I expected."

"So now, I suppose, we shall all be side-tracked in favour of Sir Adrian and his sister?" put in Blaise, who had been listening quietly. There was a sharpness in his tones, as though the prospect did not please.

Jean smiled at him engagingly.

"Of course you will," she replied I invariably side-track old friends when I get a chance."

"Oh, you'll get the chance right enough" rather subtly

"Yes, I think I shall" demurely "Geoffrey has always been nice to me, and now Judith, too, has succumbed to my charms, and says she hopes we shall be good pals."

Tormarin rose, pushing back his chair with unnecessary violence.

"I don't think I see Judith Craig extending her affections to Glyn Peterson's daughter," he commented cynically.

An instant later the door banged behind him and Lady Anne and Jean looked across at each other smiling as women will when one of their mankind proceeds to behave exactly like a cross little boy.

But a quick sigh chased the smile from Lady Anne's lips.

"Poor old Blaise!" she murmured, as though to herself. Then, her grey eyes meeting Jean's squarely, she said quietly:

"Jean, you're so much one of us, now, that I should like you to know what lies at the back of things. You'd understand some of us better.

Jean pulled forward a stool and settled herself at Lady Anne's feet.

"Do you mean about the "mark of the beast"?" she asked, smiling a little. "Blaise told me to ask you about it one day."

"Did he?" His tirades for her mouth seemed to stand for" — she broke off suddenly. "It has come to be almost a symbol in his eyes. You see, he has suffered from the family failing — more than the normal, that was responsible for that white lock of hair."

Lady Anne looked down at her thoughtfully.

"Well, there's no need for me to tell you that the Tormarins have not been saints! You've had evidences of it in Blaise—that sudden flaming up of anger. Though he has learnt through bitter experience to control it, he'd himself more or less in check." She paused a moment, as if her thoughts had reverted painfully to the past. Presently she resumed: "All the Tormarin men have had it—that blazing uncontrollable kind of temper which simply cannot brook opposition. Blaise's father had it, and it was that which made our life together so unhappy.

So Destiny had been busy with her [illegible]

"You you, too?" whispered Jean. I, too ?" Lady Anne questioned. What does that mean ? "

"Why, it seems to me as if 'no one' is ever allowed to be really happy and to live their life to peace. There is Judith whose life my father spoilt and there whose life Sir Adrian spoils and that man Nick's life as well. And now you."

"[illegible] subject of reference deep within her, struck the horrified [illegible] Jean's name

I expect we are [illegible] to be joyful " said Lady Anne. Though, after all, it's largely our own fault if we are not. We make or mar each other's happiness, it isn't Fate.

But I've had my share of happiness, Jean never think that I haven't. Afterwards, with Claude, I was utterly happy "

She fell silent for a space, coming on that quiet note of happiness. Presently, almost both in a state the review into which she had fallen, Jean questioned hesitantly)

"And the "mark of the beast," unaccountable? You were going to tell me about it "

It came as a consequence of the Tormarin temper. Lady Anne calls it the "mark of the beast." It was just before he was born—when I was expecting to be supremely happy holding my first-born in my arms. Derrick Blaise's father was an extremely jealous-natured man. He hated to think that there had ever been anyone besides himself to care for me. And there was one in particular, of whom he had always been foolishly jealous and suspicious. I can't imagine why, though—with a little pained laugh. "You would think that the mere fact that I had married 'him,' and not the other one would have been sufficient proof that he had no cause for jealousy. But no! Men are queer creatures, and he always remained the friendship with John Lovell—which continued after my marriage. I had known John Ferrar Lovell since I was a child. He was my friend a woman ever had!" She sighed: "And I needed friends in those days! For somehow or other, in spite of myself, my husband conceived an idea that the little son who was coming was not his own son and heir, but that of John Lovell. I think nonsense must have poisoned his mind. There was a certain [illegible] of our acquaintance whom I always suspected; she hated me and was very much attached to Derrick, who had been engaged to marry her, I believe. In any case, he came home one evening, from her house, like a madman, and there was a scene — a terrible scene — [illegible] accusations at me. [illegible] I can't talk of it, because he was hideously repentant afterwards. As soon as the fit of rage was past, he realised how utterly groundless his suspicions had been, and I don't think he ever ceased to reproach himself. For that had always been the way! The Tormarins are terribly invariably brought the bitterest self-reproach upon themselves. One way or another, the same story of blind, reckless anger and its consequent [illegible] repented itself generation after generation."

"And then? What happened then?" asked Jean in low, shocked tones.

"I was very ill—so ill that they thought I should not live. But I did live, and I brought my baby into the world. Only he was born with that white lock of hair. And my own hair had turned perfectly white."

Jean was silent for a little. At last she said softly:

"I'm so glad, madame, that you were happy afterwards. "Your house of dreams" came true in the end "

"Yes" Lady Anne's grey eyes were very bright and luminous. "My house of dreams came true."

After a while, she went on quietly: "But my poor Blaise's house of dreams fell in ruins. The foundation was rotten. You know, didn't you that there was a woman he once cared for ?"

Jean nodded. Speech was difficult to her just at that moment.

"It was a miserable business altogether. The girl, Nesta Freyne, was an Italian. Blaise met her when he was travelling in Italy, and—oh, well, it wasn't love! Not love as I know it, [illegible] as I think, one day, you too will know it. It blazed up, just one of those wild infatuations that sometimes spring into being between a man and woman, and almost before he had time to think, Blaise had married her——"

"Married her?"

The words leapt from Jean's lips before she could check them. In the account of Tormarin's disastrous love affair which had been blazoned upon her hearing in London, there had been no mention of the word marriage, and she had always imagined that the woman, this Nesta Freyne, had simply plotted him in favour of another man. Moreover, since she had been at [illegible] Manor, nothing had been said to correct this impression, so, very naturally, the subject was one avoided by general consent.

(To Be Continued.)

American tailors are popular in [illegible]

"I Robbed Your Dresser Drawer"

"This My Signature"

A certain city had an epidemic of house robberies in daytime. The robbers would ring doorbells and if anyone answered, they would make some excuse and depart. But, if no one answered, they would break in through a window or a skylight. One man, rubber ball his finger print on a broken piece of glass. The police had that print on file. They knew the robber, his gang and their records. The crooks were all rounded up and convicted.

All business men of these had let his finger print.

Germs in Every Print

This is told to remind you that we all leave finger prints everything we touch. Most of these prints are germ-laden. We can't keep up from doing it by handshaking—by touching things they have touched. Then we transfer them to the mouth, where they breed and do not lose its system.

Life Extension Institute Says 97 diseases which may be conveyed in this way. The most common is a cold. A cold used to check a season or a rough [illegible] to pneumonia.

We cannot escape [illegible] every handshake, every [illegible] every time. The best we can do is to remove the germs or render them harmless before they reach our food.

Safety This Way

Sorry To See Night Coming She Could Not Sleep

Mrs. E. McElroy, Kirkfield, Ont., writes:—"I was very nervous and run down, was short of breath, and had continuing feelings, and was sorry to see night coming as I could not lie down or go to sleep.

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now completely relieved; can sleep fine all night, and have gained in weight."

Put up in all three and general shapes, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Little Helps For This Week

"Teach me Thy way, O Lord, and lead me in a plain path." Psalm xxvii. 11.

All is uncertainty.
Yet over all
One guideth steadily
Unseen, though near and small.
What will the issue be?—
God guideth all.

—James Freeman Clarke.

There is no authority short of God. Look up to Him, expect His teachings. And though clouds of uncertainty may come, never let them discourage, or think that on the earth you can find that guidance which is not a thing of earth, but which must come to you from heaven.

—Phillips Brooks.

Beirn, Mecmanigues, has launched a port-expansion program.

LOCAL NEWS

Mrs. F. W. Smith is spending a week with her parents at Clyde.

Don't miss John McCormack at the Empress Theatre to-night. The first sound picture to be shown in Fort Saskatchewan.

A jolly Easter party—
We have planned with greatest care,
You will find a welcome hearty,
And we hope to see you there.
Guess what we will do are you in doubt,
Well come along then one and all
And you'll soon find out.
Josephberg School March 24th.
7-1tc

A very successful bridge party was held under the auspices of Princess Rebekah Lodge No. 82 on March 9th. Winners of prizes were as follows: Ladies first Mrs. Smith, Consolation Mrs. A. Dennis. Gents first Mr. L. Hodgins, Consolation Mr. S. Dennis. Refreshments were served and a very enjoyable evening was spent by all.

An attractive St. Patrick's program was given on March 10th by the Women's Institute. Mrs. J. H. Adamson delighted her audience, with her humorous and instructive paper on "St. Patrick".

Shamrocks were used to decorate the tea table and the serving of refreshments formed a social hour concluded the meeting.

John McCormack in "Song of my Heart" will be shown in movietone at the Empress theatre to-night.

Sean O'Casian, played by John McCormack, is prevented from marrying the girl of his choice, Mary O'Brien, by the opposition of her aunt, who favors the girl into a rich but unhappy marriage. Later, her husband deserts her. With her two children, Eileen, and Ted they must live with the unsympathetic aunt.

Sean, heartbroken, goes on the village, encouraged by his singing teacher and admired by his neighbors. Mary fails in love with Fergus O'Donnell but again the aunt interferes and Fergus goes to Dublin to make his fortune.

Despite unbelief of a pair of Irish cronies, Sean's fame spreads and he goes to America on a concert tour, accompanied by his teacher. The whole town bids him godspeed. Mary feels that the last tie of their shattered romance is gone.

In America, Sean is a great success. On the eve of his most important appearance, he has a premonition of trouble. At that moment, Mary is dying in Ireland, her last act being to write a letter to Sean asking him to care for her children.

Sean cancels his engagements and returns in time to help Eileen and Fergus. Fergus fails to win his fortune, but Sean tells him he has great plans for him, so he and Eileen can marry. He promises to take young Ted to America.

BORN

Born to Mr. and Mrs. Steve Selinsky of Fort Saskatchewan on Friday, March 11th, at LePage's Nursing Home. A son, Anthony.

At the Fur Breeders' Association meeting held on the South side, in to the rule of dishwasher canned Edmonton on Tuesday evening, Dr. mush enjoyment.
C. H. Grunert, of Fort Saskatchewan gave a practical and interesting talk on the diseases of foxes and mink, illustrating his subject with specimens, and answered many questions.

Canada during January exported 130 cwts. of sweetened condensed milk, to the old country, and 2,300 cwts. of unsweetened condensed milk.

IT PAYS TO ADVERTISE

A very enjoyable evening was spent when Mr. F. W. Smith was host to a number of young men at his home on Monday evening.

Three tables of bridge were in play, the game lasting until near midnight, when a tasty luncheon was served. After lunch, Mr. Bodine moved the following vote of thanks to the host, which was carried with acclamation.

MAR 29 1932 PROVINCIAL LIBRARY

A.T.P.A. Holds Enjoyable Evening, Hear Address

St. George's A.Y.P.A. had a very interesting meeting at the home of Mrs. A. Smith on Thursday 10th. inst.

After the usual opening ceremony the Rector gave a short talk on the observance of Holy Week, especially of Maundy Thursday, Good Friday, and Holy Saturday. Dr. R. H. Moore then took the floor and managed to make his subject, "Bacteria", quite interesting. Some are beneficial, some are enemies, some are both; their shapes are distinctive, so that they are readily recognized under the microscope, and much progress has been made in medical practice since their recognition.

After this the Rector conducted a game of vits, a sort of guessing game with the guess extracted; this was won by Donald McLellan. Then a good supper served by Mrs. Smith, with the usual songs and choruses at the end, about 11 p.m.

Hearty votes of thanks were carried, to the Doctor for his address and to Mrs. Smith for her gracious hospitality.

Josephberg Red Cross

The Josephberg Junior Red Cross Society held their regular semi-monthly meeting in the senior room of the school, on Friday, March 18th.

The President, Lorna Krebs opened the meeting with the singing of O'Canada and the repetition of the pledge.

Due to the absence of the Secretary Betty Gean, the minutes of the last meeting and other correspondence were read by Margaret Mann. Following this the Treasurer's report was given by Harold Meier.

The final report of arrangements for the Easter and April Fools party, was given by the social convener, Dove Fisher. The party is well under way and the committee have plans for a very joyous and successful evening on Thursday.

The President reported that a number of Easter greeting cards had been forwarded to the disabled soldiers in the Red Cross Hospital, the previous week.

As there was no programme arranged, Mr. Griffen kindly consented to give a "read" reading. It probably was not the same id the Hermit, when the climax came for it really wasn't so sad as people had anticipated, but never the less everyone enjoyed it, and no tears were shed unless in laughter.

The meeting was closed by the singing of the National Anthem.

The next meeting will be held on Friday, April 8th.

A Scotchman was leaving on a fortnight's business trip and called back as he left home: "Good-bye all. Katherine, dinna forget to mak' le-le Donald off his glasses when he's no looking at anything."

John Wanamaker made millions as a retail merchant. Of newspaper advertising he said: "When times are hard and people are not buying is the very time that advertising should be heaviest. You want to get people to see what you have to sell and you must advertise to do that. When times are good they will come largely of their own accord, but I believe in advertising all the time. I never stop advertising."

COMING EVENTS

EASTER MONDAY DANCE

An Easter Dance will be held on Monday, March 28th, in the Memorial Hall under the auspices of the St. George's W. A. Rhythm Boys Orchestra. Admission $1.00 couple; Extra lady 50c.

FORT HIGH SCHOOL LITERARY SOCIETY HOLDS SOCIAL EVENING

On the evening of Friday, March 4th, the first regular meeting of the Lit. ary Society was combined with a skating party and a social evening.

President Tom Henry spoke a few words of appreciation to the students for electing him to office. The Editor of the "The Wag", then gave a short report on the financial progress of the school paper.

After business discussions the meeting was conducted by a fine programme of musical selections, readings, contests and refreshments. It is probably worthy of note that everyone survived the coffee.

On Friday night, March 18th, a short business meeting was held.

The chief topic of discussion was the proposal that a debate be held in the near future. Owing to the small student representation however, no definite decision was made. It was decided that a special meeting for the discussion of it's feasability, debate and subject, would be held the following week.

After the meeting the students then repaired to the local theatre, the meeting this week taking the form of a theatre party.

Local Ladies Rink Wins From Edmonton Night Club

A rink from the Edmonton Night Club paid a visit to the Fort on Saturday evening and tangled with a rink of local ladies.

For the first few ends the visitors had the edge, but the locals soon found their stride and the game ended with a score of 10 to 7 in favor of the Fort ladies.

The game was very much enjoyed by the visitors and locals.

After the game a delicious lunch was served at the home of Mrs. T. Lee.

The visiting ladies were:—Miss Olive Walker, skip; Miss L. McKenzie Miss Olive Cowell; and Miss E Fisher.

On the local rink:— Mrs. Ardley skip; Mrs. Lane; Miss J. Gauf; and Mrs. E. Daniels.

COST OF PRODUCTION FACTORS

Present economic conditions make it necessary for the livestock farmer to produce milk, beef, pork and mutton at the lowest possible cost. Low production costs are only obtained by the judicious use of feed and labor as well as by the owning of stock capable of producing economically when given the opportunity.

Many factors enter into the costs of producing a market lamb. Experiments conducted at the University of Alberta have proven that the normal number of lambs and the thrift of lambs at birth is dependent upon how the breeding ewes were fed during the winter months.

A complete report of these experiments, together with others dealing with swine and cattle will be discussed at the 11th Annual Livestock "Feeders' Day" to be held at the University, Saturday, April 9th.

SPECIAL TELEGRAPH SERVICE AT EASTER

Through an arrangement with transatlantic cable companies, the Canadian National Telegraphs will transmit at low flat rates, Easter greetings to eleven European countries, the messages to be delivered in any one of ten languages. This special transatlantic service is available between March 19 and March 26 inclusive. Delivery of flowers at Easter by Telegraph to overseas points as well as to any section of North America is also made possible. It is your through the co-operation of telegraph and cable companies and Forists in all European countries.

YPRES VALLEY

The school social committee will give a dance on Tuesday, March 29, at the Ypres Valley School

The Ypres Valley Young People's Club presented a play on Friday, March 18th, which was quite successful

We have some very promising young actors and actors out here. I considered it was the first time some of the young people had done anything in this line, they certainly excelled themselves

We hope that in future there will be more performances of this kind

Bill Gunn had the sad misfortune to severely injure his hand while splitting wood and is in the Royal Alex. Hospital in Edmonton

Mrs H Gunn and Mrs Bill Gunn were Edmonton visitors yesterday.

DE VALERA'S WINGS ARE CLIPPED

Under the democratic system a nation obtains just the government it deserves. And the Irish Free State has obtained De Valera

Fortunately for everybody, the election is so close that De Valera will have to move along with the Labor Party if he is to remain in office. And the Labor Party, fully aware of the importance of trade with Britain, has intimated that it is not going to stand for any nonsense. From which it would seem that the sting has been taken from the Republican's ambitions, and business will continue more or less as usual.

THE RESURRECTION AND THE LIFE

Another Easter is upon us. It is the Easter message that helps us to see more clearly the Divine import of the resurrection, and the life beyond this; we build up a beautiful conception of the whole life.

The great question of antiquity was, "If a man die, shall he live again?"

While some systems of religion hold out some faint hope of a shadowy existence beyond the grave it was Christianity which gave humanity an adequate ideal and sufficient reason for this hope. He Whose resurrection we commemorate next Sunday brought life and immortality to light through the Gospel.

We need not be alarmed by the apparent uncertainty and professed indifference of some to this hope. Such indifference and uncertainty is largely due to our absorption in the physical sciences and in the material welfare of humanity. This is but a passing fashion. Thinking men realize that a general loss in faith in immortality would cut the nerve of altruistic effort and weaken our moral sanctions.

ELECTION OF PERCY DAVIES NOW ASSURED

With eight polls yet to be heard from on Wednesday, Percy G. Davies, young Conservative candidate in the Athabaska by-election Monday had his Liberal opponent, Isaac Dunn, by a margin of 200 votes.

The eight polls yet to be heard from are situated in the far northern section of the contested constituency.

We Are Learning Now

It is not in times of prosperity but in adversity that people learn their most valuable lessons. They may not be encountering immediate and material profits, but they are unquestionably profit reaping in the long run throughout the years to follow.

And what is true of individuals is equally true of nations and of the world. When things are moving along quite satisfactorily for the time being, normal or even abnormal development taking place, small progress recorded, when people are content and satisfied, individuals and nations learn very little of the real meaning and vital things of human existence. It is not in times of prosperity that great reforms are achieved or marked advances made in human and social relationships; rather it is when we consider "all is well" that we slip back and lose our grip on real fundamentals.

In the months and years immediately preceding the great stock market crash in the latter part of 1929, few people were worrying about anything, unless it was how to make still more money then was accumulating to their credit. They were not at all concerned about existing social conditions and giving no thought, or very little, to vital principles underlying all economic problems, including the possibility of future unemployment, mounting personal and national debts, industrial taxation, all combining to possibly result in loss of businesses and homes.

We and governmental bodies and special parliamentary committees grappling with the many and intricate problems involved in the relationships existing between debtors on the one hand and creditors on the other. They are discovering that, in the palmy days of abounding prosperity, when people took little thought of the future, when money and credit were easy, when prosperity was booming, markets plentiful and prices high, a huge volume of debt, in large and small amounts, was contracted which it is now utterly impossible to pay, and which now rests like a wet blanket upon all business, industry and means of production. Efforts are being directed to reducing not of the necessities in which people and nations are sinking, and to provide checks to a recurrence of such a condition when once again the world becomes thoughtless through prosperity.

A fourth commission is studying the transportation problem. A few years ago the railways of Canada were doing an enormous business, rapidly expanding their systems, the privately-owned road paying large dividends with their stock quoted at a premium, and the government-owned road steadily, even rapidly, through re-organization and efficient management, increasing its profits on operation to such an extent as to give promise that the day was at hand when it would no longer be a drag on the Federal Treasury. But now both systems are in deep financial trouble, and a solution of their difficulties is sought. In adversity they, and the country, are learning lessons they scorned to study when prosperous only a few short years ago.

Had a sound system of unemployment insurance been established during the years of our prosperity, thousands of people and the country itself would have been saved much of the grief of the past two years. But when times were prosperous, everybody employed at good wages, business booming, nce then could not have mustered a corporal's guard. It would have been ing, nobody was in a mood to even consider the possibility of future unemployment on a gigantic scale. Suggest for a moment that such a condition could ever since then could not have mustered a corporal's guard. It would have been laughed to scorn. But now, in adversity, we are learning the lesson that fooled up and taught the ancient Egyptians. Seven years of plenty prepare for years of famine.

For a goodly number of years past, the need for a thorough over-hauling of Canada's constitution, the B.N.A. Act, has been mentioned. A splendid document in 1867, its designers could not foresee an age in which radio and the airplane would wipe out provincial boundaries in the twinkling of an eye, nor could they vision this electrical age, this mechanical age with its myriads of inventions and mass production on farms as well as in factories. A nation itself cannot control radio, let alone a province. The other waves recognize no arbitrary boundary lines. If Canada and the United States each attempted a radio policy independent and regardless of the other, only chaos would result. Yet some provinces desire to control both the radio and airplanes within their smaller bounds.

Recently the Privy Council declared the Dominion Insurance Act unconstitutional, and that control of insurance rested with the provinces, under the terms of the B.N.A. Act Yet insurance is not even national, but international in its organization. There is too much conflict between the provinces and the Federal authority. It is a constant occurrence of expensive new suits to determine which possesses authority. In our adversity we are learning that we cannot afford to have all this multiplicity and conflict in government and administration, and the time would appear to be ripe for the holding of a conference, not of a few days, but a comprehensive one to go over the B.N.A. Act in its entirety with a view to more clearly defining the respective jurisdiction of the Dominion and the provinces. In view of the different conditions prevailing in 1932 as compared with 1867, coupled with the rising costs of provincial government, it would seem to be the part of wisdom for the provinces to relinquish certain matters in regard to which they possess a divided control with the Dominion, and entrust them wholly to the Federal authority in the interests of a more unified and united Canada, and a lessening of the burden of taxation upon all.

Sharp Pains in His Heart Nerves in Bad Condition
Mr. Fred J. Chase, Thurston Station, N.S., writes:—"I used Dr. Chase's Nerve Food and Nerve Pills with wonderful results.
My heart would hurt so bad I would have to sit down when at work, although only the young man I had many pains in my heart when I could lie down at night.
My nerves were also in a very bad condition, but after taking two boxes of Dr. Chase's Nerve Food and Nerve Pills I felt like a real man again. I have been so for years."
Price 50c a box
Dr. Chase's Nerve Food

Change Means Of Travel

Bicycle Is Very Popular In England and Europe

The bicycle is returning to favor. Cycle manufacturers state that the present demand for bicycles is higher than it has been for the last seven or eight years. Certain places have already been known as Bicycle Towns. Bedford is the most famous example in England, and has the highest proportion of bicycles to population. This is probably due to the fairness of the surrounding country. Abroad, the bicycle is very popular in Copenhagen, for instance, moves almost entirely on the bicycle, so does the Hague. In Berlin the streets are crowded with bicycles at the hours when people are going or coming from work. Factories on the outskirts of the city have accommodation for thousands of bicycles, as most o the workers find this the cheapest way of travelling.

FASHION HINT

"How to make my old short shirts look like new" is a question that is a problem to me until I hit on this idea. Instead of cutting off the part that had been turned under and darker than the rest, I ripped the entire dress, after having bleached the material in the Diamond Dyes package. I used Diamond Dyes for the rejuvenation of other dresses I have dyed many things with them wonderfully well. They have saved me many dollars and have never failed to give perfect results—just to name a few things—best to wear and washing Fritzies with Diamond Dyes are just right, I enjoy or that linen with Diamond Dyes. They do give the most gorgeous colors!"
Mrs. G.C. Lewis, Quebec.

Gold Mine In Sweden

Third Largest In World Is Situated Under a Lake

The third largest gold mine in the world, situated beneath a lake in the north of Sweden, in a district producing annually more than eight million dollars worth of the precious metal, is described in an official statement by Count Albert Ehrensvard, the Swedish Minister of Mines. Count Ehrensvard predicts that Sweden may advance to the front rank of gold producing countries. Since 1918 engineers and geologists have been working secretly in the primitive mountain districts near the Baltic Sea, the Minister declared, and have progressed to a point where more than forty shafts are being developed. The mines produce silver, zinc, and arsenic in sufficient quantities to pay entirely for the working of the Boliden mine alone, which discovered only in 1924, and now the third most important gold mine in the world.

Holloway's Ointment Ad Goes. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would buy the remarkable preparation of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great Indian herb remedy. Why suffer or experiment with worthless preparations when Dr. J. D. Kellogg's can be purchased everywhere.

Priceless Tapestry Damaged

A priceless tapestry depicting the childhood of Christ in the Church of the Nativity in Bethlehem, was damaged with a knife in the absence of the usual police guard. The Church of the Nativity, built over the manger in which Christ is supposed to have been born, is visited by many thousands of pilgrims every Christmas. The tapestry was presented to the church by France in 1874.

There is nothing repulsive in Milburn's Worm Powders, and they are pleasant to take as sugar, so that few children refuse them. In some cases they cause vomiting through their action in an unusual stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Stainless Steel

The first stainless steel was the work of Michael Faraday, English physicist.

Scots Industry

Nearly 70 firms are now engaged in the Scotch tweed industry of Scotland.

Quick action saves trouble, worry. Keep Dodds' Egyptian Liniment always handy. Stops burning instantly. Comforts wounds. Quickly relieves Barber's Itch and Ringworm.

YESTERDAY—
Cranky and Fretful
TODAY—
Happy and Contented
Mrs. M. Mason, Halifax, praises BABY'S OWN TABLETS.
"Baby's Own Tablets have indeed been a friend to me," writes Mrs. Mason. "When the children are ever tired and restless I give them their dose of Baby's Own Tablets at night and in the morning I can see that a wonderful change has taken place; they are happy, contented and soothed children and a pleasure to cope with.
Mrs. Mason's address is 152 Dumont Road, Toronto, and I have found it a good idea to have Baby's Own Tablets when—ever there is a slight cold or whenever there is cause for concern. Mothers should never be without BABY'S OWN TABLETS for nothing troubles children more than constipation, and these Tablets quickly relieve and whenever they are given the little ones take them, and even take them eagerly like candy. And they are absolutely SAFE, no one can possibly do any harm. 25 cents per package, from dealers or by mail from The Dr. Williams' Medicine Co., Brockville, Ont.

BABY'S OWN TABLETS
Make and Keep Children Well—As Mothers Know

Another Patent For Late Thomas Edison

Given For Apparatus Which Electrographs Sound Upon Diamonds

Edison is dead, but the United States Government is still awarding him patents for his inventions. The Patent Office has just issued a patent to Thomas A Edison for an apparatus which electrographs sound on diamonds to be used in cutting and grading tools. The diamond is the hardest known substance and it is therefore very efficient in grinding metals such as steel It is difficult to mount these diamonds in metals, Mr. Edison's invention overcomes this difficulty by providing a machine which electroplates nickel on the diamonds, after which they can be held rigidly in grinding tools. Edison also proposed to mount diamonds in a similar manner for phonograph needles. The signature of Edison in his well-known, firm and bold handwriting appears on the drawing of the patent.

In These Hard Times

Yes, these are hard times. We throw away ashes and buy soap, we raise dogs and buy hogs; we grow weeds and buy vegetables and brooms; we catch fish with a $4 rod we build sche-hhouses and send our children to be educated away from home; and at last we send our boy with a $40 gun and $10 dog to hunt 10-cent rabbits.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Making artificial flowers has become a "cottage" industry in Czechoslovakia.

Hunted Foxes Display Remarkable Ingenuity

Destroy Their Scents By Running Along Railway Lines

Hunted foxes and hares display considerable ingenuity and cun. ning when pursued by hounds. As the result of ancient heredity they will run along railway lines keeping on the metal rails. This appears to be a further application of the habit, common to hunted animals, of running in streams to destroy their scent the cold rail may have suggested cold water, actually it has much the same effect.

Simple Remedy For Bad Stomach Gives Swift Relief
No Need Of Strong Medicines Or Diet. Safe and Simple Pleyers Recipe Keeps Stomach in Fine Condition.
If you have indigestion, Sour Stomach, Gas, Heartburn, Pain or Bloating you may have your own certain relief. Just by following this simple advice:—
Get from your druggist a box of Bisurated Magnesia (Powder or Tablets). Take a teaspoonful in a little water after meals instead of your usual dose of indigestion pills. Or, if you prefer, you can get Bisurated Magnesia in tablet form. Either way is delightful. Many people prefer the tablets because they are convenient. Each tablet is the full equivalent of a teaspoonful of powder.
Bisurated Magnesia is the purest way to do it. Don't confuse it with cheap substitutes. Be sure you get Bisurated Magnesia. Then you will have no more indigestion, sour stomach, gas, heartburn, pain or bloating. Your stomach will be sweet and you will feel fine. Bisurated Magnesia is the recognized standard for relief of acidity. Ask your druggist for Bisurated Magnesia (powder or tablets).
Brazil's population has increased 27 per cent. in ten years.
It is thought that a full moon weakens radio signals.

NEURALGIA
THE agonizing aches from neuralgia can be quieted in the same way you would end a headache. Take some Aspirin tablets. Take enough to bring complete relief. Aspirin can't hurt anybody.
Men and women beset with rheumatism will find the same wonderful comfort in these tablets. They aren't just for headaches or colds! Read the proven directions covering a dozen other ums; neuritis, sciatica, lumbago; muscular pains.
Cold, damp days which penetrate to the very bones have lost their terror for those who carry Aspirin tablets with them! All drug stores, in the familiar little box!
Made in Canada
Aspirin

Federal Government Considers Question Of A Railway Outlet For The Peace River District

Construction of the Peace River district railway outlet was a matter for consideration by the Federal Government, R. J. Manson, Minister of Railways, told the House of Commons Although much thought had been given to the question, the administration was not prepared to announce its decision at the present time

"I believe firmly a Peace River outlet will have to be built," said the railway minister "It is only a matter of time, a question as to when it will be built"

Neither the Canadian National nor the Canadian Pacific Railway considered the Peace River outlet an economic feasibility at the present time, said Dr Manion they would not undertake its construction. This throws the question back to the Federal Government

Chas Stewart, former Minister of the Interior, considered the Peace River outlet an important one. He advised the government to decide for a short time the St Lawrence River development and give precedence to the far western railway.

The Peace River outlet has become a personal question in the House It is proposed to link up the "agricultural empire" of the Peace River with the Pacific Coast Its only connective with the south at the present time is through Edmonton. Alberta The estimated cost of the western link has been placed between $15,000,000 and $20,000,000, depending upon the number and extent of branch lines and the route

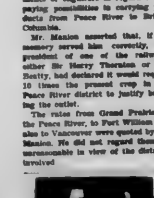
During the past year a committee of engineers studied the problem at the request of Dr Manion. Their report was unfavorable to the immediate construction of the line, but they favored the Obed route. The surveys of railways said both H. Henry Thetaren, president of the Canadian National, and Edward Beatty, president of the Canadian Pacific, concurred in this report, although Mr. Beatty did not support the Obed route.

Mr. Kennedy said the question of the outlet had been studied without consideration being given to all the facts The population of the Peace River country had grown from 20,000 to 40,000 people within the past five years, and there had been a drift of new settlers into this district from the drier-out areas. Construction of the outlet would provide assistance to people in this district in the development of their farms and was a better step than the giving of relief.

The yield per acre in the Peace River district was from four to six bushels higher than the yield in the prairie provinces, and the land available in the Peace River section was of the best quality, Mr. Kennedy declared He took issue with statements of engineers in regard to the paying possibilities in carrying products from Peace River to British Columbia.

Mr. Manion asserted that, if his memory served him correctly, the president of one of the railways, either Sir Henry Thornton or Mr. Beatty, had declared it would require 10 times the present crop in the Peace River district to justify building the outlet.

The rates from Grand Prairie, in the Peace River, to Fort William and also to Vancouver were quoted by Dr. Manion. He did not regard them as unreasonable in view of the distance involved



"Is there any greater misfortune than to be married to you?"

"Yes—to have been in love with you!"—Die Muskete, Vienna.

Lipton's Fortune

Efforts To Win Yacht Cup Removed Him From Millionaire Class

Sir Thomas Lipton's efforts to win back the America's cup for Britain removed him from the millionaire class just before he died, so his friends say

It was believed at the time of his death in fortune that his will would show a fortune running into millions, but the total estate was worth only £606,000

The America's cup races cost Sir Thomas very much more than was generally realized, and one of his most intimate associates Besides, he disposed of several large sums of money in the years before his death

Lipton's affection for his friends in the United States remained to the end, for he bequeathed the gold loving cup, which was bought by popular subscription and presented to him on his last visit to New York, to the New York Yacht Club

The greater part of the Lipton fortune went to hospitals and charities, although many substantial gifts were made to friends and old servants in both Britain and America.

Indian Population

Increased figures Shown For Saskatchewan and B.C.

The Indian population of both British Columbia and Saskatchewan increased during the last 10 years figures issued by the Dominion Bureau of Statistics indicate. Indians on British Columbia reserves in 1931 totalled 25,297 an increase of 2,955 in the decade, on Saskatchewan reserves, 11,823 a 10 year gain of 1,-Sup.

British Columbia has a population of 694,263, an increase of 170,321 in the past decade, final figures for the count previous census of 1921 show

The population of federal electoral districts is Chariton, 52,708, increase, 12,966, Comox Alberni 25,-669, increase, 3,991; Fraser Valley, 66,507, increase 4,956 Kootenay East, 32,566 increase 3,439, Nanaimo, 35,524, increase 7,516, New Westminster 69,394 increase 23,312, Okanagan, 30,358, increase, 1,434, Vancouver Burrard, 42,518 increase, 20,271, Vancouver Centre 75,234, increase, 14,355 Vancouver North, 32,-972, increase, 8,717, Vancouver South 69,356 increase 13,919, Yale-Cariboo, 35,535 increase, 5,-637, increase, 4,939 Kootenay West, 39,943, increase, 9,641

Official Snake Inspectors

Men In London Keep Tab On Prohibited Kind

Probably the quarrel job in London is that of two men whose job is to look out for snakes. The London council has strict regulations against the emission of smoke from factory chimneys On the roof of the Underground power station at Lots Road, Chelsea, is a little hut inhabited by the smoke spotter on duty He looks through a pair of binoculars, and he then produces a glass screen. This is ordered with four different shades. He looks at the chimney and compares its color with that of the shades on the glass. Should the smoke be of the same hue as the darkest of these, the smoke-spotter presses a button, instantly bells ring, hooters blow, and colored danger signals appear in various offices. One furnace is emitting smoke of a prohibited kind, and the boiler-room fiame with activity until the smoke-spotter presses the button which puts a stop to it quite literally the "all-clear."

Union Property in the Grand

Printers Are Responsible

Explanation "Out Of Sorts" Is Used By Compositors

For the expression "Out of Sorts" printers are responsible. The dictionary kinds and sizes of type in a printer's establishment are called "sorts." Sometimes his supply of some kinds may become exhausted, when any work in hand may have to be suspended until his "font" is replenished from the typefounders of the machines. While waiting for supplies he is, of course, being unable to work properly, "out of sorts."

In the past two decades the use of alloy steels has grown ten-fold.

Gold Producing Provinces Of Western Canada Adding Materially To Nation's Wealth

According to preliminary estimates of gold production for 1931, the Yukon Territory and the gold producing provinces of Western Canada are recorded for some 291 000 ounces, or nearly 36 per cent of the total production of the country Manitoba is indicated gold reserves in the known mines of the province and in possible extensions of known ore-bodies to be 250,000,000 This is exclusive of placers and probably as large a reserve as the province has had at any one time in its history yet, since 1893, into gold to the value of $160,-000 611 has been produced Reserves indicated at present, in conjunction with the re-habilitation and possibilities of semi-developed mines, prospects and unprospected areas portend a bright outlook for gold mining in the province.

In the Yukon the placers in the immediate vicinity of Livingstone were being prospected vigorously during the summer of 1931. Dredging had been practically abandoned for a number of years Considerable activity was also in evidence in the vicinity of Carmacks, where a lode gold discovery was made during the summer of 1930 The scene of the discovery was later visited by a number of geologists, but no reliable information is available as to its nature or extent.

Peace Garden

Proposed To Plant Shrubbery Strip Three Thousand Miles Long

Recently a number of Canadian business men in England have been interested in the proposal to the Dominion Government that their giving financial and other support to a picturesque scheme for establishing a strip of decorative landscape garden the whole of the way along the Canada-United States border This border is already famous for the absence of fortifications.

The idea appears to be that a fund of five million dollars be raised by public subscription in the United States and Canada, the bulk of which might come from those who might be moved by the sentiment that likely to be increased greatly by such an attractive lure, and the garden—3,000 miles long—be established forthwith by the interest on such a fund.

At various points along the border botanical museums and gardens might be established where delicate trees and plants could be reared. Such a project, too, would provide work and incidentally settle the problem for many parents of what to do with their sons because of the limited number of good gardeners in North America.

Such a garden would bring untold publicity to both Canada and United States and because of its unique position, forming the boundary between two countries and because of its great magnitude, stretching 3 000 miles and dividing a continent, it should merit a place as perhaps the eighth wonder of the world. Regina Leader.

Canadian Banks

There are 10 chartered banks in Canada with over 4 000 branches of which 179 are in other countries, mainly in Newfoundland, the West Indies, Central and South America and also in the great centres of international finance, London, Paris and New York. The assets of Canadian banks are placed at $3,045 000,000

Latvia has been cutting down its unfavorable trade balance every month for almost a year.

"Old Granite" Softens Up

Throwing off the cares of state and the worries attendant upon the presidential election, President Paul von Hindenburg, of Germany, is shown as he took a stroll in the Wilhelmstrasse at Berlin with three of his grandchildren. President von Hindenburg is still regarded as the most popular man in Germany.

Estevan Nurseries Make Gift Of Trees

100,000 Caragana Donated For Planting For Demonstration Purposes

Before the Orders of the Day were proceeded with last Tuesday afternoon, the Hon. J. F. Bryant, K.C., Chairman of the Drought Commission, rose to the Saskatchewan House a letter just received from the Prairie Nurseries Limited in which they offered to the Government a free gift of 100,000 heavy three-year-old caragana shrubs to be used in connection with the demonstration plots of the Government. The letter is as follows:

March 6th, 1929.

Dear Mr. Bryant: — "Your address in Estevan last week and the generous reports of the work of the Saskatchewan Commission on Forestation and have impressed us with the far reaching possibilities for public good of the tree planting program you have inaugurated. As commercial nurserymen we are not particularly enthusiastic over that part of our business from that contemplates the establishment of another Government free tree planting agency. We heartily approve however, of other promotional and experimental features of your program. We fully realize the urgent necessity for co-operation in combatting drought and a aid drifting and wish to aid in the establishment of the drought demonstration areas contemplated by your Commission.

To this end, our Directors have decided to offer the Province of Saskatchewan one hundred thousand (100,000) heavy, three year old Caragana, free of charge. We make this offer on the understand that your Government will provide the subject of the required stock and we are certain that delay until Government stock is large enough to plant, will greatly lessen the effectiveness of the reforestation program. The time to start your demonstration program is before the public has forgotten the bitter lessons of last summer's drought. That offer is made with the understanding that the Caragana is to be used only in the main demonstration area mentioned in your letter. No plantings be made the coming Spring. We recommend that plantings will provide valuable information for the farmers of Alberta and Manitoba, as well as those residing in Saskatchewan.

Wishing you every success in your efforts to secure the full co-operation of the public in combating drought, we are,

Yours very truly,

Prairie Nurseries, Limited,

T. A. Torgerson,

Managing Director.

Commenting on the above letter Mr. Bryant stated that he desired on behalf of the Drought Commission to publicly express appreciation of the gift of the Prairie Nurseries, Limited. The gift was extremely timely and very generous. He hoped that it would be thrice blessed; that it would be thrice blessed; that it would be thrice blessed;

Farmers Can Beat Hard Times

Should Get Together and Profit By Each Other's Experience.

P. C. Colquhoun, town mgr. of Standard Chemical Co., from Maple Creek, spoke to a gathering at Eastend Sask., recently, and told of success in farming under conditions similar to the present time.

Mr Colquhoun first advised the farmers to get together and help one another and profit by each other's experiences. Practical experience he said, was a good teacher and this is echoed, make a study of the present conditions and utilize what there is on hand.

He strongly discouraged the all wheat farming "Better to forget the big stuff and be sure of a living," he said. "The business of the farm is to build a home and make the farm interesting the his family To balance the program of farming and become a success one at his finest of the year there must be a variety of farm interests, grain, stock, poultry, bees and garden."

Mr Colquhoun explained how Russian thistle could be used for fodder instead of the thistle being a weed it should be recognized as a God-send, for it will thrive when everything else fails The thistle should be cut when in blossom, piled in bunches and let dry a few days before stacking; it is also an excellent fodder for pigs. He said thousands of cattle in the Panuke District have been saved by feeding thistle, rye chop, hay with thistle, made a good combination, and per lb still at the present time, was a splendid feed for cattle. Rye for feed must be cut when the horsel is well filled and in the dough stage. Then growing of rye he said solve the problem of soil drifting Successive years on uncultivated land and Russian thistle could not choke the rye crop as it does wheat. He said one sq a number of different kinds of grain, corn, millets, and sweet clover included.

A Challenge To Audax

Toronto Man Says Drug Tradition In Canada Not Satisfactory

Dr. A J Vining, of Toronto, who has been seeking to arouse public opinion in regard to the danger of traffic in narcotics, says the sentence in Canada are not adequate. Speaking in Toronto he charged that one dealer was caught and given a three-month sentence. He did not serve it, and the impression obtains that the reason was because he had influential friends who saw to it that he was at liberty within 36 hours.

It is not likely that Dr. Vining would make the charge unless he were certain of his facts, and the charge having been made, cannot be ignored.

We have believed there was very little—if any—of this kind of business in Canada.

The accusation is an open challenge to our system of justice, and there is a position to do so himself to make it, and take care and let the public whether Dr. Vining has stated the facts as they exist.

Old Man is Good Skater

Wilson Chambers, 81-year-old resident of Welland County, on March 14th made his annual skating trip over the frozen Welland River from Chambers Corners to Welland. He covered the 16-mile journey in an hour on Dutch skates more than 100 years old.

"You say you have been robbed of six hundred?"

"Yes. As proof, this is one like them."

"That is no proof. I have one like that myself."

"Yes. I have but spoken!"—Pele Mele, Paris.

British Speed King

Breaking Records Has Been Hobby With Him for Years

There may be some New York and drivers rambling street corners who hold unofficial records, but Malcolm Campbell still has the undisputed official title for the fastest travelling car loud. A few weeks ago, at the wheel of his racer on Daytona Beach, he went eight miles an hour faster than he had ever gone before. His speed was nearly 276 miles an hour.

Breaking records has become a Campbell habit. Only seven years ago he held the world's motor boat speed record at 60 miles an hour; now he has clipped almost 100 miles from that. And when he touched 276 miles an hour four years ago, it was said that the brain and nerve reactions of man would make it impossible to go faster. He believes next time his mile an hour will be over 300.

He Malcolm has two apparently insurable ambitions: one is to drive 300 miles an hour and the other is to rank pirate gold. He has attempted the first twice. In 1925-26, and again he will be driving racing cars when he is 70. His interest in island by the Spanish Main by study of the records, rather walk than ride, and he would rather sail a small boat than do anything.

The man who knows a mile in less than 12½ seconds has no fondness for being at the wheel of a car in city traffic. The latter is dangerous, he believes. On the other hand, he enjoys speed before a judge. He spending for more than 20 years.

"I was riding down a hill on a motor bicycle when 27 miles an hour," he says of that interval. "A broken cog stopped me at the bottom of the hill. The driving of my car helped solve the problem of not getting fast successive years on uninterested men and Russian thistle could not choke the rye crop as it does wheat. He said was eg a number of different kinds of grain, corn, millets, and sweet clover included.

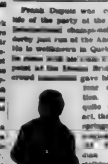
PLAY-DOUGH NO MORE

Frank Dupuis was certainly the life of the party at the 1932 Quebec Provincial championship dog sled derby just run at the Ancient Capital. His to wolfdoggery in Quebec and when he comes to the starting line the audience put its money on Frank.



He staged quite a vaudeville act, throwing handsprings, dancing around one leg of the course, doing pin-wheels, striking humorous attitudes and, as he neared the finish line, turning kisses to the crowd like a popular prima donna. Never few" thousand spectators enjoyed a race as they passed from sight, standing with one foot on the runner and waving the other at them. Frank who is well in his fifties, gave a fine exhibition of stamina and his funny ways didn't prevent him from finishing the grueling course of around 200 miles, and the three days of the race and coming to fifth. His trained sled dogs were also a source of interest.

At the prize-giving at the Chateau Frontenac, the famous Canadian Pacific hotel, he gave a rib-cracking farewell ending by handing the fifty-dollar cheque of his win to his wife, "Slappy." A Cornish girl whom he married during the war, for Frank is also by way of being a war veteran.

Drought Resisting Trees

Ground Lowered Gives Ash Survival Chance

The result of observations made during the past season in the dry areas in Saskatchewan indicates that among the broad leaved trees the green ash is the most resistant to drought. The American elm occupies the second place, with the Manitoba poplar, cottonwood and willow in the order listed. When planted alone or in mixed stands, species such as the native white spruce and the Colorado spruce make enough growth under favorable conditions. Scots pine, ash, and poplar under rather crowded growing conditions, there was heavy casualties among both species of spruce, apparently through the difficulty they possess in competition with their broad leaved neighbors. Observations have also indicated the fact that the mortality was greater during the dry period was greatest where the trees were planted with thistle. Trees widely spaced displayed by far the most vitality.

A little girl was taken to hear a sermon on prayer. After her return she asked her she liked him. "Oh," she said, "they kept on fetching him back till he sang his songs properly."

Gargoyle Gold for Britain

The hunt for gold in England goes on unabated as the gold-selling rush which has been drawing thousands of Britons to the offices of the Indian commissioners for the last few weeks continues unchecked. All kinds of novel schemes are being suggested for the procurement of gold, jewelry and even gold teeth is going to the melting pot in the great river of patriotism which has swept the Empire. The photograph above shows workmen from the Bengal Nagpur railway, Calcutta, removing gold ornaments from the railing put, when the gold leaf was needed from the dome to do so for the common cause.

NOTES ON GARDENING

FREQUENT CULTIVATION NECESSARY FOR RAPID GROWTH

The secret of early and tender vegetables is quick maturity Anything that receives a check during growth will be tougher or less possible than that which comes on unhalted To achieve the desired result, keep things growing by frequent cultivation, watering if possible during dry weather, and an application or two of some commercial fertilizer rich in nitrogen In using this fertilizer however, be careful that it does not actually touch the plant Either rake it in close beside or under the seed or, better still, dissolve in water, about a handful to the gallon of water, and apply in this way For the man just starting the following list of vegetables based on the best Canadian information available will be found useful Asparagus Mary Washington, satisfactory from the standpoint of disease resistance and a good cropper. Rhubarb Pumell Fed Bleeds Wax, Roumel Pod Kidney Wax, Stringless Green Pod with Kentucky Wonder Wax and Kentucky Green Pod for pole use Beets Early Wonder, Flat Egyptian Early and Detroit Dark Red, later. Cabbage Golden Acre, a round-headed first early, followed by Copenhagen Market and Enkhuisen Glory Carrots Chantenay and Danvers. Cauliflower Early Snowball for fall crop, Snowball for winter storage. Chinese cabbage Celtuce. Chervil. Corn Country Gentleman and Golden Bantam Cucumber Early Fortune. Cukes Early Short Green. Endive Moss Curled. Kale Dwarf Green Curled. Kohl-rabi White Vienna. Leek Large Flag. Lettuce Grand Rapids is the most popular leaf variety with New York and Non-Pareil where a head sort is wanted. Muskmelon Improved Montreal and Early Canada Knight are good varieties, as well as Golden Champion, Miller's Cream or Osage. Onions Yellow Globe Danvers, Red Wethersfield, Prize Taker Yellow Globe and Prize Taker Red Globe. Peas Thomas Laxton, Alderman, Gradus, Senator, Early Laxton Progress and, of course, American Wonder. Parsnip Hollow Crown. Potatoes Early Ohio, Irish Cobbler, White Tip, French Breakfast and Scarlet Globe. Spinach Bloomsdale Savoy Leaved or Dominion Savoy Leaved. Squash Hubbard, Delicious and Table Queen. Tomatoes—John Baer, Bonny Best, Chalk's Early Jewel, white Livingstone's Globe, Grand Rapids and Sunrise are two of the best for forcing and staking.

Use Canadian Ports

Nearly All Canadian Wheat Shipments Now Going Over All-Canada Route

Practically all of Canada's overseas shipments of wheat during the past few months have passed through Canadian ports During January 90.7 per cent of Canada's total overseas wheat exports travelled over the all Canada route and in February the percentage was 90.6.

Since the first lake cargoes of the season cleared, the proportion of Canadian wheat exports moving through Canadian ports exceeded the 99 per cent. mark

In February the United States handled only 94,000 bushels out of a total of 9,000,000 bushels of Canadian wheat exported.

The ever increasing importance of the port of Vancouver in the handling of Canada's wheat exports is expected to a marked degree for this increasing use of Canadian ports. In the first nine weeks of the present calendar year 19,824,665 bushels of Canadian wheat exported through the coast port.

Use Good Seed

Farmers Are Warned Not To Use For Seed Oats Supplied For Feeding

The following statement was issued by Robert Weir, Minister of Agriculture.

"It is reported that some of the farmers of the prairie provinces are assuming the risk of using for seed purposes oats that are supplied for feeding livestock. These feed oats are apt to be injured by frost, and their use for seed may result in crop failure

"In the arrangements for providing financial assistance for feed and seed relief, great care has been taken by the relief commission to provide seed oats that are dependable for crop production and reasonably free from noxious weeds. Those farmers who take the risk of crop failure by using the cheaper feed oats for seed purposes are very apt to find themselves seriously in need of further feed relief another year as a result of their own folly."

Build In Rubber

For Safety Auto Drivers Must Be Rested Before Start

One of those fine distinctions that judges occasionally can draw seems to have been produced by a New York court the other day, which held that a man can be under the influence of liquor without being actually intoxicated.

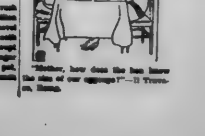
This ruling came in the case of a man who having been convicted of driving his car while under the influence of liquor, was deprived of his driver's license—the official who revoked the license having felt, apparently, that being under the influence is practically the same as being intoxicated.

Now, however, the court rules that there is a distinction. And there undoubtedly is. The question of whether the distinction ought to be made in the case of a man behind the steering wheel of an automobile may be a question. An automobile driver ought never to be anything but cold sober.

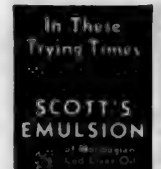
A very slight alcoholic stimulating of his faculties can be enough to cause a disaster.

Service For Employees

A windowless factory nearing completion in Pittsburg, Mass., is stirred by radio load speakers, through which weather conditions will be announced shortly before the employees quit work for a spell. Each day has been a sudden change in temperature or if there is a storm.



"Now, boy, how does he know the time of our signings?"—Il Travaso, Rome.



THE HOUSE OF DREAMS—COME-TRUE

BY

MARGARET PEDLER

Author of
"The Splendid Path"
"The Fire of Dan Tie Hi-mit"
"Hodder & Stoughton, Ltd. London.

CHAPTER XV. Continued.

And now, without warning or preparation, she found herself face to face with the fact that Blaise had been a married that he had belonged to another woman! It seemed to set her suddenly very far apart from him. and a fierce, unreasonable jealousy of that other woman leaped to life in her heart, racking her with an anguish that was almost physical She was confused bewildered, by the storm of emotion which suddenly swept her whole being

"Married per ?" she repeated with dry lips

"Yes. Didn't you know that Blaise was a widower ?"

Had Lady Anne divined the stress under which the girl was labouring that she so quickly interpreted the knowledge that his wife was dead ?

"No," answered Jean unsteadily. "I didn't even know that he had been married."

The fact of that other woman's being dead did not serve to allay the tumult within her. She had lived, and while she lived she had been "his wife!"

"Yes, he married her." Lady Anne went on, speaking in level tones. "I think matters were hurried to a climax by the fact that Nesta's step mother, Margherita Valdi, detested English people She was much the elder of the two, and as their mother had died when Nesta was born, she had practically brought the girl up. She would never have countenanced the idea of her marrying an Englishman, but Nesta so contrived her meetings with Blaise that Margherita was unaware of his existence, and eventually they married without her knowledge From that day onward, Margherita declined to hold any communication with her sister."

"Why had she such a rooted antipathy to the English ?" Jean had recovered her composure during the course of Lady Anne's narrative and now put her question with a very good semblance of detachment But, inside her brain was daily hammering out the words 'Married ! married!"

"It seems that Margherita's step father Nesta's father, of course, who was an Englishman, treated his wife extremely badly, and Margherita, like Nesta herself, was passionately fond of her mother. Margherita never forgave her father for his cruelty to her mother, and transferred her antipathy to the whole race. Nesta was just a rather nervous, high-strung child, extraordinarily beautiful girl suddenly elevated to a position which she was not in the least fitted to fill. It didn't take a month for Blaise to realize that it was Nesta or him, and for Blaise to see her as I saw her He came to his senses to find himself married to a bit of vicious, passionate flesh and blood. Oh, Jean! If I could only have been there — in time! If I could only have told him then —"

Jean hardly heeded that instinctive mother-cry.

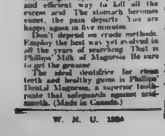
"Go on," she said, forcing herself to concentrate. "Tell me the story."

The rest had the Tormarin temper for its cornerstone Nesta was not content with the fact that Blaise loved her finger-tips. She tossed dignity to the winds, and there were overstatements, scenes and quarrels. Then, one day Blaise came in and found her entertaining a man whom he had forbidden the house. I don't know what he said to her but I can guess, poor child! He horsewhipped the man, and he must have frightened Nesta half out of her mind. That evening she ran away from Staple- Nich and I, of course, were living at the Dower House then and after making an fruitless enquiry I had a letter from Margherita Valdi telling me that she had been found drowned. She had not committed suicide, Blaise! How cruel for him!" exclaimed Jean, horror-stricken. For the moment her own individual fear was swept away in sympathy for a fiend of sympathy for Tormarin.

"Yes. It broke him up badly. Although I think he is brooding over the matter still, he has entire confidence in things. You see, he blamed himself— his unpreventable temper— for the whole tragedy. . . . If only he had been gentler with her, not terrified her into running away! . . . After all, she was a mere child in many, many ways. But she was a heartless, conscienceless minx, nevertheless. . . . And Margherita Valdi did not let him down lightly by any means. She wrote a letter, accusing him of her sister's death. I opened it as was abroad in my rights, of course, he had to see it ultimately. Tied up in a little separate packet was Nesta's wedding-ring, together with a newspaper cutting of the affair, and, to add a last stab of horror, she had folded the newspaper clipping and thread it through the wedding-ring, labelling the packet 'Cause and effect.' It was a brutal thing to do."

They were both silent for a space, Jean painfully envisaging the tragedy that lay behind that stern habitual severity of Tormarin's, Lady Anne asking herself tremulously if she had been wise if she had been wise in her disclosure? She wanted her son's happiness as tremendously! She believed she knew where it might lie, and she had raised over the burning embers of the past that she might help to give it him.

She knew that he himself was very much alive to his need of her, and her rebuke of his unhappy marriage, or that if he ever did so, it would be but to shoulder all the blame himself, exonerating Nesta entirely. Nor, unless Jean understood the fiery furnace through which he had passed that ordeal of impetuous, mistaken love, of disillusion, and, finally, of the most bitter soul-reproach could she possibly interpret aright Blaise's blessing, cherish means, no instant efforts to stand always on one side, no though he were entitled to make no limit claim on life and, above all, his love.



How Modern Women Lose Pounds of Fat

At The Same Time Gain in Physical Vigor and Loveliness and Possess a Clear Skin and Eyes that Sparkle with Glorious Health.

Here's the recipe that hundreds had already used to lose all the unsightly fat and become slender and graceful:

Every morning take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for it's the daily dose that takes off the fat. Then don't make a re-mong Kruschen daily means that every particle of poisonous waste matter and harmful seeds and germs are expelled from the system.

While taking Kruschen cut out pastry and fatty meats, and go light on potatoes, butter cream and sugar.

At the same time the stomach, liver, kidneys and bowels will get busy and the pure, fresh blood containing Kruschen Salts will be carried to every organ, gland, nerve and fiber of the body. This is followed by "that Kruschen feeling" of energetic health and vigor that is reflected in bright eyes, clear skin, active brain and lovely slender figure.

FREE TRIAL OFFER

If you have never tried Kruschen, or are not sure that it will suit you, we will send you a trial bottle FREE. Just write your name and address on a piece of paper and send it to us at the address given below. Kruschen is sold by all druggists in every town in the world. Address: The Kruschen Co., Limited, Dept. 1204, 70 Bond St., Toronto.

Canard Steamship Sailings

Shorter This Summer.

What will be the earliest departure date from British ports to Montreal for many years, has just been announced by the Canard Line, who have scheduled their liner "Aquitania" to open their St. Lawrence season from or three weeks earlier this year on account of the unusual weather conditions. "We expect this will prove a very popular move," said Arthur Randles, general passenger manager of the Canard Anchor-Donaldson Line in Canada, in an interview with the Times.

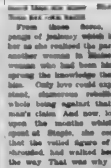
A special spring sailing will be made by the Anchor-Donaldson liner "Letitia." On her first trip here this season, she will be used as a Scottish Trade Mission Exhibition ship, bringing over a hundred Scottish manufacturers with exhibits of their products. During the week the ship is in port here she will be used as an exhibition ship and thrown open to the general public and buyers. The Hon. H. H. Stevens, Minister of Trade and Commerce, Ottawa, is to speak at the opening dinner on May 16th, on board the ship, when he will welcome the Scottish visitors and their friends.

Another event of importance for the forthcoming Canard season is of out of the ordinary is the visit of the largest Cunarders in the St. Lawrence on short cruises from New York. This visit includes no less than the "Mauretania," which is scheduled to make three trips to the St. Lawrence, visiting the Saguenay. She will also call at Quebec. It is expected that the use of the famous liner on this route will bring thousands of American tourists to St. Lawrence and Quebec. Unbeknownst with Canada's attractions as a tourist country.

The Canard and Anchor-Donaldson Lines have set aside several of their summer sailings at the height of the season for their new "Restricted Third Class." On these sailings the usual third class accommodation will be reserved entirely for "White Collar," passengers, i.e.—students, business men, teachers. On these particular sailings the third class accommodation will be considerably improved and will approximate in character to the original tourist third cabin, although the ordinary third class rates will apply.

Utterly Worn-Out

Mrs. Fraserdale Tells How Dr. Williams' Pink Pills Made Her Well



"I became run-down and unable to do my work for a family of seven," writes Mrs W. F. Scott. "I was told I had anaemia, and I took treatment, but with very little improvement. Finally my sister-in-law had the same trouble, advised me to try Dr Williams' Pink Pills, as they had done her so much good. I have taken seven boxes. Today I'm well, able to do my own work, and can stand looking or work spells. I can run upstairs without puffing I sleep like one well My friends are astonished at my renewed appearance and never tell them what I'm taking. My reply is 'Dr. Williams' Pink Pills.'"

Dr Williams' Pink Pills actual effect on abundance of new red blood, which is the reason why they have given new vitality and strength to thousands of such sufferers as Mrs Scott and countless others. Equally helpful for growing girls. Try them. At your druggist's or by mail from Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

"If ye seek Him, He will be found of you," 2 Chronicles xv. 2.

Onward we creep through smooth and rough,
Why are voyagers all in chains or not?
And the dreamer who strides by his side
Drifts in his sleep to dawn,—to doom.
—Montagno.

The great thing in this world is not so much where we stand as in what direction we are moving. To reach the port of heaven, we must sometimes with the wind and sometimes against it, but we must sail, and not drift nor lie at anchor.

—Oliver Wendell Holmes.

No wind serves him who addresses his voyage to no certain port.

—Montagno.

The old proverb might be revised to read that those who live by the sword shall perish by the taxes.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

DUST PREVENTING WONDER PAPER

With so much inventive thought being given to eliminating unnecessary household tasks, it is only natural that a worldwide enthusiasm for the musty dust cloth should be sought

Now it has been found! Appleford Wonder Paper which actually dusts—and cleans as it polishes is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp. Thoroughly impregnated with a high-grade furniture polish, and above be GIVE instead of spreading it. Appleford Wonder Paper comes in handy, size package, twenty-five sheets, each as large as a duster. Two newly created sheets into a soft rag, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you've through—throw it away. No desire to shake out or wash and bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous PARASANI heavy waxed paper in the Green Box. Many grocers, hardware and department stores and Appleford Wonder Paper. If yours doesn't just mail the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Montreal, Canada.
Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipe booklet "Left-overs."

Crowd Attends Easter Monday Dance

A very successful dance was held on Easter Monday under the auspices of the St. George's W. A. in the Memorial Hall.

The music by the Rythm Boys Orchestra was good and the large crowd of dancers enjoyed themselves to the last waltz.

At midnight everyone adjourned to the Buffet room where tables were laden with cake and sandwiches.

The dance broke up at 3 a.m. with everyone having an enjoyable time.

Josephburg

Mrs. Frank Mohr had a serious operation performed at the Lamont hospital last week. She is as well as can be expected.

WEDDING

A quiet wedding took place on the 12th of March at the home of Mr. Phillip C. Thomas, when Miss Caroline Mohr and Mr. August Duerrwachter were united in marriage. Rev. Mr. Rienbrandt of the Josephburg Reformed Church officiated.

Members of the Ladies Aid Society of Josephburg Reformed Church presented the bride and groom many useful gifts for the young people's home.

Mr. and Mrs. A. Duerrwachter will make their home at Mundoravine near Cherhill.

Prairie Air Mail loop, which has been in operation for the past two years ends on Thursday morning.

Cutting of Government finances and general paring down of estimates has eliminated the air mail service.

Easter Services At St. George's Church Fittingly Observed

Easter Day at St. George's was, as it should be, the best and brightest day of the year. There were more communicants than average, all three services were well attended, and the rendering of the services was often, as it should be, congregational. The choir did its proper part well by leading the singing, and the organist fully and adequately supported the choir.

Just what services in smaller churches ought to be.

SCHOOL BOARD TO CONSIDER IMPORTANT MOTION AT NEXT MEETING

At a meeting of the School Board last month a motion was introduced whereas the School Board would collect a fee from students staying in the same grade two years. If the motion comes into effect, it will hit some of the people, and no doubt the proposal will be the cause to feel it.

In the High School paper "The Wag" an item on this subject was published which the parents should see and think it over.

Under the heading Are you a Leader?,

Judging by the attitude of some of the school-board there is or has been an epidemic of "loafing" in our high school.

If a motion recently introduced at a meeting of the school board becomes effective, it will be "just too bad" for some of our students.

Some of this should serve to make the grade nines and tens sit up, as it would effect them more than the rest of the students owing to the fact that they have at least three more years to spend in High School.

The Lethbridge School Board has already made the passing of five units a year per student compulsory with a minimum of thirty units for six years. Students are allowed, however, to repeat any subjects out of the five, in which they fail, at a fee of $25 a subject with a maximum of $100.

It is a problem which worries the most serious minded students.

COMMITTEE MOVES BILL TO COMPEL VEHICLES TO CARRY LIGHTS

The Agricultural Committee of the legislature, Thursday, decided to recommend a year's hoist for the proposal to compel carrying of lights on all vehicles on the highways after [illegible].

Farmer members of the committee thought the legislation premature and favored the belief that for the time being, efforts to educate the public are to the use of lights should be [illegible].

PRESIDENT'S DAY PROGRAMME

The programme that will be presented at this year's "Feeder's Day" at the University of Alberta, to be held on Saturday, April 9th, will have a special appeal to cattle feeders. Four different projects have been under way during the past year dealing with such problems as the place of the self-feeder for finishing calves, a comparison of steer and heifer calves, the relative cost of heavy and medium finish on yearling steers, and the feasibility of finishing rail-fed calves at one year of age. Valuable data have been obtained since last fall, and these will be on view at this year's "Feeders' Day".

The condition of these various groups, together with figures on the rate and cost of gains should offer a basis for an interesting discussion to all concerned with the beef cattle industry.

Saturday, April 9th, is the last day of the Edmonton Spring Horse Show week, which makes it possible to take in both of these events.

RED CROSS OFFICIAL TOURING THE WEST

Miss Jean Brown, Director of the Junior Red Cross of Canada, who travelled via Canadian National from the east, is in western Canada, where she is delivering a number of addresses on her work, which deals with the training of children in health and nursing. In addition to these addresses, Miss Brown will speak at the annual meetings of the Registered Nurses Associations of British Columbia and Alberta, at Vancouver, and Edmonton, respectively.

Around the Elevators

The Old Swimming hole situated three feet south of the Alberta Pacific Elevator, and extending to the south side of the road is now patrolled. Mixed bathing is supposed to be illegal, however Frank Etherington and his boys were enjoying both Monday afternoon. He needs were used to dry the horses, Frank said words that were just as effective.

Town Notice:—

Jack Weibe trying to land three carp in two days. He nearly did it too.

E. Hallam playing tag with the cops.

C. Ashton champion bridge player of elevator row. Stan Flemming runner-up champion.

Harold Newland has being extended by Fred Rowland to a new station agent who was on display, loaded on a flat car at the station last week.

Tommy Lees disobeying our orders lately.

Annie and Jean looking heartbroken walking along the track.

Mike Burnett standing in the middle of the frozen aquarium between Bill Anderson's and the blacksmiths shop, with his coaching cap thinking of his past, however Mike courageously advanced safely to terra firma.

Topics of the Day:—

Mary had a little lamb for further particulars apply to Fred Rowland between the hours of 12 and 1.

Recreation in the summer months for the elevator men at present is undecided as to whether they will play Badminton, Tennis, Horseshoe, Bowling, Golfing, or hide and go seek with the gophers.

What Happened At The Town Council Meeting

A regular meeting of the Town Council was held last Thursday night in the Council Chambers. Present Mayor Montgomery, Councillors Gauf, Simmons, Smith Labrode and Fillmore.

The minutes of the last meeting were read and adopted.

The following accounts were passed for payment:— Fort Hardware Co. $4.05, Calgary Power Co., $135.75; J. Lauson, Coal $24.51; Alberta Gov't Telephones $6.55; J. Comp; and H. Lamoureux $12.50 each for special duty. J. T. Lalonde for relief $21.66; Jones, Graham & O'Brien for relief $18.60; St. Joseph's Hospital for J. Foster $9.00; Mrs. Farell looking after Mrs. McAlister $5; D. Turner for work on streets 90c. School District deducted $1700.00 for March salaries and School Debenture due on 1st. April.

Two applications for relief were before the Council, one was approved and one was left over for further investigation.

The question of gravel needed in the spring was discussed at length by the Council, and the matter was finally left in the hands of the Public Works Committee for action, and to report at next meeting.

APRIL FOOLS DAY

All Fool' Day will soon be with us once again, and we might take the time to learn a valuable lesson.

Be it known that every day of the year is "All Fool's Day" for the crooks who prey on the unwary.

People need to be wary for left-handed monkey wrenches and hen's teeth, on April 1st, and furnished much amusement by their enquiries therefor. Such simple cases have given piece to more astute jokes as time advances, but still the spirit of "All Fool's Day" prevails on the first of April.

The point that we wish to make is that good full weight talks a course in being fooled at this season of the year, so as to be proof against sellers of fake stocks and countless other forms of crookedness, that will likely stalk abroad in the land just as soon as the local money market begins to loosen up a little more.

Just as the member for left-handed monkey wrenches has gone out of vogue, the buyer of the bona-fide gold brick has ceased to exist. But this does not mean that the wares of the crooked are not spread with care.

Take your fill of being horsinously fooled on April 1st, but beware of being fooled on other days of the year.

Town of Fort Saskatchewan,
Assessment Roll, 1932

NOTICE is hereby given that the assessment roll of the town of Fort Saskatchewan for the year 1932, has been prepared and is now open for inspection at the office of the Secretary-Treasurer of the town from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon to till two o'clock in the afternoon, and that any person who desires to object to the entry of his name, or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary-Treasurer of the town.

Dated this 10th, day of March, 1932.

Jas. Ritchie,
Secretary-Treasurer

COMING EVENTS

The regular monthly meeting of St. George's W. A. will be held at the home of Mrs. Van Hffland's on Thursday afternoon, April 7th.

The Ladies Aid of the First United Church will meet at the home of Mr Kelterborn's on Thursday, April 7th at 3:30 o'clock.

Winter is like the unwelcome guest never knows when to Sahoosh!

Young Angus had been out for the evening with his best girl. When he arrived home he found his father still sitting up. The old man looked up and shook his head.

"Tim ye been out wi' you lassie again?" he asked.

"Aye, dad," replied young Angus.

"Why do ye look sae worried?"

"I was just wonderin' how much the evening cost."

"Ho more than half a crown, dad."

"Aye? That was no sae much."

"It was a' she had," said young Angus.

"SALADA"

TEA

"Fresh from the Gardens"

Be Careful.

The season is close at hand when once again the roads and highways of the country will witness the passing to and fro, in numbers almost beyond counting, of automobiles, trucks, buses, vans, motor propelled vehicles of all descriptions. Farmers enroute to their marketing centres, city and town people bound for their summer cottages or other resorts, tourists from far and near, commercial travellers and others engaged on business, freight and express cars moving in all directions, will be claiming right-of-way upon rural roads, city streets and provincial highways.

Past years have recorded an ever mounting toll of accidents resulting from all this modern, high powered highway traffic. The lists of killed, maimed for life, seriously and less seriously injured, the money loss in damaged property, have been appalling.

The question is: What is to be the record for this year? Is this costly toll to go higher still, or are we on a civilized people going to come to our senses, and in this year bring about a lessening of these losses?

The following figures have been compiled across the international boundary line. They apply only to the United States, but, while conditions may be somewhat better in Canada, because our population is smaller and our traffic less congested, much the same situation prevails. There is, therefore, a lesson and a warning in these figures for the people of this Dominion. Enthusiasm has been made in this column on more than one occasion previously to this subject, but no apology is offered for again directing attention to it at this time because of its importance and in the hope that thereby at least some drivers of motor cars will exercise more caution.

Every year from 1917 through 1931 deaths from automobile accidents have steadily increased. Last year 34,460 people were killed in automotive accidents. Nearly a million others, 907,000 were injured. Loss for a period of eighteen months ending December 31, 1931, exceeded even the United States sacrifices of the World War.

The money cost, also, is prodigious. The Travelers Insurance Company reckons the annual loss at $2,500,000,000.

This is a staggering sum. It is larger than the entire cost of public education in the United States. It is far greater than the entire cost, exclusive of war debts, of the Federal Government. Economists of the nation announce surrounding these accidents shows clearly that they were avoidable. Here are some of the salient facts:

More than 50 per cent. of the motor vehicles involved in personal-injury accidents in 1931 were in good condition. More than 90 per cent. of the accidents occurred in clear weather with dry roads. More than 90 per cent. of the accidents involved drivers of more than one year's experience.

The most hazardous age for driving is under twenty.

Women apparently are safer drivers than men. One male driver out of every twenty-one licensed was involved in a personal injury accident. Only one woman out of every eighty-six licensed was involved in an accident.

The outstanding fact is that automobiles are improperly operated. Exceeding the speed limit was the explanation of 67,660 accidents. Drivers on the wrong side of the road accounted for 63,500. Those who did not have the right-of-way accounted for the largest number, 119,920. Failing to control 33,840. Failing to signal accounted for 27,740. Driving off the roadway explained 68,650. Plain reckless driving added another 34,850.

Just one conclusion is possible. Heedless, reckless, inconsiderate driving is taking this tragic toll of life and treasure.

The remedy is not, however, to be found in drastic statutes and regulations hindering speed. That experiment has been tried and it proved an utter failure.

What is practicable is the instilling by law and public opinion upon auto driving at all times and at all places. The man or woman who tends to drive in a way dangerous to pedestrians or other motorists should be denied a license, and if they have already received one, it should be withdrawn. Licenses cannot be taken from drunken drivers, incompetent drivers and reckless drivers.

Respect for the law and voluntary observation of the rules of safe driving are required. Motorists as a class may well organize for safety, and pedestrians should recognize the fact that, on our meager driven streets and highways, they take their lives in their hands when they disregard the regulations and bylaws enacted for their own safety.

The real majority of cars are dependable today, but, like any piece of machinery, some part may weaken or get out of order. It is, therefore, the duty of the driver to have it checked over thoroughly and frequently. His own life, as well as the lives of others, may depend upon the precaution.

But, in the final analysis, and in an overwhelming majority of cases, it is the driver, not the condition of the car, who is responsible for accidents. It is the human element that counts; that is the vital factor in nearly all these tragedies. Law alone cannot control him, although it may punish him afterwards, providing he is alive to receive punishment. He must control himself.

Loud Crossing Accidents

Quebec Man Demonstrates Device To Overcome Danger

An automatic gate, the invention of which claims it will prevent accidents at level crossings, was demonstrated to provincial road department officials at Quebec. The inventor is Maxime Hebert, of Beauharnois.

The gate is worked by electric contact, bonded several hundred feet from the crossing. The moment the forward wheels of the locomotive touch the point of contact, the gates begin to close and at the same time starting the ring of a bell. The bell continues to ring and the gate remains closed until the last wheel of the rear coach has passed the point of contact.

MOURNING WARDROBE

"A death occurred in our family and I had to go in mourning at all short notice, so decided to dye what I had. I emptied my draggled, but by advised using Diamond Dyes. Everything came out beautifully even, wool dresses, stockings and all! I have since been delighted to appreciate the excellence of the black Diamond Dyes. I tried another black dye and the results were impossible. I had to get Diamond Dyes and Mother Dyes. Everyone I have timed my curtains a beautiful raspberry shade and dyed a rug a lovely apricot with Diamond Dyes. They are real money savers." Don't you agree? You can buy I truly believe."

Mrs. G.K.L. Montreal.

Ask Rate Adjustment

Wood Pulp Rate Basis On Shipments Going To Chrysler

Adoption of the distribution as seen tariff freight rate basis for Churchill cargoes is sought by the Saskatoon Board of Trade.

Deputation to the Hon. William Lemaistre basis for incoming and outgoing shipments by the Hudson Bay route is asked of the quarterly meeting of the board.

The Fort William rate would enable the rate for distributing the cargo basis on 45 per cent. of the standard mileage in place of a rate based on mileage basis on an arbitrary basis of 130 miles no matter the distance from the terminal. The Board of Trade claims that this basis would be unfair in that it gives a decided advantage to points near the terminus.

Time For Private Members Is Limited

Allowed One Hour In Morning Twice a Week

Time allotted to private members in the House of Commons will be still further restricted. The government gave notice that after March 21, private members will be limited to one hour each on that day until the end of the session. A resolution taking effect on governmental business has been approved by the House. When Monday was also taken over for governmental business, the only time remaining for private members will be one hour in the evenings on two nights a week.

Powerful Medicine.

The healing agencies in essential oils are concentrated in every bottle of Dr. Thomas' Eclectric Oil, forming one of the most wonderful liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that it has given their health to it. A wonderful power is not expressed by the most price at which it sells.

Threatens Homestead

Passengers who make their trains or have long waits at the St. Lazare Station, Paris, will shortly be able to enjoy a thirty-minute film show while waiting. The cinema, which will hold 300 people, will give a continuous performance from 9 a.m. till midnight.

Truth may be embarrassing at the times it is uttered. It is the lie that rises up to give trouble later.

Taxing the Highways

California Would Like Tax Covered For Roads and Pavements

Sun-kist California wants her sun tan recognized as a sort of trade mark. Down there they want all roads and pavements colored in modernistic tones but rather lean to sun tans. They have discovered an apt process which will make the tinting of sidewalks and highways that color without the least additional cost. The city reports that a far western cement manufacturing concern has found a way to produce a tan toned cement, without the addition of any coloring material, merely by a special burning process. San Francisco also finds the public smoke to the desirability of having other colors than the familiar whitish gray of the ordinary cement mixtures in the construction of pavements. So if they can burn a tan cement maybe the chemists will find a means also of turning out a self-coloring blue, green or even pink. The far western concern's officers have not yet told their new tan cement or to the finest real improvement in the basic color of Portland cement introduced in 100 years.—Brandon Sun.

Resin Threatened With Seed Shortage

Country Evidently Exported More Than Home Interests Realized

During the past month interesting news has been forthcoming from Finnish circles in connection with the difficulties that the Soviet authorities are experiencing as a result of poor harvests in some areas last year, suggesting that Russia has exported more wheat than was justified by the crop harvested in 1931. This information was contained in a statement issued by H. H. Stevens, Minister of Trade and Commerce.

In a table received by the bureau early in March it was stated that at the end of 1931 there were 130,000 tractors in Russia, of which number 70 per cent required repairs. Up to February 20, only 41.3 per cent. damaged tractor, had been reconditioned.

A further table received on March 15 stated that up to March 1, 50 per cent of the tractors needing repairs had been placed in operating condition.

Douglas' Egyptian Liniment makes the finest blister known. Is valuable for shock. Leaves the hair roots in natural and healthy condition Hair comes back No scar remains.

Seeks Damages

Action Commenced On Account Of Death Of Seaman On Submarine Chasing Duty

Suit for $100,000 damages was begun recently against the Trans-Arctic Submarine Expedition Company of Delaware, which financed the expedition toward the North Pole led by Sir Hubert Wilkins.

The action is brought by the administrator of the estate of Willmed L. Grimmer, seaman, who was swept from the submarine "Nautilus" by high seas and drowned last March 21.

The complaint alleges the life-line was not equipped with secure fastener and negligence of those in charge of operations led to Grimmer's death.

"SICK HEADACHE?"

IT is not necessary to give-in to headaches. It is just a bit old-fashioned! The modern woman who finds a headache coming on at any time, takes some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your engagements. Headaches, sympathetic pains, yield at incredible times. So do colds. You can rout them before they're fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse and insure your comfort while shopping, your evening's pleasure at the theatre. Those little stinging aches that bring a cry of "Oh, dear!" by day are ended in a jiffy. Pains that rack and wrack at night are conquered before you need them. And how quickly Aspirin! You'll find that Aspirin always has its every-

package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, lumbago, and rheumatism.

The tablets stamped Bayer won't fool you, and can't harm you. They don't upset the stomach. So take them whenever you need them, and take enough to end the pain. Aspirin is trade mark in Canada.

"What has he done?"

"He attempted to strike me."

"Then what is he charged with? Attempted suicide?" — Canadian Boy.

Business is like a wheel barrow. It stands still unless somebody pushes it.

Price 60c a box

Serves A Complete Break Set By Half The Night

Miss Julia Bass, Bath Lake, Ont., writes:—"I was troubled so much with my nerves I was a complete wreck.

I could not do my work, and would have to sit up half the night on account of the shortness of breath.

One day a friend recommended Milburn's Heart and Nerve Pills. I got some box and got relief after the first. I had taken six boxes I was as well as ever.

Increased Population For Canada Will Be Necessary Soon To Help Liquidate National Obligations

To those who think superficially it may seem out of place, in the presence of considerable unemployment throughout the Dominion, to talk of plans for increasing the population of the country by means of selected immigration. Nothing to connect, however, them the fact that Canada, with its immense area and vast vacant spaces, cannot hope to pay its way or to carry its immense established overhead without more shoulders upon which to place the burden. The Dominion has a financial, industrial and railway plant which equips it to care for twenty or twenty-five million people instead of only ten million as at present.

If we could secure additional population by gradual means and establish it on a sound economic basis, our national troubles would disappear. A public debt of $2,300,000,000, a huge railway debt and the existing load of provincial and municipal debts would no longer be beyond our capacity. With several million people we could pay the interest easily and gradually liquidate the principal. The railways would have more people and goods to carry, their deficits would be turned into surpluses, and our industries would have larger domestic markets for their products. Our paper and pulp mill establishments would no longer be a burden to the country. It is quite clear that Canada's greatest need is more people for its vacant spaces, more farmers to put its unoccupied lands, more producers and more consumers of all kinds.

The imposition of an adequate immigration policy must, of course, await the return of normal world conditions, so that there will be adequate markets for our products, and particularly for the primary products of farm, land, forest and fishery. If the Imperial Conference, to be held at Ottawa next July, proves the success that is anticipated its decisions will in large part be to supply such markets. In any event we are glad to note that, in the words of Rt. Hon. J. H. Thomas, Secretary of State for the Dominions in the British Parliament, the question of intra-Empire migration is to form one of the important subjects of discussion at Ottawa.

There is reason for satisfaction that the Canadian Government takes the same view, for, as Hon. W. A. Gordon, Acting Minister of Immigration, said at Ottawa recently, "What we need is not to get over to the positive side of immigration because we must have more people if we hope to pay off a debt with ten million people are loaded at present by reason of the railway problem on our hands." Another important consideration is the need of bringing to more British people of the right kind to strengthen and maintain the Anglo-Saxon elements in our population and to buttress the British sentiments of the country.—Toronto Mail and Empire.

Right Up-To-Date

Bobby (short of money).—"I say, dad, have you any work you'd like me to do?"

Father (taken by surprise).—"Why—no—but—er—"

Bobby.—"Then would you like to put me on the dole?"

Business is like a wheel barrow. It stands still unless somebody pushes it.

Not As Pictured

Members Of British House Of Lords Are Sturdy Patriots

The Prince of Wales has unveiled a Memorial in the Royal Gallery of the House of Lords to 246 peers who lost their lives in the World War.

These figures are startling. They represent fully one-third of the total membership. Just think what one community would have sacrificed were 241 out of 740 male members of the population to be killed or die of wounds.

Prior to the war the Lords were in point of numbers the largest Assembly of the kind in the world. The present membership is 740, but in addition to these there are 26 Lords Spiritual, the Archbishops of Canterbury and York, the Bishops of London, Durham and Winchester and twenty-three others according to seniority of consecration.

MANY A LITTLE GIRL SIGHS FOR A SOLEMN DRESS SUCH AS DEBUTANTE SWIER WEARS

Today's model is quite the easiest thing in the world to make.

The caped collar gives it a smart difference, and is so girlish and pretty. You'll like the rather straight tailored appearance of the skirt. Inverted plaits at the front, provide ample flare.

Deep blue sheer checked woollen made the shirt and bolero jacket. Then there's the delicious blouse of fresh linen in orange red shade. The tie of crepe de chine tones with the blue.

Or perhaps you don't care about woollens? You prefer cotton in wash frocks. Why then the entire dress may be made of linen in lovely new pink shade with white or in French blue with white.

Style No. 457 is designed for sizes 6, 8, 10 and 12 years. Size 8 requires 1¾ yards of 39 inch material for bolero and skirt with ¾ yard of 39-inch material for waist.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Radial Rings On Tree Trunks Reveal Age And History Of Dry Seasons Of The Past

Wheat Not Included

In Germany's Recent Tariff Against Russia Prize Cereals

The Reichsanzeiger, official gazette of the German Government, publishes a decree authorizing the finance minister to impose the so-called supertariff against goods from Canada, increasing existing duties 100 per cent. as from April 1.

Goods specifically mentioned in the decree were French, dried and tinned fruits, fish, lobsters, oysters, turtles, flour, butter, paper, cardboard, aluminum, shoes, certain kinds of machinery. Canadian wheat was not included in the list.

The decree provided that the duties can be suspended for six months, providing Canada at once enters into negotiations with Germany for the conclusion of a commercial treaty.

Germany is one of the few countries in central Europe with which Canada has never concluded a commercial treaty. Canada has had commercial treaties with France, Belgium, Holland, Spain, Czechoslovakia, Finland, Hungary, Esthonia the Serb, Croat and Slovene Kingdom, Roumania and Lithuania.

Canadian Humor

Type By Henri and Is Essentially Good-Natured

Canadian humor as a type differs from American and English alike, writes Lionel Stevenson in "Appreciation of Canadian Literature." There is not the characteristic exaggeration of the one nor the characteristic restraint of the other. There is a closer affinity, perhaps, with the Scottish type, as exemplified by Burns, with his whimsicality and sympathetic indulgence, but the Canadian style is more downright, and deals more with human men with character. It is a hearty sense of fun, arising from genuine joy of life, including an eye for the absurd which is latent in the commonplace. It is essentially good-natured. Steering a perilous course between crudity and sophisticability, it usually contrives to avoid both, by sheer force of simple, sunny cheerfulness.

Color Attracts Butterflies

Tests Show Green Was Not At All Popular

It is the color, and not the odor, of flowers that attracts butterflies, says a Popular Mechanics magazine. This was proved in tests in Germany where paper flowers were scattered in a garden with blooming ones. It was found that the insects settled indiscriminately on both kinds to suck food. The experiment further revealed that different species displayed preferences for special colors, some yellow and blue, others blue and purple, but none of them was attracted by green.

Students of arboriculture of late years in the west have taken seriously to the observation of the growth of trees, since there appears to be positive proof that tree growth depends on the annual precipitation.

Experts in the study of trees can tell by the number of radial rings the age of the tree. Once that part of the science was established, observation was directed to the width of the rings marking each year's growth.

In some large trees where the rings were well defined, it was observed that growth was not the same every year and it was finally agreed by students that there was a reason for some rings to be wider than others. This reason is given as either bush or, of sufficient moisture.

First the observations were made on trees growing in depressions where the moisture accumulated and also through the growing period. It was found that rings in such trees were almost uniform, and as the tree aged in years, the rings became perceptibly smaller.

This established the principle that old trees do not respond in the same manner to moisture and drought as do young trees.

Trees on uplands where drouth would affect them were then studied. It was found that during the periods of drouth the rings were not as wide thus the rings during the years of plenty of moisture. Then students were able to record the drouth period in the country without having any prior meteorological information.

In the observations made by L. B. Hunter, formerly of Weyburn, and now of Regina, sections of trees were found in several parts of Saskatchewan, where the years 1794, 1798, 1890, 1909 and 1931 were plainly shown as dry years. While spruce, pine, fir and tamarack green sections clearly indicate this.

Much progress has been made in the study of the trees that date ago. Of trees cut down hundreds, even thousands of years ago, can be told from the rings.

One expert in this science, A. E. Douglass, of Tucson, Arizona, was able from the study of rings on trees, to take timbers from the abandoned cliff dwellings in New Mexico and tell the years in which these timbers were cut down decade or more ago. Last year he received a price of $1,000 from the Rockefeller Foundation for his research and for the contribution to the science of aboriculture.

There are of course other agencies that must be taken into consideration in measuring the growth of trees. There is sunshine, shade, climatic conditions such as extreme cold and scorching heat. All these have some effect on the growing trees in certain sections of the country.

One peculiar condition exists in British Columbia. There the width of the rings of the trees are almost always uniform, because that plenty of moisture and an equable climate governs the growth of the trees. There also older trees show that an average one on the rings grow less in width. Regina Leader.

New Diving Apparatus

A deep-sea diving apparatus, which will allow exploration and work at depths of 10,000 feet and more, has been invented in Germany. The contrivance is shaped like an egg and its metal shell is made to resist enormous water pressure by automatically adjusting the interior air pressure through the vaporization of liquid air.

"The greedy fellow! I have been here for an hour and he won't allow me to look in!"—Dana Hunter, Mc-Gill.

A SOLDIER-PRESIDENT ON PARADE

Attired in the full dress uniform of his rank as Field Marshal, President von Hindenburg of Germany recalls the war days of 1914-18 when he was leading his country in the most disastrous war in history. The 84-year-old soldier-President is shown as he reviewed the Guards Regiment of Berlin on the Marshal Field. Next to von Hindenburg is Oberst von Tschirsky, commander of the regiment, while at the extreme left is General von Hammerstein, Commander-in-Chief of the German Army.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help; mild, gentle help—but effective. Just like kind Captain gives Castoria in a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest and your own be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed nerves and restful sleep! Genuine Castoria always has the Same

CASTORIA

Poultry On the Farm

One Of the Best Paying Lines Of Farm Effort

Official reports show that the poultry population of Canada has doubled each ten years during the period of the past thirty years. Each succeeding period of low prices for farm products finds the poultry flock running to the farmer's rescue. At the present time it can easily be shown that the poultry flock properly bred, housed and handled will be found the standpoint of capital investment and feed cost, one of the best paying lines of farm effort. Each succeeding year appears to make it more clear that the farm is the logical place for the development of the poultry industry with respect to both eggs and meat production. The farm flock is a natural adjunct to the marketing of otherwise unsaleable products in the form of eggs and poultry meat. Banks and loan companies and the farm which has a poultry flock is much better risk than the one which has none. Dept. of Agriculture, Ottawa.

WORLD HAPPENINGS BRIEFLY TOLD

Royal Canadian Mounted Police took up the task of enforcing law in Nova Scotia on April 1.

A modified form of state socialism was advocated in the House of Commons by Dr. J. P. Howden, Liberal, St. Boniface.

Madeleine Cruelli has added 11 books to his jail library. He has just completed reading the Bible again and has started re-reading the Koran.

Montreal's mineral production were nearly doubled in the past year, according to the report of George H. Gale, director of mines for the province.

The French Chamber of Deputies turned thumbs down on women suffrage, but by a month after it had voted overwhelmingly for votes for women.

Sister Mary Martha Scott, the oldest Franciscan nun in England, died at the Franciscan convent in her 99th year. She had not been outside the convent walls for more than 50 years.

Faced with increasing flood imposts, directors of Forts Lautorez decided unanimously to discontinue performances unless measures of relief were secured.

Hostilities with Japan in the Shanghai area have cost the Chinese 4,500 lives and $600,000,000 in property loss, Wu Te-Chen, chief of Chinese Department of Statistics, estimated.

The pretty life-sized playhouse which the Welsh people built for Mrs. Princess Elizabeth, grand-daughter of the King, was destroyed by fire as it was being taken to London to be presented to her.

Chamberlain, sportsman was the King's trophy for miniature rifle-shooting, competed for by 25,000 boys in all parts of the empire, it was announced by the National Rifle Association.

Worth a Half Million

The editor of a weekly newspaper in a small town received a subscription renewal from a native son who had moved to another part of the country. The distant subscriber also enclosed 50 cents in postage stamps with a note that read: "Now sit down, write me a letter and tell me the news you can't print."

Pioneer Railroader

A. M. McKay, General Agricultural Agent Of the C.P.R. Western Lines

From turning handbrakes and negotiating the old link-and-pin coupler to the more modern J. M. McKay, new general agricultural agent of the Canadian Pacific Railway's western lines, arrived on Monday, March 13th, at his 64th birthday with degree intact and a vast fund of experience in pioneering in western Canada to his credit.

"Brave Canada, of course" was his early response as his ebullient demeanor from practical rail-riding to his present executive responsibility. A few years on a farm homestead near Portage la Prairie, and after year 1896-98, patrolling Main Street as a Winnipeg policeman when the Black Maria was the nearest drag to-day his entry into rail-riding on the Canadian Pacific.

Beginning in 1898 Mr. McKay drove an express waggon. He became a freight brakeman in 1900 on the Northern Pacific, and rose to grade to the position of conductor in 1899. In 1905 he was appointed transmaster at Winnipeg, and a year later at Souris. Back to Winnipeg in 1911, he took over the duties of acting superintendent of terminals, and in 1912 reached the position of assistant superintendent at Revelstoke. Fighting snowslides in the Rockies with men, he was rewarded with the less hazardous position of superintendent at Medicine Hat, where he served from 1917 to 1920, the year in which he became general agricultural agent with headquarters at Winnipeg.

Advance Of Aviation

Travels In Seven Days Distance That Formerly Required 15 Months To Negotiate

When the Africa air mail left the London air station, Croydon, England, recently, there travelled with it a man whose journey illustrated to remarkable fashion the advance of aviation symbolized in the close of 20 years of dreams and hoping grounds between Cairo and Cape Town.

Thirty-two years ago Major Stuart Grogan, big game hunter and explorer, walked from the Cape to Cairo, taking nine years. He toiled through thousands of miles of bush and jungle, frequently distressed by fever and once brought on by the hardships of the march. The natives, ideas of myriads of demon-carrying insects that infested much of the track he followed.

And as for the tremor bugs, they are alleged so as to affect a chief, when not in motion.

A printed crops silk made the original.

Pale blue crepe satin, lace trimmed is dainty for bedtime.

For resort or cruise, you'll adore these japonica of white hankie weave cotton that has a wrinkle-proof finish.

Style No. 911 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 5½ yards of 36-inch material with ½ yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

APRIL 5

GOD IN CREATION

Golden Text: In the beginning God created the heavens and the earth.—Genesis 1:1

Lesson: Genesis 1:1 to 2:7.

Devotional Reading: Psalm 8.

Explanations and Comments

In the Beginning, God, verses 1, 2 The first verse of the first chapter of Genesis is the cornerstone of the whole of the first chapter. The detailed account of the creation in the beginning God this is the great proclamation of this chapter. Before the mountains were brought forth even the heavens and the earth, God. Because all the world, even from everlasting to everlasting Thou art God. Psalm 90: 2

"I like the superb organ tones of those immortal words of the primal reason and imagination rest; at the first, before all things, or even even God but second-by the word of mouth was the eternal, the almighty hand 'in the beginning God.' Thou Alexander McKenzie.

Light (Created), Light and Darkness separated, verses 3-5. And God said, "Let there be light." Countless writers had grammatical words, but real and material things. The sun, moon, heaven, earth, I, and then, are scarcely to be reckoned words of God, yes, hardly a syllable and letter in comparison with the entire creation." Martin Luther

Let there be lights and there was light. "The third verse is a surpassing example of sublimity of thought and diction." Longinus.

And God divided the light from the darkness. A writer in "The Outlook" finds in compare the sublimity of the opening sentences of the Bible with those sentences published in a newspaper from a teacher of one of the new religions. "The radium of spirit penetrates, and dissolves, and disperses on the substances shadows, and images of the mental concept the beautiful, man and the counterfeit universe and discloses the divine reality, and spiritual verities of being."

And God called the light Day, and the darkness he called Night. The morning clearly is that which God ordained man to do for spiritual and bodily gauge are the gift of God by a wall understood rule God to call to for himself Sun.

And there was evening and there was morning. Evening is doubtless mentioned here before morning because the Jewish day began at sunset.

One day. This "day" of Genesis has nothing to do with our period of twenty-four hours, nor with a period of countless years. "It is a beautiful device this use of a week of days and nights to show that creation was not instantaneous. The writer might have introduced any other time measurement. He might have suggested years, or centuries, or cycles. But the most convenient, the simplest scale, was the week of days a figure to help us to the thought of continuous creative energy." John H. Vincent.

Better to believe that the world was created in six solar days than to doubt whether it was created at all." W. H. P. Faunce.

The spacious firmament on high
With all the blue ethereal sky,
And spangled heavens, a shining frame,
Their great Original proclaim."

—Addison.

The Spell Of Martin-Harvey

Celebrated Actor's Art Comprehends a Unique Range Of Stage Portrayals

Anyone who has fallen under the spell of Martin-Harvey will grant the fascination of the subject. What is the mystery of the source of inspiration from which springs the actor's art? Is it true that "Man is composed of many spirits" and that in the exercise of his art, by an actor, one of these will live before us in the person of the artist who has called up one of these mysterious identities? It almost seems so. Witness his representation on the night of the subtle, poetic intangibility of Sydney Carton, a dream in life reduced to an intangible shadow and atmosphere of beauty realized by the artist, not to be remotely considered as a creature of flesh and blood. And the very next night there is Hamlet, a creature of the hilltops, a quest of abnormal passion, a virile man if ever there was one, confronted with grim reality of life.

There is no trick of temperament in the realization of these two parts so different in every respect, side by side, and their presentation is always proof of dual personalities. Behind them is beyond a perfect technique, there is something else. In the case of Sir John Martin-Harvey there is a brain, conscious, and intensely sympathetic, which understands life and touches it at many angles. Here is intellectual mentality, the substance of emotional genius is no air, realized and bridled, ready to be understood at will. This rational something of the fabric on which great theatrical art is built, a preconceived tangible achievement.

Sir John Martin-Harvey, with Miss E. de Silva and his London company will be seen at the Dacke Pantheon for matinee, 2 days, commencing Monday, April 6. Mail orders are now being received at the office of G. U. Powell and Machine-Hill Building, Regina.

League Membership Dues

China Said To Be In Arrears To The Extent Of $1,500,000

Some countries pay their annual dues to the League of Nations. Others don't. Like any other gentlemen's club, membership dues are sometimes in arrears when, as in the case of China and the South American republics, civil wars, revolutions and such domestic annoyances deplete the national treasury. The league then, is out of luck.

Interesting facts relative to this are disclosed in a return tabled in the house of commons of the British Empire on the budget of Major-General W. A. Griesbach. It shows, among other things, that Canada at present pays her way—and third hand, comely.

Canada's assessment in 1931 amounted to $218,572, and she pays on the nail. China's was in the neighborhood of $300,000, but the unfortunate celestial kingdom has been hard up for a long time. In fact China owes the league $1,900,000 in membership fees, being her consolidated arrears for the past nine years.

The year 1936 was a bad one for the league's collecting agency. No fewer than seven of the nine South American members passed up their dues, four of them—Bolivia, Paraguay, Argentina and Peru—in whole, and three Uruguay, Chili, and Colombia in part.

The seven nations of the British Empire who are members of the league regularly pay in their assessments, which amount to exactly 26 per cent. of the total. Forty-two nations of the world are members of the league.

Since 1919 Canada has spent $3,439,344 on the activities of the league, moneys expended on assessments, incidental expenses and delegations.

Recipes For This Week

(By Betty Barclay)

MINT FUDGE

2 cups sugar.
½ teaspoonful peppermint extract
½ cup milk.
2 tablespoons butter.
2 squares unsweetened chocolate
1 teaspoon vanilla.

Boil sugar, milk and butter to soft ball stage when tested in cold water. Take from stove. Keep half the syrup liquid over boiling water. Heat other half to cream, add peppermint extract and turn on to buttered platter. To hot syrup add the chocolate grated. Stir until chocolate is melted, beat until creamy, add vanilla and turn over first mixture. Mark into squares. The mint part of the fudge may be tinted with green vegetable coloring.

APRICOT AND PRUNE MARMALADE

½ pound apricots.
1 cup sugar.
½ pound prunes.
4 cups water.

Wash the prunes and apricots thoroughly and put them in the water to soak overnight. Cook the fruit together for 10 minutes, add the sugar, and simmer until the juice is fairly rich. Pour into hot, clean, jelly glasses. Seal.

"I passed the screen test!" she exclaimed.

"Plies do the same, to get inside," was his calm reply.

Shortage of native coal has retarded Latin America's industrial development.

Spend Your Money at Your Home Town Store

There are really no good reasons why people living in a community, such as the district served by this paper, should patronize out of town stores and mail order houses. But there are many good and sound reasons why they should spend their money in their own town. The only purchases they should make outside this town are those where ownership, the selection, the price, and the service, cannot be equalled here. If this buying plan was adopted by our readers we are sure that our merchants would benefit from a more deserving share of the patronage of our local buying public.

Our local merchants are your friends. You meet them socially and find them active participants in the social life of the town. They are first in the cause of betterment of the community, and in any improvements which you, as a resident will directly or indirectly share. In most cases their names are the first which appear on any worthy subscription list for local charities. They are first to buy tickets to assure the success of any local play or entertainment. They make possible, through advertising in your paper, the publication of local news of interest to the re-idents. They are vigilant and initi-ative to any proposed legislation, whether civic or provincial, which will affect the welfare and happiness of the community. They take a personal interest in their patrons, which is not possible with salaried clerks of out-of-town stores, and this personal interest is not confined to individual transactions but is continued daily throughout the year. They personally stand behind every transaction and should any dissatisfaction occur, it can be remedied immediately without any of the red-tape and delay invariably connected with large organizations.

Finally, we have no hesitation in saying that it is "horse sense" to spend your money at home, and there is a greater chance of you being able to reciprocate by doing so.

Your neighborhood merchant says: "You scratch my back, and I'll scratch yours!"

Read the advertisements in this paper and shop where you are invited to.

Sportsmanship and Banking

A number of hunters met in the north. One, being better dressed than the rest, volunteered to stay in camp and guard the grub boxes, so he was called the banker. A great storm occurred and no game could be secured for a long time. They got wet and cold, and through the banker He explained that he was committed to a policy of eating not less than a pound of meat a day, and so must take a small amount each day from their now small supplies so a service charge; for the most long his own food supply intact as a reserve to get himself out of the bush when the storm subsided.

Our banks are now in a similar position. The withdrawal of money from circulation has left the farmers of the west in such a state that their accounts are no longer profitable. As the banks are committed to a policy of paying certain dividends, they find themselves in much the same position as the camp banker. The charge on the small accounts of such farmers as have not already perished.

Any farmer who is saving a little money, to buy shoes for his children, should not carry it with him and risk loss by fire, theft or being robbed. He should put it in a bank where it can be absorbed to pay the dividends and so help to keep up the dignity of the banks which are entitled to prosperity at all times.

The Saltie 15th

Electric Cooking and Its Advantages

Economical - Clean - Fast - Convenient - Healthy

AN ELECTRIC RANGE IS ECONOMICAL BECAUSE

Food, of course, costs more than fuel. It is a well known fact that shrinkage on foods in preparation runs from ten to twenty percent. This percentage, however, is greatly reduced when the food is cooked on an ELECTRIC RANGE, which means that your food budget is lessened for the simple reason that you buy less food. Furthermore, an ELECTRIC RANGE, properly operated, works for you at the surprisingly low cost of about one cent per meal per person.

AN ELECTRIC RANGE IS CLEAN BECAUSE

There is no coal or smoke to smear your kitchen, pots and pans and other cookware utensils. No ashes covering. Your draperies retain their original beauty longer, when your cook with ELECTRICITY, clean as sunlight. The ELECTRIC RANGE is easy to clean and equally as easy to keep clean.

AN ELECTRIC RANGE IS FAST BECAUSE

High speed surface elements give quick cooking heat, and the well insulated oven soon reaches baking temperature. Practically all heat is conserved for cooking, very little being wasted. The ELECTRIC RANGE itself does not radiate heat.

AN ELECTRIC RANGE IS CONVENIENT BECAUSE

The antiquated pastime of "pot-washing" is totally eliminated forever. This tiresome task is efficiently and accurately handled by the Automatic Timer and Oven Heat Control without your supervision. You skip the food in the oven, set the controls, and forget it, knowing that the meal will be perfectly cooked on time, every time, at dinner time. Modern recipes call for the application of specified temperatures for certain time intervals. The ELECTRIC RANGE does this for you to the degree and minute, which means that you experience a new freedom in cooking with positive assurance of better results. The ELECTRIC RANGE can be conveniently placed in your kitchen to save unnecessary steps, and will keep your kitchen cool because of its insulated oven, centering the heat inside, where it belongs.

AN ELECTRIC RANGE IS HEALTHY BECAUSE

The full flavor of foods cooked ELECTRICALLY is retained in the food, which also adds to the vitamin content of vegetables and juices, so essential to properly balanced meal, as the cooking is done with very little water, thereby conserving these health-giving elements, which are lost when ordinary methods are used.

Our prices on Electric Ranges, including installation in your home, are the lowest ever offered in Alberta. We invite you to consult our Local Manager for these prices and full details of our Convenient Time Payment Plan.

Calgary Power Company LIMITED

S. PHILLIPS, Local Manager — EDMONTON

A Great War!
A Great Pestilence!
A Great Depression!

ALL within twenty years. Could there be a more gruelling test?

Yet life insurance stands invincible. During that whole period it paid every obligation promptly and fully — as it has ever since the Dominion was formed.

The Sun Life Assurance Company of Canada itself paid to policyholders and beneficiaries in cash during these periods —

The War (1914-1918) $
The Flu (1919) $
The Depression (1930-1931) $

— over $226,000,000. It has paid to its policyholders and beneficiaries since formation nearly $600,000,000.

In prosperity, life insurance is valuable; in adversity it is indispensable. The protection of your home, the security of your business, the comfort of your old age, depend first on adequate life insurance.

SUPPORT ASKED BY BALDWIN FOR THE NEW CABINET

London, England Rt Hon Stanley Baldwin, leader of the Conservative Party and president of the council in the new three-party govern ment appealed to every Conservative member of parliament to support the emergency cabinet's financial legislation.

"The forthcoming session is to be one of the most critical in our history," Mr Baldwin said in a letter sent to all of his parliamentary followers. "I beg of you at whatever personal sacrifice, to be present on the appointed days and to give your constant support to the government to enable them to pass the necessary financial legislation

Failure to do your duty throughout this crisis would be indescribable to us as a party and disastrous to the national interests."

The Conservative leader's appeal was issued as the cabinet continued its battle to balance the budget. After a thorough search it was announced, the ministers had completed their labors in connection with the economy section of the national plan and that their forthcoming deliberations would be mainly concerned with the financial question that is, new taxes.

Plans were placed on the great program made, and officials generally were optimistic that the new proposals have been resulted prospects "pulling England out of the hole" without visiting personal sacrifices on the already over-burdened population.

It was believed a vote of confidence would be sought almost at the opening of the day or at least after "two days' debate on certain resolutions which must precede the budget and passage of the Government.

The Associated Society of Locomotive Engineers and Firemen adopted a resolution repudiating the new government and urging the adoption of a definite socialist policy by the Trade Union Congress and the Labor Party "with a view of changing the present credit system of the nation and establishing the power of exploitation by both national and international financial."

Rt. Hon. J. H. Thomas, secretary for the Dominions, who resigned from his official position with the National Union of Railwaymen before being dismissed by the party when he found that the organization had voted against giving him his support.

"It's cruel, cold and vindictive," he said. "It's not the railwaymen I know."

Duty On Magazines

Customs Tariff Now in Effect Affecting Many Publications.

Ottawa, Ont. Nearly 400 periodicals are contained in the partial list, issued by the Department of National Revenue here of magazines upon which a customs tariff will be imposed as from this date

The department admits it clear that the list is not complete, and that a further list will be issued when the necessary information is furnished to the department by publishers of other named publications."

Three countries have sub-sections of the customs tariff 1405 to 1540 inclusive are appl cable to all magazines imported into Canada from foreign countries, for such publications from Great Britain and other parts of the British Dominion is provided for in the department by publishers of other named publications."

Wheat Shipment At Churchill

Steamer Cheer Wheat From Canadian Lake Port Last Night

Churchill.—The steamer of 10 years of western Canada was realized when 26 cars of No. 1 Northern wheat arrived at this busy port on route to European markets. This is the first wheat ever to come over the Hudson Bay rails into the 2,000,000 bushel wheat elevator.

All the workmen for Carter-Halls Aldinger, and Dominion Department of Railway and canals were present when the speech-making event took place. Mayor Duncan Marshall, M.P., finely realizing the significance of the event, were present in large numbers. To him it was literally true that the wheat was the principal part of the cargo, cheers arose from the groups of workmen and the engineer blew loud blasts in answer.

Council Shortened

Legion Delegate Was Should Have 30 Days In Civilized World

Niagara Falls, Ont.—Reaffirming their belief that war has or should have no place in the civilized world and approving the campaign of the League of Nations Society in Canada to advocate the cause of general disarmament, delegates to the Canadian Legion Convention here today adopted a resolution to that effect. The resolution was qualified, however, as follows: "The resolution of approval is not, however, to be taken as approving of disarmament by individual nations, and expresses the opinion that it is the duty of Canada to maintain adequate defence forces."

Second Ship To Churchill

Will Pick Up 7,000 Tons Of Grain For Shipment To Europe

Montreal, Que.—The steel steamer "Warkworth" sailed from Montreal, September 1, for Churchill, Canada's new grain port on Hudson Bay, to pick up 7,000 tons of grain as an experimental shipment to Europe. The S.S. Farnworth sailed August 30, from Newcastle-on-Tyne for Churchill.

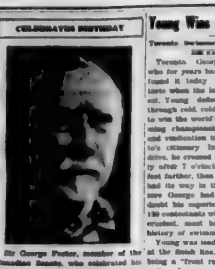
The "Farnworth" is expected to reach the Canadian northern by September 15, with the "Warkworth" due about two days later. When had loads her in Hudson Bay, she will proceed to Liverpool to be discharged for the experiment in navigating to load shipping seas.

Welfare Of Workers

Minister Speaks —Addressing the Workers of Canada

Ottawa.—Addressing the workers of Canada, Hon. Peter Heenan, V. Hardeman, chairman of the state pharmaceutical commission, declared that Soviet Russia was being virtually subjected to ban to boycott-like the nation is less than two years, increased in 1933 to devote more attention to the welfare of workers and peasants.

CELEBRATION SOUTHEAST



Sir George Foster, member of the Canadian Senate, who celebrated his 84th birthday on September 3. He is the last survivor of any of Sir John A Macdonald's Cabinets in the wider Dominion epoch.

Economic Session

Solution Of Difficulty May Lay In Shortening Of Working Hours

Saskatoon, Sask. Solution of the present situation may be found in shortening of working hours while maintaining the present standard of wages, declared Hon. Dr. Montbriand. Provincial Treasurer, when speaking to a board meeting club. Mr Montbriand dealt with the economic situation generally and stressed the need of great economy in the province. He predicted that revenue this year would be less than expenditures, laying the blame for this largely at the door of the agricultural situation in the south of this province.

British Films

May Boost Trade Of Theatres In Canada To Show Pictures

Toronto, Ont.—British motion pictures producers could boost their trade into the Canadian market regardless of the attitude of the Canadian motion picture industry, declared F. W. Fields, of Montreal, British Trade Commissioner in Canada, addressing a meeting under the auspices of the National Council of Women at the Canadian National Exhibition here.

If Canadian theatre owners continued more friendly to British pictures he predicted the erection of a chain of British theatres to show them from country to time.

Sporific Seeds

Does Sage Would Have Started Prosperity Seeds For Insomnia

London, England Doctors should prescribe books by certain authors as a cure for insomnia, suggested Douglas, of St. Paul's, at the Library Association Convention here.

"I have driven my wife sleeping peacefully with one of my books open down on her nose," Dean Inge said.

Young Wins Swim Marathon

Toronto Swimmer Defeats Field Of 100 Contestants

Toronto George Young, Toronto, who for years has sought vainly to found it today Meeting Lake Ontario when the lake was at its crest cal, Young defied it. He smashed through cold, cold waters for 15 miles to win the world's professional swimming championship, $10,000 in cash and vindication in the eyes of Toronto fan's citizenry in the last grueling drive, he crossed the finish line short by after 7 o'clock, swam perhaps 20 feet farther, then collapsed. The lake had its way in the end—but not before George had proved beyond all doubt his superiority over a field of 100 contestants who started cnn of the greatest, most brutal grinds in the history of swimming

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quit under pressure, was set at rest by his performance. Cuss, too, are the cutting and untrue remarks that the Canadian victory of 1927 was a fluke."

The prize winners were:

George Young, Toronto, first, $10,000.

Bill Gell, New York, second, $5,000.

Warren Anderson, Sydney, N.S., third, $1,000.

And these were the only swimmers to finish the ordeal.

An Epochal Event

Minister Of Railways May Witness 22nd Grain Shipment From Churchill

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways and Canals, may witness the first grain shipments by move from Churchill over the Hudson Bay route.

Arrangements have been rushed to permit two cargoes of wheat to be shipped about September 15 for Great Britain. Dr. Manion has not decided definitely whether he would be present at the departure of the Department of Railways and Canals will make the journey.

Costs Can Be Reduced

Finding Of Conference On Production Of Wheat Is Optimistic

Calgary, Alberta. Wheat producers attending conference here with a view to cutting down production expenses closed their sessions with the decision that costs can be reduced, and wheat will continue to be the money farms to cause the bank wheat-growing.

The conference formed the second part of a two-day program, the first being field trials and tests of farm machinery at the Midnapore Ranch of Senator Patrick Burns.

Commercialize Activities

Drumheller, Alberta. Coal mine operators of the Drumheller field have been asked by Rod Deer Valley unit No. 20 of the Army and Navy Veterans in Canada, to make careful selection of employees because of Communist activities in the district.

LEGION OPPOSED TO LEGALIZING SWEEPSTAKES

Niagara Falls, Ont The Dominion convention of the Canadian Legion yesterday stood as opposed to the idea of legalizing sweepstakes in Canada. The convention adopted, with only one dissenting voice, a report of a special committee, advocating that no steps be taken for a change of the law regarding sweepstakes. The committee urged that the Dominion command be instructed to oppose, now and in the future, any attempts to alter the law

It was also recommended that the proffered gift of $37,023 from the Army and Navy Veterans' Association of Canada, which, it was claimed, was wholly derived from sweepstakes, be refused with thanks. The committee, the clerk of the court would be empowered to take all circumstances into consideration and specify the amount the debtor should pay into court monthly to be advanced to his creditors The bill applies to cases where total debts do not exceed $800

Another bill to amend the Debt Adjustment Act applies to persons who have been employed in farm ng and have been forced to retire after renting their farms The debt adjustment commissioners would be authorized to issue certificates to persons in cases where such people are entirely dependent on revenue

Further Hardships For Chinese People

Famine and Epidemic Of Smallpox Add To Misfortune

Shanghai, China. Famine and famine are piecing further hardships on the people of China.

As a result of the crowding of refugees during the hostilities at Shanghai an epidemic of smallpox is now sweeping the Orient, according to Dr. Wu Lien-Teh, director of the Chinese maritime quarantine service.

Sir John Hope-Simpson, British director of the China Famine Commission, said at the same time famine conditions had again reached such a pass in some parts of the country that the people were eating the bark of trees, the chaff of threshed grain, and weeds, in order to ward off starvation.

All steamers entering and departing from Shanghai are required to take special precautions. One of the victims in recent days was E. Hsue Liu, French Consul-General.

Foreigners are particularly susceptible to the form of smallpox now prevalent.

Sailors Quit Ship

Sent Over From Canadian Destroyer "Champlain," Preserves Order In Trouble

Port of Spain, Trinidad - A boat crew from the Canadian destroyer "Champlain" landed in the harbor here and quelled fierce rioting between sailors from the Danish motorship "Stensby" and Trinidad stevedores.

About 35 stevedores were loading sugar into the holds of the "Stensby" when a dispute arose over the distribution of ship bread among them. Immediately fighting broke out between members of the vessel's crew and the resentful stevedores. Two Danes were seriously wounded and three was much bloodshed.

Would Form Central Bureau

Quinzie Lines Up With Western Premiers on Insurance Bill

Toronto, Ont Formation of a central bureau, established and supported by the authority of provincial statutes to which all insurance companies carrying on business in the several provinces would be required to submit returns and demonstrate their solvency was suggested in the legislature by Hon. W. H. Price, Attorney-General, in introducing his insurance bill

It is a bill similar to those passed by Saskatchewan, Alberta and British Columbia, and is practically a warning to the Dominion government to keep hands off insurance legislation.

With established fact if a central bureau reports would be submitted to the provincial insurance departments for their guidance in the issuance of annual licenses to transact business, he thought.

The bill submitted by Mr Price is directed to give the Lieutenant-Governor-in-Council to pass regulations governing insurance, pending the settlement of a constitutional issue with the Federal Government

Alberta Land Settlement

Government Ready To Assist In Placing Unemployed On Farms

Edmonton, Alberta. The Alberta government is ready to join in a sound proposal for the placing of unemployed on farms, with respect to the prorogation of the Alberta legislature steps along this line likely will be taken.

The announcement was made in the Alberta Legislature by Premier J. E. Brownlee in answer to a question put by Mr. Leslie of Lac La Biche-St. Mat, who asked what progress was being made in land settlement assurances to the Unemployed.

Premier Brownlee stated the government had not yet heard to what extent the Dominion Government was prepared to go in support of land settlement by unemployed, nor what proportion of the cost the federal administration would bear.

Manitoba and Saskatchewan were also interested in the scheme, said the premier, and it was hoped a definite agreement would be effected shortly after the close of the present session.

Baby Shoot In July

No Reduction In Price List Unless Absolutely Necessary

London, Eng The meeting of the National Rifle Association at Bisley Camp, which ordinarily brings the crack riflemen of the Empire to Bisley Camp, was held for July 5 to July 12 inst at a meeting of the N.R.A. Council.

Colonel Lord Cottesloe, chairman, presiding at the meeting, said that owing to shrinkage in funds available for the King's Trophy and Grand Challenge shields competition, it had been found necessary to discontinue the issue of the replica and ammunition grants, to raise the standard for bronze medals and to reduce them in weight.

The council had no intention of reducing the prize list for the great Empire meeting at Bisley this coming summer unless it was absolutely compulsory, he added.

C.N.R. Steamship Service

Montreal, Que. The service to Austral s and New Zealand by the Canadian National steamships freight services will be separated during the spring and summer of 1932, to provide a monthly service to and from each country, the company has announced. More frequent departures for the West Indies are also announced. Provision is made for a fortnightly instead of a monthly service between the Atlantic and Pacific coasts, it

No Irregularities

St John's, Nfld. As a result of his investigation into charges made by Hon. Peter Cashin that Premier Sir Richard Squires had falsified minutes of council to facilitate manipulations of public funds, His Excellency Sir John Middleton stated "no discrepancy, no falsification and no irregularity." The governor's report was read in the House of Assembly.

DEBT HARASSED FARMERS TO HAVE ASSISTANCE

Winnipeg Man Inquiry into debt adjustment and debt adjustment to enable debt-harassed farmers to remain on their lands will be made by the agriculture committee of the Manitoba Legislature. This was decided when the legislature passed a resolution ordering the investigation. Farmers, creditors, economists, agricultural professors will be asked to appear before the committee.

Two bills relating to debt adjustment are before the legislature, sponsored by W. J. Major, Attorney General. One of them would enable a debtor threatened with garnishment or seizure to file a statement of his debts with the court clerk. The clerk of the court would be empowered to take all circumstances into consideration and specify the amount the debtor should pay into court monthly to be advanced to his creditors The bill applies to cases where total debts do not exceed $800

Another bill to amend the Debt Adjustment Act applies to persons who have been employed in farm ng and have been forced to retire after renting their farms The debt adjustment commissioners would be authorized to issue certificates to persons in cases where such people are entirely dependent on revenue

Further Hardships For Chinese People

Famine and Epidemic Of Smallpox Add To Misfortune

Shanghai, China. Famine and famine are piecing further hardships on the people of China.

As a result of the crowding of refugees during the hostilities at Shanghai an epidemic of smallpox is now sweeping the Orient, according to Dr. Wu Lien-Teh, director of the Chinese maritime quarantine service.

Sir John Hope-Simpson, British director of the China Famine Commission, said at the same time famine conditions had again reached such a pass in some parts of the country that the people were eating the bark of trees, the chaff of threshed grain, and weeds, in order to ward off starvation.

All steamers entering and departing from Shanghai are required to take special precautions. One of the victims in recent days was E. Hsue Liu, French Consul-General.

Foreigners are particularly susceptible to the form of smallpox now prevalent.

Sailors Quit Ship

Sent Over From Canadian Destroyer "Champlain," Preserves Order In Trouble

Port of Spain, Trinidad - A boat crew from the Canadian destroyer "Champlain" landed in the harbor here and quelled fierce rioting between sailors from the Danish motorship "Stensby" and Trinidad stevedores.

About 35 stevedores were loading sugar into the holds of the "Stensby" when a dispute arose over the distribution of ship bread among them. Immediately fighting broke out between members of the vessel's crew and the resentful stevedores. Two Danes were seriously wounded and there was much bloodshed.

Dr. Tory To Give Evidence

President Of Research Council To Be Called As Witness

Ottawa, Ont Dr. H. M. Tory president of the National Research Council, will be called as a witness by the House of Commons committee on civil service. It was decided Chairman J Earl Lawson (Conservative, York West) read a letter from Dr Tory, who took exception to some statements made before the committee by officers of the civil service commission, one of whom, Commissioner Weston M MacTavish had suggested that the research council should come under the civil service commission.

Dr Tory declared that, contrary to expressed opinions before the committee the administrative officers of the research council received salaries in many cases lower than those paid employees in similar classes of work in the civil service. The professional workers were paid in accordance with the recommendation of the Beatty Commission report of 1920

Appointments were not made by Dr Tory personally, the letter stated, but by the research council as a whole, and professional appointments were made only after their qualifications had been examined by the highest authorities.

Back To the Land

Many Inquiries Received Regarding Settlement Plan In Saskatchewan

Saskatoon, Sask Dozens of enquiries with respect to the proposed provincial land settlement scheme whereby unemployed would be placed on farms have been received by Mayor J E Underwood in the last few days.

"The majority who are enquiring appear to be of the type who would most likely make good under such a scheme," declared the mayor when interviewed. "Many have had farm experience."

Council will not likely take any definite action with respect to the settlement proposal until after a report setting out details of the scheme, has been received from Premier J T M. Anderson.

Under the suggested arrangement the city would be required to contribute $100 to each new settler sent from such municipality, the provincial authorities providing an additional $200.

Would Legalize Lotteries

London, Eng Leave to introduce a bill for the legalizing of lotteries for charitable, scientific and artistic purposes, or for any public improvement, was granted in the House of Commons to Sir William Davidson, Conservative member, by a vote of 176 to 101.

Steamer Is Aground

London, England His Majesty grounded on sandbanks at Buckingham Palace to Sir George Perley Minister without portfolio in the Canadian government and leader of the Canadian delegation to the world disarmament conference at Geneva

Storm Sweeps Southern States

Two Hundred and Seventy-Five People Lose Lives In Hurricane

Birmingham, Ala. Two hundred and seventy-five persons were killed, hundreds of others injured and made homeless, and unestimated damage wrought by a series of tornadoes that clipped into five southern states.

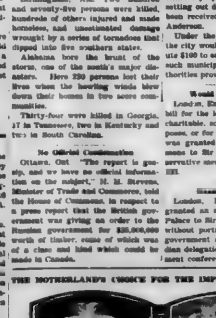
Alabama bore the brunt of the storm, one of the south's major disasters. More 250 persons lost their lives when the howling winds broke down their homes in five score communities.

Thirty-four were killed in Georgia, 17 in Tennessee, two in Kentucky and two in South Carolina.

No Official Confirmation

Ottawa, Ont "The report is going, and we have no official information on the subject," H. H. Stevens, Minister of Trade and Commerce, told the House of Commons, in respect to a press report that the British government was giving an order to the Russian government for $35,000,000 worth of timber, some of which was of a class and kind which could be made in Canada.

THE NETHERLANDS CHOICE FOR THE IMPERIAL CONFERENCE



Above are the six members of the British Government who will represent the Motherland at the Imperial Economic Conference which takes place at Ottawa on July 16. They are, top, left to right: Right Hon. Stanley Baldwin, who will head the delegation, and Right Hon. Neville Chamberlain, British Chancellor of the Exchequer. Below, left to right: Lord Hailsham, Sir Walter Runciman, Right Hon. J. H. Thomas, and Sir Philip Cunliffe Lister, President of the British Board of Trade.

Rescue At Sea

Fishermen Saved After Drifting In Small Boat For Eight Days

Miami, Fla.—Eight days drifting far at sea in a small and crippled fishing boat, four men, three and parched for lack of water and then when hope had all but died, a rag sashed to gasoline and ignited to attract from a storage battery brought rescue.

These were the experiences related here by Frank Gonzalez and his negro companion, George Maney They were brought to Miami by a consignment rather which transferred them from the rescue ship "Cuyampa." of the United Fruit Company

They were fishing near Poney Rock March 12, and the breakshaft of their motor broke. The boat began drifting and soon thereafter sprung leaks. It was kept afloat by unceasing work at the pumps.

Miraculous Escape

Fate Played Weird Role In Saving Lives Of Street Car Operators

Calgary, Alberta. Fate has played its weird role in the form of a ticket package and a steel badge in saving the lives of two Calgary street car operators

A year ago a bandit shot at John Macdonald in an attempted holdup of a street car. The bullet hit the conductor's steel badge on the front of his cap, preventing a fatal head wound.

Recently a gunmen's bullet struck Samuel Emery in the chest during an attempted street car robbery The bullet lodged in the abdomen after it had been deflected from its course into the man's heart by striking a ticket package in his breast pocket

To Study Effect Of Duties

London, England The British government prefers to watch the working out of the present general imports duties before examining as further fiscal legislation said Walter Runciman, president of the Board of Trade, when he was urged by Lord Beeb, Conservative, to institute retaliative anti-dumping measures

Do Not Want Trotsky

Prague, Czecho-Slovakia Czechoslovakia has revoked permission recently extended to Leon Trotsky, exiled Bolshevist leader, to visit this country for three months.

Young Woman Swims Lake Ontario

Toronto Swimmer Defeats Field Of 100 Contestants

Toronto George Young, Toronto, who for years has sought vainly to found it today Meeting Lake Ontario when the lake was at its crest cal, Young defied it. He smashed through cold, cold waters for 15 miles to win the world's professional swimming championship, $10,000 in cash and vindication in the eyes of Toronto fan's citizenry in the last grueling drive, he crossed the finish line short by after 7 o'clock, swam perhaps 20 feet farther, then collapsed. The lake had its way in the end—but not before George had proved beyond all doubt his superiority over a field of 100 contestants who started cnn of the greatest, most brutal grinds in the history of swimming

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quit under pressure, was set at rest by his performance. Cuss, too, are the cutting and untrue remarks that the Canadian victory of 1927 was a fluke."

The prize winners were:

George Young, Toronto, first, $10,000.

Bill Gell, New York, second, $5,000.

Warren Anderson, Sydney, N.S., third, $1,000.

And these were the only swimmers to finish the ordeal.

Economic Session

Solution Of Difficulty May Lay In Shortening Of Working Hours

Saskatoon, Sask. Solution of the present situation may be found in shortening of working hours while maintaining the present standard of wages, declared Hon. Dr. Montbriand. Provincial Treasurer, when speaking to a board meeting club. Mr Montbriand dealt with the economic situation generally and stressed the need of great economy in the province. He predicted that revenue this year would be less than expenditures, laying the blame for this largely at the door of the agricultural situation in the south of this province.

Canadian Films

Minister Of Railways May Witness 22nd Grain Shipment From Churchill

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways and Canals, may witness the first grain shipments by move from Churchill over the Hudson Bay route.

Arrangements have been rushed to permit two cargoes of wheat to be shipped about September 15 for Great Britain. Dr. Manion has not decided definitely whether he would be present at the departure of the Department of Railways and Canals will make the journey.

Costs Can Be Reduced

Finding Of Conference On Production Of Wheat Is Optimistic

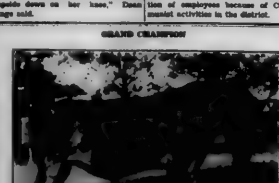
Calgary, Alberta. Wheat producers attending conference here with a view to cutting down production expenses closed their sessions with the decision that costs can be reduced, and wheat will continue to be the money farms to cause the bank wheat-growing.

The conference formed the second part of a two-day program, the first being field trials and tests of farm machinery at the Midnapore Ranch of Senator Patrick Burns.

Commercialize Activities

Drumheller, Alberta. Coal mine operators of the Drumheller field have been asked by Rod Deer Valley unit No. 20 of the Army and Navy Veterans in Canada, to make careful selection of employees because of Communist activities in the district.

GRAND CHAMPION



Holding the record maintained in all showings at the Canadian Pacific Exhibition, Vancouver, the Shrubhaven herd from the Canadian Pacific Railway's supply farm in Alberta proved unbeatable in the bull classes. "Gem Fond Prince" awarded senior and grand championship for bulls at Vancouver's show, added red ribbon to his decorations from this season's major exhibitions.

"Gem Fond Bruce" holds three firsts and the grand championship from Calgary, Saskatoon and Regina, and took second place at Edmonton. His record in 1930 made him first prize aged bull in Holstein classes at Vancouver, Victoria, Spokane International, Washington State Fair, Yakima, Interstate Fair, Puyallup, and Seattle. He is also credited with the grand championship at Spokane, Yakima and Puyallup. He is owned by Shrubhaven Farm exhibits to the north Pacific Coast fairs.

New Freight Tariff Protested

Calgary Board Of Trade Draws Attention To New Ruling

Calgary, Alberta. Protest to the Board of Railway Commissioners at Ottawa over the filing of a new tariff by railway companies which would make shippers pay freight on dead or crippled animals, has been made by the Board of Trade here.

The board claimed that a double charge could be made under the old tariff, but railway officials replied that the tariff had been in effect in Canada for a year and no complaints raised.

Centenary Ceremony

Montreal, Que.—Christening of the infant son of Their Excellencies the Governor-General of Canada and Lady Bessborough will take place in St. Bartholomew's Church, Ottawa, on September 21. Official announcement to this effect was made at "Bessborough," temporary residence of Their Excellencies here.

SAYS DOMINION HAS UNLIMITED GASOLINE SUPPLY

Ottawa, Ont Attention of the committee of the House of Commons investigating the alleged high prices of gasoline in Canada was called to the presence along the Athabasca River, north of Edmonton, of large deposits of tar sands which A U G. Bury (Conservative, Edmonton East), declared contained sufficient gasoline to supply the needs of the whole world for hundreds of years."

In suggesting the committee investigate, Mr Bury advised hearing Dr S. C. Mills, Department of Mines, who had found that it would be possible to process the deposits so as to produce gasoline at a commercial rate

R. C Matthews (Conservative, Toronto East Centre), chairman, ruled it was outside of the jurisdiction of the committee. H. H. Spencer (U.F.A., Battle River), felt any means of obtaining gasoline from Canada would certainly justify the investigation. Mackenzie, C. J. Rothwell (Liberal, Swift Current), suggested "the committee has got a great deal on its hands now. Suppose we wait before we have concluded examination of the oil companies and then look into the possibility of our having control of this scheme." The committee agreed.

John McNeil, director of sales, purposes of Imperial Oil Limited, was called to testify as to the cost of distribution of products throughout Ontario.

Fundamental difference in gasoline prices was caused by varying freight charges. Hamilton was the lowest rate "per" in Canada, and prices elsewhere in Canada would be higher, depending on the increased freight haul from the oil fields in the north-west states.

No Sale For Labrador

If Canada Could Afford It Purchase Might Be Profitable

In 1867 the United States bought Alaska from Russia for $7,200,000.

In 1881 Newfoundland offered to sell Labrador to Canada for $110,000,000

The correspondence with Newfoundland was tabled in the Canadian Commons. It disclosed Newfoundland's terms. The assumption by Canada of her national debt of $37,000,000 the payment of a further $10,000,000 as giving a clear title. It would mean taking $11 apiece from every man, woman and child in Dominion And it would be like paying $500 apiece to every resident of Newfoundland but it is not going to happen not just now, at any rate. It is probably conceded that Canada has already enough territory and enough debt without acquiring a large new helping of either

It is also pointed out that $110,000,000 is a big price that Quebec could have bought Labrador in 1920 for $1000000 But that was before a Privy Council decision determined the actual area which Newfoundland owns As a result of that decision in 1927 Newfoundland controls a Labrador of about 113,000 square miles, one fifth that of Alaska, and more than one quarter that of Ontario It is greater in extent than England Scotland and Wales combined Its natural resources include a waterpower that is said to eclipse Niagara, and forests that are said to represent $250,000,000 in timber The waterpower in the 300-foot Grand or MeLeash Falls on the Hamilton River

The purchase of Alaska by the United States was described at the time as "Seward's Folly." Time has not justified the description It may be that Labrador at $110,000,000 would not be a folly either But Canada just cannot afford it. The correspondence tabled at Ottawa shows that there is no move being made to take up Newfoundland's offer.

Slow Accidents But Fewer Fatalities

Shown in Annual Report Of Canadian Railways

A total of 2,997 casualties was the toll of accidents on Canadian railways last year, according to the annual report of the Board of Railway Commissioners tabled in the House of Commons. This was an increase of five over the casualties in the previous year The killed numbered 317 in 1931, as against 439 in 1930, and the injured 2,680 compared with 2,513.

Railway passengers killed in accidents in 1931 numbered nine, a decrease of 71 per cent compared with 1930, and those injured totalled 426 as against 982.

Employees killed in 1931 totalled 51 as against 94, while others (mostly trespassers) killed last year numbered 237 compared with 318 in 1930. Injured employees numbered 1,331 in 1931, compared with 1,462 the year before.

Not a Model Youth

When quite a young woman, before she started her career "a pound a week and find one's own drums"— Miss Eva Moore taught dancing at Brighton.

"Amongst my pupils," she says, "was a small red-haired boy.

"He was the naughtiest boy in the class. In fact, I used to think sometimes that he must surely be the naughtiest boy in the world. His name was Winston Churchill."

"How old do you think I am?"

"You have the brain of a girl of 10, the dress of a girl of 16 and the demeanor of a child of ten—total, 42."—Pub Ideas, Paris.

W. N. U. 1920

Second With Livestock

Western Indians Are Making a Success of Mixed Farming

In live-stock raising, the Indians of the three Prairie Provinces of Canada continue to show marked improvement according to a recent report of the Department of Indian Affairs. During the year 1931 cattle on all the reserves showed an increase in numbers while the horses, which are of a good Sioux type, were in excellent shape when the season's farming operations were drawn to a close last autumn.

The Department reports that there are between 23,000 and 24,000 head of cattle on the various reserves in Manitoba, Saskatchewan and Alberta, which is the largest number yet recorded The 1931 increase was a substantial one Over 1,000 calves were sold on the market by the Indians and it is estimated that approximately 1,000 head were slaughtered for use on the reserves After taking these reductions into consideration the net increase was about 1,-000 head.

An outstanding feature of the cattle raising operations on Indian reserves in Western Canada is the high quality of the stock Steers from the various reserves placed on the open market have commanded the highest prices and a substantial source of income has been established through stock raising From year to year pure bred bulls are added to the various herds to improve the stock with beneficial results. The growing interest of the Indians in this branch of farming is a matter of gratification to the Department, better shelters being provided and a general improvement in care being noted. The number of Indians milking cows increased during 1931 and the policy is an indication of continued healthy growth.

The question of pasturage and forage for cattle on the Indian reserves in the southern parts of the Prairie Provinces caused some durable anxiety but late rains relieved the situation. The pastures throughout the dried out areas was not used until after July 1. Hence rains improved conditions considerably so that up to the end of the year it was not necessary to feed hay from the stacks. Approximately 75,000 tons of hay and grain feed were put up last year by the Indians in the West.

Worse For Them

A man was being led off to execution by a party of soldiers on a freezing cold morning.

"What brutes you are," murmured the condemned man, as march me through weather like this!"

"How about us!" retorted one of the squad. "We've got to march back."

Among the mountains on the moon is a range which has been named Leibnitz Mountains and which is more than 400 miles long.

THE OLDEST MAN

Claiming to be 158 and therefore the oldest man in the world, Sadhu Agha (above), is near death in London. The aged Turk toured this continent last year when this picture was made.

Avoid Late Cutting

Observation In Connection With the Cultivation Of Alfalfa Crop

L. E. Kirk, Dominion Agrostologist, Ottawa, observes in connection with alfalfa that winter-killing due to improper management of the crop can be prevented by avoiding late cutting. During the first season the crop should not be cut at all. If in very weedy it may be advisable to go over the field with a mower and cut off the weeds to prevent them from maturing seed, in which case the plowing should be done early in the fall and with the cutter bar of the mower set high. In succeeding years the crop may be cut for hay once or twice according to circumstances, but if a second cutting is taken it should be made quite early in the season so that there will be sufficient time for a strong fall growth.—Dominion Department of Agriculture.

As He Saw It

"Hasn't talk to me about free selection!" said a hearty farmer of the old school. "What good has it done any one, any way? Makes young fellers too proud to do owt for a living but sit at a desk and wear suits bought their backs! And the girls! Why, my missus can't get a servant; they all want to be actresses, or teachers or lady clerks! And the best of it is, after all the learnin', some of 'em can't even spell. There's young Thomas of the Grange, he's just got a sign over his coach-house, and this is how he spells 'carriage'—g-e-r-r-i-a-g-e! Don't talk to me about free education!"

With 1,000 hours of sunshine, Sanford was Maglona's sunniest city last year.

Farm Life Loss Popular

Census Shows a Canadian Move Is Growing Preference For Cities

The city and town are winning against the country in bidding for Canada's population. At the census of 1921, there were still more than half the population on the farm. But in 1931, as a return published shows, between 53 and 54 out of every hundred Canadians were living in urban centres.

Prince Edward Island is the most rural province in Canada More than three out of four live on the farm there. Saskatchewan is next with 68 out of a hundred living in the country, and New Brunswick is only a whole loss rural, also with 68

Ontario is just nosed out by Quebec for the honor of being the most urban province Only 39 out of every hundred in this province live outside the city or town in Quebec the number is only 37

Only one province has grown more rural in the last decade that is New Brunswick, where the percentage was 67 in 1921 and 68.4 in 1931

The greatest swing citywards is recorded in Quebec, where the percentage of urban folk grew from 56 per cent. in 1921 to 63 per cent in 1931

Grow More Alfalfa

More Of This Crop Needed By Cultivated In Western Canada

There are excellent arguments for a greater use of the alfalfa crop in Western Canada. At the present time there is a decidedly tendency to increase the acreage of forage crops Alfalfa should certainly be grown on part of this land It is true that the acreage of alfalfa remains small and many trials have resulted in disappointment. The reasons for this, however, are well understood. Alfalfa is a crop that requires special conditions and proper handling, but it is a crop which will prove very valuable to the man who will try to understand how it should be given Dept. of Agriculture, Ottawa.

Few Points In Bee Keeping

Farmers which Are Necessary To Ensure Good Success

"The object of all spring manipulations," writes the Dominion Apiarist in the current issue of "Seasonable Hints," "is to encourage brood production to its maximum and there are four factors necessary to secure it, and for which the beekeeper alone is responsible. (1) Brood colony must be headed by a prolific queen; (2) There must be enough food within the hive to last only until the bees can forage themselves, but to feed the encouraging generation of bees; (3) Sufficient room for the normal expansion of the brood nest and for the storage of any surplus nectar and pollen which the early flowers may yield; and (4) Ample protection from the cold and changeable weather of spring."

Praise For Great Britain

Examples Should Be Inspiration To World Says U.S. Paper

One of the inspiring stories of national heroism and resolution born of this depression has been coming in, bit by bit over the Atlantic cables these last few weeks. It is the story of how Great Britain, hitched against the wall last September by internal and external forces of economic destruct on has fought her way out Again after the traditional English manner and is now more cheerful [illegible] than she has been.

First came reports of the huge shipments of gold from India to London, England, in support of the Hoover debt sterling. Two hundred million dollars in gold has gone to London from India in the last five months and the movement continues unabated.

Then came announcement that more than half of the British short term debt to America and France had been paid five months before it was due. Next came removal of restrictions on exchange dealing.

Back over the struggles made against depression in the various countries of the world since 1929 and nowhere is there a more inspiring saga than Britain's during this period of days in September when she recovered the gold standard and formed her coalition government under Ramsay MacDonald.

The Britain always shown to the finest advantage when he is pushed into a corner. The British people never really begin to fight until then. They are never really happy until in a perfectly impossible situation That's why the Britisher repeatedly fools the rest of the world.

This column has been guilty, along with thousands of individuals, in thoughtless moments, of nagging the old refrain that Britain having reached the zenith of her financial power and being now on the road over the hill to the poor house. Well, those who talked that way temporarily forgot the British character. The British have given the world its most inspirational example in depression warfare. The odds were greater against them than against us. Let us, as Americans, take hope from the British.—Cleveland Plain Dealer.

Farmer's Account Book

Handy Book Which Will Assist the Farmer in Keeping His Accounts

Farming is a business, and if it doesn't pay the farmer wants to know why it doesn't pay. Some record of receipts and expenses together with an inventory to list with values of live stock, feed, implements, etc., on hand, at the beginning and the end of the farmer's year, must be kept if he is to find out why or where it doesn't pay. A record of each department of the farm business should be kept. This is the only way to find out how to bring made from each or which departments are not paying. To assist the farmer in this matter the Dominion Experimental Farms have issued a very simple and useful little account book. This little book, while simple, is a great step in advance of keeping no accounts whatever. It may be procured from the Publications Branch, Department of Agriculture, Ottawa, for the sum of ten cents.

Exports from Argentina in the first seven months of this year were 74 per cent. greater in volume than in the corresponding period of last year.

There's nothing that can increase in weight like a heavy silver on a chain bag.

"Do you believe all they say of Londin?"

"Of course, I believe it—what do they say of her?"—Boston Herald, London Letter.

Rheumatism So Bad He Had to Quit Work

Asked Danger That Bothered Him Relieved by Dr. Williams' Pink Pills.

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Bergey, Wingham, Ont. "It got so bad I had to stop working and stay in the house I was two weeks in bed when a friend advised me to try Dr Williams' Pink Pills I got the Pills a fair trial, and they relieved me right away My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Sciatica, Rheumatism and kindred ailments that the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all sickness or seriously exhausted people Try them At your druggist's. 50c, 75c

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of
The Splendid Adventure—The Heart Of Hagar, Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XVI —Continued

The recognition of the great thing that had come into her life left her a little breathless and shaken But she did not seek to evade or deny it The absolute candour of her mind candid even to itself accepted the truth quite simply and frankly. No false shame clung to her as far as actual fact went, given her love unasked, tempted her to disguise from herself the reality of what had happened to her good or ill, whether Blaise returned her love or no. It was his.

And in her innocence she believed that he, too, cared—half-fearfully, half-joyfully recognising the pent-up force which surged behind the bars of his deliberate abstinence.

True, he had never definitely spoken of his love in so many words, but Lady Jane had supplied the key to his silence. The past still bound him! Alive, Neota had held him by her beauty, and dead, she still held him with the cords of remorse and unavailing self-reproach cords which can bind almost as closely as the strands of love.

But for that

The hot colour surged into Jean's cheeks at the memory of the letter which lay behind that "but" Blaise cared! Cared for her, needed her, just as she cared for and needed him. To her woman's eyes, newly anointed with love's sacramental oil and given sight, it had become suddenly evident to a hundred ways, most of all evident in his sullen effort to conceal it from her

So much that he had said, or had not said those clipped sentences, bitten off short with a savage intensity that had often enough troubled and bewildered her, now found their right interpretation. He cared . . . but the bondage of the past still held.

And with that thought came reaction. The brief, quivering ecstasy, which had sent little fugitive thrills and great exciting throbs through every nerve of her, died suddenly like a damped-out fire, as she realized all which that bondage implied.

It was possible he might never break the silence which he himself had decreed. From the very beginning he had recognized—and insisted upon the fact that they two were only "ships that pass," and though now, for a little space, Fate had directed the course of each into the same channel, a year, at most, would float them out again on to the big ocean of life where vessels signalled and passed each other like mist. In the ordinary course of events, nature eventually to Bermuda, while Blaise remained in England And that would be the end of it.

She knew the man's dogged perfunctuality; he would hold to an idea or belief immovably if he conceived it right, no matter what the temptation to break away And in the flood of light vouchsafed by Lady Anne's confession she felt convinced that he had somehow come to regard the tragic happenings of the past as standing between him and any future happiness. Why, Jean could not distinguish, or fathom, but she guessed that the dominant factor in the matter was probably an exaggerated consciousness of responsibility for his wife's death, and perhaps, too, a certain pride which made him resent any feeling of loyalty to the dead woman, which urged him on to sacrifice of his own and present happiness as some kind of atonement

Unless and a swift spasm of pain shot through her, tearing its way like a knife, the fact that perhaps Lady Anne had been altogether mistaken in her fixed belief that Blaise had not really ceased to love his wife, that he had only exercised away on the swift tide of passion that the which rums so fiercely and unfrom the past in his youth

Jean had her black hour then, when she had to face the fact that although he was free, and although she tremulously believed it was returned, she would never possess his heart, the supreme joy of utter certainty, never hear the beloved's voice utter those words which hold all heaven for the woman who hears

But through the darkness that closed about her, there gleamed a star of hope, the fact that he can make yourself useful by paring the thorns off the stems." She gratured towards a basket which stood on the ground at her side, already overflowing with its scented burden of pink and white and crimson roses.

He glanced at it, the runnet head bent studiously above a bush rose and there was a gleam, half angry, half amused, in his eyes His fingers went uncertainly to his pocket, where reposed a serviceable knife, then suddenly he drew his hand sharply away, and supplied with provisions. Each members of an expedition operating in the hinterland of Aden were evenmaided by air. And the Sultan's brother was conveyed from Ras-Al-Hamah to Bahrein for eye troubles.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the lower intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there Miller's Worm Powders destroy worms of kinds and while expelling them from the system serve to repair the damage they have caused.

THE RHYMING OPTIMIST

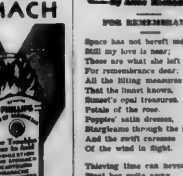
By Alice Hicksmith

FOR REMEMBRANCE

Space has not bereft me,
Still my love is near;
These are what she left me
For remembrance dear:
All the filling memories,
Sweet and gay
That the linnet knows,
Sunset's opal treasures,
Petals of the rose,
Poppies' satin dresses,
Stargleams through the night,
And the swift caresses
Of the wind in flight.

Thieving time can never
Steal her quite away,
Since with dawning ever
Memories sweet and gay
Make me from my sleeping,
From my dreams of her,
Thoughts like sunbeams creeping,
Clad as wings astir.
Space has not bereft me,
Nor have time's fleet wings;
Memories she has left me
In all lovely things.

ACID STOMACH



EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes the acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless, and tasteless, and yet its action is quick. You will never rely on crude methods, once you learn how quickly the method acts. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia. A powder—not a paste—that safeguards against tooth decay. (Made in Canada.)

Too "Worn-Out" to go

Another dose broken . . . Couldn't carry on her love's message tonight! Lydia E. Pinkham's Vegetable Compound stops relieves cramps. Try it next month.

HE COULDN'T READ FOR INDIGESTION

"For years I suffered terribly from indigestion, with headaches and thousands of other symptoms to my eyes, which prevented me from reading. I decided to try Kruschen Salts. That was August, 1933, and I have taken a little in a cup every morning of every year. I now eat anything and am entirely free from indigestion or other

Now let it be said quite definitely that what Kruschen has done for it will do for everybody else who suffers from indigestion. It is not a question of "this" or "that" little daily dose" first stimulates the flow of gastric juices to aid digestion, and then removes completely, and for all time, the unfailing stimulation of all waste matter every day.

Soon after you start on Kruschen you will begin to feel the benefit. You will find in your satisfaction that you can eat what you like, without any distressing after-effects. And as your system tones up you will feel the relief from constipation, biliousness, nerves, and rheumatism.

FREE TRIAL OFFER

If you have never used Kruschen Salts before, we will be glad to send you a FREE TRIAL BOTTLE. Just send your name and address to us at the address given below, and enclose 10 cents (to cover the cost of postage and packing). The bottle you receive will be a regular 1/6 bottle, and will last you for a month. Kruschen Salts are sold by chemists all over the world. Address your letter to: Dept. 1, The Kruschen Laboratories, 1-11, Hatton Garden, London, E.C.1.

Aviators Have Adventures

Record Of Royal Air Force Makes Fascinating Reading

For an hour during a recent meeting the British Houses of Commons were entertained with the romances of high adventure. Sir Philip Sassoon, Under-Secretary for Air, introduced the thousand and two reasons of high adventure. Sir Philip Sassoon, Under-Secretary for Air, introduced the thousand and two reasons of why more rental of votes and types of aircraft. One saw the Royal Air Force passing to new and more difficult assignments in the world's desolate places

The last touring car of the Egyptian State Railway was discovered in the sand wastes of the Libyan desert. A friendly hand was given to a district commissioner in the collection of taxes from unwilling semi-nomadic tribes. A case of appendicitis was conveyed 500 miles across the desert from Darfur to Khartoum. Water and supplies were taken to an Arbour expedition stranded north of Wadi Haifa with only a small bottle of water between its members.

Then a skillful pilot on a tour of the Northwest frontier provinces of India "back of beyond" received his mail. An Italian aircraft force landed on the Somali coast was located and supplied with provisions. Such members of an expedition operating in the hinterland of Aden were evenaided by air. And the Sultan's brother was conveyed from Ras-Al-Hamah to Bahrein for eye troubles

DR HAMILTON'S PILLS

Little Helps For This Week

"Shall we receive good at the hand of God, and shall we not receive evil?" Job ii. 10.

With patient mind thy course of duty run,
God nothing does or suffers to be done
But thy wish'd end thou would'st have done thyself
Unless it be not best.
The end of all events as well as He
Dr Byrom.

Of nothing may we be more sure than this: If we cannot sanctify our present lot, we shall not sanctify any other. Our heaven and our Almighty Father are there, or nowhere. The obstructions of that life are given for us to have away by the concurrent touch of a holy spirit and labour of circumstance will, its prison for us is tint with some celestial light, its mysteries are for our worship, its sorrows for our trust, its perils for our courage, its temptations for our faith. Soldiers of the "Cross," it is not for us, but for our Leader and our Lord to choose the field. It was, indeed, calling the station which He assigns us, to make it a field of truth and conquest, and it be a field of death.—James Martineau.

Switzerland, famous for its cheese, has banned the importation of hard cheese.

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower boil down to Canapar Cookery Pleasure

BETTER, CHEAPER AND EASIER COOKING

Delicious as cauliflower, cabbage and certain other vegetables are, they have acquired a heavy penalty on people who are fussy cooked them. Not to mention those who had to suffer the odor without enjoying the finished product. The same thing is equally true of fish.

Canapar Cookery Parchment, a very ingenious invention, does away with this annoyance entirely. While retaining all odors, it also retains flavor and food value. Cooking in Canapar actually parallels the famous French method of simmering and confining food and its flavor in the baked apple.

You buy Canapar in a large envelope of handy size sheets which may be rinsed out and used over and over again because they won't absorb odors. When boiling vegetables you merely wet the Canapar and make a bag similar to a pudding bag. If you prefer them, you line the steamer with Canapar, arrange food and steaming, and fold back corners of the Canapar to prevent steam from dripping back. You can scrub out these vegetables at once in the same saucepan, this way—save fuel—and the flavors will not intermingle.

Steamed, or boiled, fish comes out free, solid and retaining its own flavor. No odors. No sticky steamer or saucepan to clean up afterwards.

Line your roasting pan with Canapar, then the fats and juice can't burn. Meat is more succulent and there is no scouring or scraping of the pan afterwards.

Many women use Canapar for a dish cloth —it is so soft and absorbent, and doesn't spread lint.

You'll never be without Canapar once you start using it. It saves time and money. Made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores sell Canapar, but if yours doesn't, just send the coupon and we'll give you a new and unique book entitled "Leftovers" containing new hundred recipes as a bonus for your trouble.

Applebell Paper Products, Ltd.,
Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of Canapar Cookery Parchment and your 100 recipes for "Left-overs."

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the office of R. Gordon Fraser in the Town of Fort Saskatchewan, in the Province of Alberta, on Saturday, April the 18th, A.D. 1925 at the hour of two o'clock in the afternoon, the following property, namely:

The South half of Section 35, Township 55, Range 23, West of the Fourth Meridian, containing by admeasurement 320 acres, more or less, excepting thereout all coal.

Terms of sale to be ten per cent. cash at the time of the sale and the balance according to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that above property is situated about five miles from the village of Gibbons at which is the nearest Post Office and Grain Elevator. The nearest School is two miles from the land.

The land contains 320 acres of which 315 acres have been under cultivation.

The soil is a black loam with a clay subsoil.

There are two wells on the property giving a fair supply of water.

The following buildings are on the land: frame house, frame barn, frame granary, 8 portable granaries, frame carpenter, frame bunkhouse, frame work-shed and stockshed.

For further particulars and conditions of sale, apply to Messrs. Worrell, Lindsay, Emery & Ford Barristers, Canada Permanent Building, Edmonton, Alberta, vendor's solicitors.

Much Business Done At School Board Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board, held in the Council Chambers on Monday, April 6th.

Present:— Mr. F. Atkinson, Chairman, Trustees:— R. Todd, R. A. Brown, Dr. Grunert and Dr. Calhoun.

The minutes of last meeting were read and, on the motion of Mr. Brown adopted.

The motion regarding High School pupils, notice of which was given by Mr. Todd at the last meeting, was withdrawn for the present.

The caretakers, Mr. and Mrs. C Edwards, tendered their resignation, to take effect from the 30th. Instant. It was moved by Mr. Brown and adopted that the resignations be accepted, and that the Chairman and Secretary be authorized, in the meantime, to arrange for a suitable person to take over the Janitor's duties for 2 months dating from the 1st. May.

The Chairman appointed Mr. Todd, Mr. Brown and Dr. Calhoun, to prepare estimates for current year, and report at next meeting.

It was moved by Dr. Grunert and adopted that the Board pay Miss Bullock for the 2 days she was employed teaching during Miss Stevenson's absence last month.

The following accounts were passed for payment on motion of Dr. Grunert. A. M. Carscadden, $18.75; Calgary Power Co. $1.90; Simmons Lumber Co. for Coal $150.39; Alberta School Trustees' Magazine $1.50. The account for School Supplies be paid when certified to by Principal.

Mr. Brown was authorized to purchase, when he is in Edmonton, a box of paper towels, at best advantage.

Mr. Anderson, the Principal was present, and submitted attendance report for March, also a list giving name of subjects with percentage marks in case any student in the High School failed to make 45 per cent in the recent March examinations.

The meeting adjourned on the motion of Dr. Calhoun.

PARTRIDGE HILL NEWS

Messrs Ralph and Ernest Smith visited the Spring Horse Show in Edmonton on ———.

Mr. and Mrs. W. Allen, and Miss Cobbledick were Edmonton visitors on Monday.

Mrs. A Krebs is a patient in the Lamont Hospital this week.

Mr. J. B. Webb received the sad news of the sudden death of his father Mr. John Webb in Edmonton, Sunday afternoon. Previous to moving to Edmonton, about 15 years ago Mr. Webb and family resided in the district.

Dick Mains of Edmonton spent Easter Holidays with friends at Partridge Hill.

Mr. Norman Lumsby spent the Easter recess with friends in the city.

Mrs. Robt. Gordon spent last week with her mother Mrs. Phillips at Lamont.

The Junior U. F. A. will hold their annual meeting at the home of Wilson Gordon this Wednesday.

Considering the state of the roads the most pertinacent was well attended on Saturday night.

The Independent Group who formed the Government under the leadership of C. H. Fiendoff were defeated on their Bill: Resolved that Kidnapping merits the death penalty.

Mrs. Edith Cobbledick of Leland Alberta, paid a flying visit to friends here Easter week.

YPRES VALLEY

Mrs. Williamson and daughter Jessie of Edmonton were visitors last week at the W. B. Fraser's home.

We are sorry to hear that Mrs. Ash lives is a patient in the University hospital.

Mr. Bill Gunn's band is improving and we hope to have him home again before long.

Mr. and Mrs. H Brenton are visitors at Clandonnel, attending the wedding of his nephew

The sympathy of the community is extended to Mr. J. P. Welsh on the death of his father last Saturday in Edmonton.

All interested in getting together a baseball team are requested to attend the meeting to be held in the school here on Saturday evening, April 9th, at 8.30.

Mrs. D. Cranston has got over her sore throat at last.

We believe spring has come to Ypres Valley. If mud is a sign of spring. The creek has overflown its banks and the crows are here, and even the blackbirds sing

Josephburg News

Rev. and Mrs. Korn of Brush Hill were visiting at the home of Rev. and Mrs. Weinbrenner last week.

Mrs. R. Thomas and daughter Jean of Edmonton were visiting at her mother's Mrs. M. Mohr last week.

The ladies aid which was to meet at the home of Mrs. Mike Mohr on April 7th, is postponed until further notice.

Mrs. Frank Mohr who is still at the Lamont Hospital is not so well as she has been. We are hoping that she will improve soon.

Born to Mr. and Mrs. Fred Thomas on March 25. A daughter.

WE SAW TO-DAY

Stanley Dennis filling in a bad hole south of town near the railroad tracks Frank Elliston drawing gravel for same, Bey Stuchey getting mail, Reg. Warvier, Doctor Henry and Fred Atkinson in conversation on the main street, Mayor Montgomery going to the town hall, Rev. Hannay taking home the beans, Art Simmons going into the Fort Hardware.

The Argentine government will take over control of all operations of the grain futures market, effective April 15th, and will also assume control of all "price-to-be-fixed" operations after April 1, according to a decree published March 18, and cabled to the U. S. department of commerce.

ENTOMOLOGIST WARNS OF CUTWORM MENACE

Arthur Gibson, Dominion Entomologist, call attention to the probability of severe damage by the pale western cutworm in 1925 in areas in Saskatchewan and Alberta which were infested last year. He states that any fields which were undisturbed as they the soil surface was raked or crusted from August 1st to September 15th in 1924 should be considered as safe as if they were inoculated during August, 1924. Mr. Gibson suggested that where there is doubt as to a field being free of cutworms a test should be made by cutting an inch or outer strip of sward diagonally across the field. This indicator strip should be seeded as early as it is possible to get a drill on the land and long before regular seeding starts. This strip will give a fair example of the condition of the field as weather conditions which will bring this grain to a height of about five inches will also hatch many of the eggs. If on examination from 5 to 15 fifteen plants per square yard are injury the field should not be seed

Under normal conditions the strip will show by the end of the first week of May or earlier whether or not cutworms are present. No field should be seeded to any crop, except all flax, where cutworm damage is evident so long as there are cutworms present and active

Important Boiling Regarding High School Fees

The A.T.A. Magazine for March contains proceedings of the Alberta School Trustees' Association Annual convention held last month in Calgary, at which many interesting resolutions were passed. During the discussion two questions of importance came up (a) if a non-resident is sending his children to a high school in which district he is paying taxes, is there anything in the Act which prevents the high school district collecting tuition fees from the district in which the man lives? No. (b) If a farmer rents a house in town for the purpose of sending his children to high school can fees be charged to the district in which he farms? The chairman answered that a test case of this kind had been made and the ruling was that the man's "residence" was the place to which he went back to make a living so that the man's "residence" would be his farm and his district would be liable for fees provided the work was not taught in that school. The question was also raised as to whether a school board could charge high school fees above the amount set out in The School Act. In many places this is done by arrangement with the parent to pay whatever amount is charged in excess of the $20 from the district, but it is purely a local arrangement and not provided for in the Act.

HIGHLIGHTS OF TAX CHANGES MADE BY DOMINION GOV'T ON WEDNESDAY

Sales tax increased from four per to six per cent. A limited number of articles, not primary products, now exempt are made subject to the sales tax. The sale tax changes are effective April 7.

Income taxes the personal exemption in income taxes is reduced, for those with dependents, from $3,000 to $2,400, and those without dependents, from $1,500 to $1,200.

The 20 per cent reduction now allowed from tax payable under established schedule of rates is discontinued.

In addition, five per cent surcharge on the amount of tax payable, is to be imposed on all taxpayers, personal and corporate, with net income in excess of 5,000. The corpate rate is increased to 11 per cent. Provisions relating to family corporations will be repealed.

Income tax changes will apply to taxes on the 1925 income.

1001 LEAKS ITS WAY INTO NEW MARKET

In a rail shipment of oil the other day, leakage from defective containers was so great that the locomotive was unable to make headway, whereupon a trainman walked in front of the train and sprinkled sand on the rails. It was theriet oil making an inconspicuous entrance into the Abyssinian market.

The Cult Of Bigness

Every time the census of population of the country is taken a number of controversies arise because some towns and cities feel they are actually "bigger" than the work of the census enumerators allows them to be. The citizens of these places feel themselves aggrieved, their newspapers protest and their boards of trade propose the taking of another and independent census to establish the truth or falsity of the official figures. All because the town or city wants to be "big," bigger than some other town or city it regards as a rival

Yet bigness in population is not, in itself, necessarily a good thing. It is not a mark of excellence. Bigness is not greatness, although it is too frequently confused as such. Bigness may, indeed, be a weakness rather than a source of strength. The big city is not a friendly city; it is a cheap place in which to live, but an expensive one in which to get the soul-satisfying kind, but rather tend to the superficial and hectic. It has certain advantages. It is true, but they are, as a rule, out-weighed by many more and greater disadvantages. Nevertheless, every town and city is disappointed if each succeeding census does not reveal to itself and the world that it is "bigger."

This desire for bigness seems to be ingrained in our human make-up. We want a bigger house, although the smaller one in which we live is cosy and comfortable and fully adequate to our needs, and can be maintained at much less cost. We want a bigger car, although we really do not require it and cannot well afford the extra cost to purchase and meet the heavier bills for its operation and upkeep. Instead of being content with that which actually satisfies our needs, we envy another solely because what he has is "bigger" than what we have.

This far from sensible worship of bigness has led many astray and who find themselves in acute difficulty today because what they have is bigger than they need and therefore ought to have. The farmer with a quarter or half section yearns for a bigger farm and so he bought more land until he had a section or two sections. Today, as he sees many of his neighbors with the smaller holdings getting along while he is in trouble, he is less sure about the value of bigness. Today the city man and the city house and a large car is inclined to wish both were of smaller dimensions. The owner of these big things is coming to realize that they also mean something else on a big scale, that is, big expense, big liabilities, big debts.

A big man physically is not necessarily a strong man nor a healthy one. It is not the biggest flowers that are the most beautiful and the most fragrant, not the biggest apple or peach that is the juiciest or more luscious to the taste. It is not the biggest painting that is the most expressive and wonderful, nor the biggest book that contains the finest poetry or most entertaining story. Bigness in itself, is a delusion and a shame.

And after all, what does more bigness bring in its train? The bigger a city, the bigger its problems and the bigger its costs of administration. The bigger a man's fortune the bigger the load of responsibility he has to carry, but not bigger the happiness he enjoys. The German Kaiser wanted a big army and a big navy, and they cost him his throne. It is the bigger ships, the bigger hotels, the bigger office buildings, the bigger businesses that are having the hardest struggle today because they caused out their overhead expenses sufficiently to meet present conditions, while those of the smaller class are riding through the storm of this depression.

Why do we all clamour for bigness? The vast majority of us must always fill only a very small place in the world. But is it not infinitely better to fill that place well, to be held in esteem and loved a full in our small home and home town than to be a cipher in a big city? Is it not in the so-called small things of life, in the home and among our home folks circle, that we find the real joys and the great satisfactions of life, rather than in those fields which so frequently but incorrectly are termed big?

Think it out for yourself (as read these pars are inclined to feel the contented and envious of the other fellow who has something that, on the face of it, appears bigger than what you have. Perhaps, if you only knew the whole story, he would gladly exchange places with you.

Receives Little Help

Bank Of Canada Reports Payments Issued By Taxation

In a recent issue the Saturday Evening Post made the assertion that the —"So far Great Britain's payments to America have been met by collections from other nations. They have not come out of taxation levied at home."

That statement is at variance with the facts. Only a few days ago Premier Ramsay MacDonald stated that Great Britain's total payments to the United States have amounted to £192,500,000, and that Britain's total receipts from debts and reparations have come to £192,500,000. There is then a gap of some £14,000,000 which has had to be filled from the pockets of the British taxpayers.—Halifax Herald.

Explore Air Routes

Russian Polar Expedition Seeking New Route To North America

A Russian Polar Expedition, seeking a new air route from Russia to North America, will be sent out on the famed ice-breaker Cheliuskin, the most modern, it was announced at Leningrad.

The icebreaker, which participated in the dirigible "Italia" rescue, will carry two airplanes when it starts northward in June to explore over the Arctic ice fields beyond the 80th parallel.

From the point which the icebreaker is able to reach, the airplanes will be sent out to explore them a gap of some (134,000,000 which possible air routes across the Polar has had to be filled from the pockets seas to North America. The expedition of the British taxpayers.—Halifax is scheduled to remain in Herald. the Polar ice all next winter.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Perry, R.R. 2, Foxboro, Ont., writes:—"I was troubled with palpitation of the heart, dizzy spells, pain at the back of my head, and was so weak I could hardly get around.

After taking Milburn's Heart and Nerve Pills for a few days I felt much better.

My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful medicine."

Finishes Engineer Constructs Queer Boat

Craft Equipped With Powerful Motor and Resembles Whale

Nicholas Sellin 28-year-old engineer of Potsdam, Germany, has built a boat, resembling a whale with an aeroplane motor atop of the hull, which he says he believes can span the ocean between Liverpool and New York in less than three days.

The craft is equipped with a 270-horse-power motor, which Sellin said would give it a speed of 62 miles an hour After testing the boat this spring, he said, he would attempt a trip around the world, travelling east. He estimated it would take him 15 days.

New Fashioned Method

Provincial Meetings For Cattle More Like a Vaudeo

There's only one nice thing about cattle Nowadays we don't torture them with long old fashioned speeches specifically but fast-talks, inhibitions under a cloth and buried under a ton of bad chatter

We simply racine to bed, pursue frivolous magazines, doze when we feel like it, and have our meals brought to us in invalid luxury

In short, two cricks a year has come to mean two extra vacations a year. It's an ill wind, etc

Most people, however, fancy other

ACID STOMACH IS DANGEROUS

Sufferers From Indigestion CUT THIS OUT

"Stomach Trouble" [illegible] indigestion, sourness, gas, [illegible] food burning, etc., are usually caused by acid in the stomach and not by any organic disorder. Just as soda is the antidote for acid burns, so is Magnesia the antidote for acid stomach. Ordinary [illegible] Magnesia is useless. Your druggist has a scientific preparation of pure Magnesia called Bisurated Magnesia, and not only will it relieve your stomach in two minutes, but if you keep it up for a few days it will correct your condition entirely. Magnesia is prescribed by more physicians than any other antacid. Ask for Bisurated Magnesia in powder or tablet form and be sure it is not at all expensive.

Sole Hours For Motorists

The hour of the week during which you can drive your automobile with the least chance of having a fatal accident is between one and four a.m., and the time of greatest risk is on Sunday afternoon, between two and seven, according to statistical study by an insurance company.

Relief Is Promised

Within an hour of a preparation at hand no Mother's Worm Powders the child will have a lower her children to be suffer from the ravages of worms is unwise and culpably careless. A child subjected to worm attack is never well, is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without discomfort.

Tests Parachute

It took 17 men and a steam crane to put one article of baggage on an interstate steamer at Freemantle. It was a trunk.

There was an elephant attached to it.

The Terror Of Asthma comes like a thief in the night with its dreadful wheezing, robbing its victim of breath. It seems beyond the power of human aid to relieve until one tries it in such a case. Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. 140 years of world wide fame, and if the remedy be used persistently, the disease is put permanently to flight. Take no substitutes.

In New York, beauticians charge from $1,000 to $1,500 for face-lifting —and report no depression in their trade.

For stomach troubles [illegible] Nature's Remedy (NR Tablets) relieve in hours, not days. Relieves constipation, biliousness, sour stomach, gas, colds, headaches, nervousness, dizziness. Also relieves indigestion, burns

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say—Constipation. To get rid quickly of the accumulated wastes which cause pestiferous and discomfort, give a correcting dose of Castoria. Castoria goes inward to relieve especially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is mild and gentle yet you can give it to a young infant to relieve colic. Yet it is as effective for older children. Cleanse's regulative baby will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand because Castoria always has the same

Mother's CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

It was reported Pope Pius probably would inaugurate the Eucharistic Congress at Dublin next June with a broadcast message.

The world's crop of winter wheat is only 5 per cent smaller than last year judging by reports from 13 countries

Dr. O. T. Avery, New York, who discovered a means of killing the pneumonia germ by dissolving its protective covering has been awarded $1,500 by the American College of Physicians.

The motion of H. C. Nixon, Progressive leader, asking the Federal Government not to appoint a lieutenant-governor for Ontario for one year was voted down by the provincial legislature.

Russia is ranked by the Economic Review of the Soviet Union, published by the Amtorg Trading Corporation, as second only to the United States in volume of industrial output and national income.

Great Britain intends to proceed without deviation with its program for India, Sir Samuel Hoare told the House of Commons, and will not be deflected from it "by threats of force or sudden alarms."

The Family Physician. The good doctor is always worth his fee. But it is always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Eclectric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The prominence of this remedy in the family medicine chest saves many a fee.

A Difficult Test

Candidates for the post of announcer in one American broadcasting company had to pass a test, one person of sensor is "The seething sea sounds, and thus the seething sea sounds so." Only ten of the 2,500 applicants in the last two years received appointments.

Feverish?

"My baby's cheeks and hands were so hot," writes Mrs. Bernard Brest, Kingsville, Ont., "I was frightened. I gave him a Baby's Own Tablet at once and by after supper he was all better." Effective for colds, colic, teething. Absolutely safe. See certificate in each 25c package. 25

Dr. Williams' BABY'S OWN TABLETS

Not From Brazil

Apparently Nuts Imported By Canada Come Principally From France, Spain and China

Nuts of all kinds imported into Canada in the fiscal year ended March 31, 1935, were valued at $3,986,164. Shelled walnuts comprised the principal item, totalling 2,806,667 pounds valued at $1,868,151. Of this total two and a half million pounds were brought in from China and nearly two million pounds from France. The next most valuable import was of green peanuts, shelled and unshelled, amounting to 10,538,421 pounds valued at $971,216. These came chiefly from China, imports in the last fiscal year totalling 21,691,720 pounds valued at $739,168. Spain furnishes most of the almond nuts imported. Out of a total of 2,000,000 pounds,

Gold Export Ban

Why Order-In-Council Was Passed Is Explained By Premier Bennett

Why the government passed the order-in-council prohibiting the export of gold was told in part by way of an interjection in the House of Commons by Premier R. B. Bennett.

"I'm not going to go over the whole ground again," Mr. Bennett said during his remarks. "Had have the members of the House realized that unless by adequate and appropriate legislation we could deal with this situation, the gold reserves of this country would have fallen to $10,000,000 and then probably to nothing.

"Let me give you an illustration. A young partnage I should hardly say a grown; I will say man - in Sandy Hook, New York. I will take only those two points - remember the happy time of gathering up large quantities of Canadian bills at a discount. They came in here with American funds and buy our Canadian bills at a discount, so far as they are concerned, and all odds shoots slipped off. In between where the transfers are going to be started and are going to be made, using an early and late type, and also the Cox variety which will supply us during the late summer and early fall. One or two rows of beans are advisable as these yield very heavily for the amount of space taken up. Make two plantings about two or three weeks apart. Fifteen inches is considered space between rows. Spinach and beets will give very good returns and should have from twelve to fifteen inches between rows. Spinach is a hardy vegetable and will stand as early in out of the way before the later vegetables require full room. On the ground it will be better fertilized and rolled, can be planted in between the rows of carrots, beets or beans. Lettuce, Swiss chard and beets are huge quantity of greens from ten or fifteen feet of row. The lower class leaves like spinach. Onions could be planted in the small garden and only require a few feet of row. Carrots and Chow takes up quite a lot of room, but as it is never quite so good as that taken fresh from the garden it is well to include it. It pays an over-supply of three cobs to every two stalks and it may be planted in hills about a foot apart each way, eight to ten seeds to the hill. Parsnips, rutabagas, cucumbers, pole beans, squash and shorter trailing varieties of Pumpkin - rather less room than for the very small garden as at least fifty feet of row will be required to give results for a small family.

The complaints is to sow all flower seeds outside of an open row. Do not sow them too deep. Cover lightly at first but as the seedlings grow through in the spring, not thinking of the cold, frosty weather still to follow, written W. T. Macoun, Dominion horticulturist. The reason is that many seeds rot in the ground without germinating, and others germinate very slowly. The plants appear above the ground they are killed with frost. Among the hardiest annuals are those which may be sown as soon as the soil is dry enough so the leaves Pea, Virginian Stock, Poppy, Bush Sweet Alyssum, Candytuft, Alyssum, Cornflower, Pot Marigold, Larkspur, Calendula and Linaria. Included in the same hardier class, which should not be sown until there is little danger of frost after the season is well advanced, are Morning-glories, Stock, Marigold, Aster and the annual Gerbia. There is also the question to be considered whether the best other similar bedding plants outside too early, especially potted plants which have been started indoors. Many of these are checked or killed by the transfer to the soil, the more likely they are to grow.

Saskatchewan Coal

In 1931 the production of the coal mines of the Province of Saskatchewan amounted to 1,000,000 tons, as against 977,000 tons for the calendar period during the previous year, an increase of 97,000 tons. This is the largest production recorded in the history of coal mining in the province. Of this production the Souris Valley area accounted for 634,709 tons. Nine other districts which are just coming into development in the more northerly parts of the province accounted for 35,033 tons.

In a Devonshire village there is a church which was begun three hundred years ago and has never been completed. Nobody will have to organize another house, that's all.

MOTH OF CARDBOARD

MAKING THE MOST OF A TWELVE-MILE CABBAGE PLANTED ON A SMALL ISLAND

It is really remarkable the amount of vegetables that can be produced in a small space. Many people do not realize that a small family can be provided on six or eight plants. These, of course, should be staked and may be set in sequence, before Christmas. The cabbage on six feet long and are driven in close to the plant when the letter is set out. Fresh oil all the shoots to the ground and then with them along the pole and tying it about every foot. Every week during the growing season the plants should be hoisted and all side shoots nipped off. In harvest where the tomatoes are going to be planted are not going to be many on early and late type, and also the Cox variety which will supply us during the late summer and early fall. One or two rows of beans are advisable as these yield very heavily for the amount of space taken up. Make two plantings about two or three weeks apart. Fifteen inches is considered space between rows. Spinach and beets will give very good returns and should have from twelve to fifteen inches between rows. Spinach is a hardy vegetable and will stand as early in out of the way before the later vegetables require full room. On the ground it will be better fertilized and rolled, can be planted in between the rows of carrots, beets or beans. Lettuce, Swiss chard and beets are huge quantity of greens from ten or fifteen feet of row. The lower class leaves like spinach. Onions could be planted in the small garden and only require a few feet of row. Carrots and Chow takes up quite a lot of room, but as it is never quite so good as that taken fresh from the garden it is well to include it. Mis Interesting History

Hot Cross Bun Dates Back Thousands Of Years

Been enjoyed for the whole of the history of the hot cross bun? Nearly every christened as to their origin is slightly different from the others. One legend has it that it was made by Queen Elizabeth and her Maids, one, and whether we owe them to the Greeks, the Romans, the Egyptians or the Egyptians (Or perhaps to the Christians—the thirteen days of the buns always seemed to take part on Good Friday), again, just Good Friday).

At any rate, hot cross buns were regarded as odd hangover of Christianity on everyday foods.

The history of hot cross buns has always connected with religious customs. Centuries before the Christian era the Egyptians offered "buns" sweets resembling in a light appearing on a special chart made of glass and coated in the stadia. Simultaneously the whole exterior of the castle is lit to make it a possible burglar all too visible. The prince has also installed a powerful radio-equipment with a loud-speaking arrangement enabling him to relay programmes to his tenants. Being extremely fond of plays and theatricals the prince has constructed a highly mechanical stage fitted with conveniences for every kind of film projection. A 18-hole golf course and a tennis court complete the delightfully modern equipment of the ancient castle of Mormeuil.

Railroad Head Freezes

Two young physicians, one of them blind, played so brilliantly in the quiet Imperial Chopin musical competition at Warsaw, Poland, that the judges were unable to choose between them and the winner was decided by lot. Alexander Uninski, 23, a native of Lemberg living in Paris, got the decision from Imre Ungar, 22, a blind Hungarian. Eighteen countries were represented.

Women in Burma have equal rights with men where property is concerned; husband and wife each can find a greater equality than in any other country of the world.

Automats have invaded Brazil.

"Father: "Drunk again? You will have a dog's end!"
Son: "Don't talk nonsense, Daddy. I'll wish I shall not grow a tail."—Sam Hamoni, Madrid.

Credit Goes To China

Civilization Owes Much To Inventions Of Chinese People

Picturing the basic factors in what is known as civilization for which credit was due entirely to the Chinese, Prof Carrelly spoke at the English Speaking Union in Toronto on "What China Has Done For Our Country."

Among other things, said the speaker, porcelain came from China and after porcelain had come into use in England, supplanting the germ carrier, the wooden plate, the death rate was markedly reduced and the population increased rapidly. Porcelain following on glazed pottery, had come from China, where, even by the 7th century pottery fabrication was a great art.

The bringing of silk from China not only contributed benefits and comfort on a neat and fly infested southern Europe, but produced a lucrative business, one of whose benefactors was Marco Polo. Then about the time of Prof Carrelly. The trade of [illegible] was the beheading of John the Baptist was connected with the rise to power of Herod as a result of which Palestine came with the wealthy of the silk trade.

Bamboo furniture, the finest and Chinese it, as well as bedding and rattan, can be planted in between the rows of carrots, beets or beans. Lettuce, Swiss chard and beets are huge quantity of greens from ten or fifteen feet of row. The lower class leaves like spinach. Onions could be planted in the small garden and only require a few feet of row. Carrots and Chow takes up quite a lot of room, but as it is never quite so good as that taken fresh from the garden it is well to include it. It pays an over-supply of three cobs to every two stalks and it may be planted in hills about a foot apart each way, eight to ten seeds to the hill. Parsnips, rutabagas, cucumbers, pole beans, squash and shorter trailing varieties of Pumpkin - rather less room than for the very small garden as at least fifty feet of row will be required to give results for a small family.

THE TWO FISHERMEN AND THE GOLDEN BOWL

Bad Attacks of Flu

E.M. Hind Finds Wonderful Pink Pills Up to Dr. Williams' Pink Pills.

"I have had attacks of the "flu" frequently since 1918, and sometimes very bad attacks, but always when on the road to recovery I take Dr Williams' Pink Pills and I find them a wonderful pick me-up."

So writes E. M. Ward, Saskatoon, Sask., who further states: "I would recommend Dr Williams' Pink Pills to all sufferers from that rundown, tonic-feeling. I have taken the Pills on many occasions, and they seem to tone up my blood wonderfully. I have been anaemic for years and find that, when I get run-down, after taking several boxes of Dr Williams' Pink Pills the color comes back to my cheeks and I have wonderful vitality."

Dr Williams' Pink Pills actually build up the existing new blood and increase the red blood cells which restore the wasted tissues and revitalize the exhausted system. They remove the cause of disordered nervous conditions. Try them. At your druggist's. 50c a package.

THE HOUSE OF DREAMS-COME-TRUE
— BY —
HARRIET BEECHER
The Splendid Novel of [illegible] "The Hermit Of Far End." [illegible] & Stoughton, Ltd London.

CHAPTER XVII Continued

Her voice wavered uncertainly. The restraint of his intent had come upon her so unexpectedly, rousing her from her play of pure pleasure. That she felt stunned nervously unready to deal with the situation. She struggled a little, instinctively, but he only laughed down at her, a ring of masterful triumph in his voice, holding her effortlessly, with all the ease of his immense strength.

It's no good, Jean. You've got to hear me out. I've waited long enough." He paused, then drew a deep breath. "I love you!" he said slowly. "My God, how I love you!"

There was an element of wonder in his tones, and also felt the strong hands gripping here trouble a little. Then their clasp tightened and he drew her towards him.

"Say you love me," he demanded. "Say it!"

It was then Jean found her voice. The imperious demand, infringing on that secret, inner claim of which she alone knew, stung her into quick denial.

"But I don't! I don't love you!" Then, as she saw the blank look in his eyes, she went on hastily: "Oh, Geoffrey, I am so sorry. I never guessed. I never thought of your caring."

"You never guessed! Good God!"—with a harsh laugh "I should have thought I'd made it plain enough. Why, even that first day, on the river I wanted you then. What do you suppose has brought me to Maple every day? Affection for Blaine Townmarin'" cynically.

"I though I thought" "She cast about in her mind for an answer. Once presented him with the simple truth. "I'm afraid I never thought about it at all. I just took your coming over for granted. I have seen Judith and Dorothy and neighbors, so it seemed quite natural for you to be here often—just as Chiley Latimer is."

Burke searched her face for a moment. He was thinking of the other women he had known—women who would never have remained blind to his meaning, who had, indeed, shown their willingness to come halfway—more than half-way—to meet him.

"I really believe that's true," he said at last, grimly. "But if it is, you're the most unselfconscious woman I've ever come across."

"Of course it's true," she replied simply. "I'm—I'm so sorry, Geoffrey. I like you far too much to have wished to hurt you."

"I don't want liking. I want your love. And I mean to have it. You may not have understood before, Jean, but you do now."

She drew herself away from him a little.

"That doesn't make any difference, Geoffrey. I have no love to give you," she said quietly.

He stood his hand.

"I don't take no," he said doggedly. "You're the woman I want. And I mean to have you. . . . . Isn't you understand? It's no use fighting against me. You may say no, now; you may say no fifty times. But one day you'll say yes."

Jean's slight frame tautened.

"You are mistaken," she said, in a chill, clear voice calculated to set immeasurable space between them. "I'm not a cave woman to be forced into marriage. Oh!"—the [illegible] note of this imperious kind of wooing striking her suddenly "don't be so absurd Geoffrey! You can't seize me by the hair and carry me off to your own particular hole in the rocks, you know." She began to laugh a little. "Let's just go on being good friends and forget that this has ever happened."

His face had [illegible] to mask the notice of the little friendly gesture There was a red gleam in his eyes, a smouldering glow that reeded her's. [illegible]

You speak as if it were something that was over and done with," he said. His tone was calm. "But it isn't. It never shall be I love you and what you, and I shall go on loving you, saying you as long as I live. Jean sweetest" his voice suddenly softened incredibly "I'll try to be patient. But when a man loves as I do, he doesn't stop to choose his words." He stepped closer to her. "Call You little, little thing! Why, I could pick you up and carry you off to my cave with two fingers. Jean, when will you marry me?"

His big frame towered beside her. He paid no more attention to her disgleam of him than if she had not been there, quite unconscious of no odd feeling of impotence.

"You don't seem to have understood me," she said firmly, forcing herself to speak composedly. "If I loved you, you'd have no need to 'carry me off' to your cave. I'd come gladly. But I don't love you, Geoffrey. And I shall never marry a man I don't love."

"You'll marry me," he returned stubbornly. "Do you think I'm going to give you up so easily? If you do, you're mistaken. I love you, and I'll make you to love me—when you're my wife."

The two pairs of eyes met, a challenging defiance flashing between them. Jean shrugged her shoulders.

"I think you must be mad," she contemptuously, and turned to leave him.

In the same instant his hands gripped her shoulders and he swung her round facing him again.

"Mad!" he exclaimed hoarsely. "Yes, I am mad—mad for you. You little cold thing! Do you know what love to man's love?"

She felt his arms close round her in a vice of steel, lifting her off the floor, so that she hung helpless in his embrace. For a moment his eyes burned down into hers—the hot flame of desire that blazed in them seeming almost to scorch her—the next, he had bidden his face against the warm white curve of her throat, where a little affrighted pulse throbbed tempestuously. Then, as though the touch of her inspired the last flash of self-control, his mouth sought hers, and he was kissing her savagely, crushing her soft, writhing lips by his mouth his own. Her slender body swayed helpless as a reed in his strong grip, while the tide of his passion, like some fierce, untamed [illegible] swept over her resistlessly.

When at last he released her, she stood back from him, rocking a little instinctively he stretched out his hand to steady her.

"Don't . . . . touch me!" she panted.

The words came driven between clenched teeth, shockingly. Her face was white—white and her eyes blazed at him out of its pallor. She felt as if her heart were bursting in her throat, stifling her, and for a little space sheer physical stress held her silent. But she fought it back, mastering it. Then, against her will, she began to speak.

"How dare you!" There was bitter anger in her cold tones. "How dare you touch me—like that!"

She was silent. Her anger was waning, giving place to a certain distressful comprehension of the mighty force which had suddenly broken bondage in the man beside her. Dimly, from her own knowledge of the yearning head of the loved one's nearness, she envisaged what these last weeks must have meant to a man of Burke's temperament. Was it any wonder, when suddenly made to realize that the woman he loved not only did not love him in return, but had fallen even to sense his love for her, that his stormy spirit had rebelled—flung off its shackles? An element of self-reproach fastened her thoughts. In a measure the fault had been hers, her self-absorption was to blame.

Famous Vegetable Pills Make Short Work of Indigestion
"After the first dose I was made a new woman," said Mrs. Lucy Ann Hall, of Miss M. "I was troubled with Indigestion and Biliousness for years, but since they are PURELY VEGETABLE, a good, safe medicine, I have used Dodd's Liver Pills on various occasions, and always with satisfactory results. Mrs. Hall, of Dodd's Liver Pills are [illegible] Dodd's Medicine Co. Ltd."

Little Helps For This Week

"In not this the carpenter, the son of Mary?"—Mark vi. 3.

A lesson. Lord, these eighteen years to me:
Not elsewhere I could so devoutly
That humble tasks are best, however I yearn
For higher spheres where I may work more free.
Blest were those patient, toiling years to Thee,
Their secret kept within Thy loneliness of heart.
While Thou wast trained by daily skill of art
To build new worlds for human destiny
Thy future was the Now. Twas from its height
Thine eye read meanings in the passing day;
If Judith dear shadows on Thy way,
What sun was that so darkened in its light?
O Nazarene, out of these toils there came
That which we prize most dear,—a Brother's Name!
—A. A. Lipscomb.

Christ did not want higher consecration than the Father gave Him. The grand maxim of His ministry was that the humblest spheres give the greatest weight and dignity to principles. He was the good carpenter,—saving the world. Rightly viewed, there are no small occasions in this world, so in our haste we too often think. Great principles, principles sacred even to God, are at stake in every moment of life. God prescribes our duty; and it were wrong not to believe that if we undertake God's real work, He will furnish us to it, and give us pleasure in it.—Horace Bushnell.

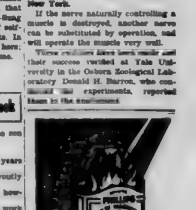
Control Of Nerves

Living Nerves Can Be Switched Like Telegraph Nerves

Zoological proof that living nerves can be switched like telegraph wires was presented to the American Association of Anatomists meeting in New York.

If the nerve naturally controlling a muscle is destroyed, another nerve can be substituted by operation, and will operate the muscle very well.

Nerves [illegible] have been made and their success verified at Yale University in the Osborn Zoological Laboratory. Donald H. Barron, who conducted the experiments, reported them to the [illegible]



ABOUT two hours after eating many people suffer from sour stomache. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a teaspoonful in water. It is pleasant, efficient and harmless. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for correcting excess acids. Buy a bottle—any drug store.

The ideal deodorizer for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth paste that safeguards against acid-mouth. (Made in Canada.)

Gopher Poison

Don't let Gophers over-run your grain fields this year. Our specially prepared Gopher poison will rid your fields of this mighty troublesome pest at very little expense.

A $1.00 package is sufficient to treat a quarter section. Use it early in the spring and save yourself a lot of trouble later.

Smith's Drug Store

"The Proof of the Pudding—

LIFE insurance benefits.... can be Proved while you are still ALIVE!

LIVING policyholders of the Sun Life were paid in benefits during 1931 $40,000,000—THREE TIMES as much as beneficiaries of deceased policyholders.

This was due, partly, to the fact that modern Sun Life representatives, when selling insurance, counsel their policyholders how to secure a definite advantage—the maximum benefit to THEMSELVES, and the greatest protection to their DEPENDANTS.

The insured no longer have to "die to win."

The widest insurance eligibility permits their policies and allows nothing to impair them. The Sun Life enjoys a remarkable record for the promptness of its business, especially the result of personal advice and expert service to its policyholders, by its representatives.

Sun Life representatives sold $900,000,000 new policies' insurance last year, making the Company's total business in force over Three Billions—an impressive collection of public confidence.

Today, prudent men are not only taking an MORE life insurance, they are doing so after consultation with competent representatives of such a company as the Sun Life.

Consult a Sun Life representative or write the clerkish coupon to the head or local office of the company.

LOCAL NEWS

The Government road grader passed through town on its first trip of the season Monday.

There are some soft wet spots on the highway between the Fort and Edmonton in which the grader will not be able to touch, but where the road has partly dried it will help to smooth out the deep ruts.

The Purdy Band Shows of Camrose, Alberta will show the all talking musical comedy, entitled "Good News" a Metro-Goldwyn-Mayer Production.

The cast includes such notables as Bessie Love, Cliff Edwards, Gus and Mary Lowden.

The music throughout is very catchy and was written by Dailyin-Brown and Henderson, the writers of so many recent song hits.

The Story of Good News is absorbingly interesting and in it is interwoven some beautiful song numbers which will appeal to everyone and send you away humming.

Don't miss "Good News" for one night only and an all talking comedy on Thursday (to-night) April 7th.

Okanagan fruit growers urge a national campaign to make the public more "fruit conscious". No expensive ballyhoo is needed, however, to get grapefruit in the public eye.

COMING EVENTS

On April 13th, a Card Party will be held under the auspices of the Princess Rebekah Lodge.

Lunch served. Admission 35c. Everybody welcome.

Municipal Council Sets Mill Rate on Seven Districts

The regular monthly meeting of the Council of the Municipal District of Clover Bar, No. 347 was held in the Municipal office, on Saturday, 9th April, with all members in attendance.

The Reeve was delegated to obtain quotations on culvert lumber in numbers for the next meeting.

Mr. Sullivan, representing the Red Hot Coal Company, was in attendance to request the grading of a culvert and lane through Capilano sub-division to the City limits. He also wished to hire the grading outfit for several days if the Council decided to grade the street and lane as requested.

Mr. Keith reported as to what arrangements he had made with references to the draining of the water from the Morrow Mine to the river.

The striking of mill rates for school taxation in eight school districts was dealt with. The following rates were adopted. Agricola, 7 mills. Good Hope, 7½ mills; Pleasant View 8¼ mills; Bolton 23 mills; Brookville 20 mills; Silver Lake 20 mills; Parkside, 11 mills; North Clover Bar 7½ mills. The setting of the mill rates in the remaining districts was left in abeyance until the next meeting.

After the adoption of estimates for municipal expenditure a mill rate of 5 mills was struck for municipal purposes.

The following rates of labor for working on the road were adopted. Man and four horses, 60 cents per hour, man and team 40 cents per hour, man, 25 cents per hour and foreman thirty cents per hour.

On account of the demand made for gopher poison an order for 600 bottles was placed with Mr. F. W. Smith, Fort Sask. This poison is now available for distribution and may be obtained at Smith's Drug Store or the Municipal Office.

With the reading of correspondence and the passing of accounts the meeting adjourned at 6:30 to meet again on the 14th of May.

CHINAMAN TAKES LYE

On the evening of last Thursday April 7th, a stranger, Chinese drifted into town and called on the Chinese restaurant keen and wanted to get some lye. At the Royal Cafe, Jack Kee thought the man acted queerly and refused him the lye and gave him supper. He then went to the Chop Cafe and stated he was going to use it washing for a women in a boarding house and tendered $ cash for it. Somewhat pf hy. Mah Hing gave him the lye and he left.

Roy Stookey was waiting in the car outside the theatre and noticed the Chinaman go to the side of the theatre and come back coughing and choking. He had apparently tried to swallow the lye in an attempt to commit suicide.

In the meantime the Royal Cafe had notified Constable Dennis to keep an eye on this man who they said was acting queerly. Dennis succeeded in locating the man and found him at the bank of the Royal Bank trying to put out the fire in his throat with snow. Dennis arrested him and confined him in the town cell and sent for Dr. Henry who after examination rushed him to the Royal Alex. Hospital.

The latest report is that the man is recovering and is being kept under observation for insanity. He came was found to be Mah Quong Yow and he was suffering badly from the results of having lye. It is understood that his father keeps a restaurant at Innisfree, Alberta, and that the lad was making either to or from Edmonton.

This is the second Chinaman to go insane in Fort Saskatchewan as about a year ago the laundryman barricaded himself in his rooms at the back of the City Cafe and apparently was intending to starve himself to death when taken out and removed to Penoka.

JOSEPHBURG JR. U.F.A. NEWS

On April 11th, the Junior U.F.A. of Josephburg held a meeting in the Josephburg Senior Room.

The Vice-President Norah Ashton occupied the chair.

The Secretary Ruth Griffin read the minutes of the last meeting, which were adopted as read by Esther Frey, seconded by Lloyd Willis. Correspondence from headquarters concerning the delegate was read and discussed. Mr. R. Hennig, suggested that we send a delegate and also get the Secretary to write for more information on how to raise money. Mr. Hennig also suggested that on the day of public speaking we should all go, and Rotten. This was approved.

Mr. Griffin suggested that we send two delegates, one boy and one girl. This was approved. The delegates nominated were Rudolph Rippel and Ruth Griffin.

A committee of five were nominated to arrange a social of some kind by which money could be raised to send the delegates. Committee:— Norah Ashton—Convener,

Fred Hennig, Esther Frey, Ernest A. Mohr, and Rudolph Rippel.

There was no definate date stated for the next meeting because of spring work.

Esther Frey moved that the meeting be adjourned. Carried.

The programme consisted of riddles by Esther Frey and a story by Mr. Griffin.

The meeting closed with God save the King.

What Happened At The Town Council Meeting

The regular meeting of the Town Council was held in the Council Chambers on Thursday the 7th Instant.

Present Mayor Montgomery, Councillor Simmons, Geaf, Lalonde, Smith, Lalonde and Fillmore.

The following accounts were passed for payment:— Alberta Gov't Telephone $9.00; Calgary Power Co., $125.00; J. Larose Coal $19.62; Jones, Graham and O'Brien for relief $13.60; Mrs. T. Reads for relief $114.00; Workmen's Compensation Board $2.70 St. Joseph's Hospital for J. Foster $15.25; W. Graham $8.20; Simmons Lumber Co. 59c; Work on streets for men and teams $6.05.

The first week in May to be set aside as clean up week was suggested as a motion passed by the Council.

The Council decided to allow suitable vacant lots for gardens free of charge this year. Applications for same to be made to the Town Secretary. Should there not be sufficient suitable lots to go around, ground on the flat to be ploughed, and laid out in garden lots.

The Secretary-Treasurer was instructed to make arrangements for the sale at an early date of lands under the Tax Recovery Act.

The home of Mrs. Brockenridge was totally destroyed by fire last Thursday afternoon.

We offer you the facilities of a modern printing plant equipped with the latest type faces and at a very reasonable price. The Record.

FORT SASKATCHEWAN PARTY GUESTS AT TIVOLI

A party of young people from Fort Saskatchewan motored to Edmonton Friday and gathered at the Tivoli in the evening for an enjoyable dinner and dance.

The party included: Miss Gladys Hodgins, Miss Ada Turby, Miss Margaret Kolterborn, Miss Eileen Truby, Miss Elizabeth Jones, Miss Olive Graves, Miss Pierpont Sessmus, Miss Jean Ramsay, Miss Gertrude Mann, Miss Mildred Brockenridge, Miss Muriel O'Brien.

Mr. Russell Carrol, Mr. Ralph Pocock, Mr. Arnold Mann, Mr. Stanley Hambly, Mr. Gordon Beaton, Mr. Arthur Simmons, Mr. Earl Lane, Mr. Lawrence Hodgins, Mr. Irvin Hutton, Mr. Orvell Kolterborn and Mr. Harry Wooston.

YPRES VALLEY

The Ladies Aid will meet at the home of Mrs. Bill Pearce on Wednesday afternoon, April 20th.

Bill Gunn has returned from the hospital.

Miss Clara Dietrich is under the doctors care in Edmonton. We hope she will have a speedy recovery.

Sub. Reed opened the swimming season on Sunday by taking a dive into the creek.

Joe Dittrich of Edmonton is spending a week with his brother Charles.

The boys held a very enthusiastic baseball meeting and are all ready to go after a few practices.

Around The Elevators

Spring is here, all the Elevator men are spring cleaning around the Elevators.

To settle any disputes regarding the visitor at the station two weeks ago, upon close scrutiny this turned out to be a gentleman ever.

Things we notice—Earl Graham changing tires in eleven and three-quarter inches of mud on the Fort trail. Tommy Todd, taking the best lanes to dodge tenants of the block. Fred Rowland telling the elevator men how to use grain doors.

Topics of the day—Turner Valley Gasoline, the power, the price and the smell, we understand the latter is free to all. The smell some say can be used to put in mud holes before driving through with the car. According to hearsay the fumbles for drivers who do not like this smell is in lots of onions.

Reducing Costs Of Government

The proposal for the amalgamation of the three prairie provinces of Canada into one large provincial unit recently advocated by Premier Bracken of Manitoba, and supported by Hon. Mr. Justice Turgeon of Saskatchewan, does not, it would appear, command very general or enthusiastic support on the part of the people in the area affected. It has only aroused a certain academic interest in much the same way as similar proposals in regard to three south eastern Maritime Provinces have been received at varying periods since Confederation.

This lack of interest in, and support for, the idea of one big province does not, however, presuppose a complete satisfaction on the part of the people with the present crushingly heavy costs of governmental administration in this country. That there is a keen and very much alive interest in this longer problem is made manifest in many ways.

There are, for example, the proposals before Legislatures in certain of the Provinces and Maritime Provinces for a drastic reduction in the membership of those bodies. In Saskatchewan, at the time of writing this article, a bill is under consideration reducing the number of members in the Legislature from 63 to 52. The effect of such reduction, if it is made effective, will be a saving of from $20,000 to $25,000 a year. Such a saving is, of course, worth while,—as all savings are whether large or small, but, unless accompanied with many other savings in legislative and administrative costs, will not go very far towards meeting the objection that we are over-governed in Canada. Much more than cutting the size of legislatures must be done.

The writer is convinced that it is not in the union of two or three provinces into one, nor in the mere reduction in numbers of the membership of legislatures, that substantial and therefore really worthwhile savings can be brought about. It is not a few thousands of dollars in the costs of government in Canada that should be saved, but countless millions that will save these millions to the taxpayers without impairing services to the people or efficiency in their administration? We believe they can.

But mere criticism of existing conditions, even when coupled with expressions of belief that they can be bettered, is not convincing unless accompanied by practical suggestions looking to reforms and a betterment of conditions. Anybody can criticize, destructive criticism is easy, but constructive suggestion and performance is an entirely different and a much more difficult matter, especially as all such action has to meet and overcome long-established and powerful existing conditions.

Not in revolution, therefore, but in evolution, and particularly at this time in co-operation of services, in co-operation between governments looking to an amalgamation of services rather than in an amalgamation of governments and provinces, is to be found a practical, ready-to-hand method of saving not thousands but hundreds of thousands of dollars.

To illustrate Canada, with a Federal and nine Provincial Governments has lost duplication or overlapping with agriculture; tax dealing with public health; tax dealing with company incorporation, company law, company inspection, company taxation, including banks, railways, loan, mortgage and insurance companies; tax having to do with administration of justice; tax levying, or having the power to levy, income taxes, etc., etc., etc., result is, of course, constant conflict of authority, duplication of services, much unnecessary expense, and interference with and the irritation of the people generally.

Everybody realizes the situation, but governments, like individuals, are loth to relinquish any powers or rights they possess, they are jealous of them though of small value in possessing every shade of authority. Within a government, it is difficult to re-organize departments to meet changing conditions because no department opposes the transfer of any branch of its work to another department, and the more highly organized and independent a Civil Service becomes, the more bureaucratic does it become.

To illustrate again: The enforcement of law and administration of justice within a Province is the duty of the Provincial authority. Hence it must have a police force. But the Federal authority is responsible for the enforcement of its own Customs, Excise, Immigration, Postal, and similar laws, and is responsible for the administration of Indian affairs. It, too, must have a police force. Then the cities and larger towns are responsible for the enforcement of their own by-laws. So they, too, have police forces.

Four or five years ago the Government of Saskatchewan entered into an arrangement with the Federal Government whereby they disbanded the Provincial Provincial Police, and the Royal Canadian Mounted Police, a Federal body, policed the Province in addition to discharging its own Federal duties. The Province pays the Dominion a handsome amount for this work, but it is saving some hundreds of thousands of dollars annually as compared with cost of maintaining a separate police force of its own. Recently Alberta and Manitoba made similar arrangements with the Federal Government. Thus without any union of governments or legislative bodies, without surrender of any Provincial right or authority, without any interference in service or any impairment in efficiency, millions of dollars will be to the Dominion.

The largest motor-coach station in the world is being built at Victoria, London, and will handle 100 vehicles an hour.

Buses will replace all street cars in Peterborough, England.

The most important rules to follow in removing stains are to treat the stain when fresh and to apply simple methods first.

Navy blue border bath for men are appearing in Paris.

Her Heart Was So Bad Couldn't Do Housework

Mrs. A. Bergeron, R.R. 2, Hilliard, Ont., writes: "I have troubled with heart trouble for many years.

My heart would feel as if it would burst, and I had headaches, and I had dizzy and faint spells.

I couldn't get my husband's meals I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and they relieved me of all my troubles. I can do my housework and I thank them for it."

Price 50c a box

Milburn's Heart and Nerve Pills are sold by all general stores, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

"Back-Fay" Experiments

Trade Bring Back, Or Pay Three Times Duty

Favorite among the projects of inventors of war devices is a "death-ray" that will kill enemies by a slim beam. The few who have claimed any progress toward such a ray have insisted it be secret by stopping enemy bullets meters or by setting off explosive charges at a safe distance. The latest of these is Karl Schlakjan, a chemist of Berlin. He succeeded recently in exploding a mine two hundred yards away.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when the proper gastric or digestive juices fail to flow. Then food lies undigested, unabsorbed by your system, simply poisons and intoxicates you, instead of nourishing beautiful solid muscle. What you need is a "booster" to help your own body—Nature's own natural aids.

You can find such aids in Kruschen Salts, and each one of them has an action of its own. Together, they form the best tonic way to the healthy functions from a number of different angles. And they all three unite in the process to free the liver of the saliva and bile that clog the system. The next action occurs in the stomach, where the digestive juices are stimulated to pour out and set upon the food. Again by the beneficial tiny action of the salts pressure a further flow of these vital juices which deal with every digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific lines. Start taking Kruschen. You'll like it for yourself.

New Pyramid Found

Built About 3500 B.C. Only the Base Remains

Egypt rocks with excitement over a fresh find. A pyramid, built about 3500 B.C., is discovered in the Gizeh tomb. It has been covered by sand and rubble and is built along with the big three. It may contain the sarcophagus of the builder. Only the base remains, the rest having been carried away—perhaps to be used in pyramids. Ancient builders were thrifty old. The Egyptians also struggled to build snow. Their unwitting contemporaries the Mayas of Yucatan, on another continent, quite squarely upon another.

Hindenburg Saved Self

Was Prevented Yet He Puts French After Every War

A field marshal's sword, studded in solid gold and with a gold dragon-shaped hilt, has been sold by the London Sullian Company for persons taking advantage of the present monetary situation to profit by gold values. It was presented to Hindenburg by the Kaiser after the battle of Tannenberg, and was the personal property of the late Kaiser's son, who had it specially made for the occasion. It is the first sword of this kind to be sold since the days of the war, who had a series of salvery charges to lift the steps of the city. The new owners said they would be interested in selling the sword, but probably would offer it to the citizens of Kimberley.

Douglas Egyptian Liniment, is recommended for sore throat, colds, tonsilitis, bronchitis and chronic hoarseness. Guaranteed good. Small bottle 25c. Large bottle 50c. Dispo throughout Saskatchewan.

Utilizing Cherry Stones

Charcoal Of Cherry Pits Was Discovered By Accident

After accidentally stepping on a cherry stone and observing the greasy spot left on the floor, an experimenter and seeker now uses the pits as well as the fruit. The oil in the kernels is pressed out and used in the making of perfumes and the charcoal from the shells is used for fertilizer, and the shells are utilized for fuel.

Canada's Economic Outlook Brighter

Improvements In Wheat, Cattle, Lumber and Related Exports

Bright prospects with the advent of Spring, in Canada's economic situation are noted in a statistical review issued recently by the Department of Trade and Commerce. The review covered statistical reports issued by the Dominion Bureau of Statistics and the "bright spots" include

A hopeful export outlook for Canadian wheat shown by world statistics.

Early Spring shipments of Canadian cattle to Great Britain have been well received.

Canadian cattle markets are showing increased strength.

Exports of Canadian lumber show a substantial seasonal increase.

Shipments of nickel, particularly to the United Kingdom, are on the increase.

Domestic production of gold, petroleum natural gas show a decided improvement.

Seems Hardly Cricket

United States Discourages Indians To Speak Against Great Britain

We note another native Indian has been telling the good folk of Pittsburgh plain what a wicked administration is given India by the British. He was doubtless with an Englishman who upheld the British rule. It seems to be one of the hobbies in the United States at the moment to flood the country with native Indians to speak against Great Britain. It may amuse the Americans, but it hardly seems to be circled for them to encourage that sort of thing.—Border Cities Star.

Your Home Medicine Chest

Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Eclectric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Eclectric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

First Lipton Ship Cleared

After 60 years of activity the first ship to be opened in Glasgow, Scotland, by Sir Thomas Lipton, has been cleared. The ship was started in operation with a slender capital on his 21st birthday after his visit to America. Lipton ran it personally, stepping under the counter at night. The business was transferred to other Lipton branches.

Deserts were objects of great interest to the ancient Romans, and artificial dwarfing was sometimes practised.

Proposed Water Reservoir

Suggested Plan To Conserve Moisture In Southern Saskatchewan

Formation of a large water reservoir at Buffalo Lake by the construction of a dam on the Qu'Appelle River, 20 miles from Moose Jaw, was advocated by T. C. Main, A.M.E.I.C., consulting engineer for the Saskatchewan provincial commission in an address given at Moose Jaw.

Mr. Main's proposal will be placed before the provincial government as a recommendation in his report. The reservoir would be about 26 miles in length and three-quarters of a mile wide. The reservoir would be an effective means of conserving water for southern Saskatchewan, Mr. Main said.

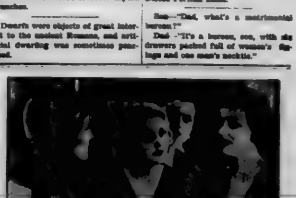
He also suggested, that despite present opposition, the Saskatchewan River water diversion scheme would go through within the next few years.

Mr. Main pointed out that the precipitation in northern Saskatchewan last year was not a great deal more than in the south and while the rainfall in the north had been conserved, it had drained off rapidly in the southern parts.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Banishes all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this peerless toilet requisite. Dainty, dependable beauty enhancement. Persian Balm achieves them in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Son—"Dad, what's a matrimonial heron?"

Dad—"It's a heron, son, with six drawers packed full of women's duds and one man's necktie."



"FATIGUE? I just postpone it!"

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three times and certain days, of course, were worse than others.

"Then I learned to rely on Aspirin."

The sure cure for any headache is rest. But sometimes we must postpone it. That's when Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And soon you are conscious of the pain seldom returns.

Keep Aspirin handy. Don't put it away, or put off using it. Fighting a headache is more the day may be saved, but it is also a little foolish. So is enduring a night's sleep because you've an annoying cold, or irritated throat, or grumbling tooth, neuralgia, sciatica. These tablets always relieve. They don't depress the heart, and may be taken freely. They do not upset digestion. It is a fact established by the testimony of years of medical practice.

The only caution to be observed is when you use narcotic habits. Don't take a remedies known to be safe and get the genuine. Aspirin is made in Canada.

Back To The Land Movement Is Now Well Under Way Throughout Most Of Dominion

Census figures show that rural dwellers represent just 46 per cent. of Canada's population, that 54 per cent. live in villages, towns and cities.

Census figures also show that Canada has 32,767 vacant or abandoned farms.

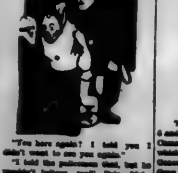
True, the census reveals that there are 732,184 occupied farms, representing a gain of 17,184, or a little more than two per cent. since 1921.

Nevertheless, and everything considered, the picture presented is not a satisfactory one, certainly gives no cause for complacency. Centers and publicists never tire of telling us that this is an agricultural country, that agriculture is our basic industry, that the strength of the nation must be in the soil. Yet what these things are true, or ought to be, we are in increasingly heavy proportion of our people drift to the cities. Forty years ago, in 1891, something like 82 per cent. of Canadians were in towns and cities, 65 per cent. on the land. With the turn of the century there began a trek to the cities, and notwithstanding the recognition of the early 1920's, just the opening leg of the West, the year 1911 saw the percentage at those on the land reduced to 54 per cent., while 1921 showed a proportionly even distribution as between urban and rural population. Now, ten years later, city dwellers are a majority in five provinces—Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island—have increased in population, growth in vacant or abandoned farms. This at a time when we have acute unemployment, when millions are being spent for relief, when our large cities are over-crowded.

In these circumstances there must be encouragement in the knowledge that, prompted by good leadership, a back-to-the-land movement is properly under way in many parts of the Dominion. Wesley Gordon, who has pioneered the movement so far as the Province of Saskatchewan is concerned, has achieved a striking success, and something of what he has done should use this province toilet requisite. Dainty, dependable beauty enhancement. Persian Balm achieves them in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Rae—"Dad, what's a matrimonial heron?"

Dad—"It's a heron, son, with six drawers packed full of women's duds and one man's necktie."



"You here again? I told you I didn't want to see you again."

"I told the policeman that, but he wouldn't believe me!"—Pele Mele Paris.

W. N. U. 1909

Beginning Of Architecture

Man Wanted To Protect Himself From Weather Big Factor

Historians of architecture tell us that man's first building efforts were for the purpose of protecting himself from the weather. He required shelter from the angry elements, and hence "the hedonessy of the cannons was the mother of architecture." In his efforts to make he took the nests of birds and the lairs of beasts as his model, and the earliest but was probably a mere scheme of twigs, afterwards covered with mud. Then huts were built of branches of trees and covered with turf. And there is every reason to suppose that the men who built shelters of this kind were agriculturists by occupation. In the hunter on the other hand preferred a cave-dwelling, which protected him better from the attacks of his fellows or wild animals, while the shepherd who led a nomadic or wandering life, as many of them do today in Central Asia, naturally devised tents.

Loanned Boring From Worms

Method Studied By Makers Of London's First Underground Railways

Ship worms, which cause much damage to piers and ship timbers, taught the makers of London's first underground railway how to bore and line their tunnels to resist water. The worm makes a boring about half an inch in diameter, lines it with a limelike substance to keep out the water in the damp wood in which it lives. When engineers made their first attempts at underground passages they had difficulty in keeping the water out of the tunnels they. By studying the ship worm they learned that they could keep the bore dry by lining it as they progressed. In boring its passage the worm eats away the wood which passes in small particles through its body.

Mrs. Miggs: "You, most of the servants are so independent and so important in they can be! How, I believe it's best to take a young country girl and train her in the way she should go and——"

Mrs. Wigg—"And then she goes!"

Wife (to husband driving his first car)—"Why doesn't he turn, George. Remember, the other people on the road are just as frightened of you as you are of them.

Census Figures For Farms

Slight Increase In Number Occupied In Prairie Provinces

That occupation of farm lands in Canada has increased in the Prairie Provinces during the 1921-31 decade sufficiently to show a net increase for the Dominion in spite of decreases for all eastern provinces, is one of the results emerging from a study of farm census figures as extracted from last year's census returns by federal statisticians.

The study, which has for subject shows that the number of occupied farms in Canada increased during the decade by 17,184 in number or 2.4 per cent. This rate of increase, however, was materially less than that shown in the preceding decade when the numerical increase of 80,191 farms gave a percentage increase of 4.3 per cent.

Each of the western provinces during the 1921-31 decade showed an increase while Ontario, Quebec, New Brunswick, Nova Scotia and Prince Edward Island showed decreases. The percentages of change for each province during the period were: Prince Edward Island, 4 per cent. lower; Nova Scotia, 16.6 per cent. lower; New Brunswick, 7.4 per cent. lower; Quebec was lower by only 1.1 per cent., 36 of its counties showing increases ranging as high as 32.5 per cent. Ontario was lower by 2.3 per cent. Of the western group Saskatchewan was up by 14.3 per cent.; Alberta gained 17.7 per cent. and British Columbia was up 10 per cent.

Detailed analysis of the Province of Ontario reveals that of its 38 counties, 14 show increases with a maximum increase of 23.8 per cent. in Cochrane County and a minimum of 3 per cent. in Perth County. The remaining 41 counties show decreases ranging from 35.3 per cent. in Temiskaming down to 3 per cent. in Peel, the net decrease for the province being 6,748 farms or 2.3 per cent.

It is interesting in examining the figures that a farm, for the census purposes, was every tract of land of three acres or more in 1931 and in 1921 had produced goods upwards of $30 in value or which was under crop or used for pasture in 1921. Vacant or abandoned farms were only those which had been cropped and later left unoccupied. The number of these in Ontario was discovered to be 4,574 and in total for the Dominion of 32,767 farms. Nova Scotia had 5,073, New Brunswick 2,741, Quebec 3,746, Manitoba, 6,444, Saskatchewan, 8,188, Alberta, 6,364 and British Columbia, 2,162.

"Do you believe kissing is unhealthy?"

Nell: "I've never——"

Bill: "Never been kissed?"

Nell: "No, never been sick."

British Scientists To Head Expedition To Northern Canada To Study Aurora Of Arctic

Has Its Bright Side

Economic Situation In Canada Is Not So Gloomy

It is very easy to look upon the gloomy side of the economic picture and overlook the brighter side. Fortunately we are prone to point out these things in connection our progress and the high rate of taxation. It is often some satisfaction upon occasion to take a peek at the other side of the picture and absorb comforting facts such as the following:

1. In 1931, Canada, in the matter of export trade, moved into first position among the nations of the world, and is conceded in the field of exports by only Great Britain, the United States, France and Germany.

2. Canadian gold production in 1931 was valued at $85,687,000, setting up a high record, and exceeding the 1930 production by a little over 27 per cent.

3. The Dominion Bureau of Statistics estimated that Canada's national wealth is now in the neighborhood of $30,000,000,000, with British and foreign investments in the country representing only slightly more than 30 per cent. of this amount.

Canada's Sugar Maples

Grow In Area From Manitoulin To Lake Of the Woods

According to the Forest Service, Department of the Interior, the sugar maple ranges of the Dominion in Canada extends from the Manitoulin Province to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 70 to 80 feet in height and 1 to 2 feet in diameter. It grows either in pure stands or is found associated with other hardwoods. It is very important of value, and the ability enables it to reproduce and survive in competition with other species.

Mount Revelstoke Park

On a boulder-strewn slope at the top of Mount Revelstoke in Mount Revelstoke National Park, British Columbia, is found the Ice Box, a cleft in the rock forty feet long, four feet wide, and about ten feet deep. Filled with snow and ice, it is naturally protected from the sun by its rocky walls and never melts its frigid contents. Painted signs direct tourists to this natural phenomenon.

Announcement is made that J. M. Stagg, noted meteorologist, will lead a British expedition of the coast to Fort Rae, N.W.T., Canada, to take part in researches connected with the International Polar years. The party is to be conducted by field parties of 12 men each under the auspices of the International Meteorological Committee.

Mr. Stagg's expedition will be one of two when Great Britain will contribute to the personnel of the circumpolar system, although Austria and Norway are also to be represented.

The British party will be located on the perimeter of the southern frequency of the Aurora Borealis (northern lights) which is the special study by means of synchronized observations, hoping to make more data which will be of value to radio transmission, etc.

The expedition at Fort Rae is expected to throw light on a theory that the Aurora is caused by rays from the sun stopped by the earth's magnetic "Van Leyer" belt, which radiate waves and which is thought to extend for the earth out a height of about 50 miles.

The party will set up two camps at a distance apart of about 300 miles and keep in touch with each other by telephone. From these two points it will take observations of the Aurora for a year. The expedition will carry 25 miles of telephone wire which will be stretched over the ground to a single strand, and with the current of the earth circuit through the water of the lake in order to avoid carrying an extra wire.

The expedition will also study air currents and the movement of the ozone layer at different altitudes. It will send up small balloons carrying instruments for recording altitude and temperature. A small wireless sets newly developed in Norway will also automatically signal a continuous record to stations on the ground below.

Problem Demand For Heavy Draft Horses

Farmers May Find Them Cheaper Than Tractor Or Combine

The present low price of oats and other feeds, in contrast with the higher cost of gas and oil, may find in tractor operation, combine, as the Dominion Seed Branch suggests, to indicate that the horse is gradually regaining favor as a means of farm power. He predicts that the best few years will see a revival in horse breeding and the use of heavy draft horses on the farms in Canada, both east and west. As he points out, under present conditions horses can be bred and reared cheaply and when they have reached working age, the charges for depreciation, fuel and repairs are surprisingly low, for the self-oiling engine has nothing whatever on the self-repairing heavy draft horses.

A Nashville paper defines a citizen thus: "A citizen is a man who demands better roads, bigger schools, a new postoffice and lower taxes." Canada is familiar with the type.

"But, my dear fellow, how much gained are you gaining by your car?"

"Why, I'm taking the girls home now!"

"Yes. I have heard that by walking, to steps to their own."—Boston Transcript.

CANADIAN MINING EXPERTS DISCUSS MINERAL POSITION OF BRITISH EMPIRE

The Canadian Institute of Mining and Metallurgy held its Thirty-third Annual Meeting at Montreal, April 5, 6 and 7, when the important questions of the Mineral Resources of the British Empire was discussed by Dr. Charles Camsell (lower right), Deputy Minister of Mines in Canada. In addition five Canadian delegates read papers which discussed the problems and possibilities of the Canadian Mining Industry. The Secretary (the Governor-General (centre), Patron of the Institute, was the Guest of Honor at the Banquet on April 7. Top left is Mr. F. W. Gray, right, to John A. Allen, Edmonton, Alberta, Professor of Geology at the University of Alberta, who read the first paper. Lower left is Hon. W. A. Gordon, Canadian Minister of Labour and Mines, who was the chairman of the Banquet.

CHILD need REGULATING?

CASTORIA WILL DO IT!

When your child needs regulating remember that the organs of babies and children are delicate. Little things must be gently urged never forced. That's why Castoria is used by so many doctors and mothers. It is so mildly made for children's allimportant routine as bowel, harmful drugs as narcotics. You can safely give it to young infants for colic pains. Yet it is an equally effective tonic for older children. The next time your child has a little cold or fever, or a digestive upset, give him the help of Castoria, the children's friend. Genuine Castoria always bears the name

Chas. H. Fletcher
CASTORIA

WORLD HAPPENINGS BRIEFLY TOLD

Commercial telephone service has been established between France and Buenos Aires.

The Prince of Wales attended a dinner given by the Pilgrim Society to Andrew W. Mellon, new United States ambassador to Great Britain.

Italy has placed a treaty with Russia which binds the Soviet to buy $43,000,000 of Italian products during the year.

A new "ringering" anesthetic which continues to kill pain after an operation, but has no habit-forming power was reported to the American Chemical Society.

The will of John Philip Sousa, famous bandmaster, was filed, leaving his entire estate to his wife and three children. The estate was valued in the will at "more than $30,000."

Mahatma Gandhi's adopted daughter, Shi Laxmi, 18, an "untouchable," was sentenced to two months imprisonment at hard labor for activities in the civil disobedience campaign.

Howard Nicholson, professional attached to the Grenitz Club of Vienna, became the open professional figure skating championship of Great Britain at Oxford.

Talking of a plebiscite on abolition of beer parlors will be recommended by the Alberta government next year, provincial general elections, premier Brownlee says.

Great Britain's unemployed on March 21 totaled 2,567,382, which is over 113,841 less than the month before and 12,796 less than at the same time last year. The improvement was noticeable in nearly all industries.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Herbert Bruce, Scottish hig, was a liquor.

Upset Stomach

"I used BABY'S OWN TABLETS for my children when they had vomiting spells, and found that they settled the stomach." Mrs. J. M. Cochrin, Boddy's Falls, Que. Valuable for teething troubles, colds, constipation, worms, colic. Sold by druggists everywhere, or mail price to take — and harmless. Sample mailed free if you write Dept. 20 Templeton's, Montreal. Manufacturing Company, Montreal.

Dr. Williams' BABY'S OWN TABLETS

LADIES WANTED TO DO LIGHT sewing at home. Good pay. Work (or sample) sent. Stamp for particulars. Universal Manufacturing Company, Montreal.

Preserve Virgin Timberland

Frank A. Sturgeon Acquires Large Forest for Lumbering Interest

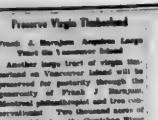
Another large tract of virgin timberland on Vancouver Island will be preserved for posterity through the generosity of Frank J. Sturgeon, Montreal philanthropist and tree conservationist.

Two thousand acres of timbered land on the Cowichan River has been acquired by Mr. Sturgeon from private owners. The property is a beautiful park area rapids with cleared areas, streams and lakes, with wild life in the woods and fish in the streams. The purchase makes Mr. Sturgeon the largest holder of big timber on that river.

Makes Canoe Safer

New Type Of Non-Capsizing and Unsinkable Craft Is Constructed

A new type of non-capsizing and unsinkable canoe weighing between 30 and 60 pounds and for which a patent has been secured has just been built by M Pepin, of Quebec city. He claims that every canoe is full and there is not the slightest danger of the craft sinking nor can it turn over. Even an outboard motor, Pepin says, the canoe will be capable of making 35 miles an hour.



PARIS IS RAVING HERE SAY ABOUT THE JACKET DESIGN THIS SEASON

Whether you want a sheer woolen dress or a crepe silk dress for spring wear here is a charming model.

It is included in a most approved and voguish way. And it's exceptionally slimming with its long lines. The jacket here offers such marvellous schemes for contrast.

Blouse that is so much, imagine the effectiveness of this model in a printed silk delicately patterned in yellow. For the upper portion, an allover lace is used.

Could anything be more charming and practical?

Style No. 534 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 18 requires 3¾ yards 39-inch with ¾ yard 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Turret Cigarette Hockey Contest Headquarters Staff Sorting the Millions of Entries Received

The scene illustrated above will give our readers a slight idea of the vast number of entries received in the Turret Cigarette $15,000.00 Cash Prize Hockey Contest. Well over three million entries were sent in bearing the post mark of March 15th or a few days later, and a crowd of ten leading sports all experts are busily engaged in the task of judging these millions of entries as to accuracy and correctness. The task is going forward as rapidly as possible according to the latest reports from headquarters, it will be two weeks before the competent list of prize winners about the latter part of April.

Recipes For This Week

(By Betty Barclay)

BILLED RHUBARB PIE

2 pastings quick-setting gelatin dessert (lemon flavor).
1 cup boiling water.
¼ cup orange juice
2 lbs. young strawberry rhubarb
1¼ cups granulated sugar.

Cut rhubarb in one-inch pieces. Steam in double boiler until tender, but unbroken. Add sugar and gelatin. Dissolve quick-setting gelatin dessert in boiling water. Measure and add juice from rhubarb and cold water, if necessary, to make 1¼ cup. Add to gelatin. Add orange juice. Chill until it begins to thicken and then fold in carefully the pieces of rhubarb. Pour into small baked pastry shells and chill until firm. Garnish tops with meringues of a rosette of softened cream.

OATMEAL MACAROONS

3½ cups of rolled oats (oatmeal).
1 cup of sugar.
1 teaspoon of vanilla.
2 eggs.
1 tablespoon of melted butter.
2 teaspoons (rounded) baking powder.
1 level teaspoon of salt.
cup cocoa nibs.

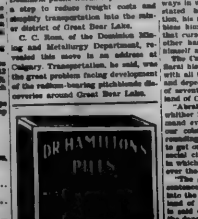
Cream sugar and melted butter — add beaten yolks, then work in gradually oatmeal, to which has been added salt and baking powder. Then add vanilla, cocoa nibs and beaten whites of eggs and raisins. Drop in small quantities on floured baking pan and bake in rather slow oven.

Reduce Freight Costs

Pine Construction Of Road In Great Bear Lake District

Construction of a road around the seven miles of rapids in the Bear River is under consideration by the Dominion Public Works department as a step to reduce freight costs and simplify transportation into the mining district of Great Bear Lake.

C. C. Camsell, of the Dominion Mining and Metallurgy Department, revealed this move in an address at Calgary. Transportation, he said, was the great problem facing development of the radium-bearing pitchblende deposits around Great Bear Lake.



SUNDAY SCHOOL LESSON

APRIL 17

THE CALL OF ABRAM

Golden Text: "Be thou a blessing." Genesis 12:2

Lesson Scripture: Genesis 12:1-9. Devotional Reading: 11:5-10, 17-19

Explanations and Comments

The Call and the Promise, verses 1-3. Whether Abraham received the call while he was living in Ur or while he was in Haran is a much disputed question. It is needless to suppose that the call came to both Abraham and his father (cf. Acts 7:2-4, Genesis 11: 31) and was reaffirmed by Abraham and the Fates and Shechard Ishmael.

It was announced, however, that the thorough study of the project being undertaken will be a preliminary to the actual launching of exploratory flights through the north.

Trans-American Airlines has been assisted during the past year in its study of the problem by the noted polar explorer, Vilhjalmur Stefansson, who proposed a northern commercial air route 15 years ago.

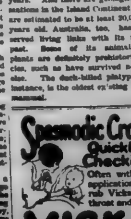
As an indication of the progress made in the preliminary work, it was pointed out the parliament of Iceland within the last month has passed an act granting Trans-American and their associated interests a 75-year franchise for the transportation of mail over Iceland on an air route between North America and Europe.

The specific routing of the northern line has not been determined pending the further extension of surveys.

Australia Is Very Old

Geological Formations Estimated To Be 30,000,000 Years Old

A discovery made by gold prospectors recently affords further proof of Australia's great age. After boring through 300 feet of basalt they struck an old river-bed, and brought up water-polished stones which, according to the experts, had not been exposed to sunlight for over a million years. And there are geological formations in the Lahad Continent which are estimated to be at least 20,000,000 years old. Australia, too, has preserved living fishes with its remote past. Some of its animals and plants are definitely prehistoric species, such as have survived nowhere else. The duck-billed platypus, for instance, is the oldest existing type of mammal.



Trans-American Airlines

Developing Air Route Across the North Atlantic

Pan-American Airways announced it had entered into an agreement with Trans-Atlantic Airlines to consider the necessary survey and research work for development of an air route across the north Atlantic.

Details of the transactions were not made public and it was not definitely known whether survey flights would be made next summer over the proposed course, which is by way of Canada, Greenland, Iceland and the Faroe and Shetland Islands.

HIGHER TAXATION IS IMPOSED TO BALANCE BUDGET

Ottawa, Ont. With new and big, the Dominion is determined to balance its budget. Pinned with an increase in the debt last year of $119,000,000, H. H. Rhodes, Minister of Finance, announced in his budget speech a double-edged policy of drastic increases in taxation and unprecedented slashing of expenditures.

New taxes designed to increase the revenue of the Dominion by $55,000,000, were announced as follows:

Corporation tax increased from 10 to 11 per cent.

Income tax exemptions lowered and the entire schedule of taxation to increased.

Sales tax increased from four to six per cent, with the list of exemptions removed.

Excise tax on all imports increased from one to three per cent.

Stamp tax on cheques, money orders, and promissory notes over $5 increased from two to three cents, and on amounts over $100, from two to six cents.

Tax on railway sleeping car berths, 10 per cent, with $5 cent minimum charge for first class and 10 cents.

Five cent tax imposed on telegrams, cables, radio messages and long distance telephone calls costing over 15 cents.

Tax of one per cent, on premiums of underwriters' insurance companies other than life, marine and farm mutual, whether Canadian, British or foreign maintaining deposits with the Dominion.

Frankly indicating a special session of parliament later in the year, after the Imperial economic conference in July, only one tariff change was announced by the finance minister in his budget speech and which repair parts for foreign-made farm implements were imported at reduced tariff rates, were announced until March 31, 1928.

With hundreds of people lining the galleries, every member in the chamber leaning forward in rapt attention as a tall, slender man, immaculately clad in black morning coat, delivered his first budget speech, Mr. Rhodes is believed to be the long line of maritimers —he is a son of Nova Scotia— who has directed the financial affairs of Canada. Not a single interruption punctuated his speech, which lasted slightly over an hour.

In announcing his taxation changes, the finance minister said the income taxation amendments will apply to 1931 incomes. The $2,000 exemption for a married man was reduced to $2,400 and the $1,500 exemption for bachelors reduced to $1,200. No change was made in the $600 exemptions for each dependent child. The 20 per cent. reduction now allowed from the income tax was abolished. In addition, a surcharge of five per cent. was added to the tax payable by all persons and corporations with an income in excess of $6,000.

The increased sales tax will become effective immediately. The excise tax on imported cars was automatic. The insurance taxes will apply to premiums paid after January 1, 1928. The special taxes on cheques, telegrams, telephone calls and railway berths, will come into force May 1.

While announcing drastic increases in the finance minister cut the estimated expenditures for the present fiscal year to $325,000,000, without considering capital expenditures. Apart from money spent for unemployment relief and wheat bonusing, the sum represented a figure in the year just ended was $404,900,000.

On the other side of the ledger was $818,100,000 in estimated revenue.

Ottawa's unemployment of money existing taxation would gather if left undisturbed. Obviously this would result in a deficit for the year. A steeply taxation was increased to a point where an estimated additional total of $55,000,000 would be collected "thus balancing the current expenditures and leaving a surplus of $4,300,000.

"In proposing these additional measures of taxation," said Mr. Rhodes, "consideration has been given on the one hand to the ability of our people to bear the extra burden and, on the other, to the absolute necessity of placing our financial house in order."

Hub Plays Havoc

Premier Squires, Of Newfoundland, Returns After Record Flight

St. John's, Nfld.—After 24 hours absence from the city, Premier Sir Richard Squires drove up to his office in a motor car, rushed up the steps and through the door. He was apparently little the worse for the rough handling he sustained while being taken from the Colonial Building to a private house during the recent disturbance, but showed the mark of 6 brains on his right cheek.

The disturbance responsible for the unsettled state of political affairs occurred when delay in admitting a deputation from 10,000 citizens, who sought to present a resolution asking for "proper investigation" of charges that the premier had falsified minutes of council, worked the crowd into an angry mood.

Stones were hurled at the windows and the police went into action, using their batons freely. Chaos ensued as thousands of men surged to the building's doors and smashed their way into the basement, whence they hurled office furniture and governmental documents into the street.

Sir Richard was surrounded as he attempted to reach his car from the side entrance, but a part, led by L. E. Emerson, an opposition member, and several clergymen, secured his safety in a private house. Peter Cashin twice spoke from the steps of the building in efforts to quiet the crowd, which finally dispersed and pillaged two liquor stores.

Lady Floleen Squires, who also was in the assembly, was seen to leave the building with a bandage about her head. It was reported she had been struck by one of the missiles hurled at the windows from the street.

Few Tariff Changes

Government Left With Free Hand For Imperial Conference

Ottawa, Ont. While it was generally accepted there would be comparatively few tariff changes, the fact that the budget contained only one tariff resolution came as a surprise to many. It leaves the government with an absolutely free hand for the Imperial Economic Conference in October, in so far as its policy for intra-imperial empire trade.

The lone tariff resolution extended the March 31, 1928, special lower duty rates on repairs to farm implements. These lower rates were brought into effect for one year in the 1926 budget of Prime Minister R. B. Bennett.

No announcement was made in the budget on the terms of the proposed new trade treaty with New Zealand. In circles which are well informed it is believed the negotiations over the agreement are still in the stage of "being under way," and there has been no definite agreement yet.

Foreclosures Prohibited

Approval Of Debt Adjustment Board Necessary In Manitoba

Winnipeg, Man.—No foreclosure proceedings can be taken against farmers by the Manitoba loans board, Premier John Bracken stated in the legislature the board and all other government farm loan agencies will be prohibited from taking foreclosure action without the approval of the debt adjustment board.

The government's attitude in this case of the policy of the board in view of the government's efforts to induce private lending organizations to do business here. He said he believed the farm loan board had been a failure to attract and said he would not decide at all its actions in enforcing payment.

B.C. Carries Heavy Burden

Victoria, B.C.—British Columbia is taking care of more than four times as many unemployed single men as Saskatchewan and Alberta put together and the problem has become "unbearable," R. W. Bryden, Minister of Public Works, said before leaving for the Ottawa conference for provincial premiers.

In order to make petroleum discovered in the Red Coulee district of Alberta available for illuminating purposes a bill has been introduced in the Federal House to amend the Petroleum and Naphtha Inspection Act.

LEADS PROGRESSIVES

Here is a reproduction from the most recent portrait of Harry C. Hixon, Leader of the Progressive Party in the Ontario Legislature

Appropriation For Great War Pensions

Sum Of Forty-Eight Million Passed By House

Ottawa, Ont The House of Commons has approved an appropriation of $48,000,000 for Great War pensions. The estimate is $2,500,000 lower than that of last year, but $4,000,000 greater than the actual pension payments of last year.

The decrease, Dr. Murray MacLaren, Minister of Pensions, said, was more apparent than real. A large sum had been estimated last year in the belief that a large percentage of the men who had commuted their pensions would be reinstated. The numbers were not as great as anticipated, with the result that the estimate had greatly exceeded requirements.

The department now estimated, on the basis of "normal" figures, that 2,000 commuted pensioners would be restored in the present fiscal year; and the appropriation was drawn up in that expectation.

Government Asked To Assist Olympic Team

Funds Required For Trip To Los Angeles This Year

Montreal, Que.—A delegation of eight members of the Canadian Olympic Committee have gone to Ottawa to interview the Minister of Finance, W. H. Rhodes, on a question of funds to enable the Canadian Olympic Team to make the trip to Los Angeles this year. Members of the delegation included P. J. Mulqueen, Toronto; J. I. Merkin, Winnipeg, and J. W. Hamilton, Regina.

Changes In Alberta Cabinet Are Indicated

Will To Amend Legislative Assembly Act Is Introduced

Edmonton, Alberta.—Changes in the Alberta cabinet were indicated by Premier J. E. Brownlee in the Alberta legislature through introduction of a bill to amend the Legislative Assembly Act. The amendment would eliminate the necessity for a member of the legislature returning to his constituency for endorsement by the voters after appointment to a cabinet post.

Re-arrangement of the cabinet was planned the premier said in speaking to the amending bill, but he said he could not say whether there would be any increase in the number of portfolios.

There are seven posts in the cabinet as at present constituted. It is expected that when the cabinet changes are made, Mr Brownlee will continue as premier and also take the portfolio of provincial treasurer. The post of provincial secretary will go to some other cabinet member.

A new face in the altered cabinet is expected to be Dr. F. S. Grisdale, M.L.A., for Olds and principal of Olds School of Agriculture. He is expected to be appointed Minister of Agriculture, a post now held by George Hoadley, who is also Minister of Health.

More For Gas Franchise

Would Supply Saskatchewan Cities From Turner Valley Field

Calgary, Alberta.—Negotiations to obtain the gas franchises in Regina, Saskatoon and Moose Jaw, with a view to supplying these cities with Turner Valley gas, will start shortly, according to R. J. Tubridge, independent oil operator.

This new move is a possible, he states, by the passing of a resolution by the Alberta legislature permitting export of gas not required for use in the province.

Even if Turner Valley's gas flow was restricted to 100,000,000 cubic feet daily under conservation plans, it would be sufficient to supply gas to Saskatchewan, he declared. Other oil men expressed their approval of the gas export measure passed in the legislature last night, believing it would mean a boost for Alberta's gas fields

Many Workers Affected

Montreal, Que.—Reductions in mechanical staffs on the Canadian National Railways, which went into effect April 9, affected approximately 3,000 men throughout Canada, union officials of the Railroad Shop Trades estimated. Special committees are being formed to discuss with railway officials the details of the staff reductions.

DENIAL IS GIVEN BY FERGUSON TO ALL CHARGES

Ottawa, Ont.—G Howard Ferguson, Canada's high commissioner to the United Kingdom, appeared before the senate's Beauharnois committee with the sole object of vindicating his own integrity," he said Traveling from Canada House, London, England, to Ottawa, the high commissioner pondered evidence which, he later, denied any connection between himself and the largesse of Robert O. Sweezey, former president of the Beauharnois Power Company

Mr. Ferguson's testimony was prompted by the statement made some weeks ago by Senator Andrew Haydon. Some time early in 1930, the senator had testified, Mr. Sweezey had informed him he had a power contract lined up for Beauharnois with the Ontario Hydro Electric commission, and Mr. Ferguson, then premier of Ontario, would not let it be signed, according to Mr. Haydon's evidence, until he (Mr. Ferguson) got $300,000."

To this the high commissioner most unqualified denial. His conversation he had over had with Mr. Sweezey could possibly bear such an interpretation. He had met Mr. Sweezey only twice, the first occasion at a period long before power contracts were thought of, and the second when negotiations were in progress with Premier Taschereau, of Quebec, respecting export of power.

The "$150,000 to bonds," given to John Aird, Jr., of Toronto, by Mr. Sweezey in December, 1929, was nothing to do with power contracts, Mr. Ferguson's evidence was that this money was destined for the Ontario Conservative Party. Mr. Aird, he had known from boyhood, he said, he had found what he had read in the newspapers. The high commissioner had no personal knowledge on this point by R. S. Robertson, counsel for Senator Hayden.

Britain Gets Reply From Irish President

But Contents Of Note Have Not Been Made Public

London, England.—J. H. Thomas, Dominions Secretary, Affairs, announced in the House of Commons the British Government has received the reply from President De Valera, of the Irish Free State to its representations that the oath of allegiance and the office of Irish governor-general were integral parts of the Irish treaty and its accompanying financial agreements.

Asked by James Maxton, member of the Independent Labor Party, to disclose the contents of the Irish note, which is understood to maintain the Free State Government's position the oath should be abolished and the land committee ended, Mr. Thomas replied it was not customary to disclose the contents of such documents without agreement of both governments.

The British Government should have full time to consider the reply before its publication, the minister added.

May Call Special Session

Parliament Might Assemble In Fall To Deal With Tariff Matters

Ottawa, Ont.—The absence of any important changes in the budget brought down by E. N. Rhodes in parliament is giving rise to conjecture as to whether a special session will be called this fall to deal with tariff matters. In Government circles it is declared that it is much too early to predict a special session. It all depends upon what develops at the Imperial Economic Conference to be held in London this summer It may be found advisable to bring any agreements entered into at the conference into effect at as early a date as possible and this could only be done by calling parliament together

Special sessions are rare in Canadian parliaments. A special session was held in August, 1914, when Canada entered the war Another special session was held in 1880 following the election of the Bennett Government, to deal with the unemployment emergency.

AN INTERNATIONAL ROMANCE

An international romance culminated April 5 in the marriage of Miss Frances Bosworth, a cousin of former vice-president Charles G. Dawes, and Dr. Trevor Charles Stamp of London, England. The bridegroom is the son of Sir Josiah Stamp, noted British economist, and Lady Stamp. The wedding took place at Evanston, Ill., in the home of the socially prominent Charles H. Bosworth, father of the bride, with numerous members of both families attending. Shortly after the ceremony Dr. Josiah and Lady Stamp, with their son, Dr. Trevor C. Stamp, are shown as they arrived at New York. Inset is Miss Frances Bosworth.

To Bring Back Prosperity

Solution Of Banks And Business Depression To Be Line With Country, Premier

"Study—not wheat is not going to keep alive the present feverish activity, but we must build up in Canada and the United States, nor will such low commodity prices allow the public to pay interest on the huge piles of private, state and federal debts which our western capitalist world has already piled up," declared Premier Bennett.

This was the opinion expressed at Winnipeg by Robert Gordon, owner and editor of the Premier Press.

Mr Gordon continued: "It must now be clear to farming people that our present low prices of wheat and copper, and lumber, and cotton, etc., and our high financial structure are the same thing that caused low prices in the same country at the same time.

"Our governments at Ottawa and Washington cannot forthwith halt the financial crisis, but they can put the banks and securities they now hold are needed for the same definition of our currency prices have just gone through, or else our governments must quickly make such deficiency moves as will bring commodity prices into line with our interest rate and capital structure.

"Until the investors and security holders in Canada and the United States are definitely told that, like the farmer's creditor, their prosperity is to be liberties decided, there can be no feeling of security, and, therefore, no possible return of prosperity.

"If an individual could not hesitate to spend two per cent. or three per cent. owing to proof his fortune, why should not a nation do likewise?"

Canada Has 20 Billions

Canada has 20 billions of national wealth. Two per cent. of that would be one billion. The United States has ten billions of individual wealth. Two per cent. of that would be 20,000,000,000."

Canada's Population

Final Census Returns Give Figures At 10,376,786

Canada's population in 1931 was placed at 10,376,786, according to the final summary of the Dominion Bureau of Statistics. Ten years ago the population was 8,787,949. British Columbia had the highest percentage of increase in the decade, 33.85, followed by Alberta, with 34.33; Quebec, 31.76, and Saskatchewan, 21.66 per cent. Prince Edward Island, Nova Scotia and the North-West Territories were the only divisions to register decreased populations in the decade.

The 1931 provincial populations were as follows: Prince Edward Island, 88,038; Nova Scotia, 513,502; New Brunswick, 408,219; Quebec, 2,874,255; Ontario, 3,431,683; Manitoba, 700,139; Saskatchewan, 921,786; Alberta, 731,605; British Columbia, 694,263; Yukon, 4,230; North West Territories 7,123.

Elderly Gentleman: "Is this the cheapest umbrella you keep?"

Assistant: "Yes, sir, the very cheapest."

Elderly Gentleman: "I'll have it. I only want it for leaving behind in the train.

A new device for protecting railroad crossings has been constructed in Sweden. The weight of the train itself lets down the gates and this energy may also be used to produce rotating electric Light flashes, as a warning.

"Maud is running with you this afternoon, Percival."

"Surprising."

"Ah, you should see a specialist."—Chicago Phantom Rabbit.

Grain Exports

Amount Paid Out By Canada Is Greater Than the Last Received

Although Canada has received from Germany, as representative of the treaty of Versailles, sums aggregating $56,077,288, the government has paid in respect of the same period sums totalling $70,000,000 more than the amount received. These figures were compiled by C. H. Cahan, secretary of state, at the request of Jan Christiaan Smuts (Lib., Vancouver Centre), who asked the following question:

Paid as reparation of Canadian moneys, $70,000,000.

Pensions and compensation of all kinds, $665,170,000.

Authorized to families and deposit cash of persons serving with the military and naval forces, $134,661,894.

"It has repeatedly been alleged by an Canadian of Canadians, who were prisoners of war in Germany, that they received from Germany an amount equivalent to the pensions for its causes of the pensions paid out by the government of Canada in respect of the same period. Is there any truth in this statement? If so, is he liberties decided, there can be no feeling of security, and, therefore, no possible return of prosperity.

"If an individual could not hesitate to spend two per cent. or three per cent. owing to proof his fortune, why should not a nation do likewise?"

A Formidable Weapon

Tank Gun Will Shoot Shells Weighing 2,000 Lbs.

Military experts are interested in a new bullet, invented by a German engineer, which is said to attain the velocity of 6,000 feet per second and to smash its way through hardened armor-plate half an inch thick. If the new bullet can be fired from a cannon, or it, it will be a formidable weapon against a tank attack. The new bullet is the development on land of the air bullet invented by Mr. Cheek.

The new bullet is claimed to get over the Treaty restrictions regarding explosive bullets. It is not explosive, but a combination of fighting strength and speed, and can thus anything that stands in its way. Once it has a hole of hole to anything that can run it.

A Scotsman, upon ordering a meal, he asked for a single spoon.

"What use is one spoon?" asked the waiter.

"Well," replied Sandy, "if I can get one side of the house to go the other one will have to come with it."

As for back as 1920 B.C., citizens of Babylon were dealing with their fellow mortal progressions, quadratic equations and equations with two unknowns.

Portugal will soon count its first broadcasting station.

Library Serves Three States

In Without Librarian in Rules and Hour Is Always Open

Located in the extreme northwest corner of Arkansas, at a lonely backwoods section, where three states join, is a free public library boasting the people of three states.

It houses more than 3,000 books and has become one of the favorite diversions with which to meet the loneliness and isolation of "mfrown's hermit" on the scattered foothills.

No patrons come from rural homes in Oklahoma, Arkansas and Missouri, within a radius of 100 miles. They come on foot, "a-horseback," by the wagon load and in all manner of gasoline-propelled vehicles. The door of this library has never been locked. Years to no libarian, no hours, no rules, no fines, but no filing system—just the books, the open door, comfortable chairs, a kerosene lamp and a wood-burning stove with its accompanying well-filled woodpile.

Books, averaging 500 in number, are borrowed each month, the borrowers choosing their books on the shelves, along with the titles of the books being taken to their homes—sometimes on foot. The library has proved popular, since in the library's 20 years of service slightly more than a dozen volumes have been lost and many have been delivered.

This library in the gift of a man and woman who have never had more than the bare necessities of life. When M. and Mrs. E. S. Cheek, with Willis and Ozro Cheek, their only grown children, died

FREIGHT TRUCK LICENSE FEES
PROVINCE OF ALBERTA
CLASSIFICATION OF TRUCKS

All freight vehicles and trucks, in addition to paying the fees set out below, must also pay the usual motor vehicle license as formerly, according to wheel base measurements.

CLASS A.—Includes all trucks used as public carriers for freight haulage. Fees printed below.

CLASS B.—Includes all freight vehicles other than those in the other classes. Fees printed below.

CLASS C.—Includes trucks operating within cities, towns and villages. These are permitted to operate outside to the extent of five miles beyond the corporate boundaries of the cities, towns or villages in which they are licensed. No fee in this class other than usual motor license.

CLASS D.—Includes trucks owned by farmers, market gardeners, or ranchers and used for the transporting of their own property. No fee other than usual motor license.

CLASS E.—Includes trucks in Classes "C" and "D" used for hauling grain between August 1st and December 31st in one year. Fees in this class one-quarter of those in Class "B".

FEES FOR CLASSES "A" and "B".

Fees for Classes "A" and "B" are figured on gross weight, which shall mean the combined weight of the chassis, body and cab of the freight vehicle and the manufacturer's rated carrying capacity.

Fees in these classes range from 50 cents per 100 lbs. to $1.75 per 100 lbs. according to their weight classification.

Applications for truck licenses, stating weight and carrying capacity of truck, should be made to

Perry Sound Colony To Hold Monster Picnic

A meeting of the Perry Sound Colony which arrived in Edmonton 40 years ago, on the 14th of April 1882 to be exact, was held in the Town Hall on the 14th. Instant. There was a large attendance with representatives from Chipman, Lamont, Bruderheim, Scotford, Camrose, Daysland, Beaver Hills, Partridge Hill, Parkside and Ypres Valley. As mentioned in last week's Record the meeting was called to consider the advisability of holding a monster picnic to celebrate the 40th. Anniversary of the arrival in Edmonton of the Perry Sound Colony.

Mr. G. T. Montgomery was elected Chairman, and Mr. E. T. Flintoff was appointed Secretary for the meeting. After much deliberation, it was decided to hold a basket picnic on the afternoon of the 6th. of July next at Elk Island Park, everybody to be welcome. Various committees were appointed to look after the arrangements, and Mr. Jas. Ritchie appointed as permanent Secretary.

It is intended to ask the Dominion Government for a buffalo for a feast.

Hon. Frank Oliver, Premier J. F. Brownlee, Mr. Duggan the President of the Old Timers Association, and a representative of the C.P.R. Land Department and others, will be invited, and asked to address the gathering. Further announcements will be made later on.

POLICE COURT NEWS

A Halfbreed from Saskatchewan, named Daniel Stanley was arrested on Tuesday night by Const. Daniel a vagrant. He was acting in a suspicious manner. In the local police Court he was sentenced to 30 days imprisonment with hard labor in the Provincial Gaol.

OBITUARY

The death occurred suddenly of Mr. Henry Hatchebay, one of the town's oldest and most respected citizens on Monday afternoon, April 10th.

Mr. Hatchebay came to this district about 30 years ago, and has carried on the business as a well driller.

The funeral was held at the United Church on Wednesday afternoon, with Rev. D. C. Ramsay officiating.

Interment took place at the Fort Saskatchewan Cemetery.

The pallbearers were Mayor G. T. Montgomery. Mr. Haizelt. Mr. E. Flintoff. Mr. P. Show. Mr. J. Gauf. and Mr. Ed. Kelterborn.

F. W. Foster had charge of the funeral arrangements.

Around The Elevators

Most of the elevator men are busy cleaning their bins, ready for the coming moving days.

Bill Anderson is busy cultivating the crocus's in his spare time.

Things We Notice:—Jack Wells explaining the composition of R. & A. gasoline to prospect buyers and the station staff absorbing this information.

Owing to one of the players having to load cars, the bridge experts are now taking a daily nap. The tiests takes place between 1 and 4 p.m. Customers are requested to use a little discretion between these hours.

Agriculture School Closed

The School of Agriculture at Vermilion has just closed and the students are away home to get ready for spring work on the farms. Mr. H. A. Craig, Deputy Minister of Agriculture, addressed the students at the closing and presented the diplomas to the forty-nine students receiving same. This is the largest graduating class in the history of the school.

The term has been a very successful one as 104 students registered for the courses and 90 of these finished the course.

The following is a list of the students who attended the school from the Fort district.

John Gillies, Clover Bar; Lester McGhan, Bruderheim; John Purdich, Carrondale, all of whom received their Agricultural diplomas; while Ruby Fisher, Fort Saskatchewan, received diplomas in Household Science.

Successful Dance Held

The Fort Oddfellow held a very successful Old-time dance on Friday evening, April 14th in the Memorial Hall.

The dance consisted of a good variety of old and present day dances which were enjoyed by the large crowd present.

The square dances and two steps were called by Mr. M. Wright.

At midnight everyone adjourned to the buffet room where a tasty lunch was served.

The music for the dancing was supplied by Fred Berg and his Orchestra.

COMING EVENTS

Don't forget the tea and sale of flowers and plants at St. George's Rectory on Saturday afternoon.

The Girl's A.A.A. Club are holding a Dance in the Memorial Hall on Friday, April 28. Skyrian Boys Orchestra will supply the music.

There will be a meeting of the tennis club in the memorial hall at 8 o'clock Tuesday, April 20th. Business general.

Tennis meetings are few and far between, so try to make those few worth while by turning out on time and by having on tap any ideas which you believe would make the tennis club a better sport club.

The courts will be prepared by Saturday the 22rd. But please note: there is still considerable moisture in the ground and if there is a notice posted asking enthusiasts to refrain please help enthusiasts to refrain obey the notice and have a better court surface later.

Don't forget the meeting on Tuesday evening at 8 o'clock and everyone is welcome.

There will be a Public Meeting in the Fire Hall on Monday evening, April 25, to decide whether a sport's programme will be held on May 24th of this year.

Everyone who is interested in holding sports on this day are asked to attend the meeting.

Baseball Club Hold Annual Meeting on Monday

The Annual meeting of the Fort Baseball Club was held in the Town Hall on Monday evening, April 18 The financial report for the year 1921 was read showing the club to owe nearly $40.00.

The following officers were elected for the coming season:—

Hon. Pres. J. D. McLean, Pres. J. B. Gauf. Sec.-Treas. Russell Carroll. Manager Fred Collis.

The policy for this year was discussed at some length and it was decided to run on a cash basis for this season.

The club now calling a general meeting to be held on Monday, April 25th at 8:30 in the Town Hall. This meeting is being called to arrange holding a sports day on the 24th of May.

All business men and others taking an interest are cordially invited to attend this meeting.

LOCAL NEWS

The relief spade work by the Oddfellows during the past winter amounted to $65.15. This was distributed to the needy families in the town and district.

The St. George's Tennis and Badminton Club held its first meeting on Monday evening, April 11th, at the Anglican Rectory.

The following officers were elected. Patron Lord and Lady Rodney. Honorary Members Rev. and Mrs. C Read, Mr. and Mrs. J. D. McLean. President Miss A. West. Vice-Pres. Mrs. R. F. Rudd.

Secretary-Treasurer Dr. B. H. Mason.

Executive Committee Miss Oxley, Miss G. Holmes, Miss M. Stevenson, Glover Talyor, Don McLellan, Jack Rogers.

The questions of Membership and fees were left over until the next meeting.

A very pleasant evening was spent last Wednesday when the Fort Rebekah Lodge held a bridge party in the Union Hall.

Seventeen tables of bridge were in play, the honors going to:—

Ladies first Mrs. Frank Smith. Gents first Mr. Frank Smith. Ladies consolation Mrs. Edith Mitchell of Lamont. Gents consolation Mr. F. McKeller of Elk Island Park.

After cards everyone sat down to an enjoyable repast.

WOMEN'S INSTITUTE

Better gardens are expected as a result of Mrs. S. O. Jones's fine talk on "Garden and Flower Culture" given at a well attended meeting of the Fort Saskatchewan Women's Institute on Thursday, April 13th in the memorial hall.

After the talk, Mrs. W. A. Graham, Mrs. F. Murray, Mrs. T.W.E. Henry, and Mrs. Earl Graham, had charge of the refreshments.

A very pleasant and profitable afternoon was spent.

"Fresh from the Gardens"

Reducing Costs Of Government

Continuing discussion of the above subject, let us consider in a little more detail some of the many duplications in services on the part of the Federal and Provincial Governments.

First, agriculture. Both Governments maintain experimental farms or experiment, illustration or demonstration stations, forestry farms, etc. This work should be combined exclusively either to the Dominion or to the Provinces, and, as could be done very far greatly to increase the efficiency, this class of work might well be left to them. The Dominion Department of Agriculture might well confine its efforts to maintaining and maintaining standards of weight and quality of all agricultural and allied products, safeguarding the health of animals, preventing the introduction of diseased animals, imported seed, and infected trees and plant life from abroad. Responsible for the fixing and maintaining of standards of quality, the Dominion should also be responsible for promoting the sale of these high standard products in the markets of the world. Let the provinces look after the educational and promotion end, and the Dominion the maintenance of minimum Canadian standards and the development of our export markets for these uniformly high quality products irrespective of province in which they are produced.

Public health. Here, too, the Dominion might well confine its work to safeguarding the health of all through the prevention of disease resulting from disease-afflicted people entering the country, while leaving to the the provinces the general work of health education among its people, health inspection and disease prevention. And just as the private provinces now pay the Dominion for police services, so the Dominion might pay the provinces for carrying on the necessary health work among the Indian wards of the nation. The Federal Department of Health might then be done away with, and the work performed through the Immigration Department on the one hand and the Provincial Departments of Public Health on the other hand.

There is then many possible source of friction between the Federal and Provincial Governments, namely, company incorporation, company law, inspection, taxation, etc. Hardly a year passes that there is not some reference before the courts to settle the respective jurisdiction of Federal and provincial authorities in regard to these subjects. There is also the heartburning issue where provincial governments through local government boards, utility commissions, or some similar body, seek to protect their people from irresponsible, and to say the least, unscrupulous promoters and high pressure stock salesmen, but whose best efforts are brought to naught because such companies by obtaining Dominion rather than provincial incorporation elude duly the provisions.

It would seem as if all company incorporation should be Dominion, rather than partly Dominion and partly provincial. Then any company could do business in any or all the provinces. If some company desired to engage in a purely local business, its incorporation fee might be made smaller, and its charter so restricted, if desirable, but if all company incorporation was vested in the Dominion, all incorporation fees could be reduced and at the same time Dominion revenues would be increased. Certainly, a vast amount of friction and litigation, not to speak of much duplication in taxation, would be ended, and all Canadian business except the lawyers, would benefit thereby.

Changes such as suggested would mean loss of revenue to the provinces and increased revenue to the Dominion. It therefore follows that there should be a readjustment of taxing powers. Under the B.N.A. Act the provinces are limited in their taxing power to the imposition of direct taxes, while the Dominion can impose both direct and indirect taxes. The field of indirect taxation is much wider than the field of direct taxation. The Dominion, therefore, might well withdraw from the latter field and leave it to the provinces. By and large this would mean the dropping by the Dominion of the income tax, and leaving that source of revenue exclusively to the provinces.

This is surely worthy of [illegible]. In the meantime, however, with both Federal and Provincial Governments levying taxes upon income, and with both governments maintaining income tax departments for the levying and collection of such taxes, is it not possible to eliminate a large amount of taxpayers' money resulting from such duplication of departments by some arrangement whereby either the Dominion would collect for the provinces, or the provinces when collecting their taxes would therefore make collection for the Dominion? Whichever body was saved the expense might pay to the other a percentage for so the money collected? Surely a large part of the money now wasted in duplication of collecting agencies be saved, but the public would be relieved of much annoyance and the necessity of filing duplicate sets of returns and calculations.

Furthermore, surely it is high time a step was put to such practices as the one introduced in the recent budget of Ontario where the government imposes a tax on businesses conducted by provincial governments. The present budget imposes a tax of five cents on every long distance telephone call. This really means an increase of that amount in long distance telephone tolls, which business in those prairie provinces is conducted by the provincial governments. If that additional sum is to be extracted from the patrons of the long distance lines, then it should accrue to the provincial governments, and not to the Dominion. But the Dominion steps in and imposes this tax on provincially-owned public utilities, and even throws additional expense upon the provinces to collect the tax. Surely this is a case of doubling up and accounting work which it will entail. This is much too typical instance. It would be just as reasonable for the provinces, if they had the power, to impose a tax upon the business transacted by the post office department.

So, in conclusion, we would again emphasize the view expressed in a previous article in this connection, namely, that it is regrettable that a considerable part of the provisions of the British North America Act, governing taxation, the only measure in the nature of a written constitution we have, and upon the provisions of which the Federal Authority on the one hand and the provincial on the other have largely based their authority outlining the spheres of control of each, and clarifying their respective fields of taxation. The taking of such action would be a long step forward towards reducing costs of government in this country.

Sorry To See Sight Going

She Could Not Shop

Mrs. E. Mellroy, Elphinstone, Ont., says: "I am very nervous and run down, was afraid of trouble, and had pains in my forehead, and was going to my family physician as I could not do these or go to shop.

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now feeling splendid; can sleep fine at night, and have gained in weight.

Making Better Use Of Sunlight On Farms

New British Glass Substitute For Window Lights Is Seen To Farmers

During the past fifteen years there has been much scientific studying of sun rays and their effect on human beings and animals. Ultra-violet rays particularly have been studied. Even the scientific themselves are unaware exactly how ultra-violet rays affect growth, health, and development in both vegetables and animals. They are, however, known to be largely responsible for all these. After extensive researches, scientists have been found not only to produce them artificially, but to facilitate their entry in to natural state into certain substances by using specially prepared material of low cost for window lights.

It is probable that this is one of the greatest boons conferred on farmers, poultrymen, market gardeners, and smallholders by scientists for many years. The preparation of this material referred to surpasses ordinary window glass in that it will permit the ultra-violet rays to enter which ordinary glass will not do so. Thus, since it is heat and almost indestructible, it affords a permanent and cheap method of lighting of livestock sheds, chick and laying pens for poultry, hot and cold houses, vegetable and flower garden and special covers for raising young plants in the open much ahead of the usual time.

The advantages of using a material which will transmit ultra-violet rays are not theoretical. They have been proved to be profitable in actual tests. Take poultry for example.

Twin carried out both in this country and England have shown that chicks can be raised earlier in the year in brooders which are lighted with the new material and that in winter months adult birds housed behind it lay more eggs.

Tests carried out made in England with a flexible glass substitute called "-WINDOLITE" which has now been made available in Canada, showed that a flock of 20 hens housed behind any win' w glass averaged 20.20 eggs per hen for the six months from May to December. Another flock housed behind the glass substitute averaged 75.87 eggs per hen for the six months. These figures are, in themselves, conclusive.

As far as chicks are concerned, there is definitely less leg weakness and the usual chicken mortality in brooders is very largely removed.

Livestock buildings and barns lighted with this material should be healthier for animals. One eminent British medical authority states his belief that tuberculosis in cattle is largely due to their being deprived of ultra-violet rays in dark sheds in winter.

In the garden, berry crops, lettuce and all other small plants can be brought to maturity a fortnight earlier, and have been found to be bigger and of better flavor if grown under covers made of this material.

The chief factor in favor of using the new glass substitutes is the extreme cheapness, strength and handability.

The new British glass substitute for window lighting actually costs less per square foot than ordinary window glass. It is made in sheets by extreme violence, retains its translucency and ability to pass ultra-violet rays indefinitely and is unaffected by severe climates—yet its weight is less than one fourteenth that of ordinary glass.

Hamilton Cleaning Hints

Is a few cracking or scaling of the paint by exposure. Cooking, canning — smoke and fumes all cause stains and marks caused by weather conditions. Dainty Fragrant, it adds exquisite charm to the home. Economical to use. Dainty women inevitably choose Old Dutch. It is velvety smooth lotion. It cleans the most precious surface. Recommended also by doctors and others the hands. Truly a peerless toilet requisite for every woman.

Old Dutch Cleanser

Hamilton-Caledon Highway

The trans-Canada Highway and from Whitemouth, Man., to the Ontario boundary has been completed and formal opening of the 60 mile stretch in Kenora will take place with appropriate ceremonies on Dominion Day, July 1, under the auspices of the Hamilton and Caledon properties.

Dr. Thomas' Eclectric Liniment is recommended for Rheumatism, Neuralgia, Sciatica, Lumbago, Sprains, Bruises, Cuts, Burns, Scalds, Sore Throat, Croup, Colds, Coughs, Asthma, Bronchitis, Frost Bites, Chilblains, Sore Feet, Stiff Joints, Lame Back, Sore Chest, Pleurisy, Pains in the Side, Stings of Insects, Barbed Wire Cuts, Sore Nipples, Caked Breast, Garget in Cows, Scratches, Grease Heel, Thrush, Quinsy, Diphtheria, Distemper, Colic, Spavin, Ringbone, Curb, Splint, Sweeny, Poll Evil, Fistula, Foot Rot, Thrush, Scratches, Mange, Sore Shoulders, Harness Galls, Saddle Galls, Sore Backs, Sore Udders, Caked Udders, Garget, Scours, Wounds, Sores, Ulcers, Boils, Carbuncles, Abscesses, Felons, Whitlows, Chapped Hands, Chilblains, Frost Bites

SHE WORRIED ABOUT HER WEIGHT

"I started taking Kruschen three months ago. I have lost 5 pounds in weight, and I feel as if I have lost 5lbs. I am full of vigor through-out. I was worried about my condition, as I was listless and worried over little things. But I am thankful to say that now my troubles doubled. They would not worry me to-day. Kruschen is the best."—Mrs. V. L.

Here's the recipe that banishes fat—take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning, for "It's the daily dose that takes off the fat."—that's now a morning. Reasons daily means that every particle of poisonous waste matter and disorded acids and gases are hopefully from the system.

Buddy your diet, and take gentle exercise; the stomach, liver, kidneys and bowels are toned up, and the purifying blood containing these six salts is carried to every part of the body, and this is followed by "that Kruschen feeling" of complete health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and sound health.

WORLD HAPPENINGS BRIEFLY TOLD

France will take part in the Olympiad at Los Angeles.

A resolution favoring shorter work-hours for labor has been voted upon favorably by the British Columbia legislature.

Men at The Pas, Man., are making ripples from Ottawa to Sale in the Hudson Bay They would operate on a

John Fletcher, a notable figure in the early history of telegraph development in British Columbia, died recently at Lake's Alto, Cal.

Dogtaine Marconi has developed a completely successful ultra short wave radio telephone capable of receiving and sending.

Saskatchewan's coal output for February of 166,635 tons is 90.1 per cent. advance over the same period it year ago.

A trading loss of $646,000 for the past year, including provision for its liability in the losses of subsidiary companies, was reported by the Hudson's Bay Company.

Rumors prevail at Seward, Alaska, that Jack McCord, a prospector, has discovered platinum bearing sands on Chirikof Island and was planning to start immediate development of a mine.

Hugh S. Gibson, the United States delegate, proposed to the world disarmament conference the abolition of offensive weapons including tanks, heavy mobile guns and gases as the key to the disarmament problem.

When Andrew W. Mellon arrived in London, England, to take up his duties as United States ambassador, he was given an ovation by a considerable crowd at the railway station.

Fresh Supplies In Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that the people of Canada like this excellent Oil Improve its power on the people. No matter in latitude it may be found its potency is never impaired. It is put up in most portable shape in small bottles and its central influence of breakage.

Complete Winter Wash

"The frying heat ear" of the north country, 28-52, a huge Junkers aeroplane, flown to Winnipeg from Moscow last December, arrived back from Norway House, having completed freighting operations for the winter. She will remain in Winnipeg until after the spring break-up, when she will be filled with provisions and sent back to her summer work.

Sixteen Per Days At Time Until She Took Vegetable Pills

Recently, Mrs. C. writes: "The first part of your wonderful Carter's Little Liver Pills gave me great relief after every meal when I tried faded."

Because they are PURELY VEGETABLE—a gentle, effective tonic to build up and benefit. Dr. Carter's Little Liver Pills are without equal for curing Constipation, Acidity, Headaches, Poor Complexion and Indigestion. Sic. & 75c. and pills, everywhere. Ask for Carter's by NAME.

W. N. U. 1936

ALLIED AND ENEMY FLYERS IN FRATERNITY

Allied and enemy flyers and observers who fought in the clouds in the encouragement of training stunts and Lewis gunfire, gathered recently in the Royal Alexander Hotel, Winnipeg, to attend a banquet sponsored by the Aviation League of Manitoba. More than a hundred Manitoba wartime pilots and observers from both sides attended the reunion.

In this picture, Karl Caspar, left, who commanded membership with the great Baron Richelten's famous "Flying Circus," is seen recounting a war exploit in an interested audience of Manitoban pilots.

This picture shows a portion of the gathering relating wartime exploits as the cocktail trey goes round.

Tax On Insurance

Imposition Of One Per Cent. Of Premiums Other Than Life, Marine and Fraternal

Imposition of a tax of one per cent. of net premiums of insurance companies authorized to transact business in any province of Canada, other than life, marine and farm mutual was announced in the budget speech of H. H. Stevens, Minister of Finance, in the House of Commons.

"The tax upon insurance premiums passed at the last session was not put into effect by proclamation as was provided by the statute, owing to difficulties over the jurisdiction of the Dominion and provinces in the matter of insurance," Mr. Stevens remarked.

"It is now proposed, under the Special War Revenue Act, to impose a tax of 1 per cent. of net premiums of insurance companies authorized to transact business in Canada or in any province of Canada, other than life, marine and farm mutual. This tax was in force from 1915 to 1920. Insurance companies, companies not so authorized, but maintaining deposits with the Dominion, will also be assessed 1 per cent. of net premiums received in Canada. Canadian policyholders who insure their property in Canada with companies other than those mentioned above, will be charged a tax of 15 per cent. of the gross premiums payable on such insurance."

Fishmen Will Prosecute

Fishmen is counted to evaporate like water by a discovery announced by Dr. James Collcrain Institute of Technology. This precious vapor, probably the world's highest-priced substance, is extracted from whitefish and then upon a wide variety of materials. It costs them virtually nothing.

Ask For Protection Of Livestock Industry

Dominion Minister Of Agriculture Requested To Call Conference

A meeting of the Saskatchewan Livestock Board held in Regina passed a resolution requesting the Dominion Minister of Agriculture to call a conference of all livestock interests in Canada before the Imperial Conference in Ottawa in July to draft a policy for the protection of the live-stock industry to be presented at the conference.

The meeting also endorsed a similar request from the Western Canada Livestock Union. It was intimated at the meeting that in the case of the Dominion declining these requests the Live-stock Union would call an independent meeting and, in case this was done, the Livestock Board requested that the six presidents of the Saskatchewan Associations, horse, cattle, sheep, swine, poultry and ranchers, be invited to attend.

By twisting the handle of a new icebreak either short or long brushes are extended for use.

One of the newest uses that farmers have found for electricity is to heat brooders.

SUNDAY SCHOOL LESSON

APRIL 24

ABRAM'S GENEROSITY TO LOT

Golden Text: In honor preferring one another.—Romans 12:10.

Lesson Genesis 13

Devotional Reading: Psalm 133.

Explanations and Comments

The Problem, verses 5-7. The land of Canaan was not fertile enough to support such large flocks and herds as both Abraham and Lot had, especially after there had been a severe famine (Genesis 12:10. Their herdsmen were continually quarreling over the pastures. Not only was there not enough forage for them, but they did not have the whole land to themselves as the Canaanite and the Perizzite were then here. Some scholars think that the Perizzites were the original inhabitants who had been conquered by the Canaanites.

The Peace Measure, verses 8,9. Abraham would have no strife between himself and Lot, nor between their herdsmen. The unoccupied country was before them, he told Lot. He was more interested in peace than in plenty; he preferred fraternal fellowship to selfish increase. And so no bade Lot choose the side he wanted and he himself would take the other.

The Choice, verses 10-13. They had a wide country from a hill above Bethel. On the one side of them were the rather barren hills of Judea, from two thousand to four thousand feet high. On the other side was the rich peak ten or twelve miles broad through which the Jordan flowed. Lot's soul had none of the greatness of Abraham's. The well-watered Jordan on the east, which was called "as the garden of the Lord" was his choice. What if the plain was filled with cities whose inhabitants were a perverse and lawless wickedness? He would only pitch his tent "towards Sodom", but dire results followed.

"Let was a man of the world. Like sharp as a needle, having an eye to the main chance. He boasted in Canaan that he always took in the whole situation. But he had very imperfect sight. He saw all the well-watered plain of Jordan, but he overlooked the city of Sodom, and its exceedingly wicked and sinful people. And the thing he overlooked was the biggest thing in the outlook! It was to prove his undoing." J. M. Jowett.

The Compensation, verses 14-18. "What lay behind Abraham's magnanimity? More than mere kindness to a younger man. More, too, than a mind superior to material values. He had been called of God for a great purpose, and that certainly was something greater than accumulation of wealth. There was an inward nobility to higher ends which made him treat the question of a better or worse grazing-ground as a mere [illegible] He was content to leave his destiny and the whole question of 'less' or 'more' in other hands.

"This is what was recognized by the gracious revelation made to him when his generosity had been accepted and without gratitude. Former promises become more precise and more definite. 'All the land which thou seest to thee will I give it and to thy seed for ever.' He is bidden to go 'through the land in the length of it and the breadth of it' in the proud consciousness of possession. If he had sacrificed a part of it to his kinsman, there will be no impoverishment. The renewed and extended promise increased more than territory. There was a specific assurance concerning a multitude of his descendants. They would be abundant so that the land would be fully possessed. 'Thy seed as the dust of the earth' beyond counting that is the assurance. God will be outdone in generosity by his servant. If Abraham gives generously, God gives tenfold more.

Rum Running Case

Nova Scotian Vessel Is Forfeited To United States Government

The Nova Scotian vessel, "Jessie E," which was seized off Amherst Light in January, 1931, has been forfeited to the United States Government with the consent of her owners, it was announced in New York.

United States Attorney George L. Medalie disclosed the action which, he said, was agreed to by counsel for the Liverpool Shipping Company, owners of the boat. The wines and liquors found aboard will be destroyed.

Seizure of the boat caused international complications because her skipper, William F. Chetti, was killed in the contraband chase. An inquiry, however, resulted in the ruling that the contraband acted within regulations.

Rotary In Ottawa

"Conditions are better in Canada because Canadians were not as easily misled as Americans by post-war conditions," declares Arthur Stringer, Canadian author. "There is a stability among Canadians that is probably due to the Scotch strain among them," he said.

Build Up Health With Spring Tonic

The fashion of taking a Spring tonic is based on sound medical grounds. Winter thins and thins and devitalized the blood stream so that it isn't carrying enough oxygen. That is the reason for the listless, languid, nasty tired-out condition so prevalent at this season.

What is needed is a tonic—one that will build new blood and restore the purity the blood stream, and there are able to carry the energizing oxygen that quickly revitalizes the whole system. Thousands have proven that Dr. Williams' Pink Pills are the ideal tonic for this purpose.

Mrs. A. Morritt of Welland says: "Again last Spring I became ill. I could not do any work. I was pale, weak and tired all the time. I took Dr. Williams' Pink Pills and they soon made me strong and happy again. Try them and experience for yourself the new strength and vigour they will bring you. At your druggist's in the new glass container 50c a box.

Community Program Competitions

Gratifying Results Attend Movement Sponsored By Canadian National Railways

The closing entry date for the Canadian National Railways Community Programs Competitions for 1935 has been set for April 30th, by Dr. W. J. Black, Montreal, director of the Department of Colonization and Agriculture for the railway.

In commenting on the results of the two previous contests, which were most gratifying, Dr. Black said an advancement quite substantial in character has been registered in the extent of the public interest being taken by many communities in their local schools, and the education, both primary and higher, of their young people. In agriculture a drive has been instituted for livestock improvement, unprofitable hogs raising has been disposed of, finer soil cultivation has been adopted, good seed has been procured, and in many cases radio in the hands of private interests, the witness declared.

Many Countries Will Exhibit

Saskatchewan Farmers Urged To Take Interest In Grain Show

Regina, Sask.—J. A. Mooney and H. B. Gass, of this city, addressed a meeting of the Board of Trade at Yorkton in an endeavor to stimulate interest and enthusiasm in the World's Grain Exhibition and Conference to be held in Regina in 1933.

Mr. Mooney told the gathering that more than 30 countries have already signified their intention of entering exhibits at the World's Grain Exhibition and that before long he expected the number would be at least fifty.

"We have one of the best growing grain areas here," Mr. Mooney said, "and it will be a shame if we do not put forth our best efforts to continue and encourage the farmers of the district to enter exhibits at the World's Grain Exhibition."

Mr. Gass outlined ways and means of stimulating interest and enthusiasm among the residents of the small towns and villages and the farmers. Previous to being guest of honor, he said that Saskatchewan should enter at least 10,000 exhibits in the World's Grain Exhibition.

For Peaceful Solution

Says Signs Of Co-Operation Between Capital and Labor

Vancouver, B.C.—"I look for the destruction of the capitalistic system through co-operation rather than revolution," declared Dr. R. D. Chown, former general superintendent of the Methodist Church in Canada, addressing the Vancouver Presbytery of the United Church here.

"I rejoice in the signs on every hand of co-operation between owners and operatives, the selling of company stock to employees and other like movements," he added.

Favors War Weapon Cut

Geneva, Switzerland — Foreign Minister Dino Grandi of Italy told the World Disarmament Conference Italy welcomed the United States proposal for abolition of tanks, heavy artillery and gas warfare. He added to the plan a proposal to abolish battleships, aeroplane carriers and bombing aeroplanes.

W. N. U. 1936

CHANGE URGED IN U. S. RADIO BROADCASTING

Ottawa, Ont. The outstanding educational associations of the United States have passed resolutions urging a drastic change in the system of radio broadcasting in that country the parliamentary committee on radio broadcasting was told by Dr. J. S. Morgan of Washington, D.C.

Dr Morgan has been for ten years editor of the Journal of the National Education Association, and represented the national committee on education by radio. The opinion was expressed in his brief that certain radio channels should be assigned to the educational authorities and that they should be owned and operated at the public expense without recourse to commercial advertising.

The federal radio commissioners of five members, appointed by act of congress in 1927, had proved a "most organizational" so far and had not made full use of its powers, the witness said. Evidence that the United States congress was alive to the unsatisfactory condition of radio in that country was seen in the fact that a commission similar to that studying the Canadian situation was now sitting in the United States by unanimous order of the United States senate.

The radio, congress had decided, must be conducted in the "public interest, convenience or necessity," but whenever commercial interests made a bid for radio channels or hours held by educational organizations, the latter always had their privileges unless they wished to enter into expensive litigation, Dr. Morgan said.

A powerful "propaganda" organization in the United States was operating a million dollars a year to influence congress to control radio in the hands of private interests, the witness declared.

Ulster Is Loyal

Northern Ireland To Remain True To the British Empire

Enniskillen, Northern Ireland.—Viscount Craigavon, Prime Minister of Northern Ireland, told a Unionist meeting that, whatever happened in the controversy between Great Britain and the Irish Free State, nothing would make his government or people abandon the flag which so long has flown over Ulster, the United Kingdom, and the rest of the Empire."

A resolution expressing unshakable loyalty to the King and a determination to stand, as in the past, with Great Britain and the empire was adopted by the meeting. (The Unionist party is the government party in Ulster.)

Benefit To Canada

Estimated $650,776,000 Brought In By Tourists Last Year

Ottawa, Ont.—Total expenditures of tourists in Canada during 1931 are estimated by the Dominion Bureau of Statistics at $650,776,000. This is a decrease of $39,000,000 from the estimated expenditures of $689,776,000 during 1930. Canada, via ocean ports, tourists spent $12,018,000; from the United States by motor car, $185,128,000, and from that country by rail, $50,839,000.

As against this, Canadians touring abroad spent $74,042,000 in other countries, a decrease of approximately $5,000,000 from the figure in 1930.

Diamond On Globe

Toronto, Ont.—To enable farmers to secure equipment necessary to extend their business operations and to aid in liquidation of their present indebtedness, a plan was announced by Massey-Harris Implement Company involving a 10 per cent. discount on all existing obligations to the company and on all new purchases of implements in the extent of payments prior to the end of next November.

Will Receive Degree

Lennoxville, Que.—Lord Bessborough will visit Bishop's University, Lennoxville, on the occasion of the annual convocation, which takes place on Thursday, June 16. The Governor-General will receive the degree of Doctor of Civil Law, Honoris Causa, which will be conferred by the Chancellor, F. E. Meredith.

Must Protect Bay Route

Many Misrepresentations Claimed In Regard To Churchill Outlet

Ottawa, Ont. The Hudson Bay route and the Port of Churchill are the butt of many misrepresentations in both English and Canadian newspapers, R. M. Hill (Cons., Selkirk), told the House of Commons. The member from Nelson charged that if the underwriters had their way they would make it impossible for business to flow over the Hudson Bay route.

Hudson Bay and Straits were now equipped with all necessary aids to navigation and ready for service. Parliament must see that nothing was done to jeopardize their future development.

With regard to the railway into Churchill he said shippers were ready to use it, but so far no schedule of freight rates had yet been published. He urged that the government direct the attention of the railway's management to this matter.

Naturalization Papers Needed

U.S.S. Workers At Winnipeg Required To Produce Citizenship Papers

Winnipeg, Manitoba. Foreign-born workers in the Canadian National Railways shops at Fort Rouge and Transcona are required to prove their citizenship. These naturalization papers were inspected by a committee headed by A. E. Moore, Dominion chairman of the Canadian Legion, who said the investigation is the result of a new basis for the proposed "lay-off" system with all employees who cannot prove their Canadian citizenship will be dismissed regardless of seniority.

Mr. Moore said the basis had been arranged at a conference he had a few days ago with Mr. Henry Thornton, president of Canadian National Railways, and R. J. Manion, Minister of Railways.

Sunday Cinemas In England

Bill To Legalize Sunday Picture Shows Passes Second Reading

London, Eng.—A bill which would legalize Sunday motion picture shows passed second reading in the House of Commons by a vote of 285 to 217 after prolonged debate.

The decision was left to a free vote of the House, the ruling cutting across all party lines. Sabbatarian elements have waged a campaign against the bill and many members received postcards naming such prospective as one that the Lord would strike them dead if they voted in favor of the measure.

Cinemas have been open on Sunday evenings in London and in several other cities for years without legal sanction. They could definitely have to close on Sundays after next October 1, however, unless the bill passed.

Distribute Flower Seeds

Canadian Horticultural Society To Donate Seeds To Saskatchewan

Ottawa, Ont.—Flower seeds, for distribution to farmers in northern Saskatchewan areas where the drouth of last year took toll of crops and flowers, will be sold in the east under the direction of the Canadian Horticultural Council. Women's institutes and horticultural societies in eastern Canada will be asked to make donations of seeds and these will be distributed by the Saskatchewan relief commission, in co-operation with the horticultural council.

F. C. Nunnick, chairman of the "Beautify Canada" campaign, announced distribution plans here.

PROMINENT VISITOR

Gilbert Carmichael, official of Scotland Yard, Criminal Police Department, is shown as he arrived on these shores. He denied rumors that he is in the United States to investigate the Lindbergh kidnapping and said he will make a study of traffic systems in various American cities.

Use More Foreign Wheat

Duty To Lighten Restrictions On Future Importations

Rome, Italy. Restrictions on the use of foreign wheat again were lightened by government decree.

Beginning April 24, millers of northern and central Italy will be allowed to use imported grain for 25 per cent. of their flour while millers of southern and insular Italy will be permitted to use 65 per cent.

The amount of foreign wheat which could be used in the making of flour formerly was 60 per cent. and 60 per cent. respectively, having been gradually raised from 35 per cent. in view of an insufficient production of domestic grain.

Ottawa, Ont. Growth in United purchases of Canadian wheat is looked forward to here as a result of the increase in the proportion of foreign wheat allowed in the making of flour in Italy. The lightening of restrictions follows the attempt of Premier Mussolini to encourage consumption of domestic wheat restrictions are imposed early in the crop season and gradually relaxed as the domestic supply diminishes.

Receipts Sent In Commerce

Member For Royal, N.B., Heads In His Resignation

Ottawa, Ont. George H. Jones, former Conservative Minister of Labor and former member of the New Brunswick legislature, has resigned his seat in the House of Commons for the constituency of Royal, N.B. The resignation with an accompanying letter by Mr. Jones was read in the House by Mr. Speaker Black.

The action was taken by Mr. Jones on learning that a contravention of the House of Commons act had occurred by reason of Jones Bros., Apohaqui, N.B., having supplied medical goods for needy Indians on orders of the Indian medical director. The firm is not operated by Mr. Jones personally. It is an incorporated firm, and had it been a corporate one, no technical encheopard would have revolutionized mixed farming. A plan of this type would encourage exports and stimulate the home market.

The farmers of Canada, proceeded Mr Rowe, for years have witnessed the coal and iron and steel industries prosper. He believed it was time to take similar action for mixed farming.

The biggest problem in Canada was the rehabilitation of the farmer, said J. L. Brown (Lib., Lisgar). The question now was whether farmers were to be responsible man living on farms, deriving satisfaction out of their work and enjoying reasonable social forms of education and entertainment, or whether they were to sink to the position of men engaged solely in grubbing out some kind of living from the soil.

Disband Hitler Army

German Government To Put An End To Political Activities

Berlin, Germany.—The German Government ordered Adolf Hitler to disband his army of 400,000 National Socialist shock troops and put an end to the terrorizing policies for which it held him and his legions responsible.

The sudden blow at the strongest single political organization in the nation came in the form of an emergency decree signed by President Paul von Hindenburg, soon as it was promulgated, police throughout the country proceeded to enforce it by invading the various Nazi headquarters and seizing materials of war and propaganda.

Business Advisers

Will Accompany United Kingdom Delegation To Imperial Conference

London, Eng. The suggestion that business advisers should accompany the United Kingdom's delegation to the Imperial Economic Conference at Ottawa, has been welcomed by most Dominion governments, J. H. Thomas, secretary for Dominion Affairs, announced in the House of Commons recently.

Mr. Thomas added he had invited industrial associations to recommend selected advisers.

Japan has ordered 400,000 military coats in Germany, for delivery next summer.

SEEK A LOWER RATE ON GRAIN TO MARITIMES

Ottawa, Ont.—Granting of a rate of 19.34 cents per 100 pounds on grain from the head of the lakes to Saint John, N.B., and Halifax, is urged in a memorial which is being sent to the Dominion Government. Conservative members and senators from the maritimes signed the document.

The memorial supports the appeal of the Halifax harbor commissioners and the transportation commission of the maritime boards of trade for a new cost differential for the maritime ports as compared with Quebec port. The appeal was heard before the cabinet shortly before parliament assembled for the session.

By a decision of the board of railway commissioners, the rate from the head of the lakes to Quebec export was fixed at 16.34 cents per 100 pounds. Maritime boilers asked that a one cent differential rate be put into effect under the Transcontinental Act.

The memorial supports the rule fixed by the railway commission in Quebec port. It further requests that the appeal for a 19.34 cent rate to maritime ports be not reduced by the railway commission. An early decision by the government is asked.

Aid For Farmers

Advances Borrowing System To Encourage Mixed Farming

Ottawa, Ont.—Bart Hay (Cons., Dufferin-Simcoe), debating the budget, pointed to mixed farming as the common salvation of Canada.

It might be necessary to borne certain products and he suggested two cents per pound for beef and five cents for cheese, and three cents a dozen for eggs This, he said, could be done without a heavy drain on the national exchequer and would revolutionize mixed farming. A plan of this type would encourage exports and stimulate the home market.

The farmers of Canada, proceeded Mr Rowe, for years have witnessed the coal and iron and steel industries prosper. He believed it was time to take similar action for mixed farming.

The biggest problem in Canada was the rehabilitation of the farmer, said J. L. Brown (Lib., Lisgar). The question now was whether farmers were to be responsible man living on farms, deriving satisfaction out of their work and enjoying reasonable social forms of education and entertainment, or whether they were to sink to the position of men engaged solely in grubbing out some kind of living from the soil.

THE HIKERS' MYSTERY EXPRESS

A unique stunt was put over by the British Railways during the Easter holidays by running "Mystery" specials for an unknown destination. So well were these mystery trains run that not even the train crew knew where they would stop until a moment before their departure. The above picture shows G. W. Medford Knight, K.C., and two other enthusiastic hikers trying to persuade the engineer to let them into the secret.

Outlook On Agriculture

(Extended Ability and Foresight Needed in Future Management)

"In the immediate future the financial ability and foresight of the farmer will prove more important than his technical skill," according to "The Farm Outlook," first of an annual series of brief reviews of prevailing conditions, combined with an outlook on agriculture, issued by the department of farm management of the University of Saskatchewan, and presented by Dr William Allen and Prof. E. C. Hope.

"Most Saskatchewan farmers are still unable to discount any other explanation as satisfactory as wheat production." the "Outlook" continues. "Had the continued depression of wheat prices has almost obliterated farm incomes. As things farmers must are extremely costly in terms of farm products, and as maturing obligations can be met only with unusually large quantities of agricultural commodities, expenditures must be most carefully scrutinized to secure the utmost use of funds."

The immediate physical conditions bearing on the 1932 Saskatchewan wheat crop are decidedly more favorable than a year ago, it is reported. Precipitation since last harvest has been better than average in the northern agricultural sections, and decidedly better than for last year in the southern districts, where adequate rains during the growing season are the prerequisites to an average crop.

The economic situation of the Saskatchewan wheat grower is possibly somewhat improved over a year ago, the report adds, but there is no tangible evidence at present to warrant an expectation of materially higher wheat prices in the near future, although improvement in general economic conditions, or adverse weather conditions, or unpredictable happenings, may help considerably in bringing wheat into line with the long-time price relationship with other commodities.

Advertising That Paid

(Orders Taken At British Industries Fair Run Into Millions)

Figures have not been made public as to the aggregate value of the orders placed with the exhibitors at the British Industries Fair, which was held in two sections—one in London and the other in Birmingham—but it was enormous. For example the textile section of the London Fair booked £25,000 worth of orders, and so the Birmingham section was closer to the Lancashire area. It is probable that the orders there were vastly greater.

At anyrate will concern in Lancashire state that orders received will be sufficient to keep their plant working full blast for from six months to one year. One firm gave orders for its workpeople enlargement of its manufacturing capacity.

The British Industries Fair was simply an advertising method. Advertising always pays.—Sir. Thomas Vivian-Journal.

Will Meet in Montreal

Montreal was selected as the convention city of the American College of Physicians as the college concluded its sixteenth annual session at San Francisco. Dr. Jonathan C. Meakins, professor of medicine at McGill University, extended the invitation from the Canadian city.

Bumper Rainy Harvest

(Increase Trade Over Same Date Last Month)

The ravages of "Arctic distinction" among the sled-dogs of the Northern Canadian wilds have been particularly severe of late, according to the annual report of the Royal Canadian Mounted Police. As a result, the Eskimos have had to resort to unusual methods to replace lost "dog-power." The most unique is reported from Wager Inlet, in the Chesterfield area, where one native family invariably harnesses two deer calfs hornmend to their household.

"They had hitched the mother team when the calfs were very little," reports Constable McCormack of the Chesterfield detachment, "and by patient training taught them to get used to harness, and not to make trouble with the dogs. And likewise their dogs had to be taught to get used to them."

This, in my estimation, was a treacherous undertaking," says the constable, "although they were quite successful in the training, the bear is too treacherous an animal to keep up with the dogs, and they play with them."

The Eskimos would not leave the bears outside at night, but would take them into the igloo occupied by their natives, where they slept side by side at night.

"There were three little kiddies in this family, and the bears seemed to take great delight in playing with them on the floor of the igloo, and in the parents paid no attention whatever."

Designing Of Type

(Training Lectures For Print In An Art Form)

Very few people are aware of the fact that the type they read in their newspapers, magazines and books of advertising has been designed by someone; that there is an art which has to do solely with the designing of type faces.

Reading has become so commonplace that most adult readers have forgotten that there are letters of the alphabet, and they no doubt do not intrude themselves due to some peculiarity letters do not impress the reader's consciousness. The art of type designer paradoxically aims at impressing the reader by using legibility. He is concerned solely striving to create letters that are more legible and which make the printed page more beautiful.

One of the world's foremost members of this craft, Frederick W. Goudy, has spent 34 years designing 73 type faces. Although he has designed his name all who read may see specimens of his handiwork daily, often not aware of the fact.

"The main purpose of making letters is the practical one of making books legible. However, it also have as well a decided decorative quality, quite apart from any ornamental treatment of the separate characters. Letters need only to be simple, well-shaped and well proportioned. Beauty is not to be sought at the expense of practicality."

How different from most of the other arts is the art of type design.

Other Means Success

(Ability To Speak In Public Is Great Asset)

There is many a man of today who would give much of his wealth, were he able to speak before an audience and compel himself creditably. To young men starting out in life it is of importance that they should be encouraged to be able to stand before a body of men, even though it consists of only a few, and speak to matters of the moment in which he is employed, and to express his ideas simply, concisely, and convincingly. Many a man of more than ordinary ability has failed to attain to his full measure of success through inability to get his thoughts together and create a strong and favorable impression in any important business transaction.

The schools of today are training the boys—and also the girls—to do this very thing, and it is one of the evidences of progress in the system of education.

Germany will celebrate this year the 500th anniversary of Luther's birth.

There is only one motor vehicle to every 1,000 people in Jugo-Slavia.

Gardening Notes

(VALUABLE SUGGESTIONS ABOUT PLANTING THE VEGETABLE AND FLOWER GARDEN)

In some parts of the country the first plantings can now be made. In the vegetable garden it is advisable to run the rows North and South so that there will be an even distribution of light. In the case of small vegetables such as carrots, lettuce and spinach, rows twelve inches apart will do, and about eighteen inches for beans and peas. Sow later crops between early ones, and the vine like melons and cucumbers.

It is good economy to alternate rows of early and late vegetables. Spinach and lettuce are planted between beans, carrots, corn and the tall growing crops, which do not require full room until they have passed are out of the way. The early vegetables such as spinach and lettuce, as well as the radish and the early peas, go in first. These are followed by the second planting of the first named and also the first set of the beans, carrots, the main planting of peas and, possibly, some beans and corn, tan days to a fortnight later. An application of some quickly available fertilizer, a small handful to about every fifteen feet of row at the time of planting, is advisable. This is best applied dissolved in a gallon of water, and in any case commercial fertilizer should not be allowed to come into close contact with the seed but should be placed in beds or two below or to one side of it. Among the plants those which need thinning are sown thinly at first, and then the proper time to get in Sweet Peas. Indeed, to be satisfactory, these plants must be sown early and they do best in deep, open soil containing plenty of rotted vegetable material into which they may drive their roots deeply in order to remain cool during the warm weather.

A BED HELP

Gardeners will find the current seed catalogues indispensable in their operations. They will find more than a mere seed sheet and will be found useful not only in planning and ordering the seeds, but in much so in planning general care, and in the harvest of the vegetables. The height of the flowers, time of blooming, whether they be annuals or perennials, special purposes as edging, screening, cutting and fragrance are all mentioned and will make the printed page more beautiful.

One of the world's foremost members of this craft, Frederick W. Goudy, has spent 34 years designing 73 type faces. Although his name is not known to all who read may see specimens of his handiwork daily, often not aware of the fact.

"The main purpose of making letters is the practical one of making books legible. However, it also have as well a decided decorative quality, quite apart from any ornamental treatment of the separate characters. Letters need only to be simple, well-shaped and well proportioned. Beauty is not to be sought at the expense of practicality."

How different from most of the other arts is the art of type design.

Oriental Methods Seem Odd

(Practically Everything is Done Opposite To Occidental Way)

Japanese folk do many things in "contrary" ways. For instance, during the day the Japanese housewife opens wide the sliding walls of wood and paper which form her house, but at night they are enclosed by solid board shutters, and people sleep virtually without ventilation.

At the door of a theatre or a restaurant the Japanese hand the attendant their shoes instead of their hats. At a dinner the events, if they come at all, are served early in the usual instead of toward the end. Acting in the theatre is modelled not on life, but on the movements of dolls in marionette shows, and in the classic "No" drama the possibility of showing emotion by facial expression is eliminated by the use of carved wooden masks.

And, where the people have not been "civilized" out of their natural courtesy, a chauffeur will refuse to pass another on the road—from motives of politeness. To us the Japanese method of beckoning would signify "go away." Boats are beached stern foremost, horses are backed into their stalls, sawing and planing are done with a pulling motion, keys are turned in their locks in a reverse direction from that which is customary with us.

The list of things that the Japanese do "backwards" might be continued indefinitely, but is conveniently ended with the singular way in which they reckon the ages of their children. In Canada a child born on the 31st of December is one day old next morning. In Japan he would be two years old! For they reckon that a child is one year old on the day he is born, and two years old on the following New Year's Day.

New York's Prima Do Luxe

(Used Two Millions and Is Last Word In Comfort)

During the winter there have been men who have appeared in the police courts and expressed a wish to go to jail, because where they were sure to get food. What a crowd there would have been all over the provinces if the idea could have been similar to one just opened in New York. Recently the city was inaugurated in right good style with brass bands, sandwiches and tea, at for the prison itself. It was a real example as to how to—or how not to—treat prisoners. There were complaints from the prisoners as to the views of the city. The prisons chapel had a revolving altar with different compartments fitted for the use of different faiths. There were washing-machine laundries, radios in every room, cells with hot and cold water, and mirrors made of steel. And it cost about $2,000,000.

That cannot be called a "prison," it is not in the nature of a palace de justice. There will, of course, be some people who will consider this the right thing for the poor fellows with an inferiority complex and the gentle lambs who "cannot help it" because they are "habitual criminals." Indeed, with such a "home" as that who would not be a criminal?"—Regina Daily Star.

Stolen Kids In Gas

Bert Greer, postlad Calgary golfer, started the hole in one race recently by sinking the ball on the 145-yard No. 4 hole at the Regal golf club with a mashie shot. It was the first hole in one of the season in the province, and Greer's second since he started golf. His first was scored in 1926 on the same course.

ST. CHARLES MILK

THE HOUSE OF DREAMS-COME-TRUE

BY

MARGARET PEDLER

Author Of

"The Splendid Folly" "The Hermit Of Far End"

Hodder & Stoughton, Ltd., London.

CHAPTER XVIII Continued

For a moment they faced each other, his eyes, stormy as her own, dark with anger. His hands clenched themselves.

"If I could," he said hoarsely, "I would 'make' it my business."

He wheeled round and left the room without another word. Jean stood staring dazedly at the blank panels of the door which had closed behind him. She wanted to laugh . . . or to cry. To laugh, because with every sullen word he revealed the thing he was so assiduously intent on keeping from her. To cry, because he had taken her pretended indifference at its face value, and so another film of misunderstanding had risen to thicken the veil between them—the veil which he would not, and she, being a woman, could not, draw aside.

CHAPTER XIX

The Dispute

Probably masculine obtuseness and the feminine faculty for dissimulation are together responsible for more than half the broken hearts with which the highways of life are littered.

The Recalcitrant Parent, the Other Woman be she never so guileful or the Other Man, as the case may be, are none of them so potent a menace to the ultimate happy issue of events as the mountain of small misunderstandings which a man and a maid in love are capable of piling up for themselves.

The man is prone to see only that which lies directly before his nose—and no self-respecting feminine thing is going to unveil the mysteries of her heart until she is very definitely assured that that is precisely what the man in the case is asking for her to do.

So she dissimulates with all the skill which Nature and a few odd thousand years or so of tradition have taught her—and pretends that the Only Man in the World means rather less to her than her second-best shoe buckles. With the result that he probably goes silently and sadly away, convinced that he hasn't an outside chance while she is there to sit simply quivering to pour out at his feet the whole treasure of her love.

In this respect Hinine and Jean blundered as egregiously as any other love-hobgoggled pair.

Following upon their quarrel over the matter of Jean's attitude towards Geoffrey Burke, Tormarin retreated once again into those fastnesses of aloof reserve which seemed to deny the whole existence of that "magic moment" at Montavan. And Jean, because she was unhappy, flirted outrageously with the origin of the quarrel, finding a certain reckless enjoyment in the flavour of excitement lent to the preconcerted fact that Burke was in deadly earnest.

Playing with an "unexploded bomb" at least ruffled to take her thoughts off other matters, and enabled her momentarily to forget everything for which forgetting seemed the only possible and temporary prescription.

But you can't forget things by yourself. Solitude is memory's closest friend. So, heedless of consequences, encouraged Burke to help her.

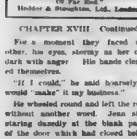
Lady Anne sometimes sighed a little, as she watched the two go off together for a long morning on the river, or down to the tennis-court, accompanied, usually, by Claire Latimer and Nick to make up the set. But she held her peace. She was no believer in direct outside interference as a means towards the unravelment of a love tangle, and all that it was possible to do, indirectly, she had attempted when she revealed to Jean the history of Blaise's marriage.

She did, however, make a proposal that might have the effect of breaking through the present trend of affairs and of throwing Blaise and Jean more or less continuously into each other's company. She was worldly wise enough to give its due value to the power of propinquity, and her innocently proffered suggestion that she and her two sons and Jean should all run up to London for a week, before the season closed, was based on the knowledge of how much can be accomplished by the skilful handling of such a "parcel."

The suggestion was variously received. By Blaise, indifferently; by Jean, with her natural desire to know more of the great city she has glimpsed en route augmented by the knowledge that a constant round of sight-seeing and entertainment would be a further aid towards the process of forgetting; by Nick, the son of whose eldest rose and lass at Charnwood, with open rebellion.

"Why go to be baked in London, mudeens, when we might remain here in the comparative coolth of the country?" he murmured plaintively to his mother.

They were alone at the moment, and Lady Anne regarded him with brimming eyes.



"I've just thrown out all my dust cloths

—because I've found how to do the work better, easier and quicker.

"I use Applebord Wonder Paper now. You buy it in a neat package that carries many handily in a table drawer. Twenty-five large sheets for a quarter. Then you turn to your dusting. You cut a sheet into a pad and go over whatever needs attention.

"I've never seen anything like Wonder Paper. It really cleans, shines and polishes at the same time. It takes up dirt like magic, and so easily. And you can use both sides.

"When I used to handle sheet dusting was the hardest possible job. Raising chaos. I always used cloth and each of old sheets and the like—and it seemed to me I was actually spreading germs. It worried me just to throw them into a box or cupboard. They covered a mountain.

"The beauty of Wonder Paper is that you throw it away when you've through with it.

"I can promise that you'll like Wonder Paper. It gives you time for things very much more attractive than dusting."

Special Offer

WONDER PAPER is made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have Applebord Wonder Paper in stock. If your town's, send in the coupon below and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus for your trouble.

Applebord Paper Products, Ltd., Montreal, Canada.

Enclosed find 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Leftovers".

MINARD'S LINIMENT

"Frankly, Nick, he sees I want Jean for my daughter-in-law. No other reason in the world. Personally, as you know, I simply detest town during the season."

He laughed and kissed her.

"What a Machiavelli in petticoats! I'd never have believed it of you, mamma. S'elp me, I wouldn't!"

"Well, you may. And you've got to back me up, Nick. No philandering with Jean mind! You'll leave her severely alone and content yourself with the company of your aged parent."

"Aged Sedletzki!" he jeered. "If it weren't for that white hair of yours, I'd bet you round on my youngest sister. And I don't believe"—severely "that it is white, really. I believe your maid powders it for you every morning. Just because you were born in sin and know that it's becoming."

So it was settled that the first week of July should witness a general exodus from Staple, and incidentally the ice-queen be carried away, and Tormarin sedulously occupied himself in adding fresh stones to the wall which he thought fit to interpose between himself and the woman he loved. While Jean grew restless and afraid, and hung herself into every kind of amusement that offered, wearing a little fine under the combined mental and physical strain.

Claire, perceiving the nervous tension at which the girl was living, was wistfully troubled on her friend's behalf, and confided her anxious bewilderment to Nick.

"I think Blaise must be crazy," she declared one day, "or abnormally convinced that he's in love with Jean, and yet he appears prepared to stand by while Geoffrey Burke compliments and flirts with her."

Nick nodded.

"Yes. I own I can't understand the

follow. He'll wake up one day to find that she's Burke's wife."

"Oh, I hope not!" cried Claire hastily.
